

May 28, 1937

To the Board of Visitors of The Citadel,

Gentlemen:

I have the honor to submit the following report of operations of The Citadel for the period since May 30, 1936.

ACADEMIC DEPARTMENT

On May 30, 1936, the Class of 1936 was graduated with 72 members.

The enrolment for the current term was 888, or 190 more than the enrolment for the previous year. There was a gain of 98 freshmen, 38 sophomores, 42 juniors, and 12 seniors. The trend of preference is indicated by the following senior and junior electives: Business Administration, 95; Engineering, 49; Pre-medical, 46; History, 15; English, 14; Chemistry, 11; Physics, 7; Languages, 0. This corresponds to the experience of the previous year.

The per centage of South Carolina cadets was 58.4 or a decrease of 1.8 from the preceding year. Four hundred and one came from other states; including two from Cuba. Thirty-five states are represented. Forty-four counties in South Carolina are patrons. Due to the discontinuance of scholarships, Berkeley and Pickens are not included. The largest number come from Charleston, 72; Greenville, 58; Florence, 30; Richland, 24; Richland, 24; Orangeburg, 21; and Spartanburg and Sumter, 19 each. The average age of freshmen is 17.8 years. The list of patrons is headed by 89 merchants and 81 farmers. Twelve per cent of the freshmen come from private schools and six per cent from other colleges.

The following losses have occurred during the year:

Honorably discharged	62
Dropped	8
Resigned	10
Dismissed	0
Granted diploma	1
Died	3
	<hr/>
Total	84

This is 9.4 per cent of the enrolment as compared to 7.2 per cent last year.

There was an increase of failures in the freshman class amounting to 20.4 per cent, and a reduction in the sophomore class amounting to 13.8 per cent. The per centages in the other classes vary little. Nine cadets, two of whom were deficient, left to enter other colleges and three left to prepare for the Naval Academy.

PERSONNEL

The administrative staff consisted of the President; the Surgeon, the Registrar, the Adjutant, the Assistant Registrar, the Quartermaster, the Commandant of Cadets, three Assistant Commandants, the Director of Cadet Affairs, and the Secretary of the Young Men's Christian Association. The Registrar and the Adjutant are also included in the Instructional Staff.

The Instructional Staff has consisted of 11 Professors, 9 Associate Professors, and 33 Assistant Professors, making a total of 53. This is an increase of 7 over the previous year and at least 6 additional Assistant Professors will be required next year. Ten have the Doctor's degree, 30 the Master's degree, and the remainder the Bachelor's degree or are officers of the Army. All who need to do so are taking summer courses to improve their degrees.

The clerical work has been performed satisfactorily by six secretaries. Two of the sergeants detailed with the military department have charge of the arms, equipment and store rooms. The remainder of the salaried personnel consists of the matron of the hospital and oge assistant, the mess officer, the assistant mess officer, the engineer and one assistant, the superintendent of grounds, the watchman, and two carpenters.

It is recommended that the present faculty and staff be reemployed with the exception of those recommended to be dropped or who resigned.

DEPARTMENTS

MATHEMATICS. The department has shown commendable activity. The faculty have attended professional conferences, and Lieut. Dye has made several professional contributions. Captain Saunders also has presented a paper. The head of the department reports that the coaching classes have been attended fairly well and that he believes some cadets were saved from failing through this opportunity.

Weekly conferences have been held on advanced mathematics. A major course in mathematics will be offered at the next session.

ENGLISH. It is believed that this department has been improved in scope of subject matter and in methods. The freshmen are helped to overcome their deficiencies by suiting the program to their needs. Stress is placed on speaking and writing correctly. A voice recording machine, constructed by Captain Razor, of the Physics department, has shown each cadet his weakness in speaking. The advance course is made more cultural. Public speaking has been taught and the State Oratorical Contest was won by Cadet Stone. The general interest of cadets is shown by the excellent quality of the cadet publications, especially the Shako. The Round Table and the revived Calliopean Society have afforded opportunity for debate. A number of cadets belong to the Poetry Society of South Carolina, of which Captain Harrison, of the department, is President.

The faculty have attended various professional conferences.

LANGUAGES. There has been a distinct change in methods and attitude in this department. As far as is practicable cadets are required to speak in the class room the language that is being taught. By means of the phonograph and records, the ear is enabled to perceive the best pronunciation. It is believed that a modern language should be spoken and understood and that ample opportunity is afforded to do so while learning the grammar and literature. A maximum amount of work is required of the students in the class room.

Major Wilson has organized voluntary classes of cadets and civilians and clubs have been formed at which conversation is conducted in the language concerned.

HISTORY. The head of the department reports an encouraging increase in reading, especially in the field of biography. He states: "While no student was required to return for extra work, the coaching hours which were consistently held two hours a week throughout the year by each member of the Department, were generally fairly well attended - often by those students whose grades were above passing. It is believed that this extra assistance will enable many students to pass who otherwise would have failed"

During the year, the faculty attended several professional conferences, at one of which a paper was presented by Major Coleman.

At the next term, a new course will be established under this department, calculated to prepare students for public service. This should open a new opportunity for an honorable career.

CHEMISTRY. During the last three years, a revision of the course in chemistry has been in progress to conform to the best practices in that subject. This has carried a heavy teaching load but the instruction has been of a high order. New courses have been introduced with corresponding benefit.

The faculty attended the meeting of the State Academy of Science. The head of the department pays high tribute to his assistants in which I concur. In recognition of the department as well as of the attainments of Cadet Hair, he has been granted a fellowship at the University of Georgia.

I wish especially to commend Captain Watkins for his resourcefulness, zeal and effectiveness in his courses in biology and geology and Lieut. Duckett for his mastery, industry, and skill in teaching.

ENGINEERING. The revised curriculum has been adopted with a view to preparing the students for a career. The head of the department recommends a number of changes in the other departments for engineering students. No doubt some can be effected and efforts are being made to do so.

Recently the department was visited by a fact finding committee from the Engineers' Council for Professional Development with a view to be accredited by the standards of that body.

The new engineering building with improved equipment will increase the efficiency of the department.

PHYSICS. This is a strong department and its teaching is of a high order. The equipment is satisfactory. The faculty attended the meetings of the American Physical Society and Colonel Smith, Captain Brenner and Captain Razor presented papers which were afterwards published.

Especial commendation is due to Captain Razor for his zeal, ability, and industry in keeping the electric clocks in order, manufacturing a voice recording machine, repairing the loud speaker and the superiority of his teaching as shown by the record of his students.

Captain Brenner rendered valuable service in making a study and report on the best type of light for cadet rooms.

BUSINESS ADMINISTRATION. The curriculum in this department is more comprehensive than that in most undergraduate colleges. The faculty have attended professional conferences and contributed papers. For the second year they have prepared papers that were read in the college and afterwards bound as "Current Economic Problems." Lieut. Brainard has prepared book reviews and delivered lectures outside of the college.

MILITARY SCIENCE AND TACTICS. The department has maintained its traditional standards as shown by the high degree of training of the cadets. The Corps was awarded a rating of "Excellent" at the recent annual inspection. Improvement in training is shown by winning the Corps Area Proficiency Cup at Fort McClellan, Ala., and winning the competitive drill at the R.O.T.C. Camp at Fort McClellan. Cadets Rosenberg and McCown were placed first and second in rifle practice at Fort McClellan and were selected for the Corps Area R.O.T.C. Rifle Team at Camp Perry, Ohio. The cadet platoon stood second in rifle practice at Fort McClellan and the cadet team won the rifle competitions with Clemson and Wofford Colleges.

Major Kirk and Captain Robertson are commended for the training in rifle practice.

Especial commendation is due to the Cadet Band which has shown the most praiseworthy zeal and efficiency. It has been much improved by the addition of a drum and bugle corps. Much credit is due to Mr. Metz and Cadets E.W. Sills, W.O. Benton and J.T. Morton for leadership and ability.

EDUCATION AND PSYCHOLOGY. The instruction in this department has been conducted entirely by Lieut. Ralya who is highly qualified in these fields. While no outstanding achievement is presented, it is believed that the purpose of making graduates eligible as teachers is being accomplished.

GENERAL

The year has been marked by a broad participation of the faculty in the meetings of professional societies. A list of conferences attended is attached. Actual expenses have been borne by The Citadel. There has been also increased activity in the production of papers on professional subjects. This has culminated in the issue of the first bulletin, containing excellent studies by Captain Harrison, Lieut. Skipper, and Lieut. Prior. At least four bulletins will be issued each year, including the catalog and the register. Arrangements with the postoffice are such that the cost of printing the literary numbers and the postage will not materially exceed the cost of mailing the catalog and the register heretofore. For this accomplishment the college is indebted to the initiative of Colonel LeTellier and the industry of Major Coleman who, as chairman of the bulletin committee, executed all details of editing and publishing. Ample material is already available for the fall issue.

TEACHING METHODS

Whatever may be the benefits of the military training and the character building elements of the college, it must be judged, in the last analysis, by the intellectual, cultural and technical attainments of the students. The faculty come from many colleges and universities and their teaching methods reflect the accepted practices of the educational world. The personnel are as fine a representation in character and intellect as probably could be found in any undergraduate college. Yet, I am constrained to believe that our teaching methods leave much to be desired and that it is within the grasp of the faculty to make The Citadel distinguished among colleges by reason of its superior product. This can not be attained quickly but must evolve from the consciousness and the zeal of the faculty. The foundation for improvement has been laid in the faculty conferences which, last year, were devoted to the art of teaching, and, this year, to the methods of improving the student's learning. Much can be done to develop in the student concentration, quick reading, thinking and understanding, reasoning, analysis and sound conclusions in all departments and to broaden his knowledge and his culture. A faculty committee has been appointed to study this problem and it is hoped to profit next year by concrete recommendations.

TESTS

The method of testing freshmen last year was continued. The class reported a week ahead of the opening of college. Besides the tests as to preparation and aptitude, they were oriented in the college and the city, talks were given to them by the President and others and they were matriculated and supplied with uniforms. A large per cent of the freshman classes are backward in English and mathematics. The two extra hours, provided by the curriculum in these subjects, must be used to overcome, as far as possible, these deficiencies. It is hoped that experience will improve the testing methods so as to arrive at a sound conclusion as to the capabilities and needs of each member of the class. It is the mission of the college to supply these needs rather than to assume that the student is incapable of overcoming them.

FACULTY COMMITTEES

The functioning of the college requires many services by the faculty beyond the class room. It is only by the contribution of the capacity of each individual that the institution can realize its maximum efficiency. To meet this need, the different activities have been decentralized under twenty-eight faculty committees. All have functioned most creditably though some have carried a much greater load than others.

The Placement Committee, of which Colonel LeTellier is chairman, has grown into an indispensable agency for bringing our graduates into contact with employers. During the past year, graduates could not be found to fill all of the openings presented by employers.

The Catalog Committee, under Colonel LeTellier, has improved the contents and printing of the catalog and has developed the program of issuing bulletins. He has also been chairman of the Round Table and Forum Committee, The Honorary Degree Committee, and the Commencement Committee, all of which have rendered most creditable service.

The Curriculum Committee, under Colonel Knox as chairman, has made several important studies and besides improving details, has organized the new electives in mathematics and public service.

The Auditing Committee, with Major Lewis as chairman, is composed mostly of members of the business administration department. It has spent much time in making the monthly audits of all funds except those of the Quartermaster.

No more capable or necessary service has been rendered than that of Major Myers, as chairman of the N.Y.A. Committee. He has devoted much time to the assignment of work, keeping records and making returns of a voluminous nature. His loyalty, zeal and tireless industry are highly commendable. He has also rendered valuable assistance with the broadcasting of the Glee Club and the operation of the public speaking equipment.

Colonel Prouty as acting chairman and Colonel Holliday as chairman of the Board in Control of Athletics have been of great assistance in the many details involved.

The Library Committee, of which Colonel Williams is chairman, has greatly improved the library and aided in the selection of books. The contribution of Major Wiles, as a member of this committee, has been invaluable.

Colonel Williams has also served as chairman of the Algernon Sydney Sullivan Award Committee.

Major Coleman, as chairman of the Bull Dog Committee, and Captain Harrison, as chairman of the Sphinx and Shako Committees, have improved these publications.

While mention can not be made of all, it is desired to record the obligation of the college to every one who has served on the committees and thereby contributed to the success of its administration.

SCHOLARSHIPS AND GIFTS

During the year, the college has been honored by the donation of a full paid scholarship by Colonel Clark Williams, of Camden, S.C., and New York. It is to be known as the Camden Scholarship and is to be filled by selection from graduates of the Camden High School. The qualifications are the same as for the First Division Scholarships.

STUDENT AID

The National Youth Administration has supplied \$11,745.00 during the year for the employment of 192 cadets. Without this aid, it must be assumed that they could not have attended college. At the same time, they have contributed to the economy of administration by performing duties of service of which the college would have been deprived.

DISCIPLINE

The Commandant of Cadets was furnished with three assistants for the conduct of his department. He reports: "The discipline of the Corps of Cadets during the year has been the best

I've seen." He especially commends Cadet Lt. Col. James, A.L., and Cadet Major Trotti as superior cadets.

With reference to the "detail" system he says:

"The detail system, after an inspiring sermon by the President to the Senior Class and other missionary work, was abolished by General Order No. 16, dated January 6. The Senior Class accepted this order in fine spirit which meant that they would not permit underclassmen privileges denied them and made the order effective. From observation and frequent inspections and interviews with dependable cadet officers, it is my conviction that the Detail System at The Citadel is dead. That this has been accomplished without the use of harsh measures is due mainly to the fine attitude and cooperation of the present Senior Class, and there is evidence in the present Junior Class to 'carry on' and improve conditions next year."

The President desires to commend the Senior Class for the loyalty, courage and sound thinking that have characterized the attitude of its members. It has been dominated by men of the highest character and intellect and it leaves a record and an impress for good upon the Corps that will be lasting.

The report dated Apr. 25 shows that 261 cadets or 32 per cent of the Corps have merits. The Commandant reports more interest in conduct records than formerly.

Seven cadets have been punished for drinking, as compared to eleven last year. All except one were on returning from leave. Instead of suspending cadets for dismissal, the policy has been adopted of giving them leave in the cases where dismissal is necessary and allowing them to resign. This appears to be to the interest of all concerned and to vindicate the standards of discipline.

The Commandant further remarks:

"In reporting on the discipline of the Corps I feel it my duty to say that par. 52 College Regulations, as far as I am able to determine, is 'dead'. The reputation and high standard of The Citadel as a Military College was built and has been maintained by adherence to the principle clearly defined in par. 52, and to nullify it by saying in effect to cadets that only officers of the Commandant's Department will report cadets for violations of Regulations and existing orders is nothing more nor less than a tragedy. Any officer of the Faculty or Administrative Staff holding views contrary to the provisions of Par. 52 College Regulations is out of place at The Citadel. He should not be commissioned and allowed to wear The Citadel uniform without accepting the responsibilities devolving upon the office. I really think every Citadel officer should take an oath of office the same as any other State Official. They should at least be required to sign a written acceptance before The Citadel Adjutant."

There is no doubt that a serious condition exists and has existed in the attitude of the faculty as to discipline. The duty of officer in charge was so distasteful that they have been relieved from that detail for the past three years. Since then, the feeling has increased, if possible, that a teacher's duty towards cadets did not exist beyond the class room walls. Disorder in the halls has been ignored by them when their presence or a word at the door would have prevented or stopped it. In spite of my estimate of their high character and attainments, I can not resist the conviction that the military features of the college are distasteful to many. This is shown not only by failure to assert authority but by the attitude towards the uniform particularly, and military formalities. It would appear that there exists a feeling that the performance of the duties imposed by par. 52, College Regulations would antagonize cadets. The contrary is the case and cadets have more respect for anyone who performs his duty with good faith and impartiality.

There is, of course, no recourse to discipline for the faculty and the President can not exercise monitorial duty over

them. The only remedy is to recommend is that those who are out of sympathy with the military character of the college be dropped. It is hoped that the condition can be remedied by the good sense and fidelity of all concerned without a resort to any extreme measures.

HEALTH

The report of the surgeon states that there has been approximately fifty percent less admissions to the hospital than last year. He feels that this is partly due to having the Corps remain in the grounds for two weeks after the Christmas furlough and having reveille one hour later from January to the middle of March. There were only 19 cases of influenza, 3 of Vincent's Angina and one of pneumonia. Operations include 5 appendicitis, 1 intestinal obstruction and 1 extraction of teeth. There were 18 injuries and 13 serious illnesses.

The most tragic incident in the history of the college occurred when Cadets T.H. Lancy, N.O. Harris and W.M. Walters were killed in an automobile accident on October 30, while returning from the football game at Orangeburg. They were young men of the highest character and promise and their untimely death shadowed the year with sorrow. Efforts have been made to safe guard cadets in the future from exposure to such danger.

The increase in the size of the Corps requires that another ward be built to the hospital. Funds for this purpose are included in the appropriation bill for 1937-1938.

I desire to express my sense of gratitude and obligation to Dr. Cathcart whose skill and devotion to our sick and health conditions have been beyond praise. To Mrs. Malloy is due our deep appreciation for her unselfish service and untiring labor in ministering to all who need her.

LIBRARY

Five thousand dollars were allotted to the library for books and \$3,809.67 have been spent to date. Six hundred and ten dollars have been spent for supplies. Fourteen hundred and seventy four books have been added, making a total of 15,992 after expending 294 that were worn out. One hundred and sixty-six magazines have been received and ten newspapers. Five hundred and thirty-two books have been rebound. The purchases over the last three years have supplied an excellent collection of up to date books of all kinds, as well as standard works in literature and science. However, the library is still far below the standard required for a college and it is proposed to allot ten thousand dollars from the next appropriation to help overcome this deficiency.

ATHLETICS

The Director of Cadet Affairs reports:

"Under the Board in Control of Athletics, intercollegiate sports; including football, basket ball, boxing, track, baseball, tennis, and golf and Intramural sports of football; soft ball; basket ball, boxing, wrestling, swimming, tennis, horseshoes, track and volley ball have been sponsored. It can truly be said that The Citadel has had its most comprehensive sports program during the session now closing and has reached by greater odds, a higher percentage of an enlarged Corps of Cadets."

Every effort is made to interest all cadets in some sport. It is believed that without a comparable system of procurement the record of our contests has been creditable to the players and the coaches.

It is planned to construct three additional tennis courts and to dredge a channel to the river for sailing.

Mr. Gressett, as athletic director, and Mr. Norman, Mr. Brackett and Mr. Matthews, as coaches are commended for their ability and their devotion to their work.

CADET ACTIVITIES

Major D.S. McAlister has ably administered the following activities: Athletics, canteen, tailor shop, clothing and book shop, shoe shop, barber shop, printing shop, cadet dances, cadet orchestra and glee club, cadet N.Y.A. employment, the Sphinx, the Bull Dog, the Shako and the Beach House.

The finances have been well administered and all accounts are solvent.

Through the generosity of Mr. M.L. McLeod, the owner, the Beach House at Folly has been leased for a year at a nominal cost. It should afford a much needed opportunity for cadets and the faculty and their families to enjoy this healthful recreation.

The cadet glee club and choir have improved under the teaching of Mr. Ivar Skougaard and the glee club has rendered a number of broadcasts and ~~have~~ given concerts at several places which were well received.

Y. M. C. A.

The Y.M.C.A. has continued to render extensive and indispensable service under Mr. J.M. Leland, as Secretary. From the arrival of the freshmen to graduation the cadet is conscious of the aid of this organization. During the year, a number of cadets participated in religious conferences. Bible classes were conducted under the ministers of Charleston and Colonel Prouty. Two hundred and twenty-seven cadets received certificates for completing the courses.

Daily religious exercises at breakfast have been conducted by Mr. Leland and Chapel services have been held every Sunday with a visiting minister officiating. Vesper services were held until the Christmas holiday with cadets talking on some religious topic each Sunday evening.

The total cadet membership of the Y.M.C.A. was 857. Cadet McCown, as president, has earned the highest commendation for his example and his wide influence for good. The cadet cabinet have also served in the most meritorious manner.

The postoffice and the recreation rooms in barracks have been amply managed by this department. The pool tables are self-supporting.

Religious emphasis week was conducted again by Rev. John H. Clifford, of Brooklyn, N.Y., on May 2 to 9. The services were attended by large numbers of cadets, thus demonstrating that the religious spirit for which the Corps has long been noted still gives to our graduates that character of character without which education is so often ineffective.

It is a pleasure to record that the Rev. George H. Atkinson, a Citadel alumnus, has presented to the Y.M.C.A., in honor of the late Frank Whilden and T.A. Jamison, 800 hymnals for the Y.M.C.A. services and 1000 hymnals for the Chapel.

OTHER RELIGIOUS GROUPS

The Catholic cadets are organized into a class which meets for instruction under a priest every Sunday evening.

Both Catholic and Jewish cadets attend the churches of their faith.

PROCUREMENT

The increased enrolment and the applications already received for the next year indicate that a growing number of young

men and their parents are finding that The Citadel offers the opportunities for the kind of education they desire. In general those who come represent the highest type of American youth.

FINANCES

By careful economy, the college has operated efficiently within the income. While the salary scale has been maintained, it is not commensurate with the high character of service desired.

Much credit is due to Master Sergeant R.A. Schellin, the mess officer, for operating an excellent mess without any increase of fees.

The laundry has been much improved by the addition of new machinery and is operated efficiently by Mrs. M.A. Williams.

NEW BUILDINGS

The progress on the new buildings has been slow and much of the work unsatisfactory. While the time for completing the officers' quarters and the mess hall was extended to May 25 the contractor reported them ready for inspection for acceptance several weeks ago. This inspection was carefully made by the Chairman of the Board of Visitors, the President and Colonel LeTellier. Many serious defects were noted and, after the contractor had corrected them as far as he intended a second inspection was made. As a result the architects were informed that the poor workmanship and materials entitled The Citadel to an allowance of \$6,910.00 on the project. Nothing further has been done. Neither the architects nor the attorney has been of any material assistance in making an adjustment.

The progress on the Chapel is very slow and no prediction can be made as to its completion.

In the meantime the federal fund was increased by \$69,000.00 and authority was obtained to construct an engineering building from the grant portion of the total loan. The contract was let and the building appears to be progressing satisfactorily. The loan also provides for the seats, wainscoting and chancel, and for the organ in the Chapel.

Through the vision and resourcefulness of Major Simons, the opportunity to present memorial windows to individuals and classes was afforded the alumni. As a result, 30 memorial windows and 15 class windows have been provided for the Chapel and others are expected at an early date. Thus, this noble building will become a shrine for Citadel men as well as a place of worship.

The annual appropriation bill authorizes an additional ward to the hospital during the fiscal year 1937-1938 and a special bill for construction at colleges carries \$300,000.00 for a new barrack at The Citadel. It is also necessary to purchase a new boiler with appliances and to extend the boiler house to contain it.

In order to accommodate the prospective size of the Corps, all activities will be removed from barracks and the entire available space will be used for cadets. The old mess hall and kitchen will be converted into rooms to receive all cadet administration and activities.

The appropriation for roads in the fiscal year 1936-1937 has enabled The Citadel to have a complete system of excellent roads. The state road department is now engaged in constructing them and it is expected that they will be completed at an early date.

In all new construction Colonel LeTellier has represented the college as adviser and inspector. His professional knowledge and his fidelity to the institution have made his services of incalculable value. He prevented much inferior work and has exposed that which could not be prevented. He has handled all contracts and administrative details with the federal government, involving voluminous and meticulous specifications, changes and regulations.

At the same time, he has conducted his department and given six hours a week to classes. The college is deeply indebted to him and I wish to record my appreciation and commendation.

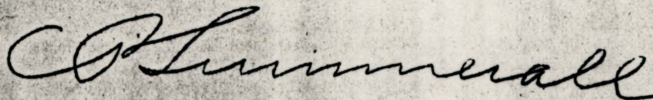

THE OLD CITADEL

Due to the increase in the faculty, all of the apartments in this building will be required when the new quarters are occupied.

CONCLUSION

In closing, I wish to acknowledge the sympathetic support of the Board of Visitors, especially of the Chairman, the cooperation of the faculty and staff and the response of the Corps of Cadets.

Very respectfully,

C.P. Summerall
President
