

Seabrook Statement
Friday Aug. 11, 1978

The NRC decision doesn't obviate the problems we have encountered regarding regulatory ~~and nuclear power~~ the process. ^{and} those problems will continue and we need to address them

as we are doing in our congressional hearings which ^{aim at} ~~should~~ reform the licensing procedures. ~~Certainly~~ = today's decision doesn't preclude

more appeals and a continuation of the difficulties ^{we've seen in the past in} resolving the basic questions ^{OF} ~~regarding~~ Seabrook.
