

CAMERON TODAY

Winter

OKLAHOMA'S INTERACTIVE UNIVERSITY

1995

Distinguished service awards presented

A legendary Cameron chemistry professor and Fort Sill's commanding general were honored at Cameron University's fall convocation. Maj. Gen. Randall L. Rigby and Dr. Ann Nalley received Cameron's Distinguished Service Awards, the highest recognition given by the university.

"Gen. Rigby and Dr. Nalley are the best in their respective professions," said Cameron president Don Davis in announcing the awards. "Their accomplishments reflect well on Cameron University."

A 1966 graduate of Cameron College, Gen. Rigby also has a bachelor's degree in psychology from OSU, a master's in experimental psychology from OU and a master of business administration from Long Island University. He was commissioned a second lieutenant in the Field Artillery after graduating from OSU. His military education includes completion of the Field Artillery Basic Course, the U. S. Marine Corps Amphibious Warfare School, the U.S. Army Command and General Staff College, and the U. S. Army War College.

Gen. Rigby has been deputy commandant of the Command and General Staff College at Fort Leavenworth; deputy director for assessment of the Joint Staff; commander of the 6th Infantry Division Artillery; and on the faculty at the United States Military Academy. He became commanding general of the U.S. Army Field Artillery Center and Fort Sill and commandant of the U.S. Army Field Artillery School last June.

"While other Cameron graduates have become general officers, Gen. Rigby is the first to serve as Fort Sill's commanding general," Davis said.

"Dr. Nalley epitomizes the very best in higher education," said Davis. "She excels as a teacher, researcher, author and student advocate. She is respected both by

Stephen F. Bentley, member of the University of Oklahoma/Cameron University Regents; Maj. Gen. Randall L. Rigby; CU's President Don Davis; and Dr. Ann Nalley gather prior to convocation

professionals in the field of chemistry and her academic colleagues."

Dr. Nalley earned a bachelor of science degree in chemical education at Northeastern Oklahoma State University in 1965, a masters in analytical chemistry at Oklahoma State University, and a Ph.D. in radiation chemistry from Texas Women's University.

A member of the Cameron faculty since 1969, she has served as president of the Faculty Council and chair of Cameron Council. She served on the committee to reorganize the governance structure at Cameron in the early eighties and has served as a member or chair of almost every committee in the structure. She has also served as sponsor of student government, the American Chemical Society Student Affiliate Chapter and Chi Lambda Upsilon.

Dr. Nalley is national president of Phi Kappa Phi honor society and has served as regent and national vice president. Her term as national president will end in 1998, and will encompass the society's National Centennial in 1997. The Cameron University Phi Kappa Phi

chapter has presented her with their Distinguished Faculty Award twice and with their Meritorious Service Award.

In the American Chemical Society, she has held every office in the local section and has served on seven national committees and task forces. She has been honored as Oklahoma Chemist of the Year by the American Chemical Society and selected by both students and faculty as Cameron's outstanding professor.

In her spare time, she maintains a pet refuge for over forty displaced or deserted animals.

The Cameron University Distinguished Service Award was established 15 years ago to honor those with ties to Southwest Oklahoma who have made a significant contribution to their community, state or nation.

Recipients are recognized during Cameron's annual fall convocation of students, faculty and staff.

"Our convocation is a ceremony of rededication to our institutional commitment to excellence," Davis said. "It is appropriate that we present the distinguished service awards at it."

President Davis sets 1995-96 goals

President Don Davis, during the annual staff and faculty meeting in August, reviewed accomplishments during the past year and announced 12 institutional goals for Cameron University for 1995-1996.

Accomplishments during the past year include reconstruction and reopening of the Fitness Center; beginning the construction phase of the Sciences Complex; equipping the campus to implement new technologies in teaching, research and administration through new student computer stations, upgrading of writing and instructional support labs and beginning the construction of the fiber optics campus network; and increased gifts and pledges, which included more than \$600,000 for the Sciences Complex.

In announcing the goals for 1995-1996, Davis said: "Our highest institutional priority is assuring the safety of those on our campus. Completion of construction of new water lines to supply campus fire fighting systems must be our first goal.

"Completing construction of the Sciences Complex and occupying it for instruction by the fall of 1996 is our second goal.

"Achieving continued NCATE accreditation for undergraduate teacher education programs and initial accreditation for the Master of Education and Master of Arts in Teaching degree programs should be our third goal.

"A new statewide telecommunications network called ONENET is scheduled to come on line later this year and Cameron will be a hub site on it. As a fourth goal, we need to develop a comprehensive action plan to assure campus connectivity to ONENET to facilitate the delivery of telecommunications services both on campus and off. A part of this goal is the completion of the campus fiber optics network.

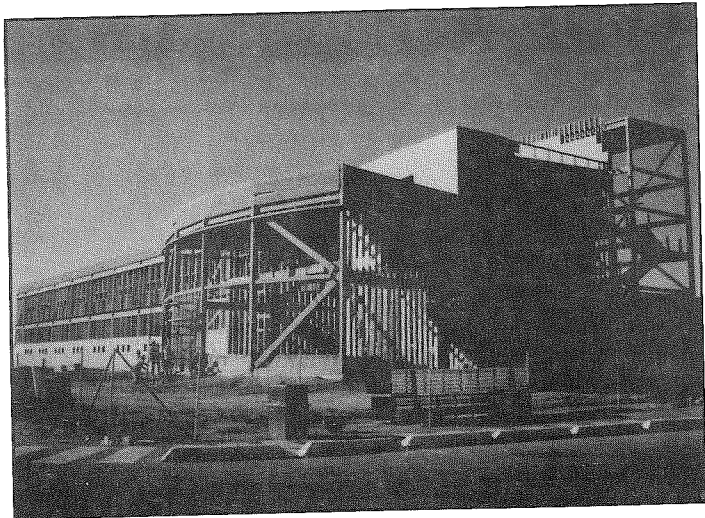

"A year ago, few among us were familiar with the home page concept. Now, it has become apparent that by establishing a Cameron University Home Page on the World Wide Web we can not only provide immediate, unfettered access to all university sources of information, but can develop interactive systems which will allow students, faculty and the public to transact business with the university electronically. These interactive systems must be user friendly and encompass our entire scope of student services. Initiating this process is our fifth goal.

"As a sixth goal, we should promote the integration of interactive media technology into academic and support environments, including a faculty and staff development plan.

"We have begun to study revision of the general education curriculum. Our seventh goal should be to continue those discussions and formulate recommendations for consideration by the entire faculty.

"It is increasingly important to document that as a university we are good stewards of the public trust along with public funds. As our eighth goal, we should implement the Institutional Effectiveness System plan.

Our institutional policies need to be brought current, examined for compliance with applicable laws, codified and

Construction of the new \$10.6 million Sciences Complex is on schedule and should be ready for occupancy next fall. The 81,086 square foot building has a building footprint equal to Shepler Center. Over \$600,000 in gifts and pledges have been made for sponsorship of the various facilities in the complex. Donors names will be placed on permanent plaques in the building.

published. Achieving this considerable task should be our ninth goal.

"Much of the process of gathering information required to begin design development on the University Center has been accomplished. We are now ready to apply the construction partnering process pioneered on the Sciences Complex to this project. Throughout this year, the partnership of staff, students, faculty, architects, engineers and construction managers will arrive at a design for the University Center, develop plans for its financing, and secure the requisite approvals for its construction. Our tenth goal is to make substantial progress through this process.

"Our tennis courts need considerable repair and the new Sciences Complex will increase the demand for parking in the southwest portion of the campus. To address both problems, we should construct new tennis courts and convert existing courts to a parking lot as our eleventh goal.

"Preparation for Festival III: Science, Technology and the 21st Century will continue throughout the year as our twelfth goal.

"I commend these twelve goals to you as worthy measures of our efforts for the coming year. They offer the means through which we can make our campus and its academic programs and services more accessible and effective. They allow us to expand our campus through the integration of technology into all our endeavors. And, they provide direction as Cameron University continues as Oklahoma's interactive university. I thank you sincerely for your past hard work and support and ask that you continue as an enthusiastic partner in our enterprise."

KCCU wins Governors Award Of Excellence

KCCU-FM, Cameron's National Public Radio station, received the Governors Award Of Excellence at a ceremony held in Oklahoma City in late October. The station was nominated by Goodwill Industries of Lawton/Ft. Sill for the public service announcements aired by the station during the year. A special public service campaign to help promote the adult day care facility operated by Goodwill was the main reason the station was nominated and selected. KCCU was the only radio station, commercial or non-commercial, in the state to win the award this year. Two commercial television stations, KOCO in Oklahoma City and KTUL in Tulsa, were the only television stations in the state to receive the award. KCCU airs over 6000 public service announcements each year for local non-profit organizations in the communities which the station serves.

Mark Norman, director of KCCU, said, "It was an honor to receive an award for the job we do each day. The KCCU staff is proud of their efforts in the area of public service announcements. We are humbled by receiving this award and being nominated by such a community minded organization as Goodwill."

KCCU employees displaying the certificate received for the Governors Award of Excellence are left to right: Charles Thurston, engineer; Debra Taylor, news director; Erika McKinzie, office manager; Mark Norman, director; Dave Sandstrom, underwriting representative; Mike Leal, program director

Public radio and television future

Many citizens have expressed their concern about the federal government's decision to eliminate federal support for public radio and television. The decision as of this date is to eliminate the funding altogether in two years. Stations will be required to replace the funding with support from local businesses, foundations and listeners. Individual listener support is the major source of outside financial funding for KCCU. KCCU will need to replace 26% of its budget or \$88,000 a year if the funds are eliminated. KCCU currently receives around \$75,000 a year from individual listeners. If you enjoy KCCU programming, it is important that you support the station with your donations. Public Radio and Public Television will need more help than ever before to continue the service now being provided.

Recent studies by the Corporation for Public Broadcasting have placed stations such as KCCU in the high risk group for failure because its membership base is so small. CPB has advised KCCU and stations in this category to work to expand their membership base in any method possible. Because of the response from listeners in the Ardmore area, a decision has been made to increase the power of the translator in Ardmore to serve that area. A frequency in Wichita Falls will also be sought, which could more than double the potential audience for KCCU. The station is also looking into the expansion of the Altus translator and to see if any other communities in Southwest Oklahoma or North Texas might be potential areas where a translator station would be desired. Suggestions have been made to consider Chickasha, Frederick and Vernon. KCCU is looking for citizens in these areas who might organize a local membership drive to help bring KCCU to these or other communities.

Plans are also in progress to establish a KCCU Program Endowment Fund with interest earned on the principal used to ensure ongoing funds. Anyone desiring to assist the station or make a donation can call (405)581-2474, or write KCCU-FM, 2800 W. Gore Blvd., Lawton, OK 73505-6377. Checks should be made payable to Cameron University Foundation.

KCCU fall membership drive successful

KCCU recently completed its fall membership drive and the results were outstanding. The station had two goals: A financial goal for the fall of \$35,000, and a membership goal of 500 new or renewed members. The station, as of Nov. 12, had pledges of over \$40,000 and a membership total of over 400 new and renewed members. The total of \$40,000 includes the two foundation Listener Challenge Grants issued by the McMahon Foundation (\$4,800) and the Noble Foundation (\$5,000). The average listener gift was \$75 per member which is much better than the average of just over \$35 from the membership drive last fall.

KCCU director, Mark Norman, said "Listeners were responding to the fact that public radio stations will lose federal funding from the Corporation for Public Broadcasting in the next two years. KCCU stands to lose 26% of its budget or \$88,000 a year. It was encouraging to see listeners open their hearts and their wallets to help keep KCCU on the air, providing a quality public radio service 365 days a year 24 hours per day."

Cameron goes on line in cyberspace

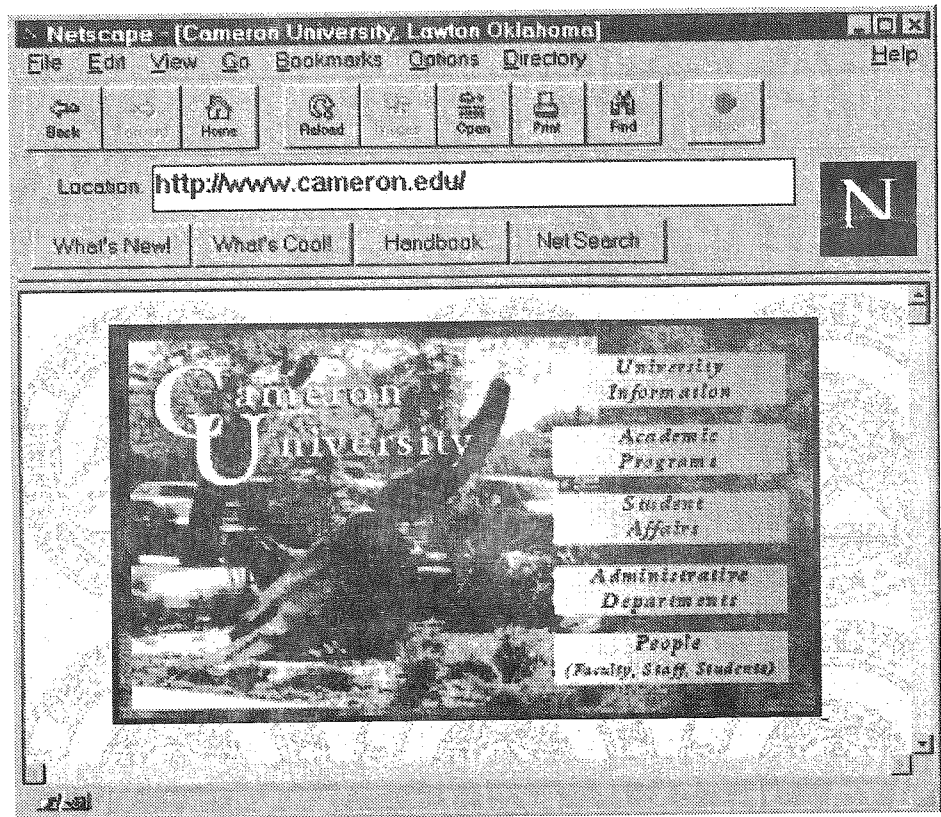

Cameron has a "new look." Faculty, staff and administrative representatives from across campus have collaborated to design a new electronic image for the university. The result is the Cameron University Home Page. Home pages provide a means for institutions to introduce their programs to the world. A home page is an electronic table of contents that offers access to information from a variety of sources. This information may take many forms including text, full color graphics, photographs, sound and movies.

Cameron University's Home Page provides information about the university, schools, departments, individual faculty members, and staff. Internet users can find information contained on these pages through the World Wide Web (WWW). Professors and students use the Internet for research, communication, and information exchange. The system provides access to unlimited resources throughout the world. With the introduction of home pages, computer users have the opportunity to learn about services and programs available to them from Cameron. This is a particularly useful tool for providing information to students, parents, alumni, and the community at large. Potential students can "cruise" the WWW in search of universities that meet their academic needs. Even though our site is in the early stages of development, some students have already contacted Cameron based solely on the information found on the home pages.

When a computer user connects with Cameron's Home Page, they can select school, departmental, or individual home pages. Information on courses, degree programs, course schedules, and faculty are examples of the data available. The unabridged Undergraduate and Graduate Catalogs are fully indexed for easy browsing. Users can send electronic mail directly to administrative, academic, and service departments or use the telephone and FAX numbers which are provided.

Currently, Katherine Liontas-Warren, associate professor in the art department, has an outstanding sampling of her work titled "Life in Oklahoma, Still Lifes and Lithographs." The electronic art gallery will be expanded to include student work for world premiering.

What does the future hold? With electronic communications rapidly evolving, predicting the future is difficult but there are several ideas being considered at Cameron. The potential for

electronic admission to the university, course enrollment, and application for financial assistance are being examined. Instruction at Cameron is entering cyberspace. During the 1996 spring semester, a limited number of courses will be developed for access through the Internet.

If you have access to the Internet, you can connect to Cameron's home page through <http://www.cameron.edu> to see what's new on campus.

Cameron's alumni office does not have a home page at this time; however, the office would like to hear from alumni through their e-mail address, alumni@cameron.edu, when they have an address change, a new job or other updated information.

Cameron alumni celebrate first commissioning

by Cadet Michael Ryan Wood, Public Affairs Officer, Scabbard and Blade

On the sixth of October at 6:00 p.m., the alumni started to arrive at the Officer's Club of Fort Sill, Oklahoma. It was a reunion dinner of the first commissioned class of Cameron University's ROTC department. In 1970, 52 second lieutenants were commissioned. Of the 52 graduates, nine were present for the dinner.

The reunion dinner was sponsored by the National Society of Scabbard and Blade. The organization was established nationally in 1904 and was constituted at Cameron University in 1994. The purpose of the organization is to promote and instill military professionalism in its members. Candidates for membership within Scabbard and Blade are selected from the top third of their military science classes and are judged both in scholastics and military performance.

Sixty-one alumni and their guests enjoyed the reunion dinner which began formally at 7:00 p.m. with cadets posting the colors. Appropriate toasts were made and opening comments by Lt. Col. Joel McCart, professor of military science, were given. A lesson followed in Cameron ROTC history by the guest speaker, retired Lt. Col. Felix Cruz, now city attorney for the city of Lawton. After Cruz's expose on each of the nine commissionees, Dr. Don Davis, a former ROTC student and participant of Advanced Summer Camp '69 with the rest of the class and now the President of Cameron University, told the class how great it was to have them there. Among the audience were Brigadier General Bill Bilo, deputy director of the Army National Guard in Washington, D.C., and Dr. Don Sullivan, vice president for development at Cameron University. Cruz, who also served as assistant professor of military science at Cameron in 1970, reminisced of times when ROTC was mandatory. He also spoke of the vast leadership within the cadet ranks during an era of turmoil over Vietnam, "No

Attending the ROTC reunion were nine alumni who were commissioned in 1970 and retired Lt. Col. Felix Cruz, former assistant professor of military science at Cameron. Pictured from left, front row are Ken Wren, Ken Vantreesse, Mike Corley, Bill Sunday, and Roger Cox; from left, back row are Ed Blackwell, Bob Bryant, Bill Johnson, Cruz, and Phillip Weber.

disturbance, ... no demonstration at all, because of the leadership demonstrated at that time."

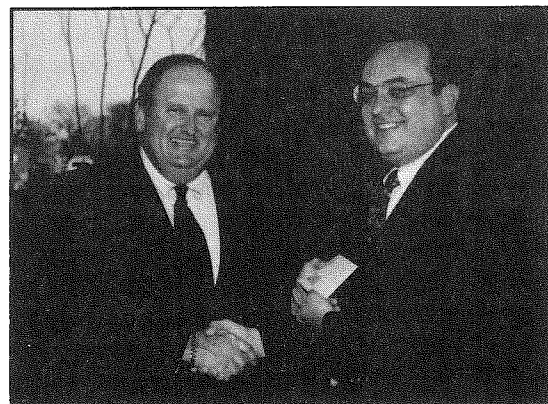

McCart and Davis used the opportunity to explain the future of Cameron's ROTC battalion. With the cuts throughout the military, ROTC has also experienced repercussions. Of the 300 schools across the nation with ROTC battalions, only 250 universities will keep their ROTC programs by 1997. Surviving ROTC battalions must maintain the quality of their cadets. "(Cameron) ROTC has a proud history and tradition...(and) if there is one ROTC program remaining in the state of Oklahoma, it will be Cameron University," Davis promised.

Scholarship fund established

The Farmers Insurance Group of Companies has established a scholarship at Cameron through their "Aid to Education Program." The company makes an annual contribution based on the total number of alumni employed by Farmers for a minimum of four years who have graduated from a college or university within the company's operating territory. The 1995 Aid to Education contributions total over \$700,000 and have been distributed to 393 colleges and universities.

Cameron received \$500 for 1995 on behalf of the following CU alumni who are employed by Farmers: Stanley B. Donaldson, '80; Loren E. Hood, '78; Mark R. John, '84; Cheryl G. Terry, '73; and Ty Valentine, '84. The check was presented by Mark R. John who is a branch claims supervisor for Farmers in Moore, Okla.

The scholarship is designated for students in the fields of insurance, mathematics, business administration, personnel, and other areas related to the insurance industry.

Cameron President Don Davis accepts a scholarship fund check from Cameron alumnus Mark R. John, '84, representing Farmers Insurance Group of Companies.

Cameron history, 1911 - 1913

by Sally Soelle, History & Humanities

Editor's note: This is the second in a series of articles covering the history of Cameron.

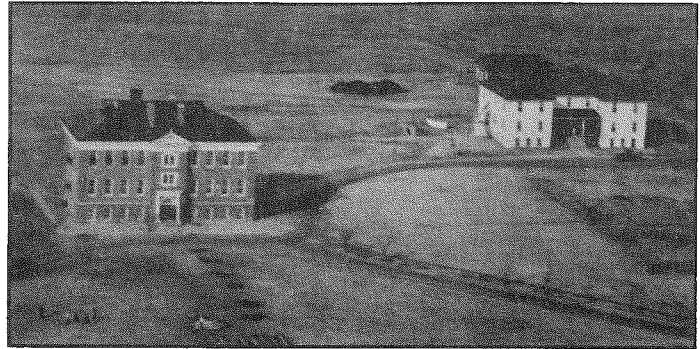

Community enthusiasm for the new agricultural school in Lawton characterized the early years of Cameron's development, despite concern about state appropriations. In March 1911, the school moved from its temporary site downtown to the new campus two miles west of Lawton. For a time the only building on the campus was a three-story brick structure which housed all the school's activities. Ten classrooms accommodated students enrolled in courses in agriculture, mathematics, English, domestic science and manual training, and school officials conducted the daily business of the new facility there. A creamery, established in response to a need of local farmers for an outlet for dairy products, was located in the basement until a separate facility could be built. A blacksmith shop was also located there.

As students embarked on their first academic year at the new location, Cameron officials purchased farm equipment and machinery to establish the school's new demonstration farm which provided practical experience for students of agriculture. Enrollment remained low for the 1911-1912 academic year because of a lack of campus housing, and extracurricular activities developed slowly. A member of the music faculty organized a school band and chorus despite limited enrollment. Athletics had been established while Cameron occupied the bank building downtown. Basketball, baseball and track events took place when opponents were available. In fall 1912, the school organized a football team which played other local teams.

School officials quickly determined that dormitories were needed to attract students to the new school. Securing monies for such construction became a highly competitive process as representatives of other institutions also sought funding. Over a period of years, efforts to raise funds occupied the time of several area legislators and a succession of Cameron's early presidents. President A. L. Liner, reportedly frustrated about the failure of state administrators to grant appropriations for Cameron's development during his term of office, resigned his position at the end of the 1912 school year. It fell to the new president, Ralph K. Robertson, to continue the battle for funding.

Robertson was only twenty-seven years old when he came to Cameron. Educated at the University of Iowa, he had served as the head of the English and mathematics departments at the Haskell School of Agriculture at Broken Arrow. Robertson continued the effort to secure a dormitory, agreeing that without on-campus housing, Cameron could not attract students and would lose support in the legislature.

The State Board of Agriculture offered Lawtonians a compromise. If the city would raise the \$5,000 needed to build a dormitory, the state would agree to furnish and maintain it. Moreover, the state would help advertise the school to ensure a healthy enrollment. Lawton's Chamber of Commerce embraced the proposal and organized a private company to sell stock to raise the required funds.

The third story building to the left was the first building on the Cameron campus, housing classrooms and offices. The frame building on the right, was the girls' dormitory, constructed in 1912.

The planned women's dormitory was to be a two-story frame building which could accommodate 62 students. Unfortunately it was not completed by the beginning of the fall semester as planned, resulting in a disappointingly low enrollment. Women students were housed temporarily with private families, and men lived for a time in tents on the campus. To make the best use of the building when it was completed in October 1912, women were housed on the first floor, and men, with a matron, on the second. Room and board were \$2.50 per week. Despite the low enrollment that fall, Cameron officials were hopeful for the future and continued to promote their institution. One such effort involved the production of promotional films which were shown at various locations in the region. Guest lecturers gave presentations highlighting the benefits of a Cameron education, and members of the Board of Agriculture also toured the district promoting the school.

For years Cameron officials confronted efforts in the legislature to abolish the district agricultural schools. Visits by members of various state agencies to evaluate enrollment, per capita costs, and the quality of instruction must have taxed the patience of early administrators and Lawton citizens who wanted the school to succeed. Cameron graduated its first class of four students in 1912. Reverend E.D. Cameron, by then a Baptist pastor, and Senator J. Elmer Thomas delivered commencement addresses in which each praised the programs offered at the district agricultural schools and stressed their importance to agriculture in Oklahoma. The seven members of the graduating class of 1913 heard similar commencement remarks promoting the value of the agricultural schools in the state.

In the summer of 1913, President Robertson passed the mantle to E.M. Frost, and left the city to pursue a law degree. Frost and his successors faced new institutional challenges, and were forced to confront continued political opposition to the district agricultural schools, including Cameron.

Cameron basketball teams begin season

The Cameron basketball teams begin another season with high hopes and expectations.

The Lady Aggies return nine letterwinners, including four starters from last season's squad. Senior Teresa Clayborn returns for her fourth year and junior April Ellickson returns for her third season. Ellickson led the Lady Aggies in scoring last season averaging 16.6 points per game, with Clayborn chipping in 14.1 points and a team leading 8.0 rebounds per game.

Newcomers to this season's squad include senior transfer, Leslie Shippy-Schroeder, from Eastern New Mexico. Shippy-Schroeder scored 925 points in three years for the Zias, garnering all-Lone Star Conference honors last season. Point guard Brandi Barbour, a freshman from Longview (Texas) High School, should also see extensive playing time.

The Lady Aggies face a tough schedule, playing Southeastern and Southwestern Oklahoma State Universities, both NAIA final four teams, and Missouri Western, a NCAA II final four team.

The Aggies team will feature a host of newcomers, added to five returning letterwinners. Back for the Aggies are seniors Greg Patterson, Richard Edwards, and Brad Cooksey, and sophomores Johnny Arroyo and Burnell King. Edwards was Cameron's second leading scorer (11.7 ppg) and rebounder (5.7 rpg) last season.

Newcomers to this season's squad include junior transfer, James Morris and junior college transfers, Ben Radford and Corey

Stewart. Morris played two and one-half years at the University of Central Oklahoma where he amassed 705 rebounds and 1,297 points. Stewart averaged 15 points and 10 rebounds per game last season at Cisco Junior College and Radford played on the Midland Junior College team that finished 60-12 in the two years he was there.

1995-96 CAMERON UNIVERSITY HOME BASKETBALL SCHEDULE

Date	Opponent	Time
Dec. 2	Midwestern State (M)	7:30
Dec. 4	Oklahoma Science & Arts (M)	7:30
Dec. 5	Midwestern State (W)	7:00
Dec. 7	Central Oklahoma (M)	7:30
Dec. 8	Henderson State (W)	7:00
Jan. 4	Southwestern Oklahoma (W)	7:00
Jan. 6	East Central (M)	7:30
Jan. 22	Oklahoma Science & Arts (W)	6:00
	East Texas State (M)	8:00
Jan. 31	Southwestern Oklahoma (M)	7:30
Feb. 10	Harding University (W)	7:00
Feb. 12	Abilene Christian (M)	7:30
Feb. 14	Southeastern Oklahoma (M&W)	6:00
Feb. 26	Drury College (M)	7:30

Cameron volleyball team shows big improvement

The Cameron volleyball team finished the season with an eight game improvement over last year, and in the process recorded its first winning season in four years.

Cameron ended the season with a 17-15 record, compared to last season's 9-20 record. The winning record was the Lady Aggies first since the 1991 season when they finished 19-15.

Freshman Hilary Baggett led the Lady Aggie offense and defense, registering 438 kills and 474 digs. Sophomores Shelly Urban and Stephanie Hillstrom each had strong seasons with Urban second in kills and digs and Hillstrom first in attack percentage and total blocks and third in kills.

Cameron broke nine season records and three match records along the way. Baggett broke match and season records in attacks and digs, and the season record for kills. The Lady Aggies as a team also broke season records in kills, attacks, attack percentage, assists and digs.

The Lady Aggies picked up wins for the first time ever over Harding, Henderson State, and Pittsburg State. Cameron also posted a 3-2 record over Central Oklahoma and Southern Nazarene.

Interest around the campus and the community was sparked, as the Lady Aggies average attendance was more than 150 people per match. The largest crowd of the season was 275 on the opening night of the HOJO Classic.

The Lady Aggies not only recorded success on the court, but off the court as well. Sophomore Stephanie Hillstrom was named to the GTE Academic All-District team. She holds a 4.0 grade point average in biology. Hillstrom is Cameron's first volleyball academic all-district honoree.

The successful season has Coach Kim Vinson looking toward next season. Of the eleven letterwinners, Cameron will return 10 including six juniors, two sophomores and two seniors. Only senior Tamara Kirkpatrick will not be returning.

"When you look at the whole picture we had a big improvement this season," Coach Kim Vinson said. "We had a few disappointments during the season which kept us out of post-season play, but I am looking forward to next season with our 10 returners. Each year we have taken steps of improvement on the ladder, and next season may be our step to post-season play."

If alumni received more than one degree from Cameron, they are listed under the year of their most recent degree. Those who attended but did not graduate are listed under the last year they were at Cameron; or in some cases, the class year when they would have graduated.

1922 - H. Truman Maxey lives in Oklahoma City. He is a retired Baptist minister. He has been pastor for churches in Forgan and Carmen, and worked with Child Care of the Oklahoma Baptist Convention and the Baptist Foundation.

1927 - Marie Spradlin Shaw is retired and lives in Lawton.

1929 - W. Bryan Waid lives in Lawton. He retired in 1952 after a 20-year career in public education. He is a member of the first junior college class to graduate from Cameron and is a charter life member of the CU Alumni Association.

1930 - Nat Robertson lives in Lawton and is retired from the postal service.

1931 - Orval Dill lives in Mannford, Okla. He is owner and CEO of Southwest Valuation Service.

1932 - Lucretia Snelling Umphers lives in Lawton. She is a retired teacher. The Cameron Campus ministry has awarded her the 1995 All Saints Service Award, as a "modern-day saint," for her fund-raising efforts and volunteer service.

1936 - Clifford F. Schneeberger lives in Walters. He is married to 1937 graduate, **Theodora Ketels Schneeberger**. Clifford has retired from farming and a rental business. Theo is a retired piano instructor and has been church organist for 50 years. They are active in their church and have traveled extensively.

1938 - Nettie Anne Ballou Barber lives in Elgin and is retired.

1939 - Col. Jack H. Farley lives in San Antonio. He retired from the Army in 1972. **Wilma Duke Stout** lives in

Lawton. She is a retired nurse. She has fond memories of Cameron where she worked in the cafeteria and was assigned to serve food to the football players.

1941 - George C. Hughes lives in Lubbock, Texas. He has retired from the Portales School System in New Mexico where he was assistant superintendent of schools. He is married to 1942 graduate, **Ruth Ann Sims Hughes**. **Harold E. Hurst** lives in Lawton and is retired. He is an instructor for the 55 Alive Mature Driving program and is involved in community organizations.

1942 - Grace E. Hardin Zink has moved to Carmi, Ill., from Edmond, Okla. She says home, church and family have always been the joys in her life.

1943 - Edward F. Cagle lives in Lawton. He owns a government contracting business.

1945 - Gussie Blasdel Barnett lives in Grandfield. She is a retired teacher. **Doris March McGill** lives in Oklahoma City and is retired. **Wilma Mae Entz McKee** lives in Hydro. She retired in 1990 after 36 years of teaching. She tutors and writes and continues to perform testing and conferences for schools. **Lillie Mae Peters** lives in Lawton. She is retired from Southwestern Bell Telephone. **Noma Mae Smith Red Elk** lives in Cache. She worked as a middle school secretary in Cache for 16 years and is now retired.

1948 - Garold E. Franklin lives in Lawton and has retired from Public Service Company where he was an engineer. His wife, **Ellen E. McCosh Franklin**, is a 1970 graduate. **Edgar D. Malone Sr.** lives in Fletcher. He is a partner in Malone Motor Company.

1950 - Charles Bishop lives in Oklahoma City. He is a gas analyst for Apache Corporation.

1953 - Ginger Simpson Conrad lives in Redondo Beach, Calif. She has been publisher of National Business Magazine,

a magazine for minority and women business owners, since 1984. The magazine now has a circulation of 40,000.

1956 - Jerry L. Salyer lives in Oklahoma City. He has been a judge for the Workers' Compensation Court since 1988 and has been presiding judge since 1993. He is also a colonel in the Army Reserve. **Rose Marie Bowman White** lives in Amarillo, Texas. She is a retired second grade teacher and enjoys traveling and bowling.

1960 - Linda Levy lives in Denver, Colo. She is a land-lease analyst for Texaco.

1961 - Georgia Shaw Taylor Bartholomew lives in Chattanooga, Okla. She is a fourth-grade teacher for the Chattanooga Public Schools.

1963 - Dr. David Leon Maddox lives in Tulsa where he is a dentist. He has served as president of the Tulsa County Dental Society and was awarded the 1995 Tulsa County Dentist of the Year. **Jane Buchwald Kerr** is a retired Cameron faculty member and now lives in Flowermound, Texas. She and her husband, 1992 graduate **Frank Kerr**, are a real estate team with Remax in suburban Dallas and Fort Worth.

1965 - Col. Henry O. Tuell lives in Frederick, Md. He was named commander of Fort Detrick, Md., in August. He has a master's in psychological counseling and a master's in hospital administration. He has served as chief of the medical service branch at Total Army Personnel Command; chief of the manpower division in the office of the Army surgeon general; assistant to the chief of the Medical Service Corps; and commander of the 56th Medical Battalion, Fort Ord, Calif. He is also a master aviator.

1966 - Jackie Cornelius lives in Burkburnett, Texas, and is self-employed in insurance sales.

1967 - Dorita Key Hooper Brown lives in Oklahoma City and is a homemaker.

1968 - Charles C. Turner lives in Lawton and is a retired federal employee. His wife, **Glenda Moss Turner**, is a 1955 graduate.

1969 - Robert Conway lives in Duncan. He retired in 1989 after 20 years in the Navy as an electronics specialist.

Distinguished Alumni and Faculty Hall of Fame Award nominations sought

Nominations are being accepted for the Cameron University Alumni Association's 1996 Distinguished Alumni Award and the Faculty Hall of Fame Award. Nominations must be submitted by April 1. In making a nomination, it is important that nominators include as much pertinent data as possible.

The Distinguished Alumni Awards are presented annually to alumni who have made significant contributions to society and whose accomplishments and careers have brought credit to Cameron by distinguishing themselves in their careers; and/or in service to their communities or through continued support of Cameron University. Nominations should include information regarding nominee's career, community

service, and the reason the nominee is considered worthy of the award.

The Faculty Hall of Fame Award honors faculty for their teaching effectiveness, positive impact on student lives and involvement at Cameron outside of the classroom and in the community. Specific examples to illustrate the reason nominee is considered worthy of the award and third party testimonials are encouraged. Nominees should have taught a minimum of five years at Cameron. Current or retired faculty are eligible.

Nominations for both awards should be sent to the Cameron Alumni Office, 2800 W. Gore Blvd., Lawton, OK 73505-6377 by April 1, 1996.

Moving? Changing jobs? Other news to share in Alumnotes?

If you change addresses or this newsletter reaches a relative of the addressee, we would appreciate an address update. We also want to hear what's new with you so we can update your files and share your news in the Alumnotes column. Mail information to the address below or use the Alumni Office's e-mail address: alumni@cameron.edu.
