Lady Rams dealt a knock-out punch

By Ryan Foley

BOSTON - From the keen observer's point of view Suffolk's 55-38 defeat at the deliverance of Framingham State was not determined when the final buzzer sounded

Nor was this contest determined when with over half a dozen minutes left in regulation, the Lady Rams were staring at a 15-point short-

For this game had been already decided by one specific series-one particular play-therefore making the contest's final 14 minutes serve as an epilogue.

With the Ram Dome's scoreboard showing that 14:07 still remained in the game, guard Paula Noto was underneath as her lavup fell true, thus setting the bilities for a three-point brawny play underneath by Make her free-throw, Noto would shave Framingham's lead to seven.

Yet, much to the dispiritment of her teammates and the crowd. Noto never even attempted a shot, never mind made one. A traveling violation would nullify the foul, the basket-and Suffolk for that matter-and so this bestial civil war of Ram vs. Ram (Framingham's nick-

name as well) was to be resolved early. Using the play as inspiration. Framingham reeled off eight consecutive points stretching their lead to eighmaterialized teen. Meanwhile at the other end, their defense was stifling, prohibiting Suffolk from scoring for the next six

nabbing two of her team-high 17 points, but for all purposes of intention, the teeth had been taken from Suffolk's hite That traveling call had proved to be this game's deciding point

"No one works harder than them," said Coach Ed Levden on his team's diligence. "Even in a situation like this (being down by 17 points, 45-28) they never The contest commenced

somewhat positively. Suffolk leaped to a quick 10-8 lead, boosted by four points from McBride and the strong rebounding of Noto. But Framingham was to show they were just as fleet, and Suffolk's lead was swiftly vaporized under a 10-0 run

Framingham's quick three-point shooting was bruising the Lady Rams' transition defense, and it was the Michelle Kelly and Jennife Verlicco that kept Suffolk close at half-time, 29-21.

"A lot of people may verlook them (Verlicco and Kelly) because do not score a lot of points," commented Coach Ed Leyden, "but they do hold players to well below

their scoring average."

Opportunities to rally did sent themselves in the second half in the form of numerous Framingham turnovers, but Suffolk had difficulty penetrating their opponents adamant defense and no lengthy offensive run

That ref's whistle voiding Noto's fieldgoal and foul undoubtedly dealt the Lady Rams the knock-out blow for they never got closer than McBride would finally 15 points for the rest of the

Suffolk raises tuition

The university announced a 6.76% increase in undergraduate tuition on Feb 9, touting it as "the lowest percentage increase for the Colleges since 1975-76."

A memorandum released from President Sargent's office reveals that full-time undergraduate tuition will increase to \$11,300 per academic year, an increase of \$716.

Full-time graduate mition will jump anywhere from 4.9% to 9.47% Full-time participants in the Masters of Public Administration program will be snared increases in mition for 1005-06

Although Sargent defended the increase as "proportionally, not as great" as it is in other private institutions, the figure of \$11,300 represents an increase of approximately 50% from a 1000-01 level of \$7 000

Sargent attributed the increase to several factors, including an effort to upgrade university computer systems, accomodate additional faculty. as well as provide cost of living increases to existing faculty and staff. The recent postal increase was also said to be a concern

Maureen Dooley, budget direc-

48% chunk of the increase will go toward faculty salary. She explained

The next largest portion of the increase, 17.5%, will help to supplement fringe benefits for faculty and staff Fellowshins constitute 14 1% maintenance will receive 3.6%, while other miscellaneous expenses, such as computers, stationary and furniture shoots 16.1% of the increase

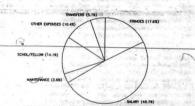

In addition to insisting that Suffolk remains a "anality education at a reasonable price," Sargent painted a grim picture of the university without tuition increases. Sargent said that without periodic tuition increases there would be an "incredible adverse impact" on the university. He emphasized that a lack of increases would be "very disasterous for operations," operations that he depicted os "hore hones"

Surgent also used tuition amount from other private colleges and universities in order to emphasize the affordablity of Suffolk He pointed to amounts ranking Suffolk University 45th among 64 local private col-

Pre-Paid Phone Card Use **Growing on Campuses**

College Press Service

When Arizona State University shman Dan Gibson gazed at his irst dorm phone bill, he says, "I felt bad, very bad." During one month alone, the bill totalled \$100 for longdistance calls made to friends at other campuses. The bill's arrival put an immediate damper on his tendency to call buddies around the clock to

Gibson rallied quickly, however, when he discovered a new item being hawked on campuses — the pre-paid phone card. Sold in increments of \$5, \$10, \$20 and more, the disposable cards operate on a flat per-minute rate no matter what time of day you call. In most cases, there are no added costs for prime-time calling, toll calls, busy signals or unanswered calls. The cards are "activated" after purchase by dialing 800, a personal ID number and the phone number.

Gibson says he's now a regula ser, buying the cards in \$10 and \$20 increments as a way to help control his phone call budget.

"The pre-paid cards I buy cost bout 12.5 cents a minute and are a much better deal than the 20 to 30 cents a minute charged by AT&T. which runs the phone service at my dorm " he says "Now I hav a card when I want to make a call and limi the call to my purchased time. I jus warn my friends not to take it person. ally when we get cut off, which hanpens when you talk past your limit."

In other countries, pre-paid phone chatting since the mid-1980s, when

they were first introduced in Europe and Japan. The debit cards have be come available in the U.S. only in the past two years. Research already shows that almost half of pre-paid phone card purchasers in this nation are between ages 18 to 24. To date more than 300 different companies are vying for collegiate business knowing that college students are big users of pay phones. Those with phone credit or calling cards frequently max out their limit, and parents are reluctant to provide them with personal telephone credit cards

"Pre-paid phone cards are ven popular back home in Singapore. says Southern Illinois University se nior Saniay Seth. "The cards come decorated with different designs that users collect like trading cards Some cerds carryopictures of popular tour ists snots like the mer-lion stance

Wayne State University postgraduate student Christine Clay also got turned on to pre-phone cards while traveling abroad. While the cards are newly available on her campus and aren't popular yet, she says this is only because U.S. students don't know what they are. Clay is taking additional studies at Wayne State University in Wayne, Neb., after spending two years as a Peace Corps volunteer in Ghana

"The country sold its own prenaid card called the Ghana Card. she says. "Using it was neat, You didn't have to scrape up money and then insert all the coins into the com box. I'd buy \$5 eards and use them a ards have been popular ways of lot to call my mother. I was surprised to see the cards in this country.

Indeed, international students who have used the cards back home buy the cards regularly on campus says Michael Shupp, general merchandise manager at Iowa State University in Ames. "I started selling the cards two years ago, and sales are increasing," he says. "I expect the market to really take off."

Jim Skiersch, director of the book store at Southern Illinois University. says there's a big difference among the various companies selling prepaid phone cards. "Stores have to know how competitive the market and make sure they offer cards with

should have found out when they started the process, and we should have made our presentation at the first meeting."

As a result, there was a conscious decision by Christenson and others within SGA to learn from last year's mistakes. "We got out there and we said 'We want involvement in this process,' and they gave it to us because we did the research and we were prepared," said Christenson.

Life Almost Back to Normal for "Pentium" Professor

By Marco Buscaelia

College Press Service LYNCHBURG. Va. — Life is starting to get back to normal for Tom Nicely, who had almost gotten used to seeing the daily comments about his discovery in the newspaper and

And while you may not recognize Nicely's name, you've probably heard of his discovery: that the Pentium computer chip was flawed.

After rocking one of the nation's largest companies, as well as its millions of customers across the globe, by flagging the flaw, Nicely is ready to put the past behind him and get on with his quiet life as a math professor at Lynchburg College.

"It's funny. I was simply doing research," says Nicely, adding that the constant phone calls from repor ers have finally slowed. "A math professor usually has to shoot someone to get this much media attention.

Nicely became somewhat of a folk hero at the private liberal arts college, which is located approximately 180 miles southwest of Washington and has about 2,300 students. "I would have people calling me congratulating me," he says. "I really appreciated it, but I just don't know how much I deserved it."

Nicely insists he was just doing his job when he realized that the Pentium chip had a flaw. Last June, the 51-year-old professor was conducting a project on prime numbers. As part of his research. Nicely set up five computers one night to perform routine - at least routine for a math professor-arithmetic problems like dividing 824,633,702,411 into 1.

When Nicely came to work the next morning, four computers had the right answer for the problem: 1.212659629408666956.

Winter and frigid temperatures hit Beacon Hill.

"At first I didn't think it was the computer that made the error," says Nicely, "I just figured there was something wrong with the equation."

So he worked on the problem off and on for four months, checking it on computers that used the Pentium chip and those that did not. He used computers of other Lynchburg professors, friends, even the local electronics store. Each time, he came up with the same results. By then, he figured that it had to be the chip.

Nicely called Intel to inform company officials of the problem. At first, his concerns fell upon deaf ears. Then, a few weeks later, Nicely de-Internet, asking other Pentium users if their computers produced the wrong answer as well.

The next morning, he received a

call back from Intel.

After weeks of denying the problem, Intel officials spent the next 4,000 possible numeric answers. month acknowledging that the chip was flawed but refused to replace it. Finally, after the Pentium chip controversy seemed to take on a life of its own, Intel offered to replace the chip free-of-charge for the more than 2 million affected computer owners.

Although Nicely agrees with the Intel officials who say the flaw would never have any impact on the large majority of computer users, he says that it could be "extremely damaging" to researchers.

The Pentium chin's flaw is based on five missing numbers on a divicided to send out a message on the sign lookup table of 4,000. Dead Concert Inspires College Filmmaker

College Press Service

EVANSTON, Ill. - Pete Shapiro was walking to his car after watching the Grateful Dead in March 1993 when he was hit with a large dose of

There were was this big drum circle around this bonfire. It's snowing out, and these guys are all playing the drums, dancing and just enjoying it," he says. "When I saw them, I saw myself. Here were people of all different backgrounds getting together to do something they loved It really got to me."

Having been to many of the San Francisco band's concerts, Shapiro was aware that Dead shows were more than a live performance by a band. Still, the image in front of him had an effect on him, and he decided that he needed to act on that inspira-

Two years later. Shapiro is preparing the final version of "And Miles to Go Before I Sleep," his documentary film on the Grateful Dead counterculture, and shopping around for

With the image of the drum circle still burning in his mind. Shapiro. then a sophomore at Northwestern University, began researching documentaries on the Grateful Dead. When he didn't find any that gave a true sense of the life of a Deadhead. he decided to make his own.

Shapiro quickly recruited Phil Bruell, a friend of his who was a film major, and the two decided that they would be the ones to present the great American Dead experience to

"People who have never been to Dead show have their own stereotypes of what it's like," says Shapiro. wanted Deadheads to tell their own stories about what they were

So that summer, Shapiro and Bruell hit the road. Living in a van, the two NU students went to six cities in three weeks, covering 12 concerts in all. But Shapiro wasn't interested with what happened inside the various stadiums and arenas. Instead, he roamed the parking lots, looking for Deadheads and others to share their

Shapiro's film provides some interesting insight into Dead fans, whom many believe thrive on being on society's fringes. The film, however, illustrates that Grateful Dead

WSFR'S TOP TEN

fans aren't as concerned with being tary that will be released to celebrate outside of society as they are with the Grateful Dead's 30th anniverbeing part of their own tie-died com-

The fundamental thing about the Dead scene is that it consists most entirely of kids from the 'burbs who have never seen any community before," says John Barlow, the Grateful Dead's lyricist in the film "When that come in contact with a

Sunshine, a Deadhead from Perry, N.Y., keeps popping up in "And Miles to Go" at concert locations in Buffalo, N.Y., Louisville, Ky., and Chicago. "All these people are me and I am them " he says "We're all about peace and love and lovin' everybody

Shapiro says that because of his amateur filmmaking status, he was able to get historical perspective on the Grateful Dead from some authentic spokesmen of the 1960s, in-cluding Timothy Leary, Ken Kesey and Wavy Gravy.

Kesey, author of "One Flew Over the Cuckoo's Nest" and originator of the Electric Kool-Aid Acid Tests. rarely gives interviews. He agreed to speak with Shapiro, though, after he learned of the subject of the NU student's film

"When that little split-second thing happens when the Dead are playing and everybody in the audience goes 'Wow, did you see that?'"
Kesey said white being interviewed on his farm in Oregon. "That's why kids will sit through five hours of mediocre music to have that one thing happen because it puts them in

With the help of Lenny Kravitz Shapiro was able to sneak backstage at the MTV music awards, getting interviews with Chris Barron of the Spin Doctors and Ice-T

Although interviews with Deadads take center role in the film Shapiro also spoke with a number of people who provided the usual opinions that most people associate with Deadheads, including a television reporter, the Louisville police chief

and stadium security guards.
"Just like we have police officers
who look at (Deadheads) and say, 'I hate the way that son-of-a-bitch looks,' there are some people who say 'I hate this pig because of what he stands for," says an undercove Louisville police officer looking for unlicensed vendors, "It's all the

Once in a lifetime opportunity

Suffolk students now have a rare opportunity to experience one of the geniuses of our time right here on

David Marnet's new play, The Cryptogram, produced by the American Repertory Theatre, is currently having its American premiere right at Suffolk's C. Walsh Theatre. Mamet, Pulitzer Prize winner and author of other acclaimed plays Glengarry Glen Ross and Sexual Perversity in Chicago, also directs the production, part of the ART's New Stages series.

The Cryptogram, starring St. Elsewhere's Ed Begley, Jr., is an intense play about the codes we all develop when talking to each other, and the roundabout way we have of expressing ourselves, especially to those we

Every student should avail themselves of this rare opportunity. Not only will it allow students to view a professional theatrical production for peanuts (tickets for Suffolk students are available at half-price, and for the truly frugal, students can usher and see the production for free) but it also presents an opportunity for Suffolk to be regarded nationally. The New York Times has been to the C. Walsh Theatre to see The Cryptogram, and gave the production a rave review

Boston has long been regarded as a major contendor in the theatrical world. Many plays have had initial runs here before going on to Broadway and theatre history.

For many, the stage has an intimidating aspect. Perhaps it is because of the expense, rarely can a live performance equal the low cost of going to the movies or staying home and watching television. However, neither of these mediums can match the live theatre for immediacy and drama

To those students who haven't seen The Cryptogram, it is recommended that they try to see it at least once, although with a playwright as complex as David Mamet tends to be, one viewing is rarely enough to discover all that there is to say.

This is a rare opportunity, one that is generally only available to larger schools, such as Harvard and Yale, that emphasize theatre for all students, regardless of major or career track. It is an opportunity that all Suffolk students should sieze.

Tricia Gervasi

NEW BRUNSWICK, N.J. - Students are calling for the resignation of Rutgers University's president after he gave a speech in which he said African Americans lack the "genetic hereditary code" to score well on mandardized tests.

After hearing the words of Rutgers University President Francis wrence, minority students staged silent protest march on the New Brunswick campus. Rutgers studen government organizations, African American student organizations and the local chapter of the National Asociation for the Advancement of Colored People (NAACP) have called for Lawrence's immediate res-

Lawrence however says he fidn't mean what he said. "It is an bsolute contradiction of everything I believe, of everything I stand for, and of everything that I have done throughout my life," Lawrence said he day after the speech went public. "I regret it. I do regret it. I certainly regret those comments."

In November, Lawrence spoke to about 30 faculty members on various academic matters. During his three-hour speech, Lawrence said: The average SAT for African Americans is 750. Do we set standards in the future so that we don't admit anybody with the national test? Or do we deal with a disadvantaged population that doesn't have that genetic hereditary background to have a higher advantage?"

Lawrence's statement didn't receive much attention until late January, when officials for the American Association of University Professors, thich represents the university's 2,000 instructors, played a tape of the speech to hear Lawrence's opin-

ons on faculty tenure. In 1994, Caucasian high school students averaged 938 on the SAT, of aspersion about genetic inf while African Americans averaged has no place in our society."

750. Averages for the ACT were similar: 21.4 for white students, 17.0 for black students.

Critics of standardized tests say that the difference in score averages can be attributed to poverty levels, communities, schools and the indi-vidual curriculum of each student.

"The SAT is designed to measure

skills, not intelligence," said Jan Gams, a spokesperson for the Col-lege Board, which administers the SAT. "Students' skills are usually determined by the preparation they've been given."

Lawrence later said that he w trying to say that "standardized tests should not be used to exclude disadvantaged students on the trumped up grounds that such tests measure inherent ability, because I believe they do not"

But for some minority student in was too late for explanations.

"People say things like this and then later on they say they didn't mean it," said Cassandra Novel, a junior at Rutgers, where nearly 10 percent of university's 47,000 students are African American, "You would think the president of the university would be someone smart enough to watch what he says. But what if he's just saying what he thinks? That's the scary part."

The NAACP's demand for Lawrence's resignation stated: "The African American community has grown tired of being insulted and assaulted viven halfhearted anologies and then expected to act as if all is forgiven. Forgiveness is no longer an option. Justice is."

New Jersey Gov. Christine Whitman was puzzled by Lawrence' remarks as well.

"I know people make stupid statements, Lord knows I have myself," she told reporters after hearing about the incident "These remark are so troubling, though. That kind of aspersion about genetic inferiorit

Rutgers University President Under Fire Love Online: Students, Others, Surf the Net in Search of Love

By Marco Buscaglia College Press Service

Lonely? No Valentine? Well, don't just sit there. Fire up

at computer. With 30 million people from nore than 60 nations in cyberspace, online dating is becoming more popular. In fact, more and more compute users are finding ways to hook up electronically with their objects of

"Online romances are really hot right now," says David Fox, author of Love Bytes: The Online Dating Handbook "People are meeting the same way online as they do in their regular lives. It starts out with conversation, and it takes off from there "

Fox says that online encounters offer interested parties a chance to meet and converse with each other without any nervousness or worries about appearance. "The pressure is nowhere near as great as it would be in a place like a bar, where everyone is watching your every move," he says. "There's a freedom that's not usually found in most places."

Rob Modesto, a junior at the University of Kentucky, admits that college has given him more opportunities to date than ever. "When you're in high school, you meet girls you go to school with, but it's only like 200 or so," he says. "Here, there are thousands of women. You go out at night or on the weekends, and you see different girls every time."

Despite the opportunities, Modesto says he didn't meet the last three girls he's dated at any bars in Lexington. Instead, he met them on off to their own private location and America Online's Romance Connec-

"Every night, I'm on my comter either doing work or checking out what's out there." he says. "Since this is a pretty big school, you can magine there are a lot of other people who do that, too."

That's how Modesto hooked up with three girls, one from his own university, one from the University of Louisville and the third from Jacksonville, Fla.

"You just start getting into these inversations with people when you-alize, hey, why don't we just go get mething to eat and talk about this m person?" Modesto says. "That's what happened with this girl from hool. It was pretty spontaneous."

But when your online friend lives nore than 10 minutes away, the rules have to be changed. "This girl from Florida seemed really nice." Modesto says. "We talked on the phone a lot, so finally I decided to make the trip down there over spring break to meet-her in person."

Unfortunately, that trip didn't ignoring that, she was just a different person than she was online. I they have to go back to their real wouldn't even want to be friends life."

with someone like that." But not all online romances end

Steve Casey says he dated quite frequently after he and his first wife divorced. He began communicating with other single parents on a Prodigy bulletin board and eventually met Lisa, a single parent from Augusta.

After the two switched over to Delphi, a different online service. Casey and Lisa ended up helping other single parents learn the new coding that was necessary to maneuver on the network

It was at that point that Casey realized he was interested in more than Lisa's teaching techniques After finding out the feelings were mutual, the two decided to meet.

Casey was living in Indianapolis at the time, so the couple decided to pick a halfway point - Jellico, Tenn. and met there soon after.

"The town was beautiful, the weather was beautiful, and Lisa was beautiful," says Casey. "We hit it off right away and ended up getting engaged within a year."

They are now married and living with their children in the town where they first met

Fox says that with real-time video. digital photographs and improved audio, Internet users will be able to find out all about their computer mates before they ever meet.

Of course, not all computer match-ups are played out in real life. Some Net users hook up with

another person in a chat room, sneak then have a digital sexual encounter all via their keyboard, "Some of the things get pretty intense," says Fox.

"It's rewriting sex in the '90s." But for those who are still interested in the real thing, there are plenty

"There are so many opportunities online because you can practically find any type of person you desire," says Fox. "If you're inter-ested in a one-night stand, you can find a bulletin board that will give you exactly what you want, whether

who is into sadomasochism."

Online subscribers and Internet surfers know that singles who post messages on bulletin boards often host an occasional F2F, or face-toface, so that those people who com-municate with each other every night can finally have a chance to meet in

Fox says to beware, though, be cause someone's computer persons may be different than their image in

"This 'Leatherboy' guy you talk work out as well as Modesto had, to every night shows up, and he's hoped, "It was pretty obvious that wearing a suit and a bow tie." Fox she wasn't straight with me when she says. "A lot of times people use their described herself," he says. "But even computers to act out their fantasies. When they get in front of people,

it actually sounds like constipation to me. My advice? Feed him Cheerios. After a few days put him to sleep.

Dear Pat.

Two trains leave North Station in two different directions. One has four stops of five minutes. The other has three stons of ten minutes Which one will travel further in an hour and a half?

Your 6th Grade Math Teacher

Dear Ms. Prishy Ten I mean the first train

CHAW Continued from page 7

off the handle every time a

person "slips up." Think about it Even

though it may have been all a big misunderstanding, the envients who started the sitin took it upon themselves to go out onto mid-court before sellout crowd of 8,000, all of the cameras, the officials and the police just because they were mad Now that too was Politically Incorrect

Or was it? This whole nation was based upon he idea of free speech and the right to express your ideas whether the powers that be like it or not

But if that's the case with the students, then wouldn't the same logic apply to Rutger's president? Shouldn't he be able to express his own ideas and opinions without worrying about what the good Republican governor of New Jersey has to say about it?

Do you see what I mean? By trying to decide who was to blame, and getting all caught up-in the situation's "Political Correctness," I totally fost sight of what it was I was falking about.

Astronauts Taste Test Coke By College Press Service

BOULDER, Colo. — Astronauts on this month's space shuttle Discovery mission won't be drinking Coke just to quench their thirsts or give themselves a caffeine boost.

Instead, astronauts will drink Coke and Diet Coke to test tasteperceptions in space, said Louis Studieck associate director of the University of Colorado's BioServe Space Technologies Center.

University of Colorado students and faculty and other researchers have developed a new device known as the Fluids Generic Bioprocessing Apparatus, which will allow astronauts to drink the carbonated soft drink during the flight.

Since bubbly drinks have the tendency to foam in zero gravity, astronauts will dispense and drink 1.65 liters each of Coca-Cola and Dier oke while using the new appa-

"The technology we've developed to dispense gas-saturated liquids in microgravity without foaming will have application to other Bioserve projects such as nutrientdelivery systems for plants grown in space," said Alex Hoehn, a CU re-

Test results could lead to the deelopment of better-tasting foods and beverages for future space travelers as well as the elderly and chronically ill on Earth

The experiment is sponsored by The Coca-Cola Company in Atlanta.

foul out at 16:37 of the second half. though the loss seemed to show no immediate effects for when Kelly nailed a 10-foot jumper at 14:14, Suffolk led 39-31. "When Noreen left it was somewhat of a disappointment because she has such an mpact on the team," Leyden stated.

And the Lady Hawks gave adquate proof to this statement when they began to chisel away at the Lady Rams' lead. At 7:34. Roger Williams had cut the lead to three. and then finally went ahead for good 47-46, two minutes later.

Suffolk's defense intensified to counter the Lady Hawks' swift scoring and at 3:14 had pulled to within a point on a Kelly one-hander undemeath. Yet Roger Williams was to be the victor of this physical contest, and would pull away to a 55-48 advantage with 1:46 left and never look back.

HOCKEY

Lady Hawks get physical with Lady Rams

BOSTON_It was a game that made the common spectator wince and grimace. A contest that appeared to have more players hitting the court floor than shots hitting the everyone watching and pargoing to end when the other eam collapsed. Literally.

Such was the physical affair Suffolk (5-15) found itself clashing in on Thursday evening against Roger Williams College. Bodies colliding and crashing here and everywhere the fans cringing at the sight of it, and unfortunately, the Lady Rams being the ones who eventually vielded 57-55

For Suffolk it was their third consecutive setback. and in their last home game of the season. Truly they left the Ram Dome for the final time this year battered and battle-weary.

view, we had to be very active defensively," Coach Ed Levden stated on the condition of his squad. "I am very proud with the way they have finished so far this year, especially against a team like Roger Williams. These guys (Roger Williams) came in here and just expected a win."

When all the numbers

were calculated and the final stats tallied, it was a contest that witnessed both teams produce a combined 31 turnovers in the first half: more than 45 for the entire game. And if those particular numbers do not paint a clear enough picture of the raucousness this struggle exhibited, then this statistic surely will: combined, there were more than 30 fouls in the

The Lady Rams took adantage of four early Lady Hawk turnovers in driving to a 7-2 lead just 4:03 into the

Suffolk's quick-moving offense, Roger Williams began its full-court pressure defense. thus turning up the physical level of the contest, which was already at dangerously high levels, several notches, Yet the Lady Rath hung

firm, and on the shooting o guard Tammi Thorn (13 points) were able to counter the Lady Hawks' incessant pressing, and leap out in front 18-13 with 9:50 remaining in the first half .- This Suffolk run culminated, and on the type of physical play that would be repeated quite often during the night, with Thorp grabbing a pass that she would lay in as she was fouled most fiercely. The Lady Hawks sliced

the Lady Ram's lead to one with more team callousness and just as Michelle Kelly was beginning to lay the framework to one of her finest statistical performances of the season. Kelly (a teamhigh 15 points and 10 repoints for the Lady Rams during one stretch and with 2:54 left, had granted her team breathing snace in the form of 32-21 lead, Suffolk's largest of the evening.

"What a lot of people don't realize," Leyden had to say about Kelly's stellar performance, "was that Michelle had to go up against several active people on defense, and in order for her to do this, she had to play a very physical

The lead was to be short lived though, for the Lady crest of a 6-0 run, exhibiting their lethal talent at being able to score with blurring speed. At the half, Roger Williams had crawled to within five.

Suffolk Star of the Week:

Bill Mulally was the Suffolk star for the week of Feb. 5-11. The junior center/winger was instrumental in the Rams' 6-5 victory against Iona College on Saturday (2/ 11). Mulally was nearly Suffolk's sole source of offense in tallying four goals for the evening.

Suffolk falls behind early to Babson

By Ryan Foley

The Rams fell to perennial power Babson College last Tuesday evening (2/7). The 100-67 defeat was Suffolk's sixth in a row and dropped their overall record lead." to 8-13. "Unfortunately for us, Babson lived up to its reputation as being one of the top five teams in New England," Coach Jim Nelson commented on the loss

For the first 15 minutes. the game was particularly close with Babson's biggest lead being a mere 6 points As the half wound down the Beavers (16-5) cranked up their full-court press defense

and Suffolk's offense wilted as a result of it, falling behind by twenty at half-time. "Although we played on equal terms in the second half." said Nelson, "we were never able to make a serious inden-

Editor of Venture to go on tuition hunger strike

By Erskine Plumme

Jim Behrle, editor of Venture Student Arts Magazine and a Suffolk we can do as a community to senior, declared that he would be going on a hunger strike to protest

"I think it's time to say enough is enough,"said Behrle. "The administration is going to raise tuition until somebody decides to challenge them. I'll be that guy."

Suffolk University last week announced that tuition would be raised 6.76% for 1995-96. It was hailed as "the lowest percentage increase for ition for full-time undergraduates will be raised to \$11,300, an increase of

"It doesn't matter how small the tuition increase is. It's the principle of it This admin clear that they will continue to esca- joke, and I want to get my picture Journal interview.

"How much longer will people be able to afford higher education if universities are going to hold them over the rifle? People deserve affordable higher education. It's just

Behrle also challenged other dents to follow his lead.

"SGA has tuition forums and is happy that tuition wasn't raised 7%.

or something. But, I think if it makes people sit down and think about what kind of message we. as a society, are sending students, I will be successful."

Aids Number One Killer of Young Adults

by Bruce Jaspen College Press Service

Last year, the University of Washington distributed 40,000 prophylactics during "Condom Week" to educate students on the Seattle campus about the dangers of AIDs. This year, joining condoms were pamphlets, speakers from family planning and AIDS organizations and face-to-face discussions with health agencies at educational booths and the week was renamed "Safer Sex Week."

UW's bolstered effort came about the same time that

Centers for Disease Control and Prevention (CDC) in Atlanta announced that AIDS replaced accidents as the No. 1 killer of American adults ages 25 to 44.

"The university figured information and education and condoms were all-inclusive ' said Renee Richardson, a coordinator of the University of Washington's Safe Sex Week. "Last year we tried to be more

ATDS

Students react to recent tuition

Reactions to the recently an nounced tuition increase have been heated and varied among various students. Many students felt the increase was going to stress the student body's ability to afford cost of living expenses while attending Suffolk. Freshman Accounting major Tony Miroginnis feels the increase will hit students right in the wallet, "For like some people, they work at a job and pay for their tuition and they will have to pay for everything. And people who commute, 80 percent of the school, have to pay for transportation, gas, and parking." Miroginnis explained he finds it more convenient to drive in because it make an easier commute from school to his job. However he noted paying this had not been easy. Sophomore Legal Argument Communications major Sonia Ruas added, "If they could increase tuition that much they have a discount on T-passes, our own parking garage or parking discounts. If we're going to pay so much we should at least get some

encouragement and help.
