Re: Discussion with PET on Sunday, 9 October 1982

Paul has two ideas that he would like to see us follow up on:

1) Gov. Jerry Brown just signed a bill into law authorizing/mandating every classroom to have a computer. Paul would like to see such a bill introduced into the State House through McGee and Bulger.

First, we must get a copy of the California Legislation and ~~nd~~ work on an appropriate bill. Secondly, we must sell it to the legislators with as many co-sponsors as possible.

I am comfortable working on this request, and will ~~begin~~ begin making inquiries

2) Paul's second idea addresses "boring Massachusetts' license plates". Paul wants this office to sponsor a competition for high schoolers in which they would present alternative designs for a license plates. We would judge the designs and pick out the 5 best and submit those to the state. The winners would receive a ~~xx~~ some reward, a luxurious dinner for themselves and a guest at some fashionable place with Paul as teh guest as an example. As to who shall ~~x~~ judge and using what criteria, well that has been left for discussion.
