

Chaffin Previews Campus Additions

By DONNA PICK

T. W. Chaffin, Superintendent of buildings and grounds, previewed projects to be completed in the near future as finishing touches are added around the MCC campus.

"One of the major plans that will be considered is a new access road to the rear of the campus going below the Applied Science Building and behind the Fine Arts Building," said Mr. Chaffin.

He explained that the road mainly will be used by the faculty members who park in the area by the Applied Science Building and for deliveries made to that area of campus. "The new road will eliminate the somewhat hazardous road being driven now," he said.

"We also have some plans for additional improvements to our gravel streets and parking area," related Chaffin, but he did not have any definite dates for construction.

Mr. Chaffin also stated that three protective crosswalks will be added on the main road in front of the campus: from the parking lot to the Administration Building, between the sidewalks of the Fine Arts Building and the gym, and from the parking lot to the Student Center area.

Additional safety features are traffic signs and three breakers at various locations. "The speed breakers are really very effective," said Chaffin, "because they cause drivers to

reduce their speed and remind them that pedestrians will be crossing in the area." He said that no final decision has been made as to where they will be located.

Although it may seem that all the progress for MCC is tentative, this is not the case, for construction has already begun to replace the mud banks along the outer edges of the campus with cement sidewalks. "They would have all been completed sooner, but it has been held up by the weather," said Chaffin.

Sidewalks will be laid all around the edge of campus by the main street, in front of the faculty and visitor's parking lot to replace the temporary stones, along the outside of the new bottom half of the Student Center, and in some isolated areas on campus.

"In some cases we ignored the original plans and just cemented some of the crosswalks which had been made by students," commented Chaffin, concerning the new sidewalks.

One final major project being pursued is the campus lighting situation. Chaffin explained that most of the lamps have been installed and that the three destroyed by storm have been replaced.

"Soon all campus lighting will be in pretty fair shape," he said, and so will the whole campus as future dreams and plans become realized and fulfilled.

RON SULLIVAN'S art display entitled "Aquarius" is now showing in the Fine Arts Building on the MCC campus. The exhibit is of or about fish, and will be on display until the end of March.

Sullivan's 'Aquarius' Exhibited In Fine Arts

An unique art exhibit featuring works of or about fish is on display in the Fine Arts Building on the McLennan Community College campus on weekdays through March.

The exhibit opened March 7, with Mike Ansaldo reading his poetry about fish and Ron Sullivan's drawings to the music of "Aquarius."

Sullivan met Ansaldo at Del Mar Junior College in Corpus Christi where both men are instructors. Ansaldo began composing poetry about Sullivan's drawings. Some of the poems are actually printed on the works.

Sullivan was born in Oklahoma, but he moved to California to fish, draw fish, and receive a master of fine arts degree from Sacramento State University. He went to Del Mar

to establish a department of sculpture and to fish in the Gulf of Mexico.

Sullivan's works have been shown at the University of California at Davis, the Davis Art Center, Sacramento Valley Academy of Arts, and Capitol Art Gallery. He has also received architectural sculpture commissions in California.

WACO, TEXAS 76703

City of Waco Turns Down Proposal To Install Traffic Light

The Student Services Committee was recently turned down on a proposal to the City of Waco to install a traffic signal at the intersection of Powell Drive and North 19th Street.

The City conducted a survey of the traffic density and the time which it takes automobiles to get out onto North 19th from Powell.

A letter to Dr. Wilbur Ball, President of MCC from J. E. Lykos, Director of Public Works said:

"This visual survey did not indicate that warrants for the installation of a traffic signal are met at this time...I appreciate your interest in this matter and if this office can be of further service to you, please let me know."

The traffic division conducted the survey. Leroy Campbell, traffic superintendent noted in his report that in the period from Jan. 1, 1969 until Feb. 2, 1970, only one of the three accidents that had occurred in

Gilliam Participates In Counseling Seminar

Larry Gilliam, dean of student services at McLennan Community College, presented a paper entitled Synthetic Confrontation Therapy at the American Education Research Association Convention in Minneapolis Thursday morning, March 5.

Gilliam was one of five participants in a symposium on Man-Machine System for Contemporary Counseling Practices. Other participants were from Southern Methodist University, Texas A & M University, Northwestern Oklahoma College, and the Palo Alto Unified School District.

The symposium discussed how computers may be used to aid in the counseling of students. The American Educational Research Association notes educational research in progress in the United States and publishes the Review of Educational Research, which is read by educators across the nation.

the area could have been prevented by a light at the intersection.

Campbell's statement further said that:

"...From delay studies of vehicles attempting to enter 19th Street from Powell Drive, it was determined that the average vehicular delay from 7:30 a.m. to 8:15 a.m. was 12 seconds per vehicle...Also similarly tabulated, are delays taken during the peak traffic delays from 12 p.m. until 1 p.m."

The statement noted that there was sufficient traffic coming from town on North 19th but "...over fifty (50) per cent of approach traffic volume used in the computations turned right

onto Powell Drive...which is a non-conflicting movement in regard to Powell Drive traffic waiting to enter 19th Street."

The survey said that the light on 19th and Park Lake Drive platooned the traffic which allowed gaps in which cars seeking to turn onto 19th could go between. The same gap was reflected in the traffic seeking to enter the campus in an east-bound direction.

In summary, the statement said, "With the accident rates and delays within satisfactory limits, indications are that the existing traffic handling abilities of the intersection are satisfactory without the necessity of a traffic signal."

Achievement Tests Give Planning Clues

By JAMES HILLIARD

Achievement tests are of no use to the educator unless the results of such tests are used in planning a student's educational curriculum, explained Psychologist Johnny Fulkerson in a speech given to MCC's TSEA chapter recently.

Fulkerson related his experience in the area of testing to the members and guests at the TSEA meeting. He is currently in charge of testing at Waco's Education Service Center.

"Implementation of the results of both achievement and intelligence tests is very important," related Fulkerson, "because these results can give educators clues as to the nature of a student's work capacity, his attitudes, and his special abilities." He explained that although tests are not definite measures of ability, they do serve as guides.

He added that testing often reveals character in a student. In elementary school children, for example, the various levels of character development in children of different grades can be measured through skill tests,

survey tests, and placement tests.

"Higher education is not, and should not be, completely determined on the basis of testing," he continued, "because the tests are simply one measure of a student." "Often, when the results of various tests are analyzed on the basis of the scores of a given student, we can draw various conclusions about the student's abilities."

Fulkerson emphasized that testing is beneficial only if teachers and administrators use the results carefully and efficiently. The main problem with secondary school testing, he explained, is that teachers do not successfully apply the results of tests to the needs of the students.

Coaching children for achievement tests should be avoided, he concluded, because the results of the tests must be accurate measures of the student's capacity to learn. With the results of the tests, teachers and administrators can try to improve the capacities of students on an individual basis.

David's Detour**No Flowers Please-
Just Send Letters**

I walked into the student publications office yesterday with a song in my heart and garlic on my breath. And lo! what do I see but a broken down editor.

There, sitting behind his heaped-up desk was my childhood hero, my idol, drinking uncarbonated sodas!

I stood frozen to the ground. What unforeseen calamity could have reduced this stalwart prince of a guy into the direlect before me? Could he have recieved his draft notice? Did Consuela turn him down Saturday night? Did Joe Namath get married?

All of these thoughts raced through my mind in those fleeting few instants. Then I rushed across the room and threw myself at his feet.

"Tony," I cried (sogging up his socks), "what's happened? Have they kicked you out of the League of Scorpio voters?"

He looked up from his 49th uncarbonated soda of the day and gazed at me with bleary eyes. "Play it again, Sam" he said.

"Alas! he does not remember me," I said. "Do not fear, Tony, my good friend and father image. I will stand by your side. I will help you to overcome."

So saying, I get out on a rigorous campaign to straighten him up. The first step was dealing with all that uncarbonated soda in his system.

After getting three gallons of carbonated water, I forced him to drink all of it. "This hurts me more than it does you," I said with a gleam in my eye (and pain in my stomach because that's where he kicked me).

We wandered back to his office after a cold shower and sat down to talk about his problem. "Tony, fearless leader," I said, looking him in the eye (which was pretty bloodshot), "you can level with me. What's the matter?"

"Young David, I know I can count on you (for haven't I taught you everything you know?). Maybe you can help me find the answer to my delima."

"I shall do everything in my power to help you. What is it?"

Tony said, "No one writes any letters to the editor. Do you think it's my breath?"

Knowing as all housewives do that carbonation kills all odors, I was able to look him in the eye and say, "No, it's not that. You mean to say that you haven't gotten a single letter to the editor this year?"

"Not one," he confirmed.

Realizing the seriousness of the situation, I left him with a pat on his back and a promise to help. And that is where you come in.

Yes, YOU, dear reader. You can help poor Tony. If you will, it doesn't take much. All you have to do is close your eyes and wish and believe. Then sit down and write four column inches to the editor.

DAVID WALLINGSFORD

Students Aware of Course Programs?

With the midpoint of the spring semester drawing near, students should become more aware of their course programs, according to Counselor Fred Scott.

"Now, freshmen should be trying to select their mentor college," he said, "because this will aid them in forming an accurate, clear degree plan." He added that a degree plan will help the student make certain that he is not taking courses which will not transfer.

The counseling office has many facilities for the student's use. Catalogues from most of the major Texas colleges are on file and may be checked out for home use. Also, college bulletins are available to interested students.

Should problems arise in degree planning, Scott suggested that students make an appointment with a counselor in order to receive help. The counselors will offer students assistance in formulating plans for the degree outline.

**Iranian Student Finds Out
United States Isn't Perfect**

By DIANE TEMPLETON

March 21 is a special day for Shiva Dadkhah, a McLennan Community College student from Teheran, Iran. In Iran, March 21, the first day of spring, is New Year's Day. It will be the year 3049 in Iran that day.

Shiva further explained the Iranian New Year celebration. "Every family plants seeds in a shallow tray. The grass grows green for spring." The tray serves as a centerpiece for the table, and seven things whose names begin with "S" are placed on it New Year's Eve.

There is a 13 day holiday to celebrate the New Year too. On the thirteenth day it is bad luck to stay at home. "You have to spend it outside the home," Shiva said. "People go on picnics."

Shiva has been at MCC for one year. She decided to attend MCC because her grandmother lives in Waco, and MCC accepted her without the prerequisite scholastic tests which foreign students are subject to take before admittance to an American college or university.

"I make myself like everything in the United States... In Iran I left everything. I thought

**3 Faculty Members
Elected To Office**

Three faculty members at McLennan Community College were elected to offices at the Texas Junior College Teachers Association Convention in Austin recently.

Mrs. Maxine Hart, instructor of Office Education, was chosen social chairman for the TJCTA. Don Tatum, chairman of the department of physical sciences at MCC, will serve as vice-chairman of the Physics Section. James Schwarz, instructor of biology, will act as chairman of the Biology Section for the Association.

THE HIGHLAND HERALD

Editor----- Tony Pederson

Assistant Publisher--Bill Stone
Staff Reporters--James Hilliard,
Donna Pick, Galen Strickland,
Tommy Stewart, Diane Templeton,
David Wallingsford.

The Highland Herald is a publication of the students of McLennan Community College, Waco, Texas. The Herald is published twice a month during the school year. Offices of The Herald are in the Science Building, Room 211, telephone is 750-0551, Ext. 383.

The Herald welcomes letters to the editor. Publication of signed letters will receive thorough consideration.

The opinions expressed in editorials do not necessarily reflect those of the college.

the United States would be perfect. But it's not. It is so hard to leave home."

Even though she learned some English at the Shahdough High School in Teheran, and she has been speaking in here for one year, Shiva says English is still difficult. "You can see by talking to me that I have a problem," Shiva timidly admitted.

She is studying Arabic, and she and her grandmother freely converse in Persian.

She has one familiar complaint about Waco, "There is nothing to do here!" Teheran is a modern city of three million. Shiva said that there is always a place to go dance in Teheran.

Shiva enjoys dancing, and she added, "I love to listen to Tom Jones!" She also belongs

to the International Club at Baylor University.

She also said it was not hard to make friends at MCC. "Everybody is so friendly and willing to help."

Still undecided about her major, Shiva plans to transfer to the University of Houston in the fall. Her brother came from Iran in January to attend school there. "I told him all about the United States, but they want to come and see it themselves."

Shiva's parents, two brothers, and one sister are still in Teheran. She hopes to visit them this summer.

An Iranian custom at the beginning of spring and the new year, is for a girl to tie blades of grass together in a bundle. Then her wish will come true.

We hope your wish, whatever it may be, comes true, Shiva, and happy New Year!

Campus Happenings

Officers of the Phi Chi chapter of Phi Theta Kappa, a junior college honorary scholastic fraternity at MCC, for the spring semester are Donna Pick, president; Diane Templeton, vice-president; and Joyce Bennett, secretary.

Glenn N. Clayton, Jr., freshman English instructor at MCC, will be leaving this spring semester to take a similar teaching position at Eastfield Campus, a junior college in Dallas.

Bill Wood, Bill Deford, and Bill Faulkner, Baptist Student Union members at MCC, attended the Student Missions Conference March 6-8 at the Southwestern Baptist Theological Seminary in Fort Worth. The theme of the conference was "Crisis."

Elaine K. Long, Health and Physical Education instructor at MCC, was wed Saturday morning Feb. 28 to Sidney Wayne Post, a coach at Lake Air Jr. High School. Also married Saturday were James Henderson, MCC speech and Drama teacher, and Virginia Ferguson.

The Third Annual Statewide Chicano Student Conference, sponsored by the League of Mexican American Students, was conducted at the University of Houston March 7 and 8. Those attending from MCC were Ernest Fraga, Johnny Lopez, and Joe Cabellero, who are members of the Mexican American Youth Organization in Waco.

The theme of the conference was "1970 Year of the Chicano." It consisted of workshop seminars on such topics as race relations, third political party formation, cultural aspects of Mexican Americans, and internal characteristics of the Mexican population.

**Lost and Found Reveals
Wide Variety of Items**

A casual glance through some of the items in the Lost and Found Department will reveal that students can lose anything from class rings to one tonnis shoes.

"We have really had some interesting items show up this year," said sophomore Marsha Lockwood, manager of the lost and found items. "Something unusual comes in every day."

When an item is found, it is turned in to the Counseling Office where it is placed with other lost articles. In some cases, building superintendents simply call the Office and describe articles which have been found in the buildings.

Most recently, some strange articles have made their way into the big cardboard box which serves to hold lost items. One pink tonnis shoe, a decorated make-up case, and a handful of

class rings are now in the box. Class rings are by far the most abundant articles in the box.

Text books are also common articles in the box, according to Miss Lockwood. "When texts are turned in," she said, "we can usually identify the owner easily because the books have names written in them. But after a few months, we begin thinking about clearing out the items, and the books can be sold to the bookstore."

Many of the items now in the lost and found box have been there for more than a year. In a few weeks, the box will be cleared of those items, and the Lost and Found Department will make room for more articles.

To identify an article as his, a student must give a description of the item. In cases where names are written in the books, however, this is not necessary.

Austin, MCC Folk Dancers

Do Their Fling

Don Barton and Debbie Koon Step Carefully

Art Hare says that it's "this way."

MCC Club Seeking To Have Fun And Gain Cultural Knowledge

The MCC Folk Dance Club, sponsored by Ray Murray and Mrs. Kay Post, got off to a swinging start recently when the Austin International Folk Dancers visited the campus. Murray and Mrs. Post are physical education instructors at MCC, and both have studied and taught dancing.

The main purpose of our club

is to dance and have fun," Murray said. "But we also want to expand our cultural knowledge and appreciation through learning the dances.

"The different ways people dance show elements of their customs."

The Austin Dancers, led by Art Hare, taught a variety of dances

from Czechoslovakia, Yugoslavia, Germany, Israel and Russia.

"We dance international dances," said Murray, "and not just the Americanized square dances. There are many different types of dances done in lines, circles and of course with partners."

Murray is instructor of two

folk dance classes during the day, but the club meets on Thursday nights from 8 to 10. The dances are open to the public from junior high age to senior citizen age.

Murray also pointed out that dances are taught every week. Each dance is taught three weeks in a row, and then only

reviewed from then on.

The MCC Club is planning to organize an exhibition group which will be able to perform on off-campus functions.

Membership in the club is open to any MCC Student and area resident. The Thursday night dances are held with no admission being charged.

Ray Murray and Bobbie Gillott begin to groove.

Bob Cosby gets all twisted up.

Baseball Team Takes Opening Doubleheader

The MCC Highlander baseball team began its 1970 season with two victories over Tyler Junior College Tuesday afternoon at Bellmead Lions Park. The Highlanders got off to a roaring start in the first game and held on for a 5-2 win and then nipped the Tyler visitors 7-6 in the final nine innings.

Mike Giles hit a double to send Mike McKissack and George Caldwell racing across the plate in the second inning of the first game, and Mike McGilvary singled in Babe Torres and Mike Amick in the sixth.

MCC's fifth run came when Giles whacked a home run over the right field fence.

The visitors collected five

runs off starter Rickey Harwell with the help of four errors in the second game, and Gary Reid had to come in relief.

Reid held Tyler scoreless the other six innings while the Highlanders were able to get one run in the sixth and ninth innings and four in the seventh.

The winning run came in the final inning when Torres banded a double to drive in Brown Smith who had reached base on a fielder's choice.

At press time, the Highlanders were scheduled to play Christian College of the Southwest in Dallas Saturday at 1 p.m. The next scheduled home game will be Tuesday against Hill Junior College. Game time is 3 p.m. at Bellmead Lions Park.

MCC Closes Season With 75-66 Loss

AMARILLO--The MCC Highlanders ended their 1969-70 basketball season last Thursday as they fell to a strong Howard County team, 75-66. The loss came in the first round of the Region Five junior college tournament.

The Highlanders held a three-point lead at halftime, but lost it soon after the half. Guard Jimmy Knox was not able to give full effort as he was suffering a collarbone separation in a scramble for a loose ball just before the first half ended.

Knox could only manage two points after his injury, and teammate Bruce Crowley collected only six.

Simpson Degrate, MCC's outstanding postman had to carry the load. Degrate, the Highlanders' leading scorer and rebounder, finished the night with 24 points.

Harry Johnson chipped in 16 and Dennis Edwards collected 10

The Highlanders went cold at the free throw line, hitting only 16 or 29 for 64 per cent. Howard County chunked in 21 of 28 for 75 per cent.

The Highlanders finished the season with a 19-11 record and were second-place representatives in the Central Division of the Texas Junior College Athletic Conference.

Here are the scoring totals for the 1969-70 Highlanders:

HIGHLANDER SCORING			
Player	PG	FT	TP
Simpson Degrate	304	203	811
Harry Johnson	122	83	347
Dennis Edwards	132	95	294
Bruce Crowley	87	52	224
Jimmy Knox	84	42	218
Mike Nelson	35	16	44
Iveon Mitchell	27	6	40
Robert Taylor	23	8	34
Don Greedy	14	11	29
Robert Chapman	10	4	21
Charles Beck	4	2	14

McLennan Linksters Swing Into Action

The first golf team of McLennan Community College will swing into action Thursday in the San Antonio College Invitational Tournament.

The golf team currently consists of two athletes on golf scholarships, Randy Greer and Butch Price.

Greer was a leading player on Richfield's District 14-AAAA championship team. Price was the no. 1 player on Gatesville's team last year.

Coach for the team is Vernon Cole, athletic director for MCC. Cole plans for the team to participate in ten tournaments during the season.

Cole also said that it is quite normal for a junior col-

lege team to have a two-man team, and that in the tournaments, there is a two-man division in addition to the four-man division and the competition for medalist honors.

Cole will be able to offer two more scholarships during the spring and summer when he is recruiting for the team.

"We feel this (a golf team) is just a part of a comprehensive program," he said. "If we are to have a good program, we've got to have golf. I am real optimistic about the program."

Greer and Price play their practice rounds at Lake Waco Country Club.

Nine Student Government Members Attend Conference

Representatives of the MCC Student Government will be attending a conference in Galveston this month.

The Texas Junior College Student Council Association is holding its annual convention on March 19-21. Members of the Student Congress will attend to present a program on leadership.

The group is presenting a leadership training program. It includes qualities of a good leader, what makes a good team, and a self-evaluation for student government leaders. The hour program will include several discussion groups to be guided by the representatives.

The Student Government scrapbook will also be presented for over-all competition at the convention. The scrapbook was a project of the Congress and was compiled by a committee headed by Pat Hurtado.

Clint Lewis, president of the student body, said that the convention "gives the student governments a chance to interact with the problems that face each of the campuses and to arrive at solutions acceptable to all. In general, it provides these governments with a chance to improve their own government through regarding others."

The nine people planning to attend the convention are Mike Alford, Brenda Allen, Bon Hughes, Pat Hurtado, Gary Jinks, Clint Lewis, Roy Nash, Kirby Pledge, and Susie Tompkins.

Ford Chief Advisor In Organizing Science Club

A club for science majors and interested science students is being organized at MCC with Robert Ford, chemistry teacher, as chief advisor.

Officers are Darryl Godfrey, president; Royce Fowler, vice-president; and Anna Howell, secretary. Mrs. Pat Norton and James Schwarz, Biology instructors, are also sponsors of the club.

The science club will be affiliated with the Texas Academy of Science at the collegiate level. Membership in the academy includes those interested in the environmental sciences, physical and biological sciences and mathematics.

According to President Darryl Godfrey, the science club will be especially valuable to sophomore science majors because one objective of the society is to promote independent, supervised research.

However, club membership does not exclude freshmen. "We've got quite a few sophomores in the club now, but we really need some freshmen to keep it going next year," said Joyce Bennett, a sophomore biology major.

One feature of the club which may be of particular interest

to freshman students is a tentative plan to sponsor a science lab similar to the math lab at MCC.

Future plans of the club include guest speakers on campus and the scheduling of field trips to four-year universities to acquaint student members with the facilities and the help available for science majors at various Texas colleges.

Activities tentatively planned that might be of interest include the formation of a campus nature trail and field trips to observe ecological habitats, fossils and the study of the floral and fauna of surrounding localities," said Mrs. Norton.

The MCC science club members are presently in the process of naming their organization and writing a constitution to become officially recognized on campus. Members of the constitution-writing committee are Donny Garrett, James Hilliard, David Jones, and the three club officers.

The club invites any student interested in the science club at MCC to attend the meetings tentatively being held every Wednesday at 10:00 in Room 200 of the Science Building.

Faculty Sponsors, Students Attend Science Convention

Recently six students and seven faculty members attended the 73rd annual convention of the Texas Academy of Science at San Angelo State University in San Angelo.

Faculty members attending were Mrs. Pat Norton, James Schwarz, Don Forester, biology teachers; Bob Ford, Joe Dean Zajlock, chemistry instructors; Don Tatum, Chairman of Department of Physical Science; and Hoyt J. Burnette, Chairman of Department of Biological Science.

Students in attendance at the convention were Joyce Bennett, Rita Bucy, David Jones, Mrs. Barbara Reinking, Steve Sager, and Barbara Williams.

"I thought that the convention was very interesting because many of the speakers had done further research on some of the topics I had studied and researched in my biology classes," said student Joyce Bennett.

Mrs. Norton concluded that the experiences gained from the convention will help the science club at MCC.

Free Golf Invitation Extended By Lions Park

Clyde Bennett of Waco Lions Park has extended an invitation to anyone wanting to play a free game of putt-putt golf at the Lions Park Course.

The coupon appearing on this page is good for one free game of putt-putt golf. The park will be open March 21 and the coupon is good until June 1.

The Lions Park is located at 1715 North 42nd. There will be free refreshments and souvenirs during the spring celebration.

Bennett also extends an invitation to putters to join the Amateur Putters Association. Membership fee is \$5.

Membership will enable a person to participate in the \$1,000 Amateur Putting Tour-

namment which will be held July 10. Winning this tournament would make a putter eligible to

participate in the \$100,000 Tournament at Nassau in the Bahama Islands.
