

Integrity Commission

Electoral Reform
Judicial Reform
Military Reform

* Composed of 9 Political Parties -
of all ideological tendencies
(legal parties).

- Work in rotating construction.

Organized on April 19 - coming from an
initiative by President Cerezo - to maintain
level of consultations with all the parties -

- way to make decisions is by "consensus"

3 subc. - based on negotiable

1 Electoral

2 Justice (Judicial reform)

3 Commission of Human Rights

has probably been
frowned upon
work

Composed of leaders of different parties at present represent
Commission as a whole.

decentralization:

In subc. of electoral - delegates of ARENA
have been coming in rotating fashion.

we haven't achieved a rhythm in dealing
with the negotiable between gov. & FMLA.

- there are not main negotiables - but our role is
complementary.

our agreements represent a type of 'national consensus'.

It is important that Integrity Commission retain

its independence

level

It's all method to vote - other than electoral card.

It's essential about increasing political debt

→ we've already begun to address use of armed force.

⊗ we've agreed on methodology - and on basic elements for discussion -

30% consensus on paper
not on implementation -

approx 30% of ~~the~~ side of voting card vote
because they do not have the voting card.

W/ in population there are high expectations
after 4 months - the real achievements - are
minimal - This is generating w/ the
parties - noise -
they say they're working - but having
no effect on negotiation -

all the parties are agreed that elections
should be massive + trusted by

test

Montana

It is most unlikely that the Argent
document would be brought up + approved.
