

PAUL'S STATEMENT

I am impressed by

The hearings clearly demonstrate the polarization on the question of Seabrook, the depth of division on the issue. It shows that ~~demanded~~ the enormous expenditure of money would not have occurred if the applicant prior to resolution of issues had not begun construction.

Mr

Not even agreement of what should be considered during the licensing procedures of a nuclear power plant.

Have to face up how deep the divisions are on energy issues including nuclear and come to grips with it, otherwise, we won't get anywhere.

*not so much interest in process but
issue of nuclear energy - yes or no -
analogy - addict - been addicted along x
prob is the addiction - arguing supply -
have to argue demand - I'm offended by
extremism - those against writing backlash
by Thomson's - prob of civil liberties*

*Public Service Company
altern sources
intervenor
environ*

*So much has to be done
fighting as needed to
fight for conserv +
altern -*

*Catalytic approach to energy problems
some resp. to underst long term implic
of what advocating - What it means
in long term -*

*unhealthy to look at it for God on our side
Brown's posture close to my own -
reasonable concern of that site
energy issue potential when all
but owe it to our children -*

*- where are you people when talk about altern -
energy sources, conservation*
