Fieldhouse Gets Board Scrutiny

The Board of Trustees approved the preliminary plans for the new fieldhouse last night at a board meeting.

The new fieldhouse will be built on the parking lot adjacent to the Child Care Center. The field house is being built to hold the fans because the present gymnasium is too small.

The gym will seat 2713 and will cost \$541,726.

The building has two levels to take advantage of the slope in the land and save economically, said Joe Raso, architect, and to save the existing trees.

The walls will be made of concrete and the gym floor will be made of wood. The roof will be sloping and made of metal.

Bob Sheehey brought up the idea of a concession area.

"We were thinking of a temporary type," said Dr. Ball.

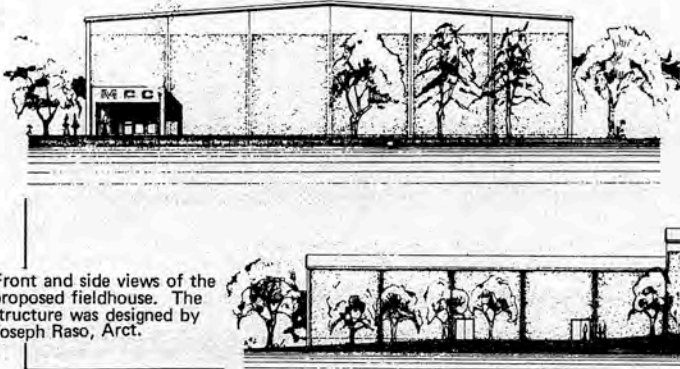

Several of the board members brought up the idea of permanent ticket offices.

Board members suggested several ways to put in a ticket office and concession area but Dr. Ball said that more than likely this would be getting into more money.

Some of the members suggested removing some of the retractable bleachers.

"I would rather build it too large than too small because we will end up with the same problem we have now, not enough seating area," said Guy King board member.

"I think we are looking at the people crowding at the door

Front and side views of the proposed fieldhouse. The structure was designed by Joseph Raso, Arct.

before 7 p.m. because they know they may not get in," said Richard Garcia.

Sheehey said "since there is only one entrance there would be a crowd at half time because

of fans going to the concession area and to the rest room.

Earl Harrison suggested air conditioning.

Air conditioning is estimated at \$71,000

Artists Display Talents

The Annual Student Art Show will be held from March 17 through April 9 in the Fine Arts Building. Judging for the show was held March 11, and Juror Ary J. Arlan selected 27 works from a possible 54 entries for placement in the show.

Students with works in the spring show are Denise Berger, Greg Blancett, Raydean Damon, Glen Downing, Sharon Draper, Ted Edmondson, Loretta Holley, Otto Matjevich, Rosemary Nichols, Chet Ragsdale, Darlene Rosser.

Orators Receive Award

Several MCC speech students received awards at the MCC Speech Festival last Friday.

David Wiley received superior ratings in poetry and prose interpretation; Paul Hill received an excellent rating in

Louis Santoyo, Ron Vaughan and Paul Wernette.

First place was awarded to Glen Downing for his overall entries, with the two paintings "Icon" and "Point Zero at Icon" being the strongest, according to Judge Arlan. Rosemary Nichols received second place for her painting "Sisters", and Louis Santoyo took third place with "Constructivity", a painted wood relief construction.

Merit awards were received by Otto Matjevich, Sharon Draper, Chet Ragsdale, Ted Edmondson and Ron Vaughan.

solo acting and a superior rating in oratory; Valerie Dumagan received an excellent rating in poetry interpretation and a superior rating in prose interpretation; Marvin Schroeder received an excellent rating in oratory; Lynn Hodd received an excellent rating in extemporaneous speaking; Glenn Whately received a superior rating in solo acting and Jamie Oliver received a superior rating in poetry.

In the Central Texas Novice Debate Series held at MCC Saturday, Dale Hughes placed fifth in individual speaking awards. Also, Hughes and Hood's affirmative case banning strip mining went undefeated in the tournament.

Broadcaster Visits Waco

Paul Harvey, noted radio broadcaster and author, will speak at 8 p.m. tomorrow in the Waco Convention Center. His appearance in Waco is sponsored by the Waco Christian School.

Harvey is a widely acclaimed commentator, having received awards from many organizations.

American Legion honored Harvey in 1952 with the radio award and in 1955 and 1957 with a citation of merit. He has been awarded the Freedom Foundation award nine times. Veterans of Foreign Wars presented him with a certificate of merit in 1953. He received the Bronze Christopher's award in 1953 and the award of honor from the Sumter Guards in 1955.

Oklahoma named him to its hall of fame in 1955. In 1962 he was named Top Commentator of the Year in Radio and Television for daily broadcasts. Also in 1962 he received the Great American KSEL award and ABC gave him a special award in 1963.

Harvey is the author of four books and four record albums.

His books include: "Remember These Things," "Autumn of Liberty," "The Rest of the Story" and "You Said It, Paul Harvey."

"Our Lives, Our Fortunes, and Our Sacred Honor," one of his records, will be given away at his appearance tomorrow. A

SG Plans Blood Drive

At the regular Monday meeting of Student Government, Rep. Dale Britt announced that a booth would be set up today and Thursday in the Student Center to sign people who wanted to give blood on Friday. The Nursing Club is co-sponsoring the blood drive.

President Bobby Kacal read a reply from Blinn Junior College on the establishment of a MCC yearbook. Rep. Spook Kellum also gave a progress report on the yearbook project.

Tentative dates for the Spring elections were also set. Dates for filing for office are March 29 through April 9. Elections would be held on April 28 and 29. The winners would be announced at the annual Highland Games.

Kacal also reminded members that the Texas Junior College Student Government Association State Convention would be April 11 through 13 in Dallas. MCC is running for the office of state secretary.

Applications Being Taken For Summer Financial Aid

Applications for financial aid for the summer semester should be submitted to the Financial Aids Office no later than April 1.

The Financial Aids Office has received Basic Educational Opportunity Grant applications for the 1976-77 academic year. Students planning to apply for this type of aid should submit their applications as soon as possible.

WEATHER

The extended forecast for Wednesday through Friday, calls for clear to partly cloudy with cool nights and warmer afternoons. We should begin a weather change starting late Thursday and continuing on into Friday. No rain is predicted for the first two days of this forecast.

Highest temperature last week was 76 degrees, with the lowest being 36 degrees.

Total rainfall for last week, was .42.

You could consider last week as being unusual, with the first part of the week starting off with cool days and cool nights. Then Wednesday through Friday we saw cool nights and warmer days.

Also in the early morning hours on Saturday sleet fell for a short time. On Sunday the temperatures started to warm up again.

Tests Prove Students Academically Weak

MCC students are bucking a national trend. Nationwide, students are entering college with a weaker academic background than the average student 10 years ago.

A 10-year decline in student test scores from the American College Testing Program (ACT) and the Scholastic Aptitude Test (SAT) have become "real" and "significant", ACT officials report.

"The decline is based on too many student records for it to be due to random yearly fluctuation," said Leon A. Munday, vice-president of research and development at ACT. Munday tried to explain the decline:

1. Many more students from the lower half of their high school classes are attending

college, and these have weaker academic preparation than traditional college students.

2. High school students are academically weaker today than they were five or ten years ago. For various reasons--including greater use of electives, lowering of teacher demands and expectations, a schooling directed relatively more by students than by teachers. Today's student leaves his school and enters college or work with less academic preparation than previous years' students."

Tests in English, math, social studies and natural sciences plus a composite of those scores are used for comparison on ACT tests. Scores can range from one to 36 and dropped an average of 1.2 points the last 10 years. SAT scores range from 200 to 800 and have declined 25.5 points during the same 10 years. The greatest decline on ACT was in social studies falling from 20.6 to 17.69. There was a slight increase in natural sciences scores.

Composite scores of freshmen entering MCC during the last three years have increased. In 1974-75 (the latest scores available) men's composites were 17.6 compared to the national 19.9. This is an increase from 16.9 in both 1972-73 and 1973-74.

Women rank slightly higher than the national average with 18.9 in 1974-75 compared to the

national 18.8. Women showed a greater improvement than men over the last three years. In

1972-73, women scored 15.7, and 1973-74 women scored 16.2 composite.

The national scores resulted from a test sampling of 45,272 students in 1974-75 and were reported by MCC's Counseling Office, Counselor Ed Lindsay is in charge of ACT research.

Lindsay said the scores fluctuate for many reasons. It is difficult to isolate one factor such as the quality of high schools. But the tests do measure achievement levels of students.

Women traditionally score higher than men, on the average, Lindsay said.

Nationally, women's scores dropped more than men's scores. The composite for men dropped less than one point (.9) compared to 1.6 points for women. The percentage of females using the ACT increased from 45 to 52 per cent reflecting their awareness of expanding career opportunities and increased recruiting efforts by colleges, Munday said.

ACT and SAT are used in various regions of the United States and the decline has been noted throughout the country.

There has been no decline in the percentage of students scoring high on the tests, but there is a moderate increase in those scoring low. Those scoring high (26-36) number 14 per cent. Low scorers (1 to 15) have increased from 27 to 33 per cent.

'But grandpa, I'd rather watch TV.'

National test makers (ACT and SAT) are trying to determine why the average college freshman today is not as well prepared as students 10 years ago.

New Adult Ed. Classes Prove Interesting

A wide range of adult recreation courses will be included in the McLennan Community College Continuing Education program for the 1976 spring semester. Several classes that will begin in March are archery, bridge, sailing, springboard diving and tennis.

Archery is an introduction to the fundamental techniques and rules of the sport, including care of the equipment. Classes begin March 27 and will be held for six weeks on Saturdays from 9 - 11 a.m. at the cost of \$8 per person.

Sailing I (fundamentals) begins classes March 22 and sailing 2 (advanced) begins March 23. The beginning course will cover subjects on nautical terms, sails, rigging, points of sailing, rules and safety. Sailing 2 will cover advanced sailing techniques including Nayru Yacht Racing Rules and basic sailing strategy. Both classes will consist mostly of on-lake instruction at Speegleville Park. All equipment is furnished. Sailing I will meet on Mondays and Sailing 2 will meet on Tuesday. Classes for both will be held for 8 weeks from 5:30 to 7:30 p.m. at a cost of \$15 per person.

Springboard diving instruction in the basic body positions, takeoffs, and types of dives begins classes March 18. Classes will be held Mondays and Wednesdays from 7:30 to 9:30 p.m. for six weeks. Tuition will be \$14.50 per person. For further information, contact the MCC Continuing Education Office at 756-6551, ext. 217.

Traffic Light Finally O.K.'d

Traffic will probably remain jammed at the intersection of North 19th and Powell Drive. There are plans for a traffic signal to be installed there, but it won't be erected until next September.

Although the City Council voted last week approving three traffic lights to control MCC area traffic, installation is still far off.

Traffic lights at 19th and Powell, 19th and College, and College and Lake Shore Drive were approved Tuesday about seven months after MCC's Student Services Council first asked for traffic control on Powell and North 19th.

City traffic engineer, Thomas Charlton said the installation, originally set for April, would be delayed until Sept. 1. North 19th is a state route, thus the state had to approve any lights planned by the city, he said.

The state did not approve the original plan, and the designed was changed to meet state requirements. Part of the funds for the lights will come from the

federal government's community development funds and this entails stringent control, Charlton said.

In addition to the lights, North 19th between Powell and College will be widened to a full four lanes plus left-turn bays at the two intersections. The construction is scheduled to be completed first, but "the construction will not delay installation of the lights," he said. Lights can be put up before construction is the widening is delayed.

Each intersection will have at least two lights (post and mast arm) for each approach to the intersection. Cost of the project is unclear at this time since bids for equipment are not complete. If equipment arrived on time, the lights should be in place by Sept. 1.

Greene Enjoys Challenge School Offers

Whether she's taping another segment of "Cathy's Corner" for KCEN-TV, performing on the stage of the Waco Civic Theater or becoming involved with MCC, Cathy Greene is primarily concerned with people, and she projects unique ideas about them.

Mrs. Greene recently became director of Support Services for the Physically Limited at MCC.

"I think the great thing about MCC is the age span it covers," she said. "In any one class you have people who've already been working, and you have the younger people. We each have something to share and teach each other."

"People are always growing and developing," she said. "I think it's great that no matter where we are in life we can stop and say, 'There's a different merry-go-round I'd like to be on.' I think it's great that a college is able to provide curriculum like this."

"I love the atmosphere of challenge here," said Mrs. Greene. "I don't like the term 'failure,'" she said. "A poor grade tells me either one or two things: either I haven't tried hard enough, or this is not my

thing."

"We have to be careful not to take the easy way out just by saying: 'this isn't my thing!'"

"We're all always 'becoming' or developing," she said.

It's not unusual that an individual like Mrs. Greene should coin the work 'becoming' to mean growth. Her energy is directed to several diverse projects and interests.

Though her job at MCC is full-time, she will continue to host "Cathy's Corner," which has been aired by KCEN-TV for 20 years. Mrs. Greene explained that through the taping process, she will have to be at KCEN only twice each week at the lunch hour.

"The program always gives me resources and new ideas for the program with which I'm working," she said.

Mrs. Greene explained that the Support Services Program offers help for the physically limited through notetakers, tutors and interpreters. She said that the program also helps with other problems that may arise for the physically limited such as registration or parking.

"We attempt to aid those with physical limitations to make the

same educational choices for their chosen vocations as those without limitations," said Mrs. Greene. "These students do not expect special treatment or special favors. However, some of their limitations present certain problems in the academic setting, and we attempt to minimize these.

This type of work is not new to Mrs. Greene. She has served as Director of Rehabilitation at Goodwill Industries. She has directed the Senior Luncheon and Activities Program since 1973 and has also served as director of the Retired Senior Volunteer Program.

Mrs. Greene will complete requirements for the masters degree in educational psychology with majors in counseling and guidance at Baylor University this spring.

"It seems I've always been involved with some type of non-profit organization," she said. "I've worked with every age group, and I love people from any age standpoint."

The stage has provided Mrs. Greene with a way to share one of her other talents—acting. She has participated in 25 high school, college and Waco Civic

Theater productions.

"I once checked into the theater area, and found that from Helen Hayes on down the

average yearly salary for union actors is \$400 per year," she said; "so I decided just to have fun at it."

Cathy Greene recently became director of Support Services for the Physically Limited at MCC. Mrs. Greene is the host of KCEN-TV's "Cathy's Corner." She says that she "loves the atmosphere of challenge" at MCC.

Pipeline

Alpha Sigma Phi

Attend Meeting

Eight members of Alpha Sigma Phi attended the Texas Academy of Science annual meeting at Texas A & M on March 4 through the 6. Those attending were sophomores Joe Piercy, Lucy Lewis, Mike Harry, Pat Sanders, Dennis Meurer, Billy Clendening, Beverly Blohowiak and freshman Gary Conway.

Mrs. Wallace Norton, club sponsor, was selected to serve on the Texas Academy of Science Collegiate Academy Committee.

Dennis Meurer was chosen to serve for second year as Northeast Director of the Collegiate Academy.

Joe Piercy presented a paper to the Collegiate Academy entitled "A Photomicrographic Survey of Cell Morphology."

Racquetball Deline Set

Entries in the Womens Intramural Racquetball competition are being taken until Friday, March 19th. Equipment for the game is available in the PE equipment room.

MCAPHER Meet

Members of MCAPHER are notified to meet in HPE 102 this Friday at 10 a.m.

Rodeo and Circle K Clubs Meet Today

Circle K and the Rodeo Club will also meet today for their respective meetings. Circle K will meet in the Liberal Arts building, room 204 and the

Rodeo Club will get together in the Liberal Arts building, room 105.

Counselors Luncheon

Held at MCC

The annual Counselors Day Luncheon will be held at McLenan Community College on Wednesday, March 17, 1976. Guests include counselors from area high schools.

MCC's Readers Theater will entertain at noon in the HPE Lecture Hall with scenes from the bicentennial series entitled "Amerigo Vespucci's Namesakes Celebrate America."

Information on new classes and programs planned for MCC in the 1976-77 school year will be presented. Susan Cochran, MCC counselor, is coordinating the event.

Cops Raid Campus

Eight representatives of the Arlington Police Department will be on campus, March 22, in the Highlander Room on the third floor of the Student Center.

Cagers Drop Two Games At Kansas

by Terry Tacker

Ollie Mack, converted on six free throw attempts in the last two minutes of the game to lead the San Jacinto Ravens to a 91-90 win over the Highlanders in the first round of the 1976 NJCAA National Tournament.

The contest was played Monday in the Hutchinson, Kansas arena. The Ravens held the biggest lead of the game, 85-79 with 3:05 left. The Highlanders then forced the Ravens into turnovers with their press and pulled ahead 86-85 with 1:53 remaining in the game. But the Ravens' Spike Jones, scored with 1:42 remaining and the Highlanders could never again regain the lead.

Mack, a 6-2 freshman, from Queens, New York, was fouled when the Ravens attempted to stall and each time converted the pressure-packed free throws.

The first half was close throughout with neither team able to pull far ahead. Guards, Chriss Gosner and Jim Harris, applied pressure to the Highlanders leading scorer, Vinnie Johnson, hoping to hold his scoring down. They did. Johnson had only eight points at halftime and was never able to lead the Highlanders fast break offense.

As the game progressed in the second half, the deeper the Highlanders got into trouble. To begin with, Mark Talaga injured his knee in the first half and didn't play in the last twenty minutes.

Freshman, Johnson picked up his four fouls early in the second half, and had to be taken out of the action with 13:09 left on the clock. Ed Marshall, who had been carrying the bulk of the Highlanders attack, collected his fourth foul with 8:29 left. Substitutes, Glenn Mennix,

picked up his fourth foul with 8:01 remaining. In all 24 fouls were called against the Highlanders while the Ravens picked up a total of 12.

Coach Johnny Carter had to juggle his lineup around several times to try to offset the Highlanders fouling. Johnson re-entered the game late in the second half but this time the Highlanders could not make up the difference.

Sophomore, John Derrick led the Highlanders scoring with 21 points. Johnson and Marshall had 20 each. Minnex collected 20 points and postman, Skippy Black had 10.

MCC vs Lakeland College

The Highlanders lost their second game in the tournament 99-91 to Lakeland College Tuesday morning. The setback eliminated MCC from future action in the tournament.

Vinnie Johnson tallied 29 points to lead the Highlanders, John Derrick, played his last game for MCC, scored 25. Ed Marshall and Glen Minnex added 12 and 11 points respectively.

The Highlanders started slowly probably due to the upset lost to San Jacinto the day before. However, they built a 29-22 lead when Easy Ed Marshall scored with 10:24 remaining in the half. But the Lakers from Mattoon, Ill. chipped away at the lead and held a 51-50 advantage at half time on a basket by Jim Bramlett with three seconds left.

In the second half the Highlanders, played without the services of Mark Talaga, were allowing Lakeland too many open shots; also, Marshall and Derrick were flaged with 4 fouls each early in the game. This allowed Lakeland to obtain an edge in the rebounding department.

Johnson scored six straight points and Minnex added a

bucket to tie the score at 77. But Lakeland proceeded to score five straight points to put them ahead 83-77. Johnson again went to work to put MCC back in front 84-83, but the lack of consistent freethrow shooting on the Highlander part, enabled the Lakers to pull out the victory.

MCC closed the season with an outstanding 30-5 record.

Pro Plays With Concert Band

The Concert Band will perform at 10 a.m. Friday in the Fine Arts Theatre. The Concert Band will be directed by Bill Hasket, music coordinator and instructor.

The guest soloist will be Richard Frazier.

Selections Frazier will perform with the band will include "Introduction and Dance" by Bilik and "Beelzebub" by Catozzi. The band will also play Gossec's "Military Symphony in F", "Allerseelen" by Strauss, Sousa's "Liberty Bell" and "El Capitan", "Canzona in Quart

Toni" by Frescobaldi, and "Intravention" by Tyra.

Frazier received his Bachelor's and Master's of Music Degrees from the University of Houston (U of H) where he played solo tuba in the Wind Ensemble and the Symphony Orchestra. At the U. of H. he studied tuba with William Rose, tubist with the Houston Symphony, and received the Ed Jablonski Memorial Award for Excellent Performance in Tuba.

He taught three and one-half years at Wharton County Junior College and during that time

performed as a soloist with the Texas Junior College Teacher Association All-State Junior College Band. He is in his third year as instructor of low brass at Sam Houston State University (SHSU) in Huntsville.

Richard has an assorted background of experiences as a professional musician including the Houston Symphony Orchestra, Houston Grand Opera, Houston Chamber Orchestra, Houston Ballet, Ice Capades, and the Ringling Bros-Barnum and Bailey Circus.

Astro Club Shows Classic Movie Tonight

After 300 man hours and nearly six months of labor, members of the Astronomy Club will present slides and narration of the investigation of the moon from Stonehenge to the 1969 Apollo moon landing.

Seven club members compiled the show partly to prove that the HPE lecture hall could be used to its fullest, said one member. The room was built with a series of rear-projection screens and sound equipment that has not been fully used because of its complexity.

The slide show will accompany two movies "Other Planets, No Place Like Earth," and "The Day the Earth Stood Still" (a science fiction film). The three will be shown at 7 p.m. tonight in the HPE Lecture Hall.

The slide show, titled "A Childhood's End" will last about 10 minutes and will utilize three projectors and a four-track sound tape. Sophomore David McCarty built an electronic device to allow the

projectors to "hear" instructions from the tape, but these tones are silent to the audience.

The tape carries sound effects, music and narration including radio transmissions from Apollo on the moon, count down sequences and recording of John F. Kennedy, comments when he initiated the moon mission in the early sixties.

The slides, taken by sophomore Mark Jessup, were reproduced from books and

magazines in the Baylor and MCC libraries which assisted the students in their work by offering conference rooms and all facilities, Keith Williford said.

Club sponsors are Gary and Wayne Duncan, math instructors.

The group plans to donate the show to the MCC media center for instructional use.

The seven created the show as a surprise for Club members.
