

Dear Dr. Slipher,

I have been drawing up a program for investigation of nebulae, at Mr. Hale's request, to serve as a guide to systematic research work at this Observatory. The remarks in my letter are taken from these notes. Mr. Hale has looked over the rough draft of this program, has approved of them, and has even considered the idea of publishing a suitable variation as a contribution. I shall forward you a copy of the program as soon as the draft is revised, to use in any way you see fit. I am only sorry it is not in shape to send at once.

Sincerely
Edwin Hubble.
