

My father bought me a birthday cake. It was chocolate inside with a white frosting. I did not get any gifts because it is not a custom in my country to celebrate birthdays. But I like the idea of birthday celebrations. I was born in 1979. I have lived in Lowell about 5 years. I go to The J.G. Pyne School. It is fun at the J.G. Pyne. My favorite subject in school is science. I like to study about how our bodies work, and plant life.

What are your favorite subjects?

I would like to hear from you.

Love,
Savy Chum
