You may be interested in the experience of the Chas. L. Coon High School, Wilson, N. C. in transporting athletic teams. Possibly it is similar to your own experience.

Public opinion voiced against the danger and delay in transporting members of various athletic teams in automobiles led to the purchase of the new Hackney "Sports" Bus pictured on our literature. Now the team travels together under competent supervision, danger is minimized, and the delay and trouble in keeping several automobiles together and on time is completely eliminated. Athletic teams now arrive at their destination safely and comfortably.

The plan was made financially possible due to the extremely low cost of this All-Steel "Sports" body. Contributions to the School Athletic Association were gladly made by interested citizens. The same plan would work in your community.

The Hackney "Sports" Body is the lowest priced All-Steel body on the market equipped for athletic teams. And it is also very useful for bands and glee clubs.

May we hear from you? Please use the enclosed card for requesting further information and service.

Yours truly,

HACKNEY BROS. BODY CO.
