

INDEX ALPHABETICUS COGNOMINUM

Quasdam notas praemittimus, quibus exprimitur ratio huius indicis conficiendi:

1.- Ordinatio. Cognomina ordinantur secundum hanc litterarum successionem: a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z. Quapropter non habetur ratio diversi valoris prosodici, sive ex litterarum coniunctione (v. gr. hisp. ch, ll), sive ex signis diacriticis (v. gr. pol. z, z, n; gall. c; hung. o, u), provenientis. Tamen in germanicis nominibus ä, ö, ü considerantur ut ae, oe, ue.

2.- Abbreviationes. Aestimantur non factae. Sic, Mac, Mc, M'; De, D' (nisi vocalis, vel h, sequatur: D'Adamo, D'Hondt), eundem valorem habent.

Abbreviationes quae adhiberi solent ad exprimendum, sive cognomen paternum valde commune (F[ernández]Regatillo), sive primam partem cognominis compositi (O[rtiz]de Urbina), enodantur; sed additur opportuna referentia cognominis materni ad paternum, et cognominis abbreviati ad plenum cognomen.

3.- Cognomina composita. Omnia (etiam praepositio, coniunctio) quae nomini personali praecedunt, unum quid constituunt, relate ad ordinem alphabeticum. Tamen pars cognominis inter uncas inclusa, praecedens, non computatur; subsequens, computatur.

4.- Praepositio et articulus. Praepositiones de, van, von, te ... (exceptis cognominibus belgicis et italicis) praecedunt, sed non computantur. Articulus autem, in numero sive singulari sive plurali, computatur.

Combinatio praepositionis et articuli computari solet, sed minus uniformiter etiam in singulis nationibus: sic, in sermone gallico du, des, generatim computatur; in sermone hispano del plerumque non computatur, nisi praecedat monosyllabo (v. gr. Del Val); in sermone lusitano da non computatur, etc...

Ad augendam difficultatem uniformitatis accedunt, inter alias, duae causae: alius usus in aliis temporibus (v. gr. in antiquioribus catalogis Neerlandiae ante 1903 van computatur); et diversa ratio scribendi cognomina idem sonantia (v. gr. de la Croix, Delacroix), quae proinde in indice aegre separarentur. Remedium, ut patet, est multiplicatio referentiarum: quo tamen parce usi sumus.

5.- Littera initialis nominis. Prae oculis habeatur, litteram initialem nominis, in hoc elencho alphabetico, ex forma latina, non ex hodierna forma, desumptam esse. Plerumque in utraque forma haec littera est eadem; sed iuvat hic notare praecipuas differentias: Aegidius/Gilles; Aemilius/Emile; Aloisius/Luigi, Luis; Audoenus/Owen; Caietanus Gaetano; Emmanuel/Manuel; Gu-(Gualterus, Gulielmus)/Walter, William, Wilhelm; Hadrianus/Adrien; Hieronymus/Jérôme; Hippolytus/Ippolito; Hyacinthus/Jacinto; I-, J-, (Ioannes/Jean); Philippus/Filippo, Felipe; Xaverius/Javier, Saverio Yvo/Ives.
