

La Salle - Nov. 11/12

1912

dear friend,

I was very glad
to have your card, but
sorry not to have you
at home over Sunday -
but as it is turning
again, you would not
have had a good
trip back.

Father Elizabeth
started for St Louis
this morning, they go
by mail, so it will

rather a long journey
but by the S. cut
they would not have
arrived until 9.20.
I probably take the
Sibs. They have enough
time to change in
Jolim, but had the
new station in
not finished then.

I wish you would
think about Cambridge
a little more. Mr
Jandain does not live
in Cambridge itself - about

4 miles away, at Gaitan, the speaks of
~~Dr. Smith~~ Trinity College & through his
face and most real English
people, & from it would be a
pleasure to print. The Cambridge
Cambridge Laboratory for physics is one of
the celebrated ones of the world.

I suppose the snow is deeper
than ever at Madison now, it seemed
absent to in. here yesterday.

I was glad to have
your letter. If your
party is only to be
our lake care of
you very well here
in the house. I
hope you will look
after for the June
Charade at Grassville
Hart - The Admiration
they probably make at
Cleveland -

Hoping you will
enjoy your ministerial
performance what
you all soon have
better look out your Calcutta

John Adams
June 1800
