

*Congratulations!*

## **KEEP UP THE GOOD WORK!**

### **Prostitutes are safe sex pros.**

Studies are finding that we are more likely to use condoms than people who have sex for free. We use condoms for fucking to prevent AIDS. Many of us use condoms for blow jobs too. This way we do not get herpes, syphilis, venereal warts or anything else.

But some prostitutes think they only need to use condoms for work. Not true. *Condoms are for lovers, too.*

And if you shoot drugs, never share a needle unless you clean it first with bleach.

For more information, call 926-1626 or 392-AIDS.
