

CONDOM TIPS

Prostitutes are safe sex pros. Studies are finding that we are more likely to use condoms than people who have sex for free.

But the key to safe sex is treating yourself and your condoms right.

Be sure to use a latex condom every time, even with that special someone. Lambskin condoms don't stop AIDS. Use a rubber when fucking and sucking, and even when giving hand jobs if you have cuts or open sores on your hands.

FOR MORE INFORMATION
Check with your friends who have been on the scene for a while, or come to the coffee house at Maggie's, 298 Gerrard Street East at Parliament, Tuesday and Wednesday from 10 pm until 2 am.

OR
Call the AIDS Committee of Toronto at 926-1626, Ontario Ministry of Health at 392-AIDS or Hassle Free Clinic at 922-0603/922-0566.

Use only water-based lubes like astroglide or K-Y. Vaseline and hand creams break condoms. NEVER USE VASELINE!

Be good to yourself.

Don't use condoms with Nonoxynol-9 brand spermicide if you are fucking more than a few times a week. It is irritating to the cunt and particularly the asshole. Nonoxynol-9 condoms, along with flavoured condoms might cause yeast infections.
