

March 29, 1923.

Doctor Edwin P. Hubble,
Mount Wilson Observatory,
Pasadena, Calif.

Dear Hubble:

A short time ago I received a letter from Schlesinger, asking if I would send him an abstract of the report our committee made out a year ago, for the American Section of the International Astronomical Union. He also suggested that it would be well to publish it in full perhaps, elsewhere, possibly in the A.S.P. Publications. He asked to have the abstract soon, and thus I hope you can write me any suggestions as to the abstracting of the report and send them with the copy of the report which I gave you ~~when you visited us~~ ^{soon} when you visited us, to take with you and look over at your convenience.

Shall be very glad to hear from you, on the above matter and to hear something of the news from Mount Wilson, and of your own interesting work. Please give my regards to the other men, too. Best Wishes,

Very truly yours,
