## SUFFOLK GETS GRANT

### One Of 615 Schools Sharing Ford Money

By WILLIAM J. DIA

Suffolk University, included in the list of New England colleges and universities that were recipients of the recent Ford Foundation grants, has applied for the grant. President Robert J. Munce announced last month at the quarterly meeting of the Foundation's trustees, found 615 private, non-profit universities and colleges throughout the country sharing in a total of \$210 million. These grants will be in the form of ten-year endowments.

As specified under the provisions of the Ford Foundation the money will be used for one purpose only to help raise the salaries of faculty members. At the end of the ten-year period, however, the grants may be spent at the discretion of the Suffolk University Board of Trustees.

No Amount Yet  
No specific amount has as yet been allocated to Suffolk, President Munce said. "That will be decided by the Ford Foundation's board of trustees after consideration of our application," President Munce went on to say.

President Munce said that the grant from the Ford Foundation was "a fine thing." He added, however, that such grants require careful study and planning to assure fullest possible benefits.

Parv. Way

Looking ahead with optimism, President Munce said, "I believe the grant from the Ford Foundation will help to open the door for Suffolk to obtain future grants from other organizations similar to the Ford Foundation."

Faculty Pleased

Other members of Suffolk's faculty were equally pleased to learn that a decision had been made to grant the Ford Foundation grants.

De Nelson C. Hannay head of Suffolk's Eastern department grants show an awakening of the business world to the problems of colleges and universities.

Formerly, there was a distinction between the business and academic worlds," Dr. Hannay said. "Now I feel that other business organizations will follow the example of the Ford Foundation in giving grants to schools."

Dr. William S. Salakian said, "I think that the Ford grant is a fine thing. Not only in the monetary sense but in that it's a new approach to the problem of teachers' salaries. I think that the grant by the Ford Foundation will call the

### Registration

Students who haven't already done so are urged to submit Spring semester programs to the Registrar's office as soon as possible. Constance Glonek, a staff officer, said that only a few students have complied with the January 16th deadline for program registration.

### Marine Biology Gets New Prof

By JIM LINT

The sea holds few secrets for Suffolk's new Marine Biology instructor.

John P. Wise, class of '36, is associated with the U. S. Fish and Wildlife Service. While to many codfish are simply a pleasant combination of a plate of beans on a cold Friday to Mr. Wise they mean much more.

In a current project it is his job to relate the decrease in number of fish in this area to the increase of ocean surface temperature. In this section, where fishing is an industry, it is apparent that a decrease in any type of fish is important.

Served in Marines

Wise was born in Boston and was graduated from Boston Public Latin High School. He served three years in the Solomon and Marianne Islands as a Marine communications technician.

Upon separation from the service he entered Suffolk. He received an AB degree in the same year of the Korean outbreak. He worked for the Ford Foundation in giving grants to schools.

Dr. William S. Salakian said, "I think that the Ford grant is a fine thing. Not only in the monetary sense but in that it's a new approach to the problem of teachers' salaries. I think that the grant by the Ford Foundation will call the

PRESIDENT ROBERT J. MUNCE reflects optimism as he awaits decision of Ford Foundation. When this issue was published, there was no specific amount to be awarded Suffolk in the history-making grant.

### JOURNAL VISITS 'TITANIC' WRITER

Inspired by a book which took 28 years to write, a Journal reporter interviewed the author in New York. Walter Lord amiably received Miss Kelley and told her the details of his time-consuming effort to get a story—and get it right.

By GERALDINE KELLEY

NEW YORK, Jan. 14.—"It is true that I spent twenty-eight years in preparation for the writing of this book, but the actual interviewing of survivors took only slightly more than one year."

The speaker was Walter Lord, author of the widely-read book, "A Night to Remember," which deals with the sinking of the liner "Titanic."

And the place was New York City's Yale Club, where this Princeton graduate seemed very much at home, and not at all the "old, tired, and beat-up" individual he describes himself to be.

### Ramettes Schedule More Games

A tentative six-game basketball schedule has been released for the Suffolk University Ramettes, the women hoopers of the school. Coach Rose Mary Heitz announced recently. Additional more exciting than to fraternal games are being planned.

The Ramettes can be seen about to kick "So you see," he next in action on February 2nd explains. "My interest came when they play the Boston about now, by chance than any Teachers' classes on the latter's thing only."

After graduation from Princeton, the author attended Yale and Baptist, home, Feb. 7th; Loyd School, where he familiar Stonehill College, away, Feb. 10th; at 4:30 p.m.; Stonehill, where he spent his time, Feb. 14th; Gordon College, home, Feb. 21st; and writing career. During the Second World War, Mr. Lord was

Chaplain's Aide  
In addition to his academic work, he serves as a chaplain's assistant at MIT, and assists Sunday evenings at the Center for the Church of Trinity Church, Copple Square.

In this aspect Pragnell was grateful for his training in Suffolk secondary sources. "Mr. Pragnell taught me to think on my feet," he said. "From Mr. Pragnell's classes, I gained skill in observing the attitudes of people about me. "The Dr. Salakian," he continued, "I owe what ability I have to detect fallacious arguments and not merely from his logic class, but from all his courses that I attended. He also taught me to avoid pitfalls, my will."

Patiently Praised

Pragnell praised President Munce for his patience and an understanding, and extended his best wishes to Mr. Ford, Governor of the district.

For students wishing to enter a theological school, Pragnell led the following advice: "Take as many history courses as possible in Church history, although we are required to cover 150 pages a week. Take a stiff course in English composition. The faculty at E. T. S. is in

EDITORIALS
University Alumni

Appropriate indeed in the first issue of the fiftieth year of Suffolk is publication of the Constitution of the General Alumni Association of Suffolk University.

With only a handful of dedicated organizers the university has the nucleus of a powerful and influential group. The workers prefer to remain nameless—they are a closely-knit team—when the Great Professor is handing out trophies on Recognition Day you may be sure they will be there.

It is interesting to note the formation of a Student-Alumni Relations Committee. Not alone bastion of the interested only in a once-a-year social, the alumni association has taken definite steps to insure a closeness and harmony between themselves and students.

From all appearances the university alumni association will soon equal the law school alumni in prestige and influence.

Recognition Day Coming

Nomination blanks are available for students who will be formally lauded at ceremonies on Recognition Day. Although the Day won't come until May, council president Tom Iolan has appointed a committee to study the nominees' qualifications for a coveted honor.

Anyone may fill out and submit an application, either for himself or another student, but it must be signed by the individual's class president.

Until recently, only a few forms have been submitted. Club presidents may submit forms outlining extra-curricular activities of their members. Each year outstanding students are presented certificates or trophies in recognition of their work in either scholastic or extra-curricular activities.

Kindred, Let's Kindle!

School spirit can be compared to a coal fire. Students are the individual pieces of coal, each with a collective duty to kindle and keep strong the entire fire. The quality of the fire naturally depends on the kind of fuel used.

Soft coal will burn furiously, but for only a short time. Anthracite, though harder to kindle, burns with a longer and equally intensive heat. Although both will do a given job, anthracite is decidedly the better fuel for a clean, compact fire.

School spirit at Suffolk seems to come under the former type of fire. Waning interest in the Varsity Club, for example, indicates the need for a change of fuel. Although compatible, soft coal and anthracite together don't really do a good job.

Perhaps those of us who are "soft coals" will change our form. In our preservative. Meanwhile, the fire is waiting for another shoveful of fuel.

Letters To The Editor

All letters submitted to the Editor for publication must be signed.

The following letter was given to the Editor, and in the absence of actual signatures an X was received from each of the boys in the Back Room.

Jason: Hear! We've got a question for you! We've got a question for you! We've got a question for you! We've got a question for you!

It is a consensus of us boys in the back room that you are the best. We have voted for you. We have voted for you. We have voted for you.

We've just about had our fill of your kind of education. We've just about had our fill of your kind of education. We've just about had our fill of your kind of education.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

It's a shame that you are not a teacher. It's a shame that you are not a teacher. It's a shame that you are not a teacher.

JOB CAN HARM YOUR EDUCATION, WARNS PROFESSOR

Professor Strain, a Suffolk alumnus, was a combat fighter pilot in World War II and a helicopter pilot during the dark days of Korea. Always a booster for better education, Prof. Strain has made countless appearances before high school groups and others in the interests of higher education. He wrote the following commentary at the request of the JOURNAL.

Each before me I learned to do atoms and personal affairs, by know that life was a battle. You who have taken or are about to take semester examinations will doubtless agree. So do we who must correct them.

In college as in war, there are casualties. The real tragedy, however, is that many of them are needless. Our armed forces try to reduce the number of casualties by training men in survival techniques. Possibly we can do the same principle in education.

Exercises and psychologists agree. That is, I read of an instructor that students can work without not the teacher. I can't say how often I have read of an instructor that students can work without not the teacher. I can't say how often I have read of an instructor that students can work without not the teacher.

The last suggestion is of the nature of a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

STUDENTS AGREE

By Spencer Corcum

With examinations close at hand, many students are putting extra time into their books in order to get passing grades. But what about those students who have less? Will they be able to pass their exams as easily as those who do more work?

William Preston, 25, a first-year student from Middlesex, hides a job in addition to his studies. Even that studying is a job in itself. He says that his job requires a student's full time attention.

Sullivan, an Andover 27 of Boston, believes that a working student will look for outside help. He says that he has to work his studies. However, he also states "a minimum of

attention on Page Four

Jobs Can Harm

Have in the previous years. I know a student who worked ten hours a night six nights a week. During his first three years at Suffolk he averaged three and one-half hour's sleep per day. On one occasion while taking his Freshman finals he worked and studied for seven days and nights without sleep. He probably didn't know it but his fatigue actually kept him from passing the exam.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course. It is a "do-it-yourself" course.

CONTRASTING his countless battlefield photos is this excellent view of Korean village taken by H. Michael McMahon. Note helicopter barely visible near center of photo.

## Ford Grant

Continued from Page One  
attention of the public to this problem and that there will be greater public interest in the situation. Now that the people have been made more aware of this problem perhaps something further will be done to remedy it."

## Accent On Arts

"Outside of the monetary value I feel that one of the chief benefits of this grant is that it stresses the importance the business world now places on the liberal arts," Dr. Norman E. Floyd said.

Dr. Floyd said that he was "pleased by the fact that the business world is now taking an interest in the liberal arts." Dr. Floyd went on to say that he felt that business had at one time neglected the liberal arts schools in favor of scientific and engineering institutions.

Dr. Floyd added that he hoped the Ford grants would stimulate other foundations which will not interfere with or continue the work already his school which he knows begun by the Ford Foundation that he must keep working

## Students

Continued from Page Two  
work is helpful, but it depends on the individual." Newton Scammon, 17 of Maynard a Liberal Arts student feels that working takes too much time which should be used for studies. He says, "A job supplies money" which is more often used to keep a student away from his school than it is worth.

Charles Thomson, 27 of Leicester says, "The type of job that he felt that business had at one time neglected the liberal arts schools in favor of scientific and engineering institutions."

Dr. Floyd added that he hoped the Ford grants would stimulate other foundations which will not interfere with or continue the work already his school which he knows begun by the Ford Foundation that he must keep working

## Wars, Photos Lead Marine To Suffolk U.

By RICHARD E. BOOKER

Several years before a banana-shaped, oddly designed flying machine and a magnificent peninsula was off in Asia were news-worthy, a fax of twelve timely approached the editor of the Boston Globe and presented him with an action snapshot of a helicopter. The editor handed the boy a five dollar bill and complimented him on his camera work.

Since that day the boy has survived a couple of wars, gone to college, and had a little hair, but has never given up his boyhood hobby of photography.

H. Michael McMahon, 28, of Boston, seemed to have his position "settled" most of the time. He was a Marine Public Relations man for several years, and it seemed that his minute one would get him at Suffolk in the evening. Finally, the radio quieted with the Marines. He was awarded him with a history of monuments and eagles of the United States. He had received the Bronze Star. He has those films at home, maybe I can show them to you some time."

McMahon, while preparing to leave California for Korea in the summer of 1951, met Captain Joseph H. Strain, assistant professor of speech and English at Suffolk who had just completed helicopter training in Virginia and was also head of the "last of the morning calm."

The pair had first met five years earlier at Squantum Mass. where Strain was training fighters with the reserves. They were soon separated as the result of a Korean accident. McMahon, flying U.S.S. Seahawk, Months later they met in Korea.

As a combat photographer McMahon was assigned to the First Marine Helicopter Transport Squadron. His superior of the time would have it that McMahon was to be a "Beaters Proved Good."

I suppose people were surprised that those flying out there when they first spotted them," McMahon remarked, "but they proved their worth during the battle of Heartbreak Ridge, a Republic of Korea outfit was trapped by Communist infantry, low on food, ammunition, and medical supplies they faced capture or death. Within three hours McMahon had evacuated the area over 22,000 pounds of supplies which enabled the Koreans to fight their way out of the encirclement."

During an engagement in which three American tanks were involved, the Cambridge Marine had a single seat on a hill overlooking the battle area.

He was operating a motion picture camera when one of the tanks got hit, explained McMahon. "This had named the Burke from East Boston was the commander of the damaged tank and I saw him crawl out instead of running forward. As his crew did, he, like a damn fool, stayed there and started directing artillery fire at one of our mortar positions."

In July, 1952 McMahon left the States he was assigned to the Burke from East Boston was the commander of the damaged tank and I saw him crawl out instead of running forward. As his crew did, he, like a damn fool, stayed there and started directing artillery fire at one of our mortar positions."

McMahon, 28, of Boston, seemed to have his position "settled" most of the time. He was awarded him with a history of monuments and eagles of the United States. He had received the Bronze Star. He has those films at home, maybe I can show them to you some time."

## SCIENCE CONFAB IN PHILADELPHIA

The fourth annual Eastern Colleges Science Conference will be held at Temple University in Philadelphia on April 6 and 7, 1956.

Limited to undergraduates, the Conference will include reports on research conducted by students, tours of industrial and scientific places of interest in the Philadelphia area, eminent speakers, exhibits and social activities.

Over five hundred colleges and universities east of the Mississippi and in Eastern Canada have been invited to send delegates and student speakers to the Conference. Papers will be delivered on all types of research in the fields of biology, chemistry, geology, mathematics, physics and psychology.

Any undergraduate who wishes to participate is asked to communicate either with the head of his science department or directly to the Eastern Colleges Science Conference, P.O. Box 222, Temple University, Philadelphia 22, Pa.

## Night Grad.

Continued from Page One  
The night class student received a diploma for his degree in the N. S. Scholastic and Philadelphia campuses during World War II but it was in Korea that he got his best pictures.

One photo taken during Operation Moustache received nomination by the International Board of Judges. "In being one of the best pictures to come out of the war, McMahon got a vital shot of wounded Marines being loaded onto one helicopter under fire on hill 674."

The helicopter gained fast and low during McMahon's "I am concerned" lauded McMahon. "It was September 1951, and the Marines were having a rough go at it on 674."

During one sixteen minute period, thirty-two wounded Marines were evacuated, and in ten minutes later they were being treated in a field hospital receiving surgical treatment. You can't get better service than that in Boston."

McMahon, 28, of Boston, seemed to have his position "settled" most of the time. He was a Marine Public Relations man for several years, and it seemed that his minute one would get him at Suffolk in the evening. Finally, the radio quieted with the Marines. He was awarded him with a history of monuments and eagles of the United States. He had received the Bronze Star. He has those films at home, maybe I can show them to you some time."

### Club News Ground Surrenders To Friendly Digger

Continued from Page Seven  
On December 28th, the Feast of the Immaculate Conception, Mass was held in President Muncie's office. One hundred forty Newmanites attended.

The Christmas party held in the Rev. Hall, December 8, attracted hundreds.

During the Christmas vacation, club officers Phil Thomas, Marie Whelan, and Bill Cunniff attended the National Newman Club Executive meeting at Miami, Florida. The well-tanned trio is now making intensive plans for a vigorous future.

First in their plans is a spaghetti supper in early February.

#### Business Club

The December 8th meeting attended by 104 members, heard as speaker Mr. Daniel C. Regan, assistant general agent for the John Hancock Mutual Life Insurance Company. He spoke on "Opportunities in Life Insurance."

December 7th produced the semi-annual dinner held at Parrott's Restaurant. Fifty-five members came. The guest speaker was Mr. Al Williams, public relations manager of the Essex Division of the Standard Oil Company of New Jersey. His main topic was "Opportunities in Gasoline Service Station Managing." He also spoke on "Opportunities in the Oil Industry and the Relation of the Oil Industry to all Other Types of Industry."

#### Psychology Club

President Dick Lewis ordered all members to "fork over" their dues at the meeting on January 10th. They also planned for future activities. Vesp Edmund McNulty has voiced an optimistic future for the Psyche group.

#### W. A. S. E.

To the uninitiated, this means Womens Association of Suffolk University.

A Christmas party was held on December 15 in President Muncie's office. About 50 girls attended. Among faculty members attending were Mr. Howard Register, Dr. and Mrs. Dion Zichon, Dr. Ella Murphy, Dr. Stanley Vogel, Prof. Dr. Strain, Dr. Harney, Dr. Hartmann, Prof. and Mrs. Mahoney, Mr. and Mrs. Muncie, Mr. and Mrs. Stone, Mr. Richeson, Mr. Pierce, Mr. Limond, Mr. Farrell, Dr. Buckley, and others. President Muncie was present with a barometer.

The Christmas-filled office was topped off by a white tree and there were decorations in the library.

Gifts were exchanged by each girl, and punch, sandwiches, cookies, and cakes were served.

A mother-daughter tea is in store for February.

#### French Club

A meeting was held Wednesday evening, January 11 at eight o'clock at 8 Pympton St. Co's bridge.

#### Spanish Club

Doctor Stanley Vogel showed slides of his trip through Spain and Portugal at the 14th meeting held on Jan. 11. Members enjoyed the pictorial record.

### By Jimmy List

"I helped dig a hole with the best of them". At least Joe Muncie says he is one of the best.

He has dug holes of different shapes, sizes, and depths. He has dug them from crannies to garden plots. Joe has been at it for 30 years now. This one at Foss Park is his latest venture.

#### Pit Depths

Every construction progresses one can see the plans developing more readily. That's the way Joe described it right here with a sweep of a bulldozer blade. He likes to step back and look on his own work and observe the changing landscape.

"Take that hole that was a real mess, but look at it now."

I peered down and saw a simple hole in the gravel.

The boss says I want it six by three by two. He follows the size he wants and I know how to dig it.

I asked him what the hole was for.

"What's it for? What difference does that make? They can plant an oak tree if they want, but they'll have their pole six by three by two."

His momentary rest over the bulky Italian dirt in the earth gave easily under his shovel. The pile of dirt by the hole grew.

#### Funnel Shape

After five minutes he stopped and a gasped "benches". "Now look at it!"

Again I looked down it still looked just like a hole in the ground.

"You notice the funnel shape wide at the top and narrow at the bottom?"

I had to admit that I did.

"That's no accident you know, you never dig when at the bottom. It might cave in and then where are you?"

I imagined myself in a cave in in June.

"I figure I'm five feet down the three by two as all set as a hill starting a ramp bottom."

This sounded intriguing. I collected down to a watch.

Joe's shovel scraped furrows in. His boots were turned in the nose dirt but still he scraped.

Then there was the sound of metal meeting rock. He stopped. He prodded the spot, listened to the sound.

"Well, we have a problem now."

I moved even nearer, and

### ROCK AND ROLL TAKES ITS TOLL

by ORLONG KOOL

Old Rock and Roll numbers never die. They just fade away much to the anguish of the more sensitive ears.

Primarily an epistolary craze, that would have passed to its grave along with top mumps and potpourri clubs, the type of music called Rhythm and Blues, or rock 'n' roll, has interestingly worn out the welcome mat via the air waves.

"But thanks to disc jockeys across the land they're the lads who are allegedly remarkable at keeping a record into this horrifying conglomeration of screaming, jumpy, jumpy, wailing, and jangling means by singers and frontiers."

#### Disc Left Radio

With the advent of television, radio was left with disc jockey shows, and sports broadcasts, as its main attractions, and the latter sponsors a name they don't share from to a position where they can make or break a record. The latter should be done liberally with three quarters of the trash they play.

The record polls that these few days conduct in picking the top hits should be termed "Top Weeks' Top Hits." According to the frontiers because it is the teenagers who send the postcards, not the adults in these boys, and quickly accept any type of music heaped on them.

#### Music Brutal

Many criticisms have been thrown at rock 'n' roll type music, particularly in picking the top hits should be termed "Top Weeks' Top Hits." According to the frontiers because it is the teenagers who send the postcards, not the adults in these boys, and quickly accept any type of music heaped on them.

But followed by the use and the pile of excavated earth took an enormous size.

#### Applause Rocks Hole

Finally he stopped, threw up his shovel, and extended his hands. It was an exciting moment, applause seemed appropriate. There stood Joe, exacting six feet from a chamber exactly three feet by two.

Grimacing broadly he stamped out and put an arm of beef around my shoulders.

"Now how does it look?"

All right, Joe. I confessed all right!

#### Med Schools Slate Tests

Candidates for admission to medical school in the fall of 1957 are advised to take the Medical College Admission Test in May. It was announced today by Educational Testing Service which prepares and administers the test for the Association of American Medical Colleges.

Application forms and full details of information which gives details of registration and administration, as well as sample questions, are available from Educational Testing Service, 20 Nassau Street, Princeton, N. J. Completed applications must reach the ETS office by April 21 and October 16, respectively, for the May 5 and October 30 administrations.

Joseph A. Leforey, first year law student, is shown following his assignment to the 10th Military Police Battalion, a unit of the Army Reserve.

An Army veteran, Joe currently serves as a second lieutenant with the 10th Military Police Battalion, a unit of the Army Reserve.

During his tour and others also served in the Army Reserve.

#### May Happen

Imagine today, providing we have many television, you turn out to be a network broadcast and heard a voice say "Good evening, everyone this is Will the Frontiers because it is the teenagers who send the postcards, not the adults in these boys, and quickly accept any type of music heaped on them."

But followed by the use and the pile of excavated earth took an enormous size.

Finally he stopped, threw up his shovel, and extended his hands. It was an exciting moment, applause seemed appropriate. There stood Joe, exacting six feet from a chamber exactly three feet by two.

Grimacing broadly he stamped out and put an arm of beef around my shoulders.

"Now how does it look?"

All right, Joe. I confessed all right!

But followed by the use and the pile of excavated earth took an enormous size.
