

CAMERON TODAY

SPRING 1991

A newsletter for alumni and friends of Cameron University

Ostar gives CU "interactive" sendoff

Cameron University received praise and a sendoff into its interactive future when Allan W. Ostar spoke to the second annual meeting of President's Partners Jan. 12.

Ostar is president of the American Association of State Colleges and Universities and father of the "interactive university" concept which has been adapted for Cameron by President Don Davis.

Ostar said the best way to meet the challenges of changing demographics, rapid advances in technology and international competition is through the creation of strategic partnerships among higher education, business and government.

He spoke at a banquet attended by approximately 200. More than 100 individual and business members of the Partners have pledged \$1,000 annually to Cameron.

Lauding the organization, Ostar said

business and industry as stakeholders in the interactive university are supplied with trained graduates, and in return supply visiting instructors and mentors.

He said the interactive university understands the importance of cultural diversity "that our differences do not weaken us; they strengthen us." In the 1990s, the nation will require 700,000 science and technological professionals, and 85 percent of the new workers will be minorities, women, and disabled workers, he said.

Speaker Allan W. Ostar, left, with Aulena Gibson, chair of Cameron University Foundation, Inc. and President Don Davis at the second annual meeting of President's Partners.

President Davis said funding contributed by the Partners this year will go to the New Business Research Center within the School of Business.

Research center begins business

Cameron's new Business Research Center (BRC,) with financing this year from President's Partners, has moved into a wing on the first floor of the School of Business and started several research projects.

Development of a general business index (GBI) for the Lawton area is the first research project, said Cameron President Don Davis.

Other planned projects are analysis for a theme park venture, a customer satisfaction survey for banks, and a customer survey for a mall, said Dr. Jac-

quetta McClung, dean of the School of Business.

The GBI consists of 27 variables and will provide invaluable data in recruiting industry. In the past such statistics have been reported as Tulsa, Oklahoma City, and the rest of the state. They will now be reported as Tulsa, Oklahoma City, Lawton, and the rest of the state.

T.K. Bhattacharya, assistant professor of finance, is the director of the BRC. He is assisted by Dr. Abdul Sukar, assistant professor of economics.

Kerr coaches success in workplace

Dr. Jane Buchwald Kerr, Cameron College alumna and one of three women who chairs a department at the university, coaches success in the workplace.

Chair of the department of home economics/human ecology, she teaches consumer economics and career preparation courses including resume writing and job interviewing.

Her recent work achievements include co-authoring a book, "African American Dress and Adornment: A Cultural Perspective," published in 1990 by Kendall/Hunt, Dubuque, Iowa; and presentation of two papers concerning female advancement in the workplace.

In March, 1990 she presented "Political Mistakes From Which You May Never Recover" at the Oklahoma Conference on Advancement of Women in Higher Education, University of Oklahoma Research Center. In May, 1990 she presented "Women, Work and Self-

Image" at the Women & Work Conference, University of Texas at Arlington.

"Women tend to want to do 110 percent, and that is impossible," Kerr said. "They should set realistic goals, achieve one step at a time, then go on to the next goal."

Kerr during the Oklahoma Conference on Advancement of Women in Higher Education advocated political savvy for women in the workplace and stressed traits including discretion and reliability as keys to success.

"Those who wish to rise in their profession use initiative and never miss a deadline," she said. "A lively sense of humor helps define and distinguish leaders. Exhibiting and handling humor effectively may be one of the most important on-the-job skills a woman needs for professional success."

Kerr at 5 feet 4 "suited" for basketball years ago when she was a farm girl at

Chattanooga. In 1962, she was Aggie queen at Cameron Junior College where she studied home economics. She earned a B.S. in home economics education at OSU and a masters in education at OU. She completed her Ed.D. in adult and continuing education at OSU in 1985.

Kerr

She has one son, David Beavers, 16, a junior at Eisenhower High School, and three stepchildren. Her stepson, Ken Kerr, earned a masters degree at Cameron in the spring of 1990. Her stepdaughter, Kellie Randall, is a Cameron senior majoring in medical technology. Kyle Kerr is a pharmacist in Dallas. Her husband, Frank Kerr, a native of Walters, is a Cameron junior majoring in history and foreign languages.

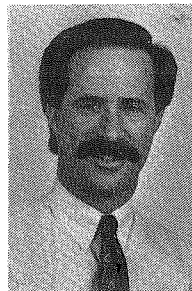

A MESSAGE FROM THE PRESIDENT... Richard Allen, President of CUAA

Many of us never stop to think about the impact that higher education has had on our lives. College education is an influence that is with us forever. Often when we talk to alumni and friends of the university about joining the alumni association, their first question is, "What will I receive in return?" As an active participant in the alumni association, I am more interested in what I can give back to Cameron. It is an opportunity to support an institution that has made an impact on my life and thousands of others not only in the Lawton community but across the country.

The CUAA awarded the first Alumni Scholarship Award to an upperclassman at Cameron this year, and we hope to provide additional scholarships as our funds increase. The first 50th year reunion was held at Homecoming in 1989 and we continue to present Distinguished Alumni Awards each year. To keep you informed, the alumni newsletter is now being published and mailed on a quarterly basis to active association members

and twice yearly to all addresses on our mailing list. As our active membership grows, the alumni association can become more involved in strengthening and supporting Cameron's traditions and quality programs.

The university hired Sandy Joyner as the first full time director for alumni relations in 1989. Sandy is dedicated to working with us to design programs that are mutually beneficial to the association membership and the university. She can't do that without our support. Joining the Cameron University Alumni Association is one way to give something back to an institution that continues to offer educational opportunities and influence our leaders of tomorrow.

Allen

Of course there are also benefits that our active members enjoy. They receive CU library privileges, car rental

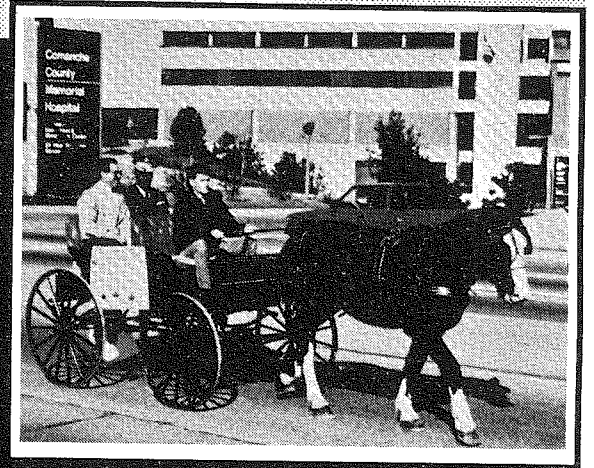

discounts, selected discounts on imprinted gift items in the book store, selected discounts to athletic events and fine arts programs, a CUAA window decal, all alumni publications and an embossed membership card. Active members are also guests of the CUAA at the Homecoming barbecue each fall. The most important benefit; however, is the satisfaction of knowing that you are supporting programs and activities designed to mutually benefit the membership and CU.

Annual memberships run from Oct. 1 through Sept. 30 each year and are only \$15 or you can become a life member for \$150. Send your check payable to CUAA to Cameron Alumni Office, 2800 West Gore, Lawton, OK 73505. If you are a Cameron graduate or former student, include your year of graduation and major or the years you attended. We want to be able to let you know about any reunions that might be planned for your class year or school.

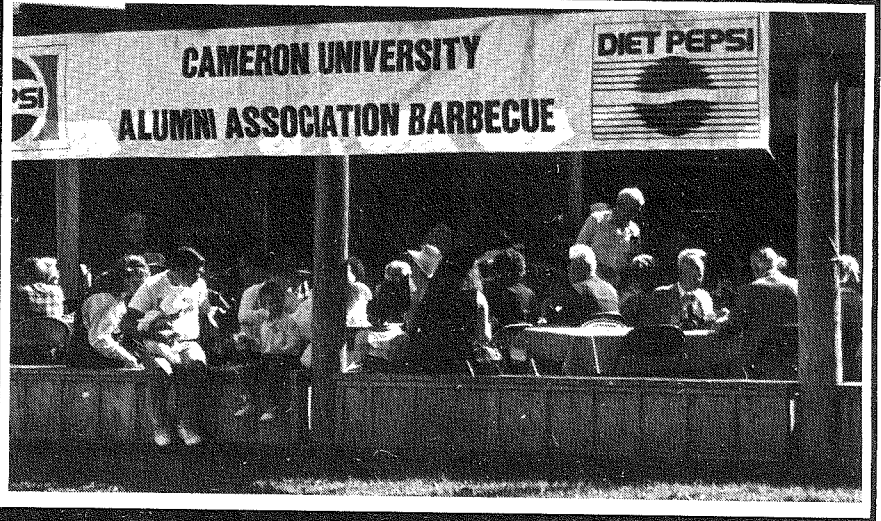

Homecoming '90 Highlights

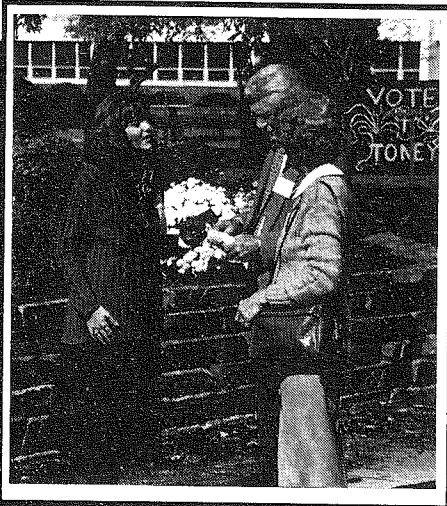

CUAA President, Richard Allen, left, leads the 1990 Homecoming parade as parade marshal.

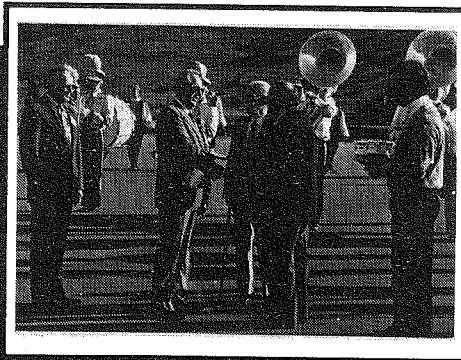

The classes of 1940-44 gather to reminisce, renew friendships, make new friends and memories and become reacquainted with the Cameron campus.

Alumni, faculty and friends enjoy a barbecue lunch before attending the Homecoming football game.

Alumni scholarship recipient for 1990-91, Joey Brown, left, visits with visiting alumni prior to the barbecue.

Distinguished Alumni recipients for 1990, David Rodolph, Glen Hastings and Harry Hammond receive their awards from President Don Davis and Richard Allen, CUAA President at half time ceremonies.

UPDATE ON ROTC GRADUATES

As of Nov. 15, 1990, 222 Cameron alumni who have been commissioned through Cameron's Army ROTC program were serving on active duty. This represents 54% of the 415 graduates who have received Army commissions since Cameron's first commissioning class in 1970.

Graduates range in rank from second lieutenant to senior lieutenant colonel. "Cameron should have its first colonel next year when the officers from the class of 1970 enter the promotion zone for colonel," said Lt. Col. Dick Murphy, chairman of the department of military science.

Five graduates are known to have already commanded or are in command of battalion-size units. They include James Beauchamp, '70; Terry Bullington, '70; Roy Edwards, '70; Michael Bergman, '71; and James Pickens, '72.

Philip Brinkley, '72, is scheduled to assume command in early 1991.

"This is a good indication of the quality of Cameron's graduates and how well they are doing across the Army," said Murphy. Cameron's ROTC graduates include 26 lieutenant colonels, 69 majors, 72 captains and 55 lieutenants. They are serving across the Army in a wide variety of assignments, including the Department of the Army and the Joint Staff at the Pentagon.

Dr. Connie Butterfield, '81, is an Army captain on the medical staff at Beaumont Army Medical Center, Ft. Bliss, Tex. A number of graduates are serving in Saudi Arabia.

In addition to the 222 Cameron graduates commissioned through Army ROTC, more than 300 other Cameron graduates are serving on active duty in the Army. The vast majority of these

officers received their commissions through the Officer Candidate School program and later completed their degrees at Cameron through the Army's degree completion program. One such officer student is currently enrolled at Cameron compared to the peak years in the early 1970s when as many as 300 Army officers were enrolled as full-time Cameron students.

Among the more notable army officers with direct ties to Cameron are Maj. Gen. Thomas J.P. Jones, '71, who recently retired as the commander of White Sands Missile Range in New Mexico and Maj. Gen. Wilson A. Shoffner who is commanding the 3rd Infantry Division in Germany. Jones completed his degree while a lieutenant colonel in the "Bootstrap" program. Shoffner was a two-year graduate in the late '50s, and then transferred to Oklahoma State where he received his commission in 1961.

FORMER TEACHER SHARES MEMORIES

The Cameron alumni office has received a donation of yearbooks and over 100 photos from former instructor, Irma Casey Howard. Mrs. Howard taught biological science courses at Cameron from 1937 until 1948. She is now retired and lives in Tonkawa. Although handicapped by a stroke almost five years ago, she designed her own pen and ink Christmas card this year. She has done numerous pen and ink note papers and has also painted in watercolor.

Mrs. Howard is a sports fan, and many of the photos she has donated are of Cameron athletes. There are also photos of other students, staff, faculty and the Cameron campus during those years. Sandy Joyner, director of alumni relations at Cameron said, "The photographs and yearbooks are wonderful additions to the alumni archives. We'll also be able to share those memories with our alumni who attend the homecoming reunions for those years. The class of 1941 will be honored on its 50th anniversary and the classes of 1942-45 will also be spotlighted next fall at homecoming. The alumni who attend will recognize many of the students in the photographs that Mrs. Howard has donated."

Howard wearing a 1941 National Jr. College Champs football jacket.

CAREER FAIR SET FOR MARCH 28

The Cameron University placement office will sponsor the third annual Cameron Career Fair on Thursday, March 28, 9 a.m. to 3 p.m. at the Shepler Mezzanine.

The fair is designed to give all Cameron students an opportunity to explore career possibilities for college graduates and to visit informally with a number of representatives from businesses and government industries. It also offers graduating seniors an opportunity to make valuable job contacts. No interviews will be conducted; however, those attending might want to bring resumes.

Suzanne Aplin, director of placement and testing, would also like to invite Cameron alumni to participate in this year's fair. "Whether they are employers seeking qualified employees or looking for new employment opportunities themselves, alumni would be welcome to attend this event," said Aplin. Anyone desiring further information can call the Cameron placement office at 405-581-2205.

OUTREACH OFFERS CONTINUING EDUCATION

The educational outreach office at Cameron offers short courses, seminars and workshops each semester which are designed to meet the educational, cultural, professional development and leisure-time activity needs of the citizens of Southwest Oklahoma. Courses which still have openings for the spring semester are listed below.

Enrollment is open to all interested persons. Optional credit is available for some courses for an additional fee and by completing additional requirements as specified by the instructor. To enroll or to obtain further information, call the educational outreach office at 405-581-2280 or come by their office in Shepler North Tower, room 424.

Eater's Choice - Cholesterol Lowering Program

Mondays, March 18 - April 22, 1991, 5:30 p.m.-7:00 p.m.

Instructor: Dr. Rebecca Pazoureck
Fee: \$70

Participants will learn the skills necessary to choose foods that satisfy both their taste buds and their need to achieve maximum cholesterol lowering. Key features of the program include interpreting food labels, ordering low fat foods from restaurant menus, and opportunities to make and taste low fat refreshments.

Wichita Naturalists

March 21 - 24, 1991, 8:00 a.m. - 4:30 p.m.

Instructor: Dr. Jack Tyler Fee: \$44
This workshop will explore multiple aspects of the history and ecology of the southwest Great Plains with emphasis on the Wichita Mountain region, effects of soils, geological history, and other abiotic factors in addition to the impact of man as they relate to present day flora and fauna. Well-known experts in numerous fields will explain how their disciplines interrelate and are interwoven into the other facets of the natural history of this unique part of Oklahoma. Several interpretative field trips will be taken.

History of the Lawton-Fort Sill Community

April 13 and 27, 1991, 8:30 a.m. - 4:30 p.m.

Instructor: David Stevens Fee: \$44
This seminar will focus on the beginning of man's interest in living in the Lawton-Fort Sill area. Topics will include a brief archeological study of the area, American Indians, Spanish explorers, American explorers, U.S. Army occupation which includes the establishing of Fort Sill, and the history of Lawton.

Critiquing Your Potential for the Workplace

April 27, 1991, 8:30 a.m. - 4:30 p.m.

Instructor: Diana Chamblee Fee: \$44
This workshop is designed for you to critique your own skills in preparation for job success. Research indicates that success in the job market depends on personal skills as well as a formal education. During this eight hour workshop you will actively participate in seven to eight activities which will enable you to graph your strengths and weaknesses.

ELDERHOSTEL

May 19 - 25, 1991

Fees: Resident - \$265; Commuter - \$125
Resident fee includes room, board and tuition. Commuter fee does not include overnight accommodations.

This is a learning vacation with only one requirement -- the minimum age is 60. Elderhostel is a network of colleges and universities world-wide that offers a taste of contemporary campus life for elder citizens. You can live in the dormitory for a week or at home if you prefer, eat in the cafeteria, attend classes, and participate in cultural and recreational activities. You will be a college student for a week without taking tests, doing homework or worrying about grades. Course work will cover:

Welcome to the Great Plains

with special focus on Great Plains geography. Learn about the unique environment of the Great Plains including the Wichita Mountains, the cross timbers forests and the plains wildlife of buffalo, elk, prairie dogs and eagles.

Images of the Great Plains

A journey back into plains history to discover the Plains Indians, the impact of European contact, Anglo-American settlement, and contemporary issues.

Popular Culture on the Great Plains: Myths and Realities

Experience what happened on the plains through western movies, and the literature and poetry of plains authors.

Grads reward Nalley with their success

Dr. Elizabeth Ann Nalley, who grew up on a farm near Checotah and attended a one-room schoolhouse, is a nationally recognized chemical researcher and the national vice president of Phi Kappa Phi honor society.

She delights in the successes of her Cameron former students, and keeps a running correspondence with them.

Nalley is a 20-year faculty member at Cameron and one of 10 female full professors among a total of 54 full professors at the university. In 1978 she became the first female professor promoted to full professor at Cameron University.

Nalley and Dr. Donna Nelson of OU, working under a \$17,000 research opportunity award from National Science Foundation, did research last summer on organic synthesis through organoborane compounds -- research that will benefit the pharmaceutical industry.

Nalley is the recipient of the Cameron University Student Congress Outstanding Professor Award (1986), the Phi Kappa Phi Meritorious Service Award (1981 and 1989) the Phi Kappa Phi Cameron University Alumni Award (1980) and the CU Phi Kappa Phi Distinguished Faculty Award in 1978.

She is active in the American Chemical Society and is the faculty sponsor of the Cameron University American Chemical Student Affiliate Chapter. She was nominated for the Oklahoma Chemist of the Year Award in 1986.

Nalley was elected national vice president of Phi Kappa Phi by the delegates of the 1989 triennial convention of the honor society. Phi Kappa Phi recognizes academic excellence in all academic disciplines.

She served as a regent from 1980 until her election. While serving as a regent, she conceived the idea and edited a manual which describes in detail procedures for establishing new chapters and maintaining old ones.

She received her B.S. from Northeastern Oklahoma State University in 1965, her M.S. from Oklahoma State University in 1969 and her Ph.D. from

Texas Woman's University in 1975.

Several main sources of inspiration for Nalley as a child were the biography of the Polish-born French chemist and Nobel prize winner Marie Curie; the encouragement and high caliber of her science teachers in high school; and a National Science Foundation High School Institute in Chemical Engineering, held at Oklahoma State University, which she attended between her junior and senior years in high school.

"One of the main rewards received from the teaching profession is the opportunity to observe the results of the

products your university produces -- our students," she said.

"At Cameron this is especially true because the physical science department is small enough that we develop close ties with our students as we serve not only as their teacher and academic adviser, but often as their mentor, professional adviser, and friend.

"This means in many cases we assist them in preparing applications to graduate and professional school and in securing their first job and in many cases their second and other future positions," Nalley said.

Dr. Ann Nalley assists students Gary Pruett, center, Rush Springs, and Paul Reed, Altus, in pulling out glass tubing to make capillaries.

'85 chemistry grads succeed in variety of positions

There are so many chemistry grad success stories at Cameron that it would take several weeks to describe them, said Dr. Ann Nalley, professor of physical science.

Here is what has happened to just a few from the class of 22 graduates in chemistry in 1985:

John Argenzia completed his B.S. in chemistry and accepted a position as a chemist with Goodyear in Lawton. He performs quality control analytical tests on polymer and composite samples at various stages in the tire manufacturing process at Goodyear.

Phillip Easton completed his B.S. and entered graduate school at the University of Arkansas the following fall. He completed his Ph.D. in chemistry in the fall of 1989 and accepted a position as a research chemist with Conoco-Dupont in Ponca City.

Robert Karl Herring after graduation at Cameron became a process development chemist with Martin Marietta in Orlando, Fla.

Kathy Hise after completing her B.S. in chemistry began work with National Analytical Laboratories in Tulsa. There she became an expert in environmental analysis procedures. Her work was so

outstanding that her employer has since hired several other Cameron graduates. During the last three years Kathy received additional training, accepted more responsibility, and moved up the employment ladder. She is employed by AGRI-CHEM in Catoosa, Okla. where she does research in agriculture and environmental chemistry. She will be completing her masters degree at OSU in the department of civil engineering this spring.

Darwin "Win" Hormann Jr. after retiring from a career in the Army completed his B.S. in chemistry at Cameron. He became an environmental specialist in Oklahoma City with the Oklahoma State Health Department. Win recognized that there were career opportunities where he could utilize both his training as a chemist and his extensive training and experience in the military. After a year at the State Health Department, he applied for and was accepted into the training program of the Oklahoma State Bureau of Investigation (OSBI) He has completed that training and is assigned as an officer to the Lawton OSBI office. He relies heavily on his analytical training in chemistry and is often called upon to gather and investigate evidence at crime scenes. His wife, Dr. Virginia A. Hormann, is an associate professor of physical science at

Cameron.

Christopher Hynes after completing his B.S. in chemistry at OU entered grad school at Oklahoma State University. He recently completed his Ph.D. in analytical chemistry and is seeking a position in teaching at the university level.

Stan Alan Zisman completed his B.S. in chemistry and mathematics at CU and entered graduate school at OSU. He completed his Ph.D. in organic chemistry. He completed his four undergraduate years with a perfect 4.00 GPA then compiled an identical record in grad school. Stan's Ph.D. research led to the development of several important patentable pesticides. He is now working for Phillips Petroleum in Bartlesville.

Robert Louis Schmurr entered the School of Veterinary Medicine at Oklahoma State University after completing his B.S. in chemistry at CU. He completed his DVM and is now in private practice.

James H. "Jim" Keck moved to Atlanta after graduation in chemistry at Cameron. He is working with Hitachi selling medical and analytical instrumentation.

Mark Your Calendars Now and Attend Homecoming '91

Friday, November 1, 1991 - Annual Homecoming Golf Tournament

Saturday, November 2, 1991 - Parade, barbecue, football game and reunions. Reunions will include the annual CSSA reunion, Reunion of the Classes of 1941-45 with special recognition for the class of '41 on their 50th anniversary. All alumni, former students and guests are invited to join us for a barbecue meal at the student union prior to the football game.

1991 CAMERON UNIVERSITY BASEBALL SCHEDULE

<u>DATE</u>	<u>OPPONENT</u>	<u>PLACE</u>	<u>TIME</u>

10 Alumnotes

1920s

1925 - Doris Julia Albright Drew is a homemaker and lives in Jefferson City, Mo.

1930s

1930 - Lillie M. Frazier is retired and lives in Lawton.

1931 - Hallie C. Julian is retired and lives in Lawton. She stays active with church and club work and has been active in A.A.R.P. for ten years. Allen N. Talla writes that the brochure for "Lawton-Fort Sill: A Pictorial History", which features a 1929 winter scene photo of Cameron, brought back memories. In order to get home to Sterling, he had to walk over 25 miles, spending the night half way with some farmer friends.

1932 - Myron W. Smith is retired and lives in Lawton.

1933 - Ferne E. Castle Farrar is retired after a 33 year teaching career and lives in Elgin.

1934 - Zula Harrison Clower is retired and lives near Faxon. Alton Lee Livingston is retired in Frederick.

1936 - Jack E. Allen lives in Lawton. He is a World War II veteran and is retired from the Air Force, Air Force Reserves and Civil Service.

1938 - Gene A. Hancock is retired from the Lawton Public Schools. He enjoys golf, fishing and travel.

1939 - Clorene Davis Hancock is retired from American National Bank in Lawton. She enjoys golf, travel and visiting grandchildren.

1940s

1940 - Cowley Carl Banks has retired in Willow, Okla. after teaching and working with soil conservation. Merle J. Brandon owns a music store in Duncan.

James C. Barker is an independent geologist and lives in Houston. Horace Carl Brooks is retired in Bethany, Okla. He enjoys golf, woodwork and gardening. Edith Eller lives in Lawton and is a retired teacher. James H. Holman lives in Altus and is a retired physician. His wife Sybil Harrel Holman is also a 1940 graduate.

1941 - Mary Ann Gafford Gilmore lives in Glen Ellyn, Ill. Elenora Scott Barris Hines lives in Clovis N.M. She retired in 1985 after 29 years with the Clovis Municipal School System as coordinator of health and school nursing. She was twice honored as educator of the year and was inducted into the Educator of the Year Hall of Fame in N.M. in 1988. Eldon W. Krause lives in Cheyenne, Okla. and is retired from the U.S. Department of Agriculture Farmers Home Administration. Lloyd Brooks Mitchell is President of Mitchell Appraisal Services in Oklahoma City. His wife Mable Grace Apple Mitchell is an artist, housewife and former teacher. Geraldine Nell Farmer Skaggs and Alvin Douglas Skaggs live in Dallas. Barbara C. Smith has retired in Miami, Fla. She is an active shell collector, artist and judge. Helen Greb Szatalowicz is a housewife in Stanley, Wis.

1942 - Lucille Peevey Brumley has retired in Bluejacket, Okla. after 39 years as a teacher and is active with Craig County Retired Teachers. Merrole Davis Dickens has retired in Meers. Theresa Arlene Roberts Dugan lives in Frederick and is employed with the Association of South Central Oklahoma Governments. Evelyn Louise Norris Klein lives in Lawton and is a retired school teacher. She is married to 1970 graduate Jerry Otto Klein.

1943 - Mary Lou Holt Daniel lives in Lawton. Cecil Frank Mattoon is a retired postman and lives in Lawton.

1945 - Gussie Marie Blasdel Barnett is a housewife and lives in Grandfield.

1950s

1952 - Richard L. 'Dick' Smith has re-

tired in Watonga.

1960s

1962 - William O. Strange is a partner with Deloitte and Touche in Houston.

1968 - Dr. Carroll Wheeler has joined the staff of Great Plains Hospital in Lawton as medical director of the adolescent program.

1970s

1970 - Bob DeLaughter lives in Yukon and is accounting supervisor for Oklahoma Gas and Electric in Oklahoma City. Jerry O. Klein is a retired teacher and lives in Lawton. David Newman has been named vice president of investments for A.G. Edwards and is manager of the firm's Duncan office.

1971 - Elva Lynn Brown is a second grade teacher at Prather Brown Center in Frederick and is working toward a master's degree.

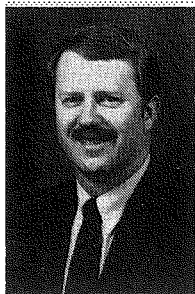

1972 - James W. Campbell is general manager for Wholesalers, Inc. in Corpus Christi. He was 1990 amateur of the year for the Southern Texas PGA and general chairman for the Ben Hogan South Texas Open. Ronald Gale Prueitt is principal at Lincoln Elementary in Corsicana, Tex. Janet Shirley was nominated for Comanche Public Schools teacher of the year award. She teaches at Meridian Elementary.

1973 - Nancy Allen is principal of Woodrow Wilson Elementary School in Duncan. She was selected for the Administrator's Award by the Stephens County Reading Council as the administrator who has done the most to implement and promote an exemplary reading program in Stephens County. Harold N. Hunt is supervisor of television for the Department of the Army at Fort Sill. William L. Norris is an elementary teacher with the Lawton Public Schools.

1974 - Rod Ring has been appointed a special district judge for Cleveland County.

Prior to the appointment, he was in private law practice in Norman and had served as assistant city attorney for the city of Moore. **Bradley H. Sinor** is on staff at the Broken Arrow Ledger newspaper. A science fiction writer, he has had short stories and articles published in national magazines. **Jerry B. Stanley** is members' services coordinator for Cotton Electric in Walters. **Louise Watson** is a kindergarten teacher at Grandfield Elementary School and has been featured on KSWO television as Grandfield's historian.

1975 - Rev. Harold Brown has been appointed associate pastor at Epworth United Methodist Church in Chickasha. **Rev. James L. LAWTON-FORT SILL

A PICTORIAL HISTORY

Lawton-Fort Sill: A Pictorial History by M. David Stevens captures the history of the Lawton-Fort Sill community in words and pictures and records the influence of the cultures that shaped it -- the Native American, the military and the settlers.

The author has collected over 300 photographs, many never before published, and added text for this looking glass into the past, recapturing forever everyday life and historic moments. You'll meet famous men and women who were so vital to the founding of this area, and you'll relive the events that shaped its heritage.

These beautiful 8 1/2" x 11" hardcover limited edition books are available exclusively through the Cameron University Alumni Association. All limited edition books purchased through the alumni association will be signed and numbered by the author.

Price: \$37.95 from Cameron University Alumni Office, Administration Bldg, Rm 145

\$40.95 postpaid if to be mailed. Checks payable to CUAA

Quantity Limited

ANDY WARREN FUND ESTABLISHED

Farrell Large, a former member of the Cameron football coaching staff, is seeking funds to assist Cameron alumnus Andy Warren. Warren, a 1986 graduate and member of the CU football team, has been diagnosed as having leukemia and is on a donor list for a bone marrow transplant. In order for the bone marrow transplant to be performed, it will be necessary for Warren's family to raise over \$100,000.

Prior to becoming ill Warren was coaching in Danville, Va. According to Large, he is hospitalized in a Richmond hospital and is expected to be moved to Baltimore, Md.

Those desiring to contribute to the fund for Warren should send donations to Lawton Teacher's Credit Union, 1806 N.W. Liberty Avenue, Lawton, OK 73507 or to Farrell Large, Farmer's Insurance, 2355 West Gore, Lawton, OK 73505. Checks should be made payable to The Andy Warren Fund.
