FIRST Move operating lever (red handle) to the right. This closes curtain and unlocks machine for voting.

Second Pull down the individual voting lever over the name of the candidate of your choice. If you pull down the wrong one the first time, push it back up and pull down the right one. Your vote is not registered until you open the curtain so you can make any changes you want prior to returning the operating lever to the left.

THIRD After you have made your selections move the operating lever back to its original position on the left. This registers your vote, opens the curtain and clears the machine. YOU HAVE THEN VOTED.
