MERIT ROLLS

POSITION IN CLASS. The marks on which the merit rolls are made are obtained by multiplying the average in each branch by its "weight." The aggregate of these "weighted averages," with the Conduct Marks added in, determine the relative *class standing* of cadets.

WEIGHTS. The weights given in the various subjects are proportional to the time assigned them in the schedule of recitations.

ACADEMIC STANDARD. A minimum average of 50 per cent is required in each department, and a "general average" of 70 per cent. of the aggregate—not including the Conduct Mark—is required for advancement to a higher class and for graduation.

CONDUCT MARK. The value of the conduct mark is fixed at five per cent of the Academic aggregate.

CONDUCT ROLL. Rolls exhibiting the relative standing of the cadets in Conduct shall be formed by the President at the June examination for the whole Academic Year, in the following manner:

1st. Merits. Merits shall be awarded to the cadets upon the following basis.

For perfect Conduct for one week.....1

2nd. Demerits. To all the recorded delinquencies of the cadets shall be affixed a number of demerits, not exceeding 10, corresponding to the degree of criminality.

In determining standing of the "Conduct Roll," Merits and Demerits shall have correlative value.

DEFICIENCY IN CONDUCT. When any cadet shall have a number expressing his demerits on the general Conduct Roll greater than 200 for his Freshman year, 170 for his Sophomore year, 150 for his Junior year, 130 for his Senior year, such cadet shall be declared deficient in Conduct, and be immediately suspended, and reported to the Board of Visitors at its next meeting.

MERIT ROLL
The marks on which the merit roll is made
are obtained by multiplying the marks on each branch by its "weight."
The aggregate of these "weighted averages," with the Conduct Marks,
is used to determine the relative standing of cadets.

CADETS
OF
THE CITADEL,
THE MILITARY COLLEGE OF SOUTH CAROLINA

IN THEIR RESPECTIVE CLASSES

FOR THE SESSION 1926-27.

CLASSIFICATION OF CADETS

The cadets are arranged in four distinct classes, corresponding to the four years of study. The cadets employed on the first year's course constitute the Freshman Class; those on the second year's course, the Sophomore Class; those on the third year's course, the Junior Class; and those on the fourth year's course, the Senior Class.

NOTE.

Those cadets whose names appear in CAPITALS are officially selected for publication, conformably to a regulation which requires the names of the most distinguished cadets not exceeding two in each class, to be reported for this purpose at each Annual Examination.

DEPARTMENTS OF INSTRUCTION

COURSES AND DEGREES

The courses in the freshman and sophomore classes are prescribed, and are the same for all students. At the beginning of the jounior year, students are offered optional courses in civil engineering, chemistry, physics and electricity, premedical preparation, literature, history, and languages, and business administration.

The session of thirty-six weeks is divided into two equal semesters. The unit of credit in the various courses is one hour a week for one semester,—two hours of laboratory being counted as one. The standard course is one which has a semester credit of three; that is, a course which is taken three hours a week for one semester of eighteen weeks.

The work of a semester is graded as follows: four monthly grades, each of a maximum value of one hundred, are recorded, based on the daily class-room work. At the end of the semester, an examination is held covering the entire ground gone over during the four months, the maximum mark being two hundred. The semester grade is then found by averaging the monthly and examination marks.

The passing grade is an average of seventy. A student who has a passing grade on at least half of his courses and no average below sixty, will receive full credit for the work of the semester. An average of less than sixty, but more than fifty, will be marked "conditioned." No credit will be given nor condition allowed for a course in which the Student's average is below fifty; but he will be required to repeat the course and make a satisfactory record in order to receive credit. No student will be advanced to a higher class with more than one "conditioned" course.

The monthly and semester percentages will be published only approximately by letter grade: A representing an average of 90 to 100; B, 80 to 90; C, 70 to 80; D, 60 to 70; E, 50 to 60; F, below 50.

A minimum total of 148 semester hours, or 74 credit hours is required for graduation.

The degree of Bachelor of Science is awarded upon the satisfactory completion of courses in engineering, science, and business administration. The degree of Bachelor of Arts is awarded upon the completion of the literature courses.

The degree of civil engineer is awarded to graduates in engineering after at least three years of responsible work in their profession and the submission of a satisfactory thesis on some engineering subject.
