Dear Prices:

Thank you for your recent telegram urging my attendance at a meeting of concerned legislators with President Ford to discuss alternatives to forced bussing to achieve quality education in our nation's schools.

I have been working closely with Schator Tower of Texas and others to arrange for this meeting with the President. As of this writing, the President has agreed to such a meeting and it will be actuabled for after the Columbus Day recess.

I appreciate your words of support and encouragment and you can be sure that I will make a special plea to the President on behalf of the City of Roston for his support for a constitutional amendment to curb forced bussing.

Thanks own again for your efforts.

With all best wishes, I remain

JAN JUSET WALLE

Hon. John Tower
United States Senate
142 Senate Office Building
Washington, D.C.

Dear Sonotor Tower:

I would like to take this opportunity to commend your efforts to engage President Ford in a thorough dialogue with Members of Congress on the issue of bussing.

It is vitally important that concerned Members of Congress have the opportunity to discuss alternatives to bussing as a means to achieve quality education with the President and his top domestic advisors.

As a kepresentative in Congress whose district includes sections of the City of Boston which have been deeply affected by court-ordered bussing, I welcone each new initiative which might bring us closer to our goal of providing quality education to our school-age children without bussing these children. Bussing has proven to be disruptive and divisive and as a device to encourage integration, has failed the American people.

I trust that you recognize the serious situation in the City of Boston and will include me in the group of concerned legislators who will meet with the President.

Thank you for your consideration in this catter.

With warmest wishes, I remain

Sincerely yours,

JOHN JOSEPH MOAKLEY
