Reality of the present
moment-to-moment,
causes our frail links with the past
to slip from our unsure grasp.

Oblivious
to the injuries
it imposes upon each individual,
discovery manifests itself in
forms of change, not of the
world around us, but rather in
the form of changes imposed upon
us from and
of within.

S P O N T A N E I T Y

I Found the Me

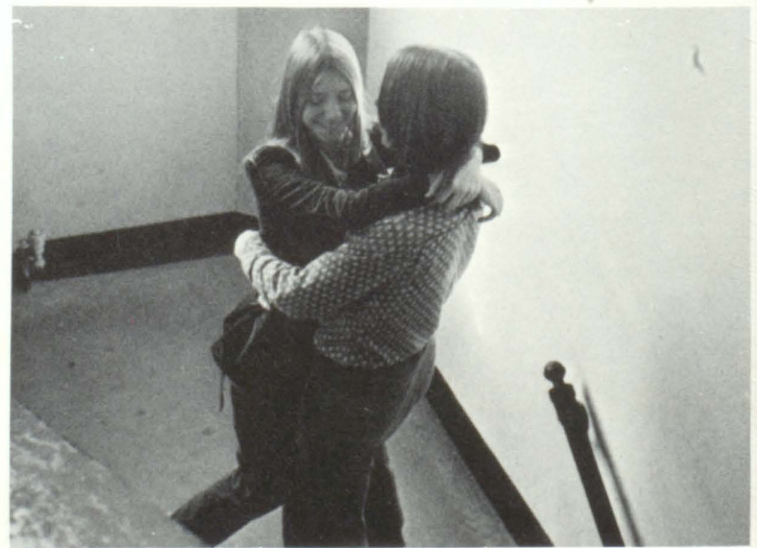

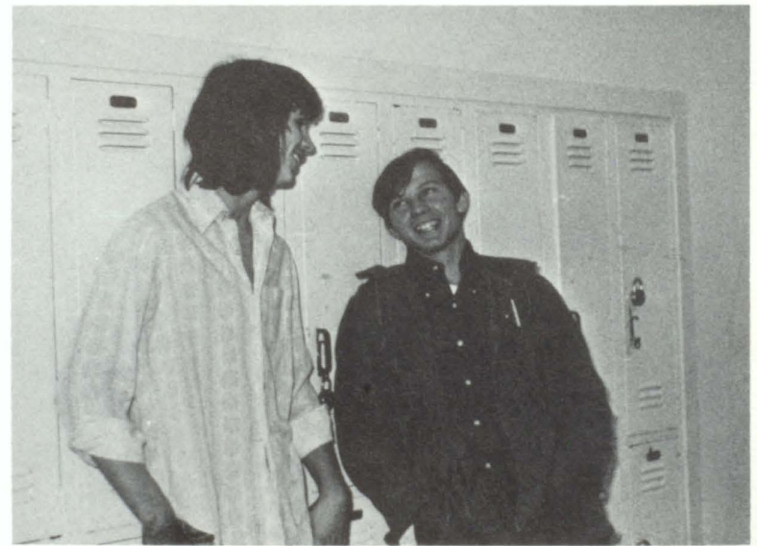

In the beginning, there existed simply me. Inside me was a me I didn't know, a separate entity. I searched, grew, and expanded until I found the me inside me.

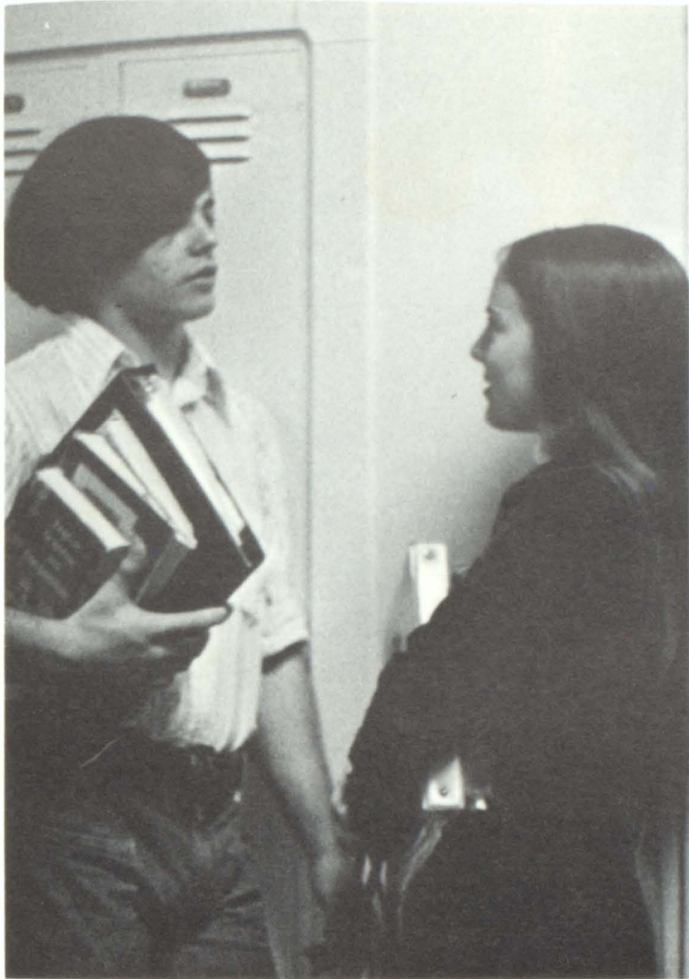

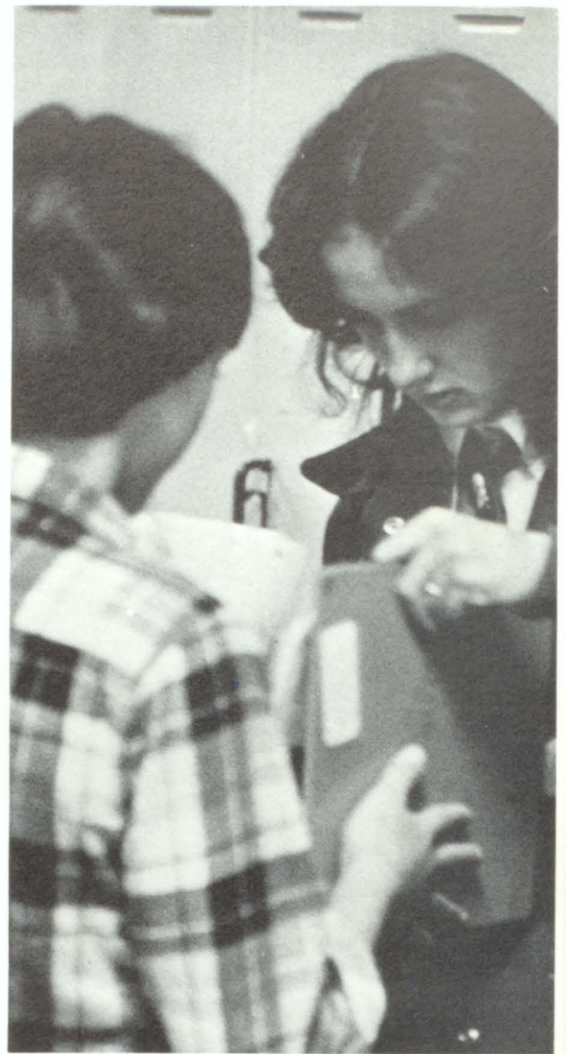

Being An Us

Soon, I found that an alone me gets lonely so, I built a relationship with a someone else. Together we learned to share parts of ourselves. Within us we discovered true closness.

Sharing Interests

I still knew that I must not draw into myself. To really belong, I had to find my own special crowd to share my interests.

Learning To Fit In

Satisfied with my own special crowd, I sat back and looked around. Something was missing. I had much left to give. Needing an outlet to express myself, I entered an organization.

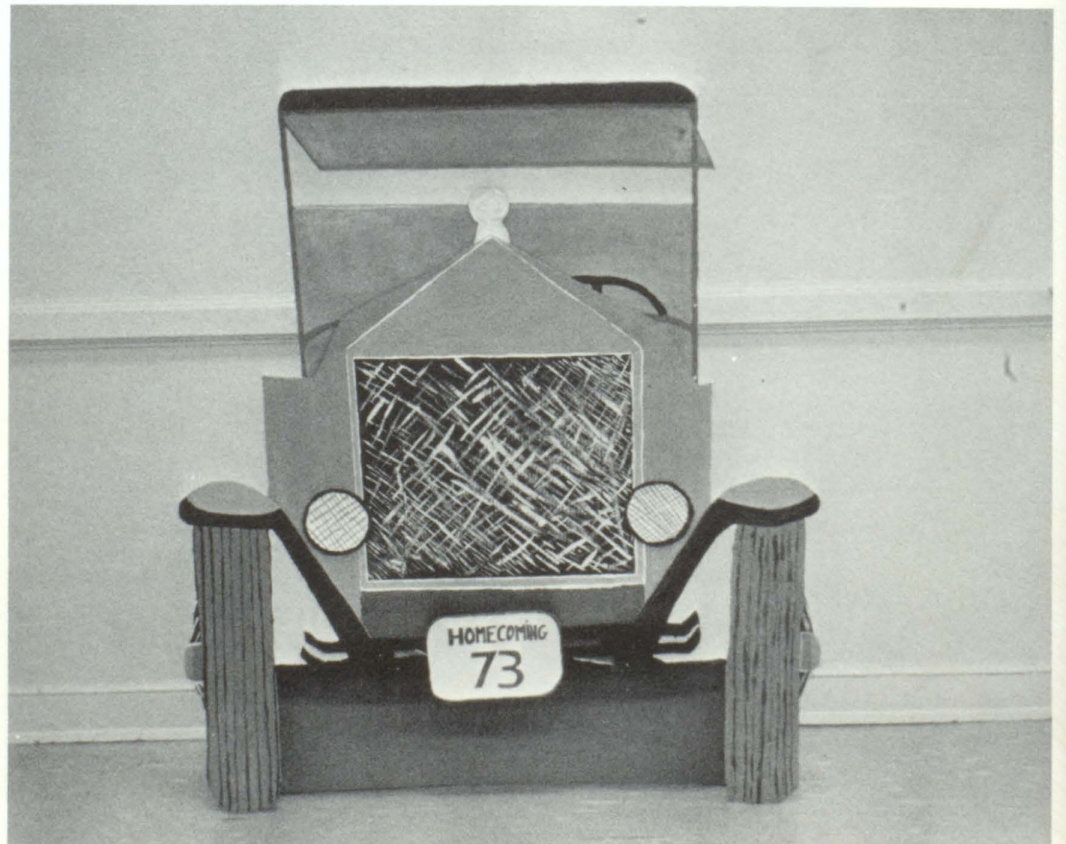

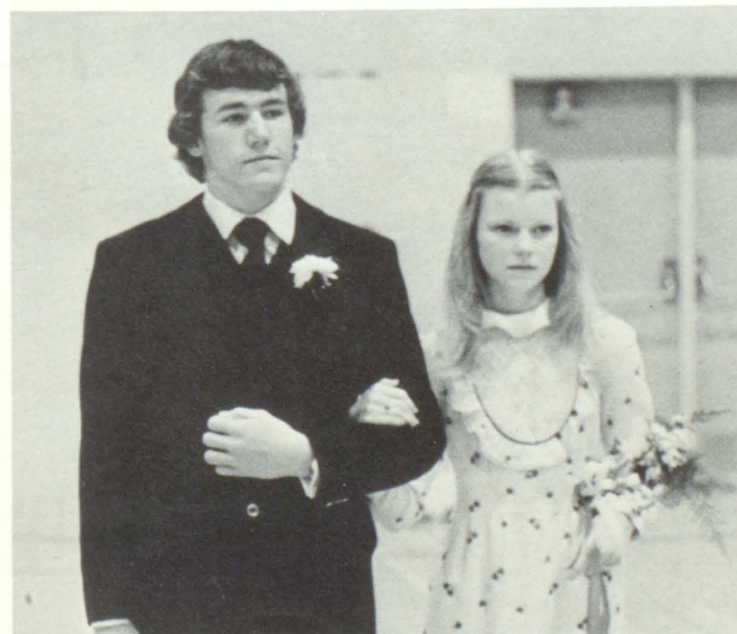

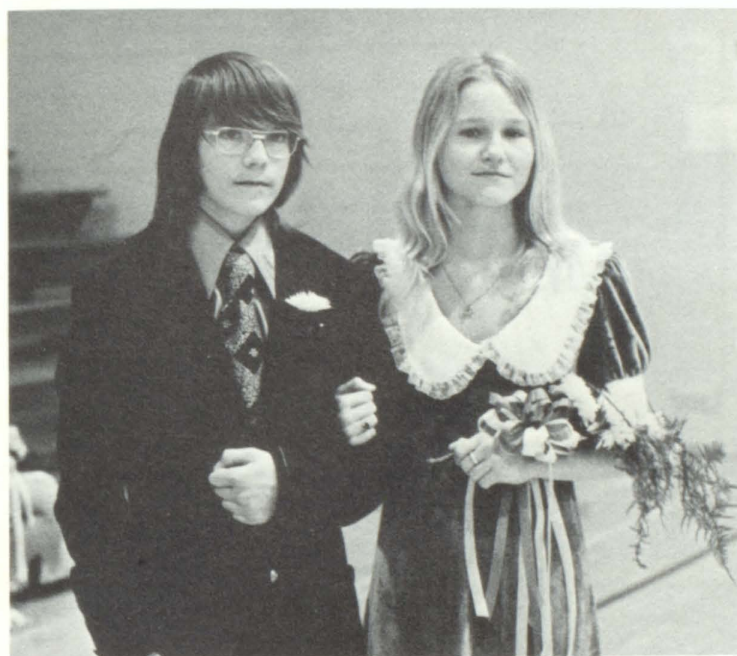

Self in the Crowd

In my quest for my own personal me, I found many times to put my me, a someone else, our crowd, and the organization together to improve our school. One of these times was Homecoming. Now my me was complete.

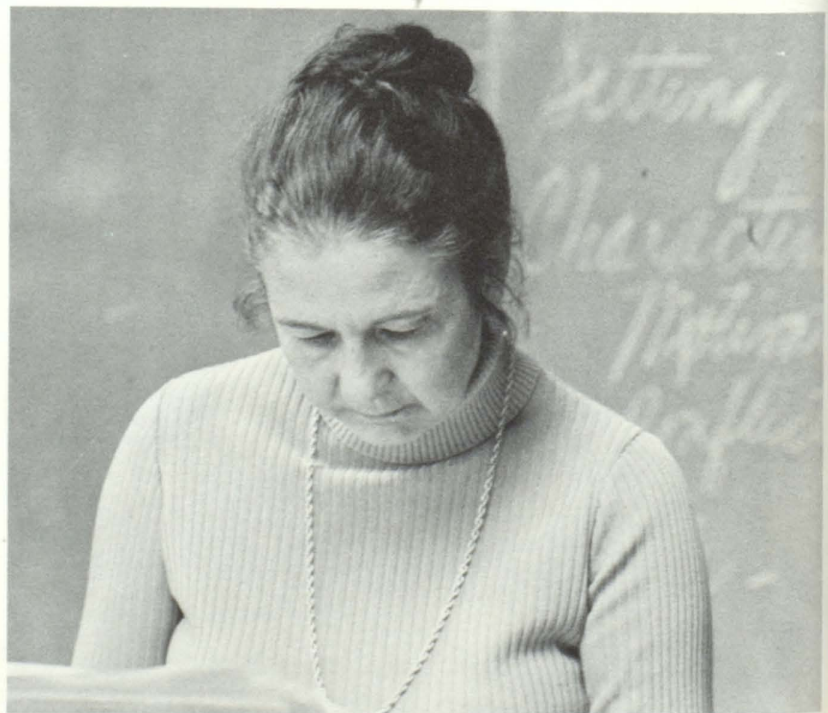

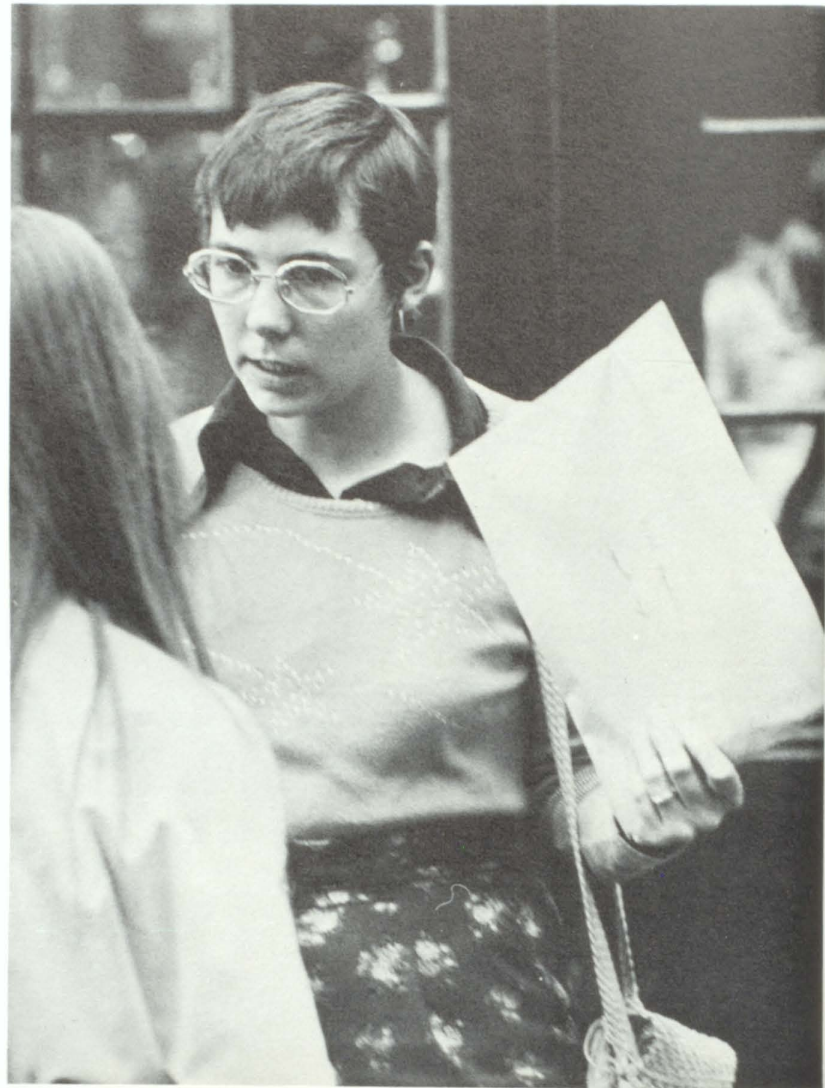

INSIGHTS

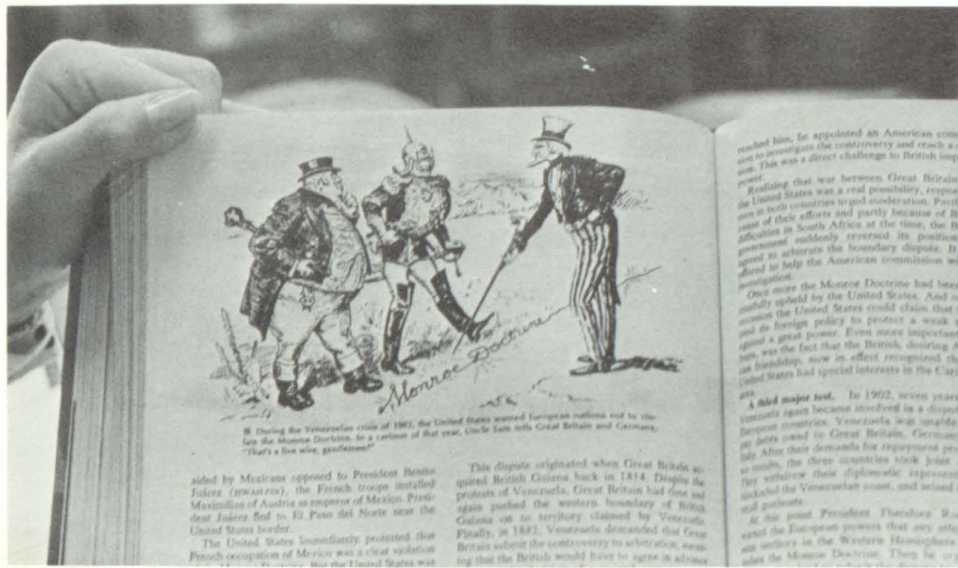

English — Conducive to Communication

It had been the goal of the English teachers at H.H.S. to find the best way to help the students express themselves, and to encourage them to share their thoughts. The teachers here have created an atmosphere that is conducive in developing the students need and desire to communicate with others.

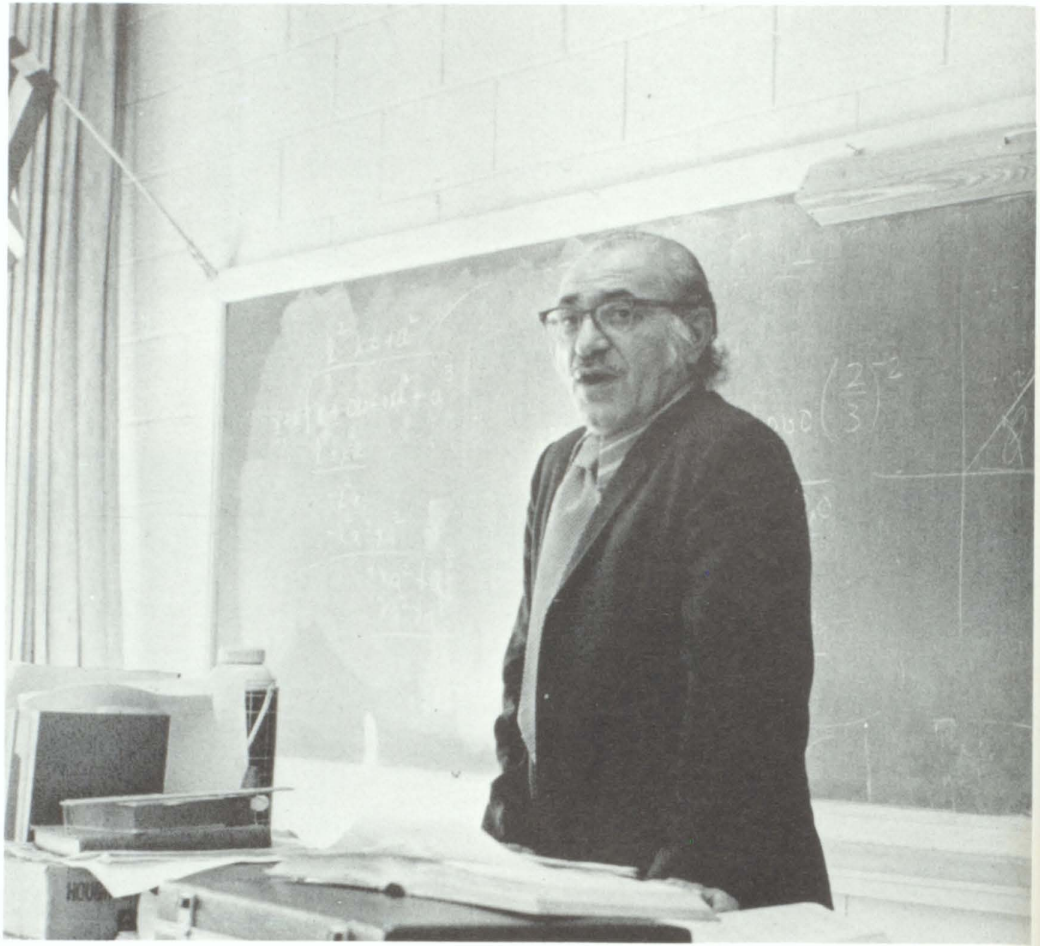

History — Past Clarifies Present

History is two distinct things; the past, and all that happened in the past. The past is not dependent upon us, students and teachers, for its existence. Its existence is its own right. By discovering some of the last ingredients or by illuminating some of the dark areas the students at H.H.S. can "realize" the past. History lived and teachers and students gain knowledge from knowledge past learned. The memory and the consciousness can be stimulated, the image of the past can be changed. Now that the teachers have given H.H.S. the idea of these things, the students here at H.H.S. can make History what they see it to be.

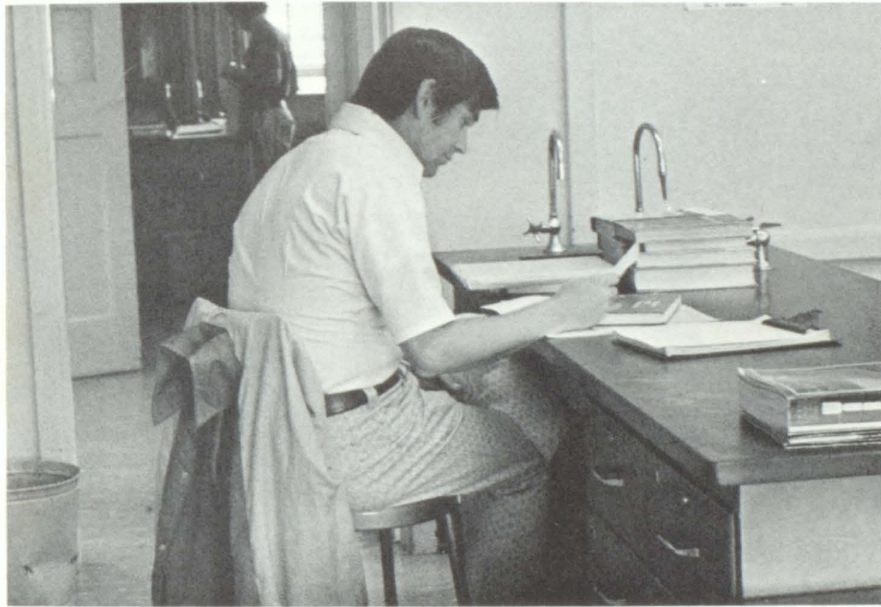

Math Teachers Combine Forces

Math is a turning point in every student's life. You either pass or fail at HHS . . . Explanation, concentration, and a little bit of luck combine to supply us with a weak stomach and stronger mind.

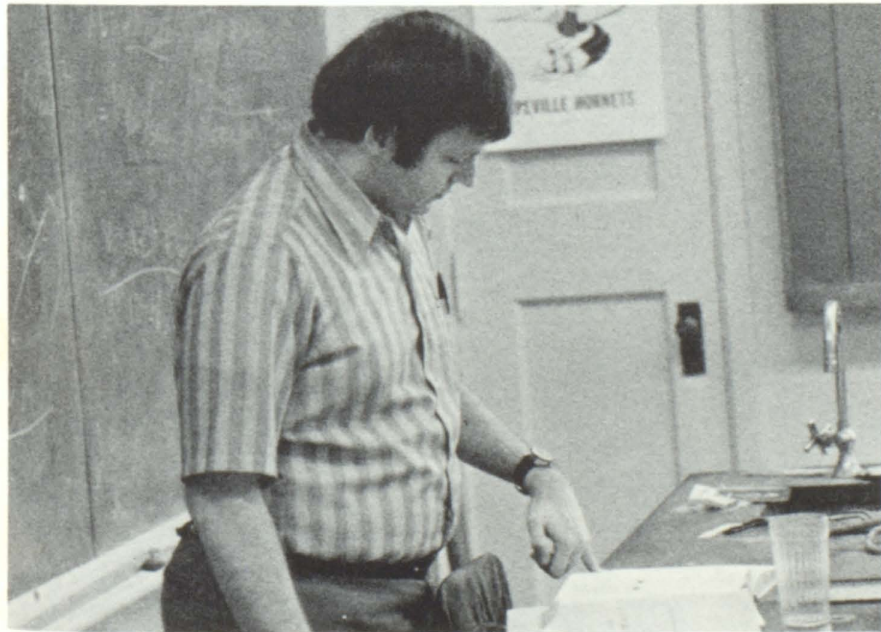

Science Intrigues the Mind

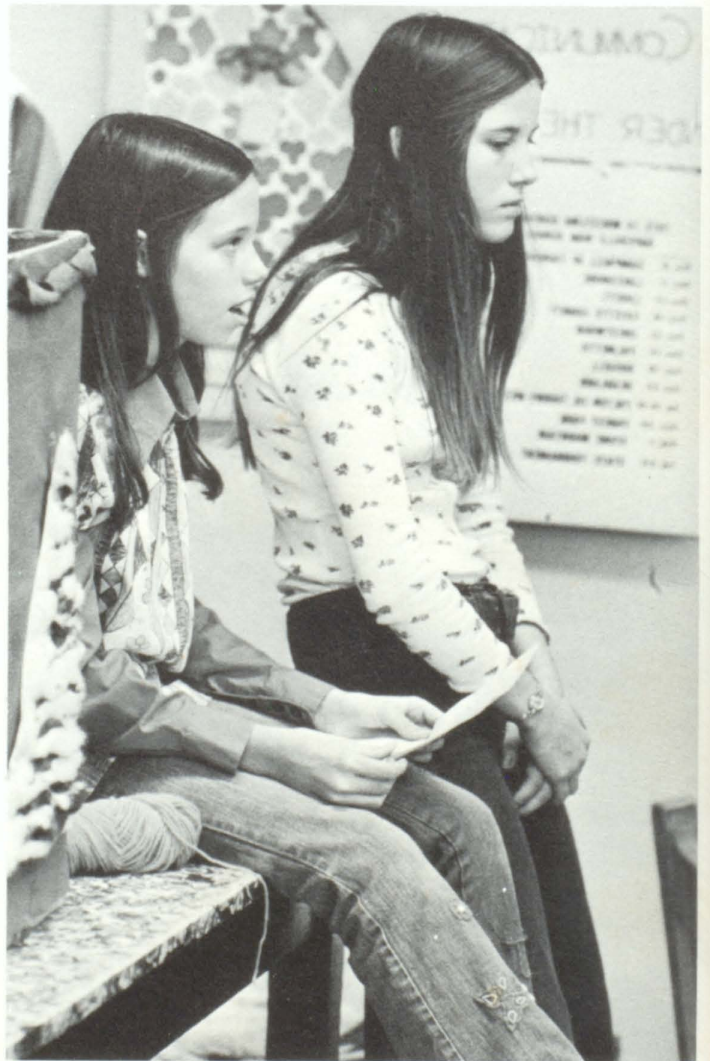

Man is an inquisitive creature. Not only does he explore the depths of the oceans, sample the moon's surface and the limitless expanse of outer space, he also ponders the mystery of his own mind. One of the most remarkable capacities of the human being is his ability to communicate his thoughts and feelings across space and times to others. At Hapeville High School, the teachers and students are striving to delve into these scientific realms.

Spanish and Library Broaden Language Skills

To widen the realm of international communication, Spanish offers the opportunity for the H.H.S. student to expand his powers of intellect.

Librarians are no longer mere custodians of books; at Hapeville High School our library is equipped with library aides, a card catalogue and efficient shelves with correct numbers and names to make things easier. This year along with Mrs. Williams we have a new assistant librarian, Mrs. Mawbry. Both of these ladies help students to the world literary thought.

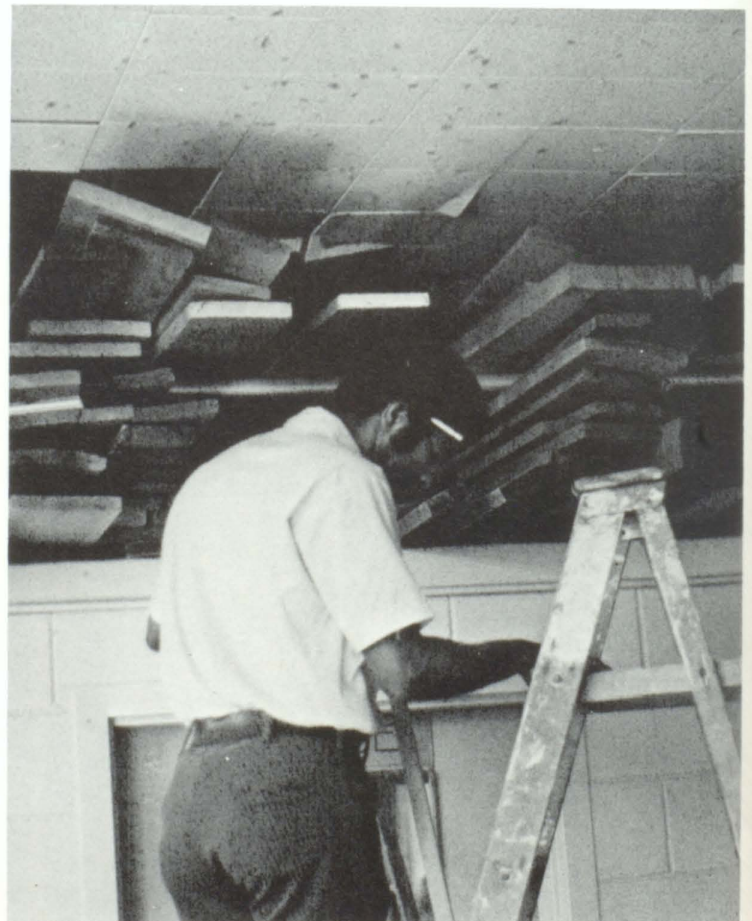

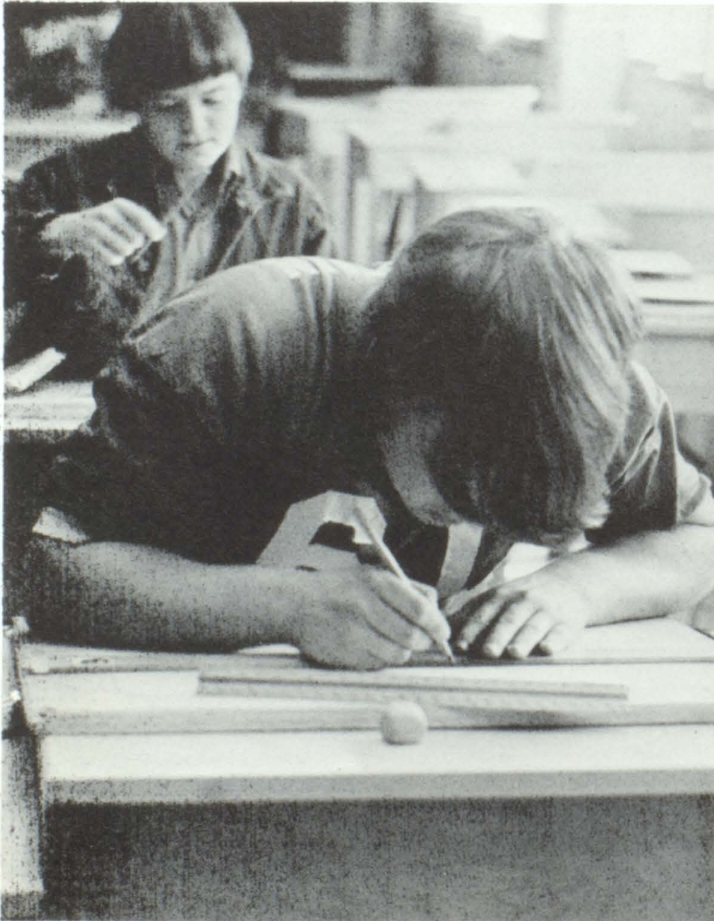

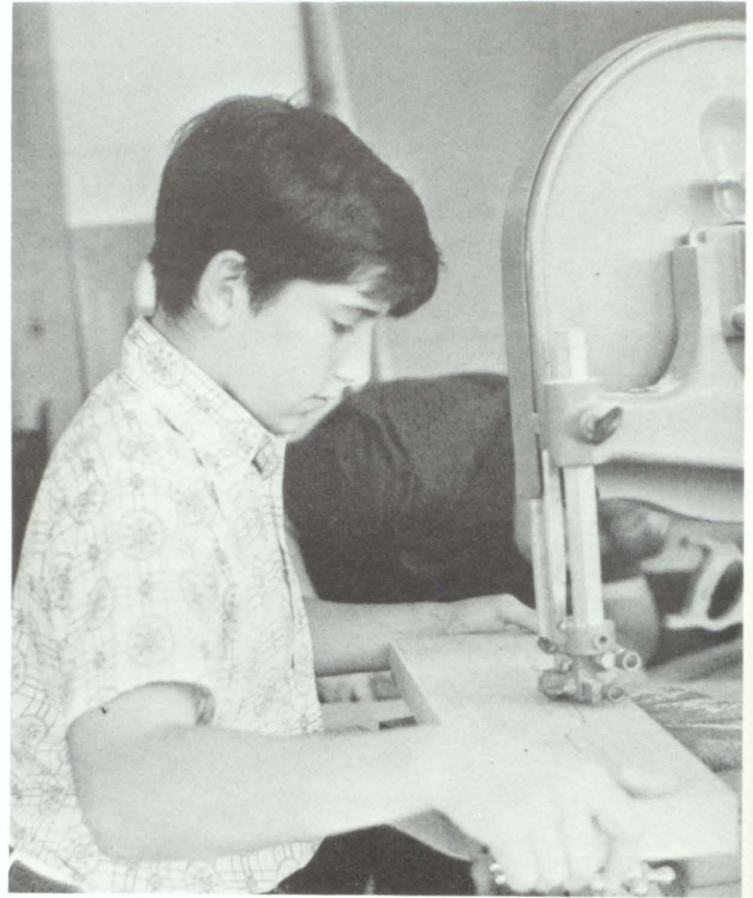

A Trio of Alternatives

At Hapeville the Music Department has three types of programs. Band, the most spirited group, marched at all football games, marched in parades and presented its annual spring concert; Chorus, the largest group, sang at Underground Atlanta and presented a Christmas Concert. Last, but not least, the newest group of all is Guitar, an exciting new course offered for students interested in learning to play a string instrument.

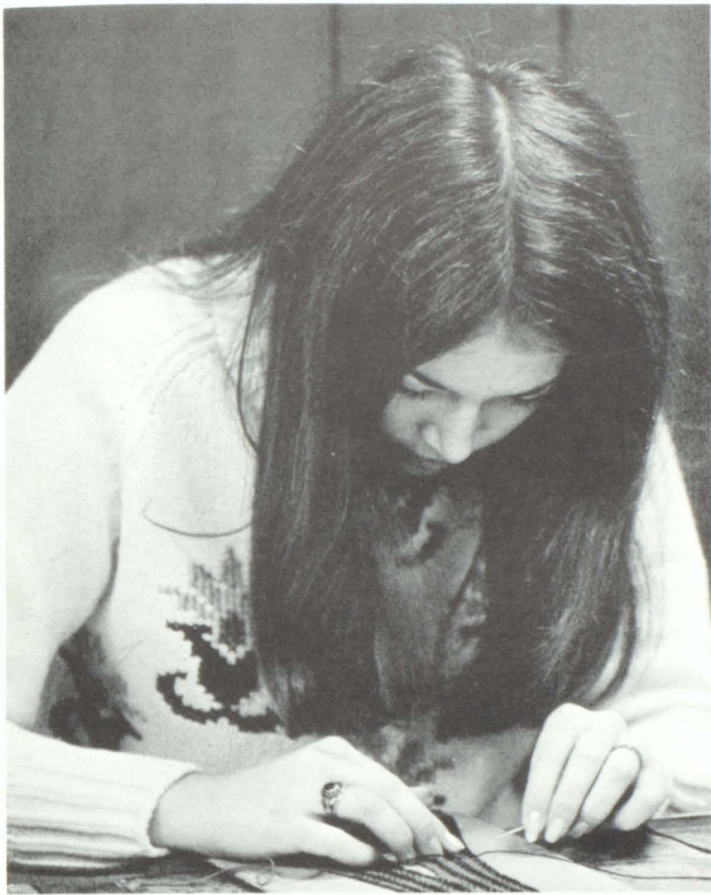

Industrial Arts — Hard Work and Skilled Hands

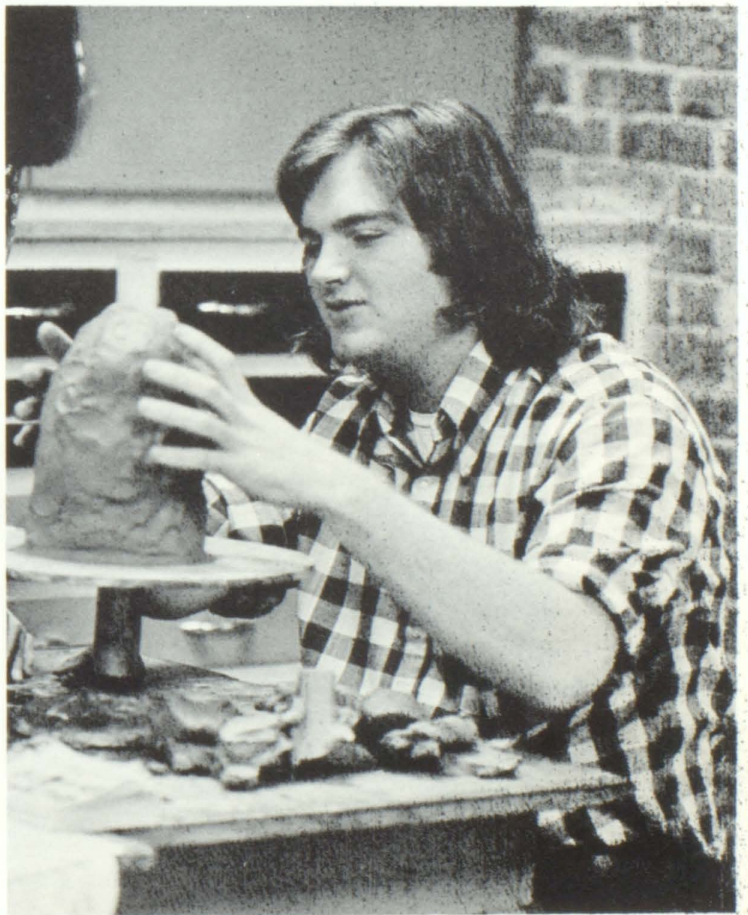

To plan a house, construct a table, or discover the techniques of a tool, takes hard work and skill. This year the Industrial Arts Department pushed for a better student participation, and succeeded.

Express Yourself

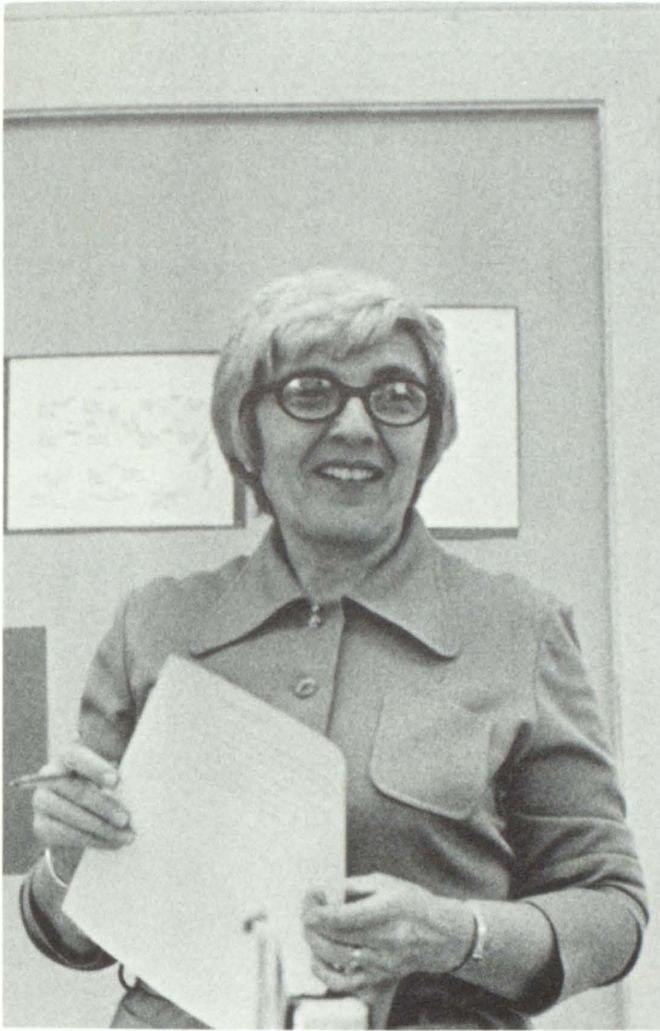

Art provides the opportunity to express ones own imagination. The Art room, full of paintings, stichery designs, and sculptured statues takes the student to a fantasy world of creativity. Under the direction of Mrs. Wolfe, students learn to think and put their thoughts on paper.

Practice Makes Perfect

Cooking and sewing are valuable assets to those who wish to take the initiative. Cooking is a snap for students desiring to learn. In fact, before long, one might be able to cook a gourmet feast fit for a king. In sewing, whip up a dream. Try out your creativity.

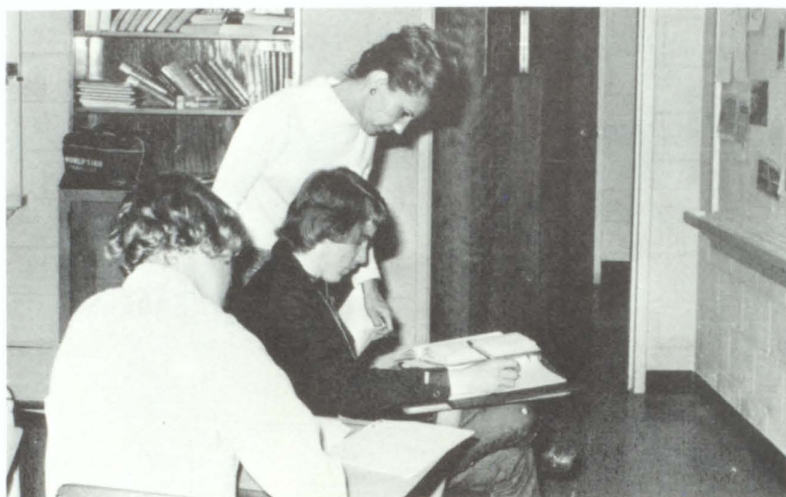

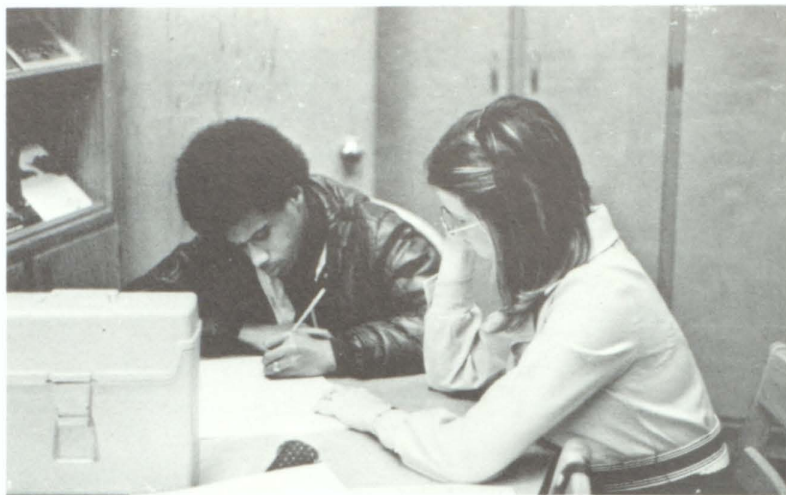

Business Department Builds Futures

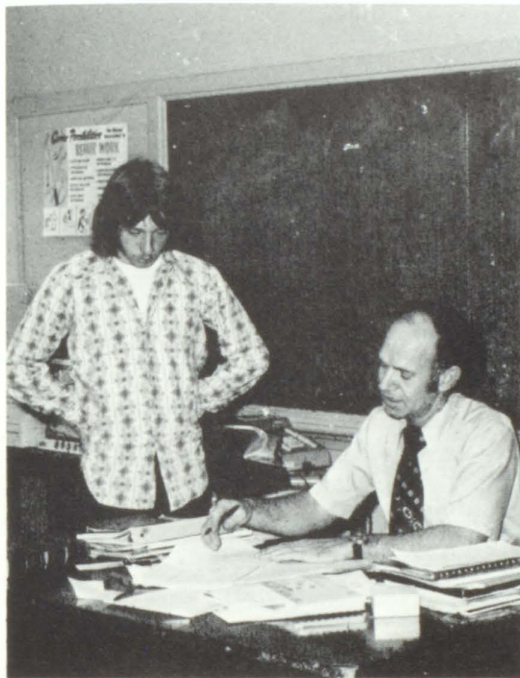

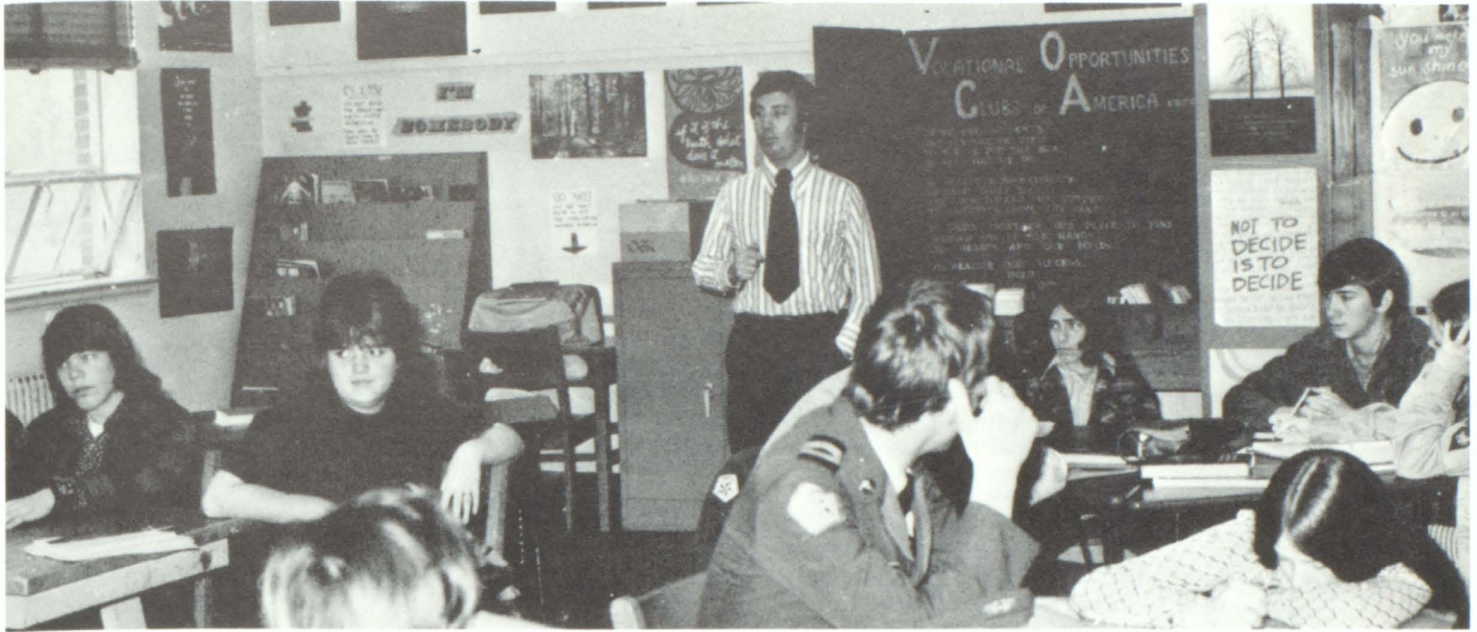

Learning to grow into the business world is the objective of the HHS business department. Whether the student is intending to go into a business situation directly after high school, or proceed with higher learning, he is guaranteed an adequate background with the HHS business course.

3 - Woman Team Teaches Special Skills

The time that one offers each student to develop his ability and creativeness and to learn and prepare for a long future, has become a direction of desire in the PVT Department.

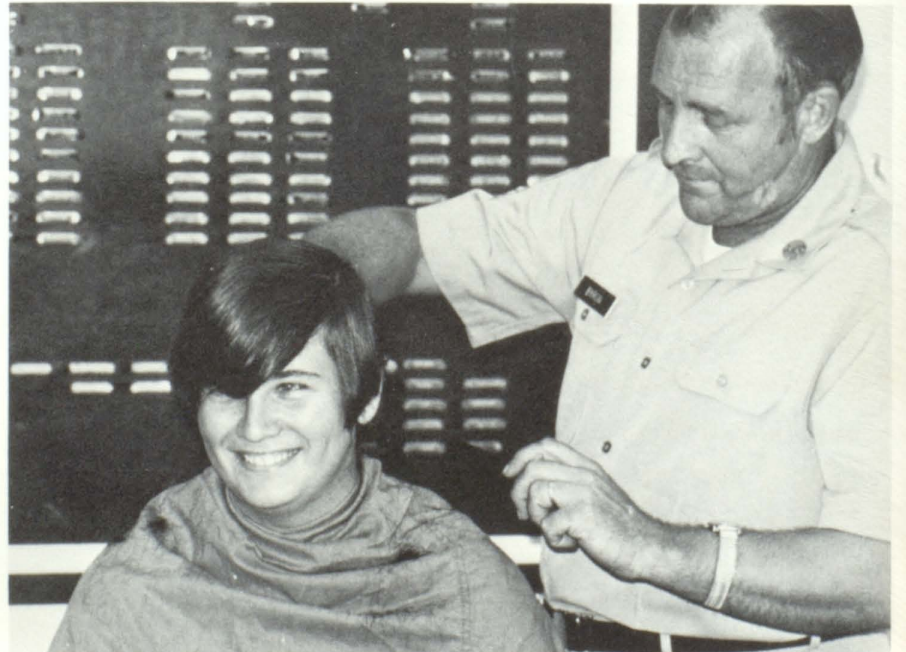

Work - Study Students Explore Their Futures

The discovery of a job might make a future way for the DCT or CVAE student; or give him the opportunity to work for the things that will make him happy. Most people wouldn't sacrifice as much as these students might. But, if they didn't enjoy it they wouldn't do it.

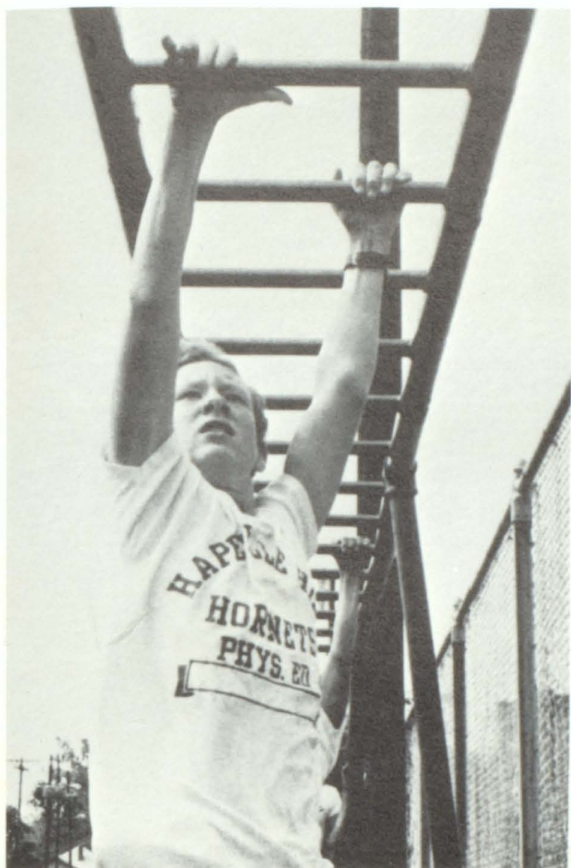

Sergeant Byron Wants You!

. . . if your arm can hold your hand up to your eye, that is. But don't dismay if you can't — the officers will build up those weak arms with about 100 pushups! Boy, what a requirement!

P. E., Driver's Training — Skill of Control

Sore muscles, sweat, and fatigue constitute the Physical Education Program at H.H.S. Although it seems hard and worthless at times, students acquire physical and mental control of their bodies, a worthy endeavor.

"Accelerated" by Coach Ed Daniel, Driver's Training students gain new perspectives of control and alertness. From the first time in starting a car to, at last — the final grade, students put learning and understanding together with fun.

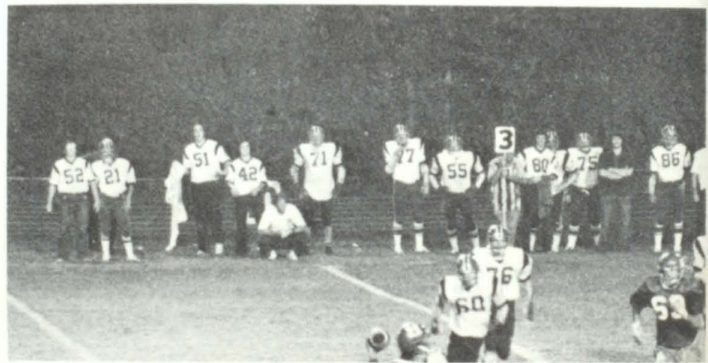

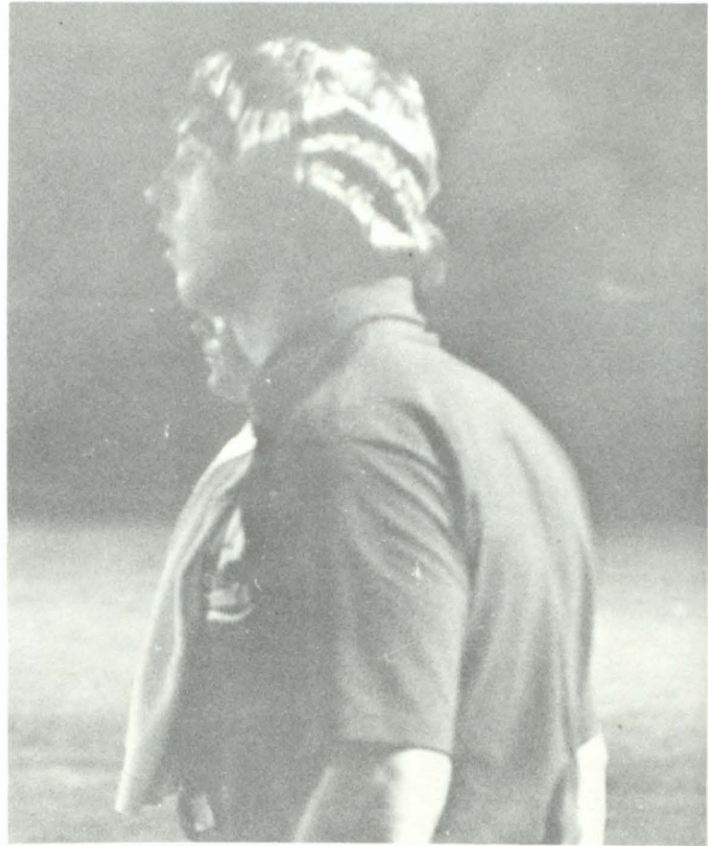

OPPOSITION

Hornets Prove to be Super

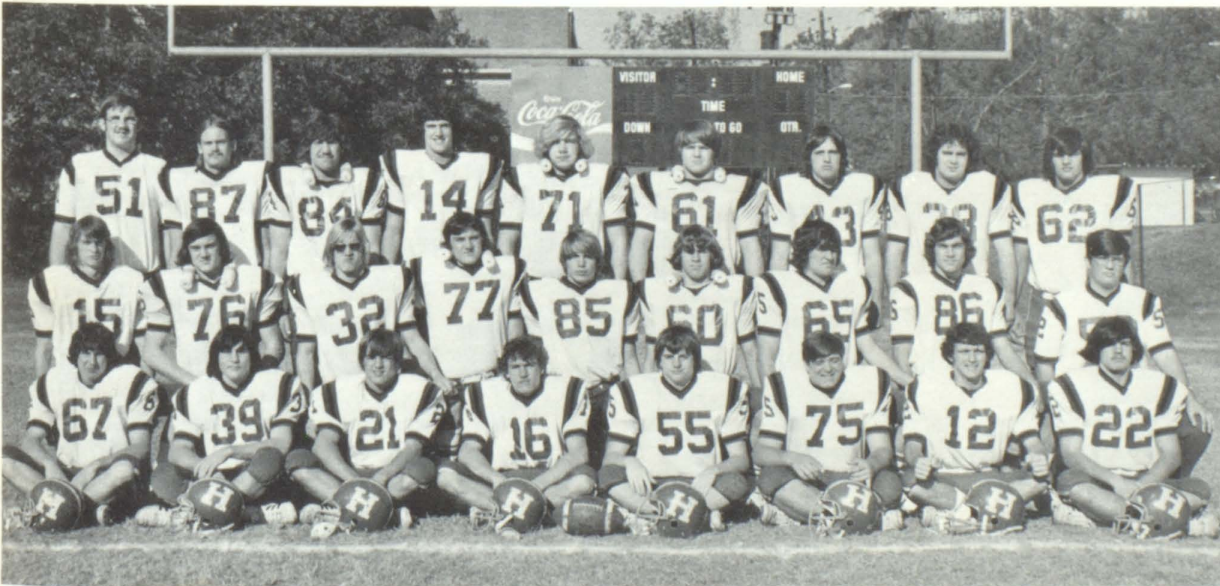

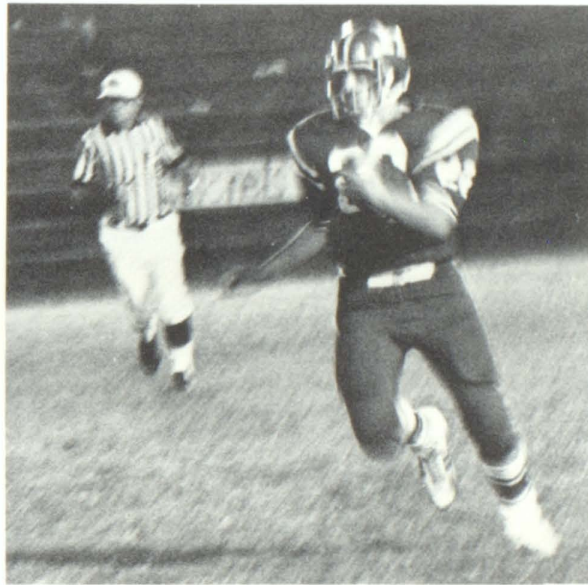

From the first "shift" to the final "T.D.", the Hornets stuck it out. With David Albright and Tim Purcell both making Prep Honor Roll, the team put it all together for a record breaking statistic gain of over 2,000 yards. The dedicated War Hornets worked hard all season and ended up with a well-earned 6-4 record!

VARSITY: SPIRIT!

"Spirit — there ain't nothin' to it, the way we do it, it's so easy to learn . . ." How could they miss, with superior rating at camp and coming home with a genuine "SPIRIT STICK"? This year's squad did more than any other squad has ever attempted to do. Selling everything from trash cans to themselves, they proved to have it all. Boy — what a squad!

B-team wins it again

Working together, the B-team Hornets proved themselves capable of surpassing the preceding year's record with 3 wins in 7 games and went on to again capture the region title. Large quality and superior quantity were responsible for building experience valuable to players in the future. All-in-all, a very rewarding season.

We've got Spirit How 'bout you?!

Starting out the year as a novice squad, the B — team cheerleaders gained spirit, enthusiasm and learned new techniques from camp. They ended the year proud and fulfilled.

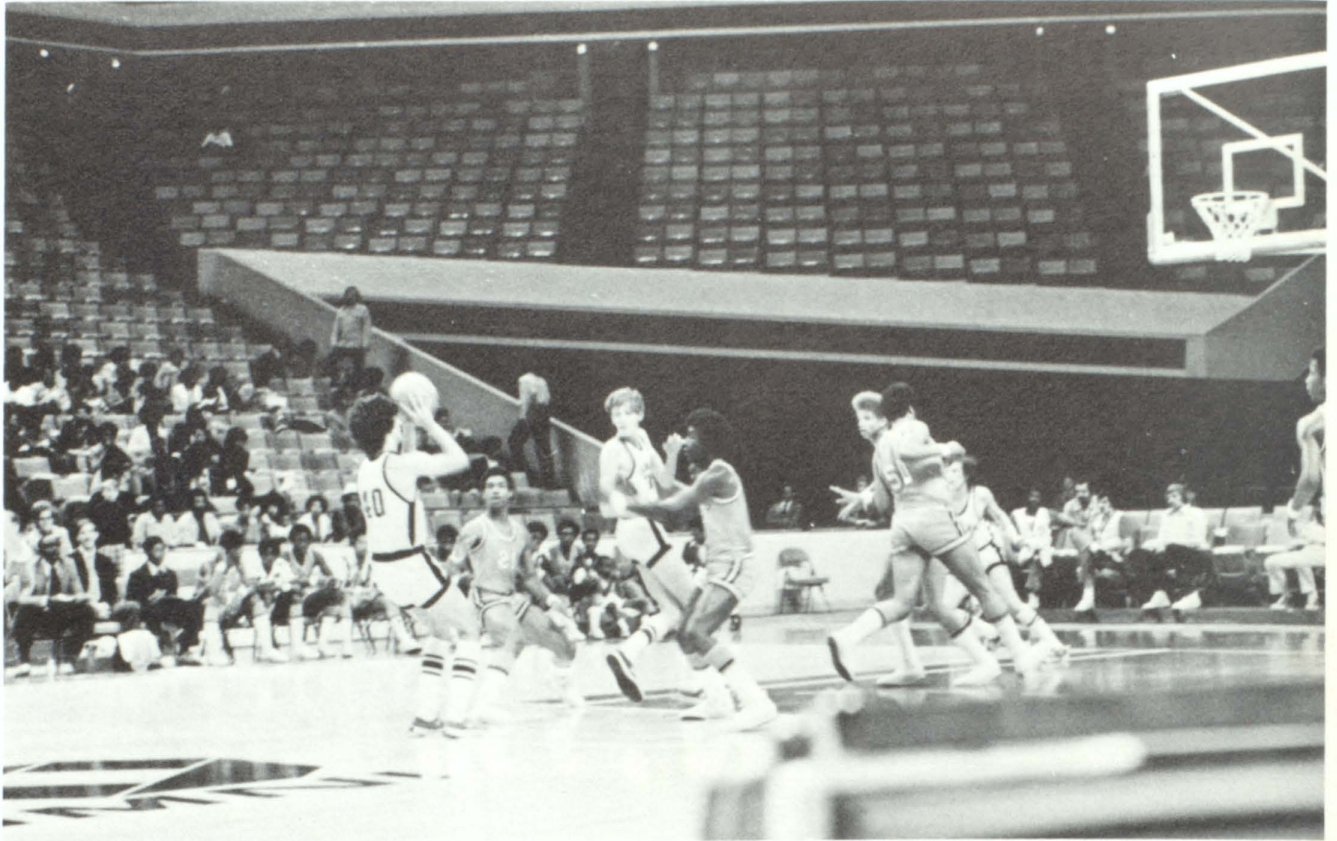

Dribble That Ball!

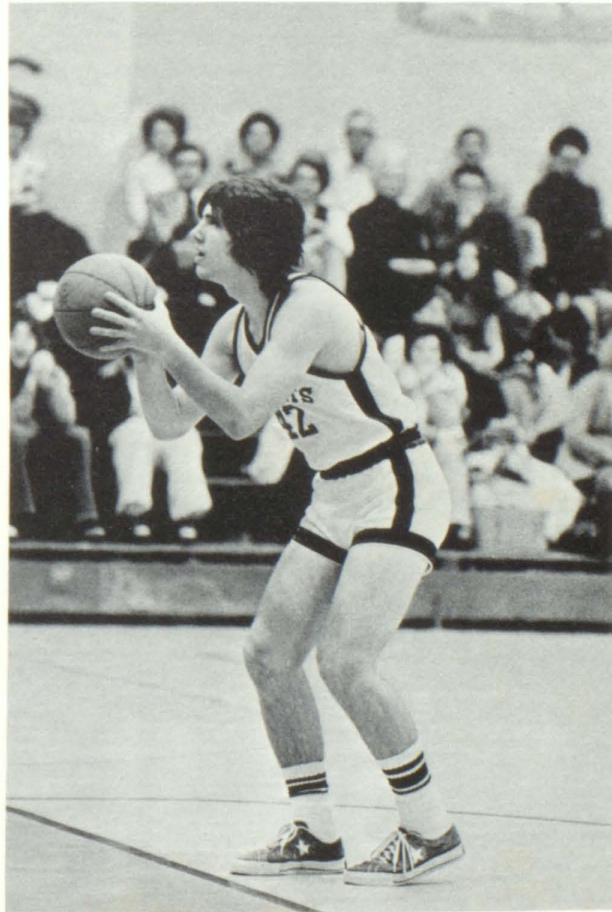

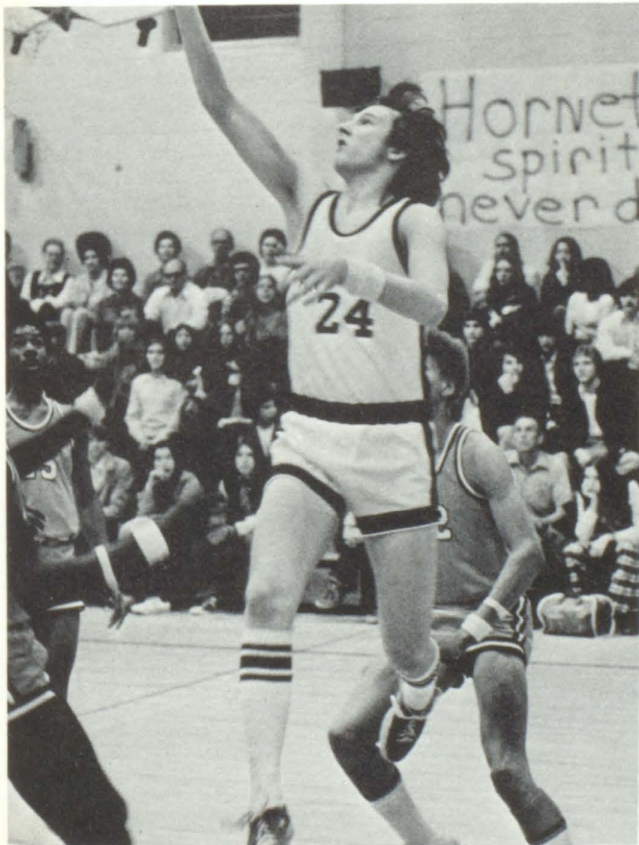

The Varsity Boys' Basketball team's season was not as successful as hoped for as the Hornets ended with a record of 3 wins and 17 losses. The team made improvements without having much experience. But their attitudes alone showed one area needed no improvement!

New Coach — New Experience

Mr. Basketball — Rocky Boris

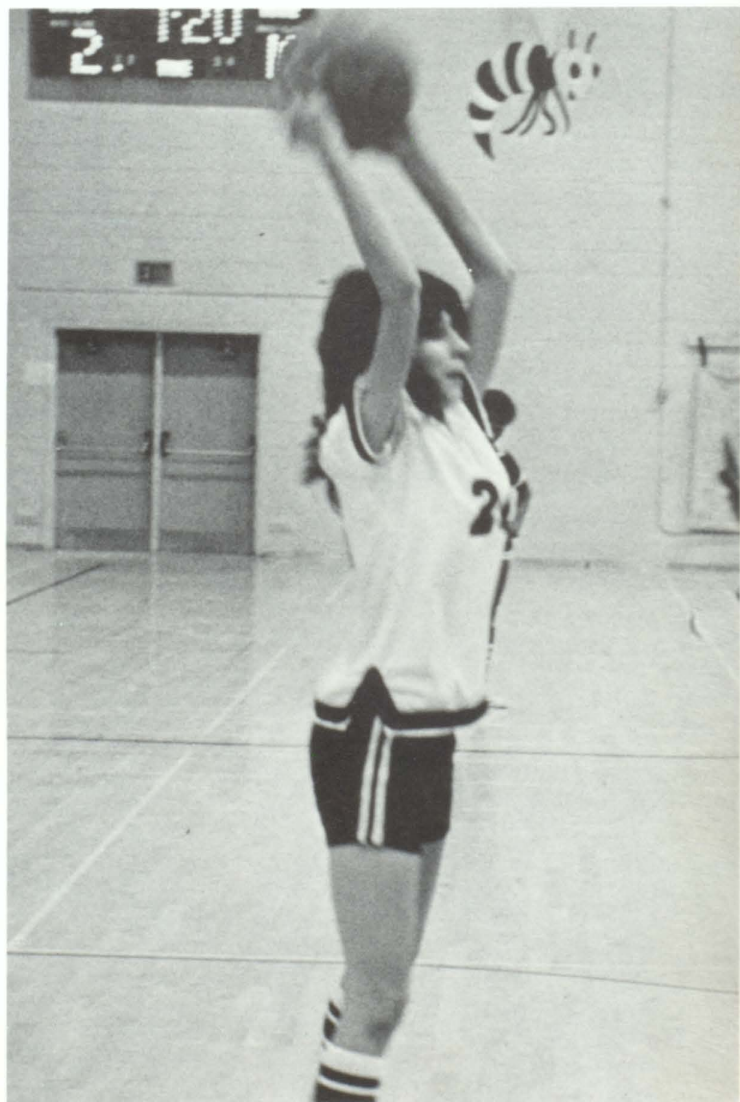

Improvement — Wanted & Maintained

Obvious improvements were shown by the Girls' Varsity Basketball team as the season progressed. They became more aggressive and played with more effort. Coach Hendry's girls continued to improve. They really hustle for their close wins that now mean something to them.

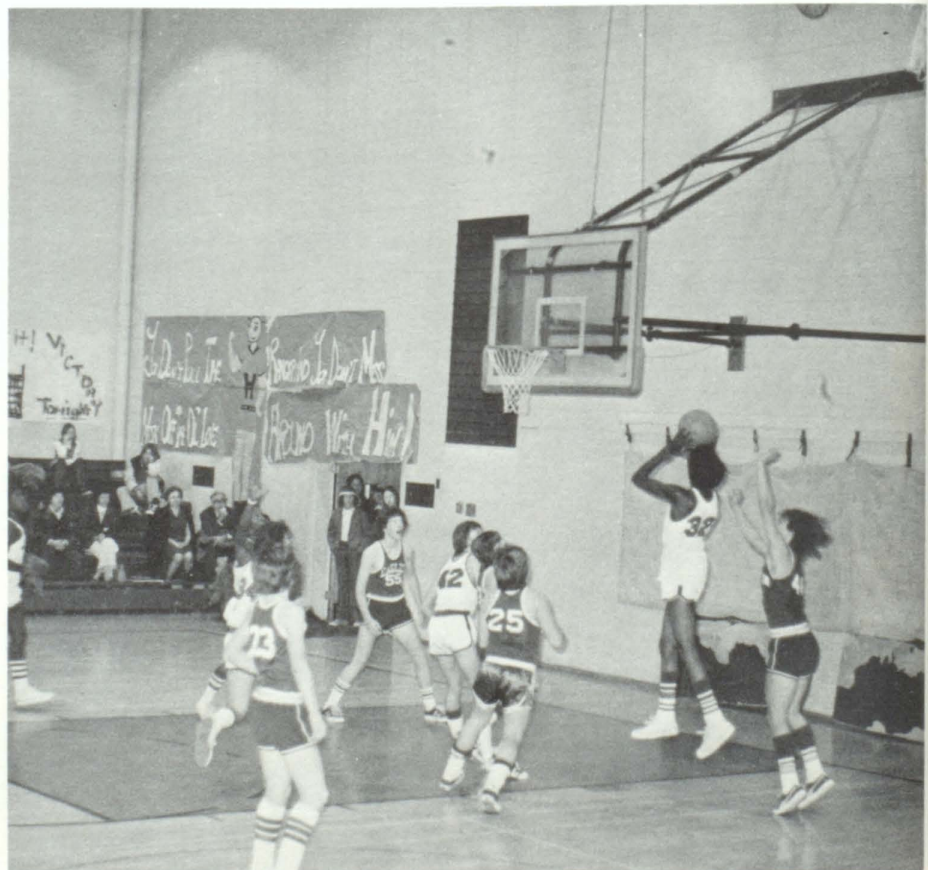

Miss Basketball — Valerie Haney

Hey, Hey, Hey, Whew! Tear Em Up!

The B-teams headed into their final phase with a dismal attitude but ended up with a little curve in the smiles. Both girls and boys tried their hardest, and came out on the top or close to it several times.

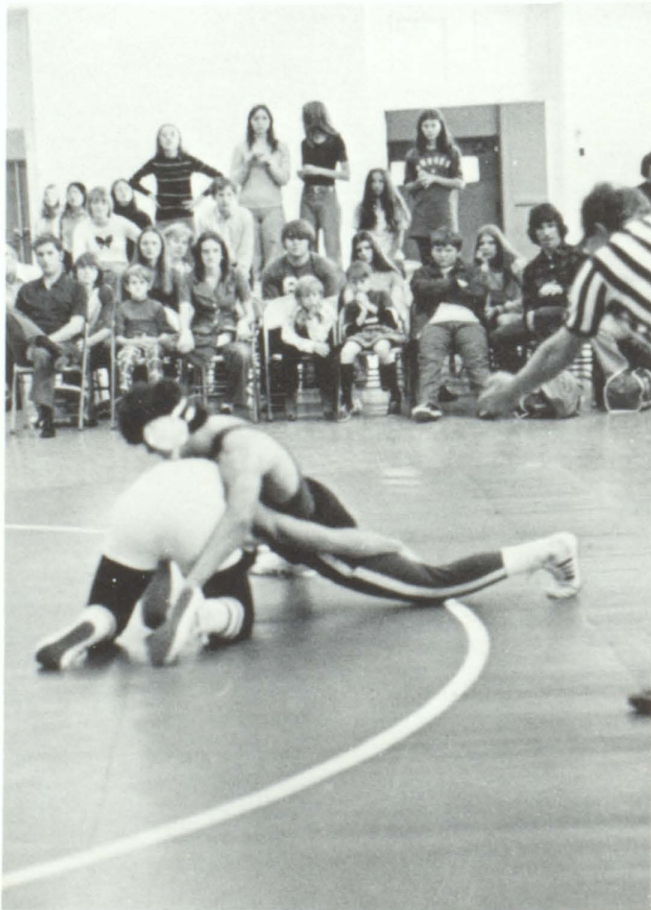

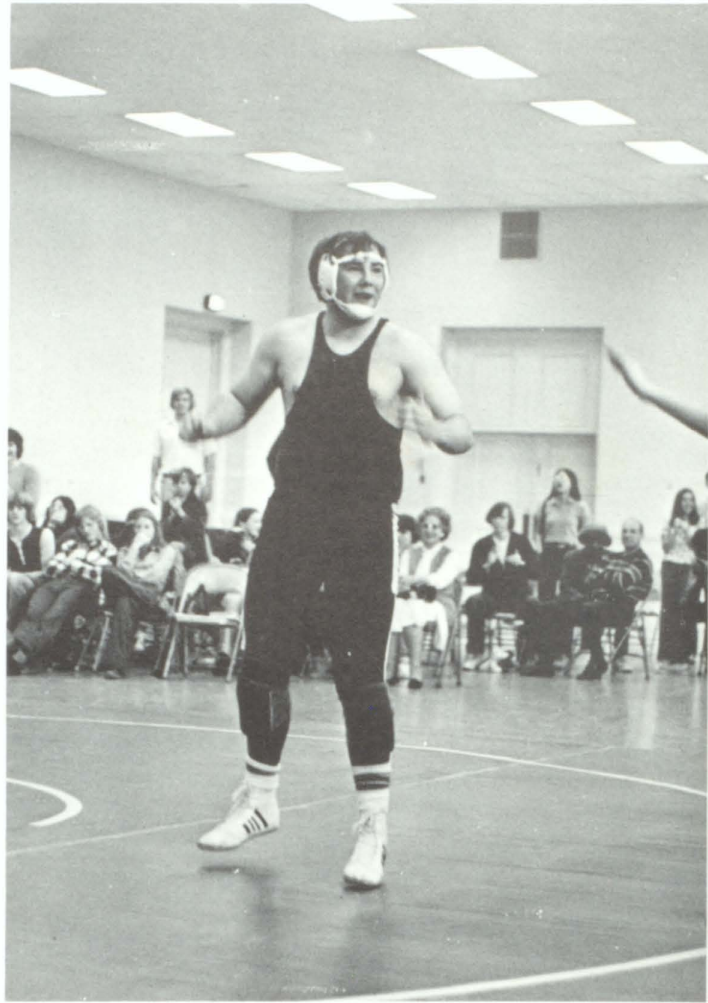

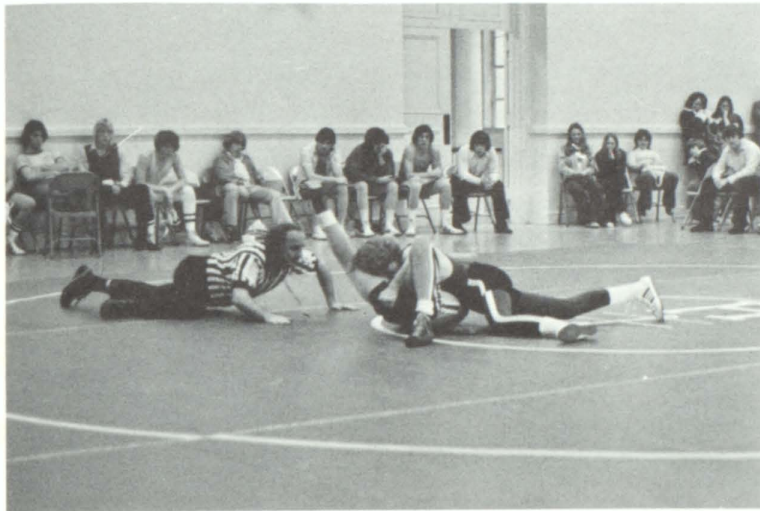

WELCOME TO HAPEVILLE
Home of the **FIGHTING HORNETS**

All the Way To State!

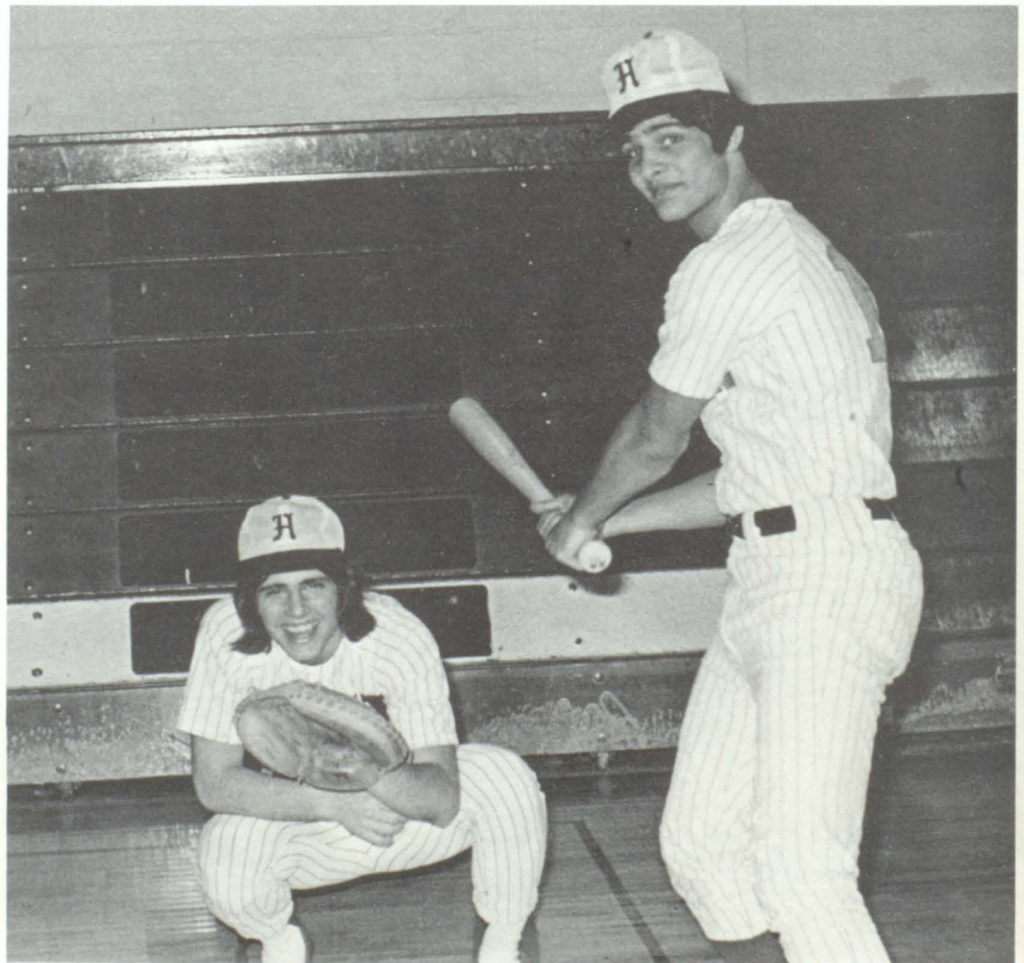

Hapeville's wrestling team got second in state. One good reason for this is having several wrestlers with fine individual records. They really showed their toughness and ability by concluding with a tremendous winning record.

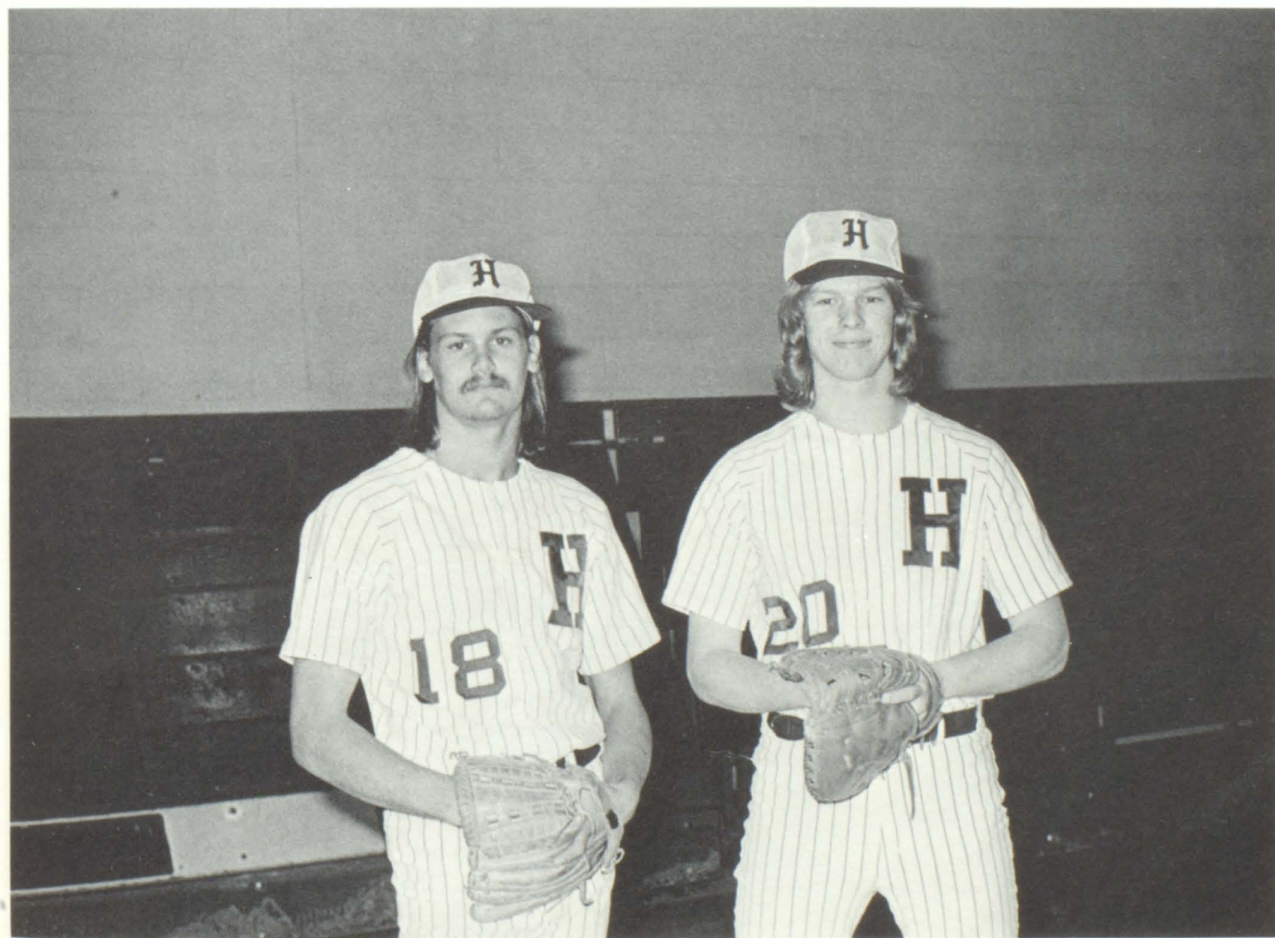

Strike 1-2-3, You're Out!

Baseball was a real hit this year. Our two fantastic pitchers that maintained the highest batting averages last year and a guy behind the plate who's really super good, not to mention our basemen, combined to go all the way!

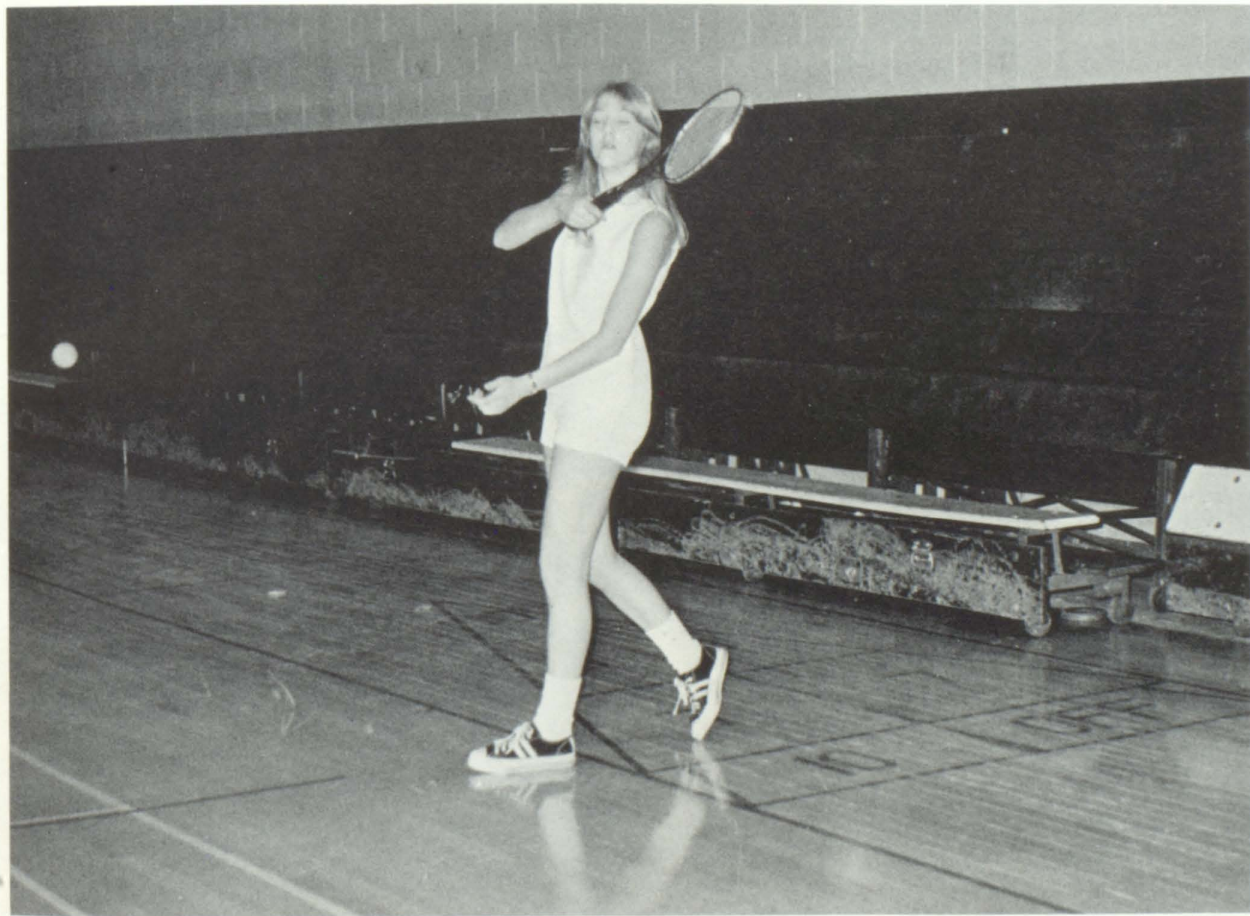

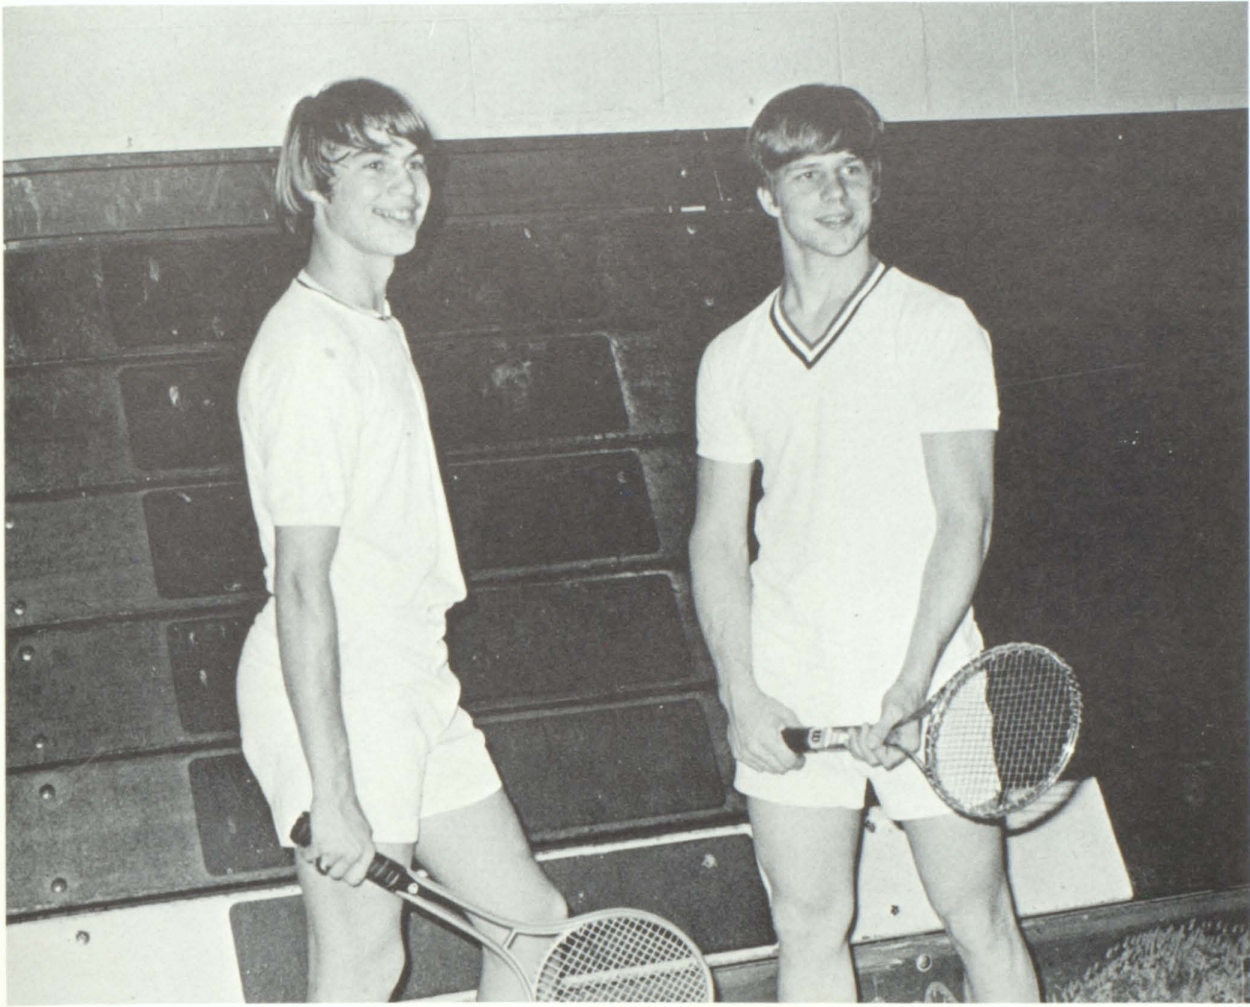

Tennis Anyone?

Tennis is really swinging this year. With so many people out for the team, they played with finesse and style.

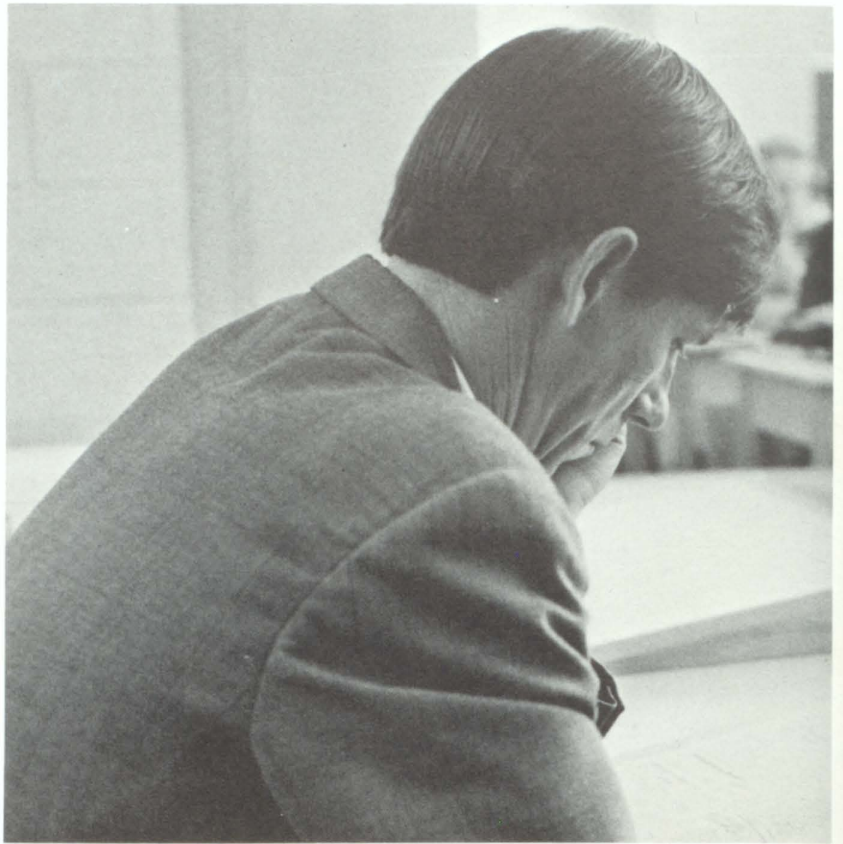

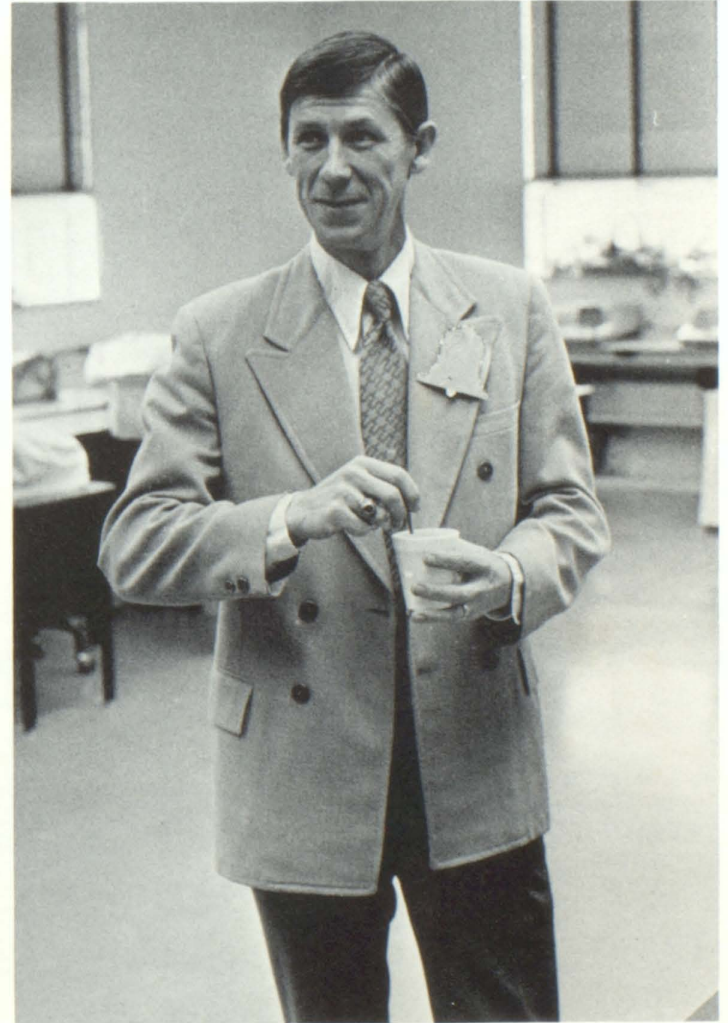

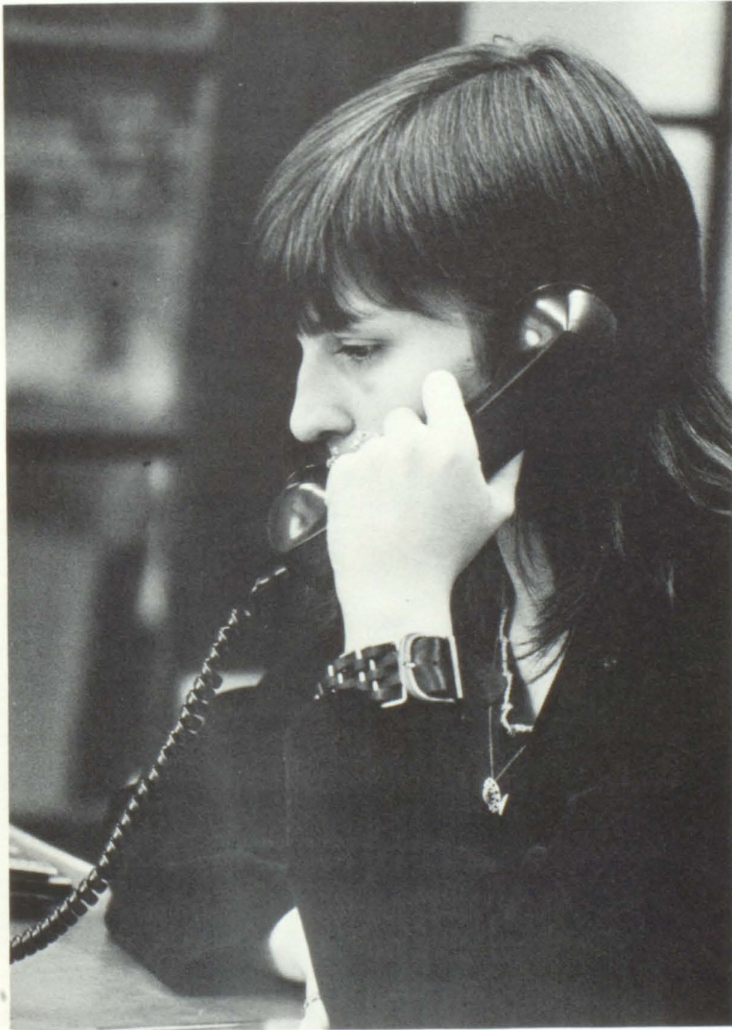

RECOGNITION

Administration Boosts Student Spirit

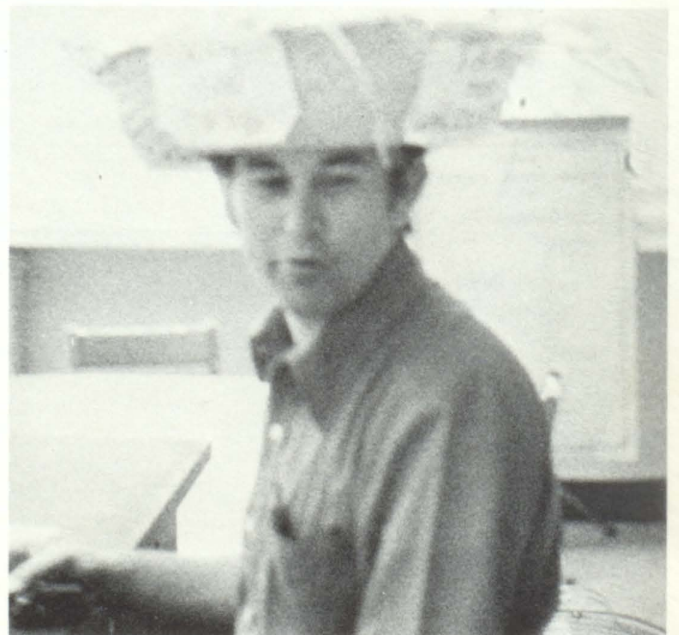

Once again the school year opened with Mr. John Givens acting as principal. New innovations this year included smoking permits, and a room to store equipment for the English department.

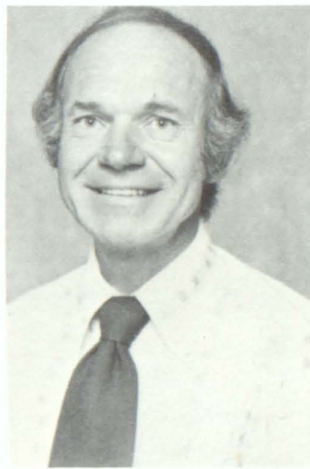

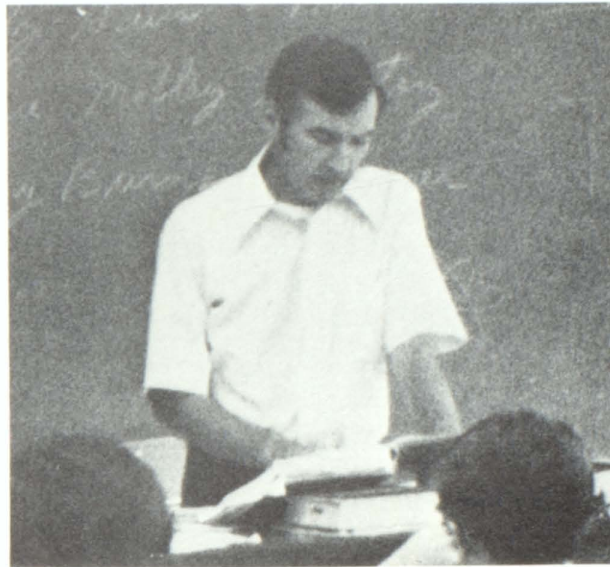

Faculty Lighting The Way

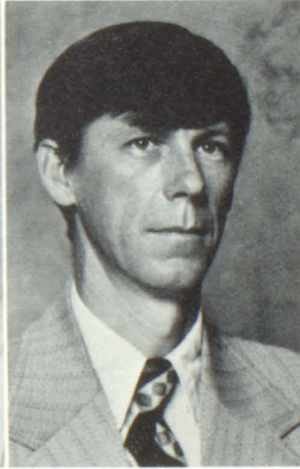

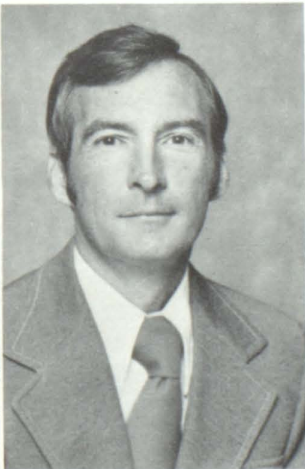

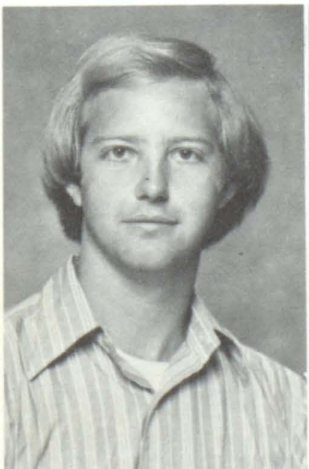

Acting benevolently as tutors counselors, and disciplinarians toward their pupils, teachers nudge students forward to blaze their individual trails through the hazardous jungle of life to gain the field of success, lending help and understanding where they can. Teachers find time.

Custodial Staff — Dedicated and Untiring

Frequently forgotten, always taken for granted, the custodial staff untiringly strives to make HHS more comfortable for the students and faculty of Hapeville High.

Cafeteria Staff Attempts to Please

Feeding five hundred hunger-stricken students a day is a risky job for the bravest to undertake. Even so, the Cafeteria Staff always attempts to please the students of H.H.S., and usually succeeds.

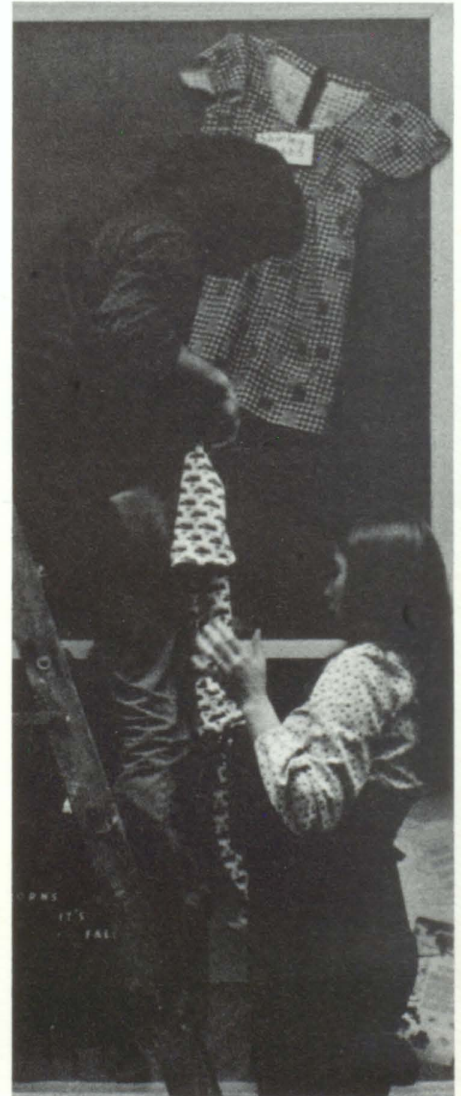

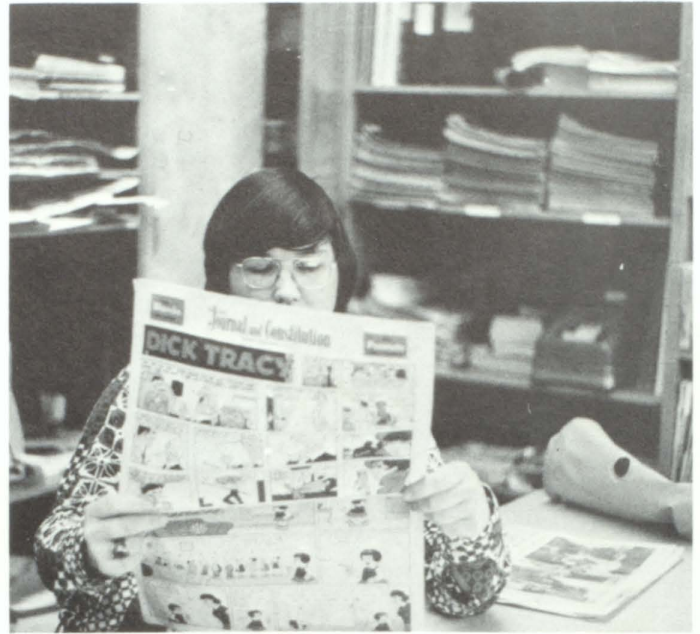

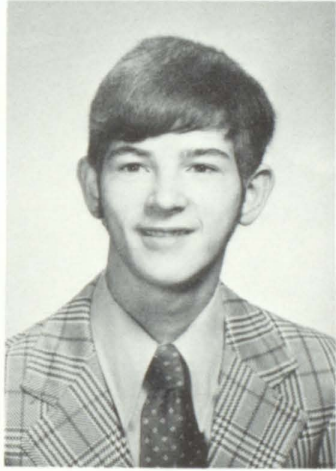

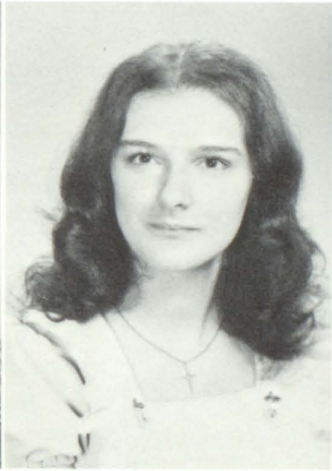

Bewildered, But Wonderful . . . The Seniors

As complex as a myraid composed of an infinite number of
multi-colored pulsating lights —
As simple as a single beam of golden sunlight —
As learned as the most aged man of wisdom —
As naive as the newest infant —
As polished as the finest gem —
As lacking in lustre as the roughest stone —
As whole as the finest portrait —
As incomplete as an unfinished symphony . . .
In this state of mind, body and soul, the
Seniors face the greatest precipitance of their
lives. Not yet fulfilling their potential and
yet hinting of much to come, the Seniors embark upon
their journey.

With contemplable ease and incontrovertible skill, acquisition of knowledge touches each and every individual.

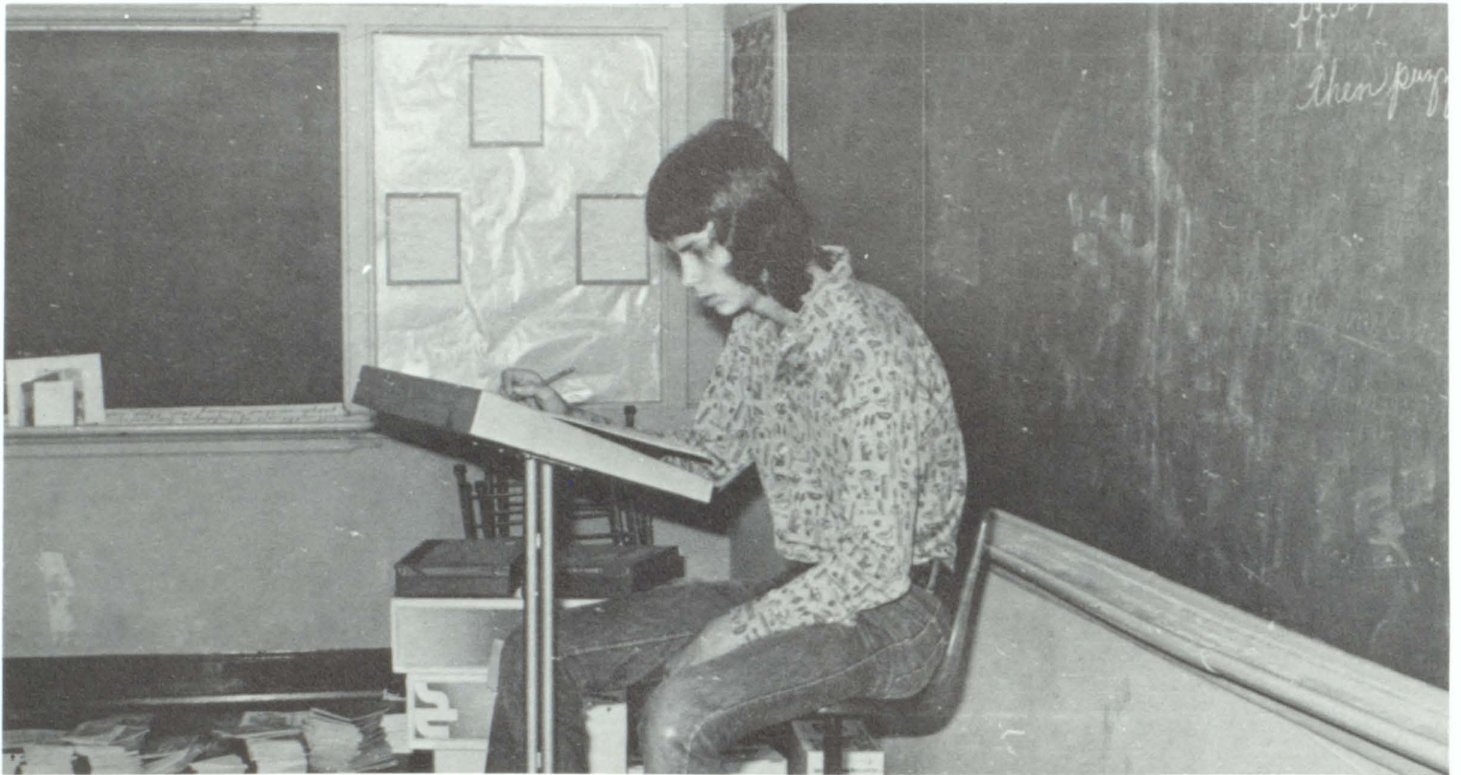

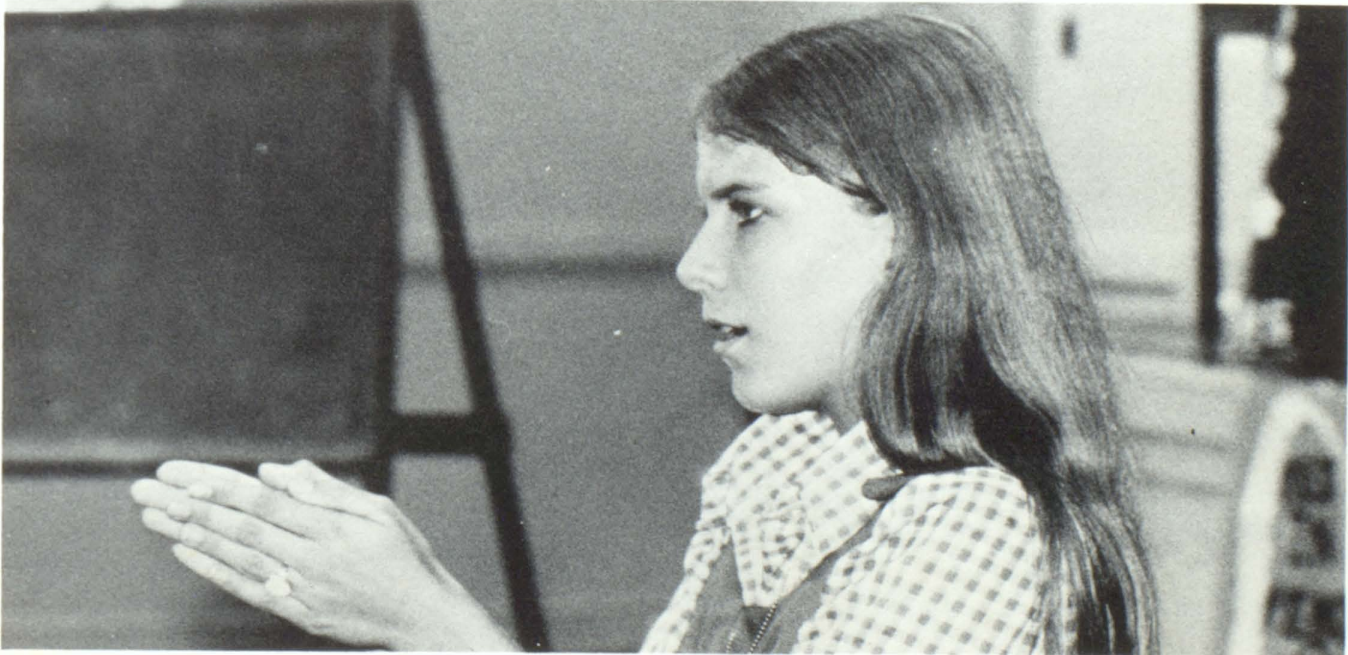

Contemptible to man, for
discovery is capable of changing
the course of history, altering
the face of the earth or touching
the mind.

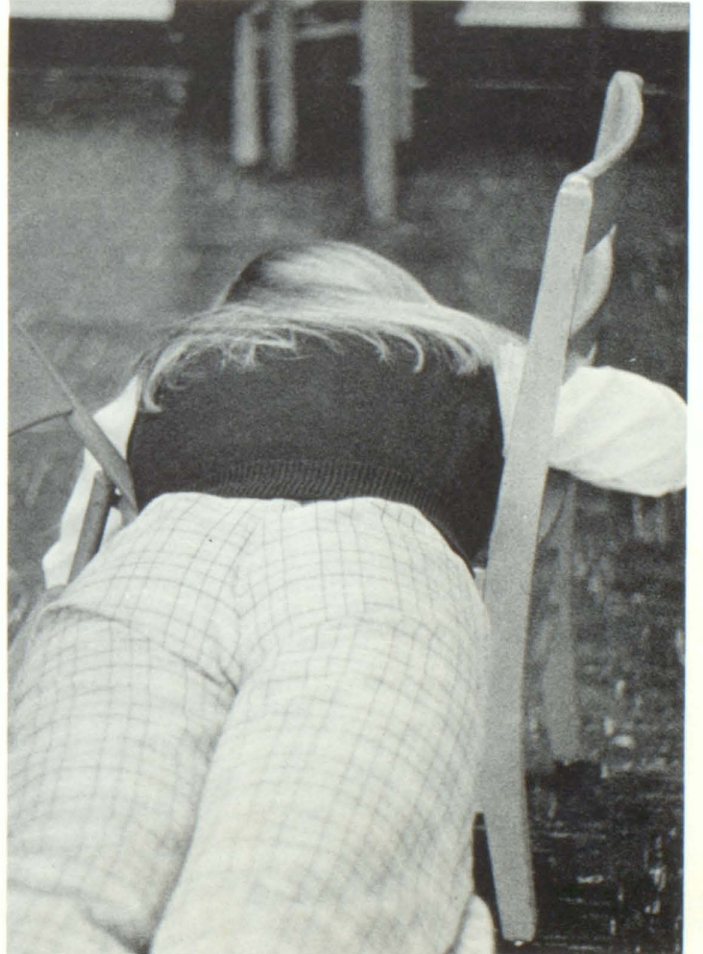

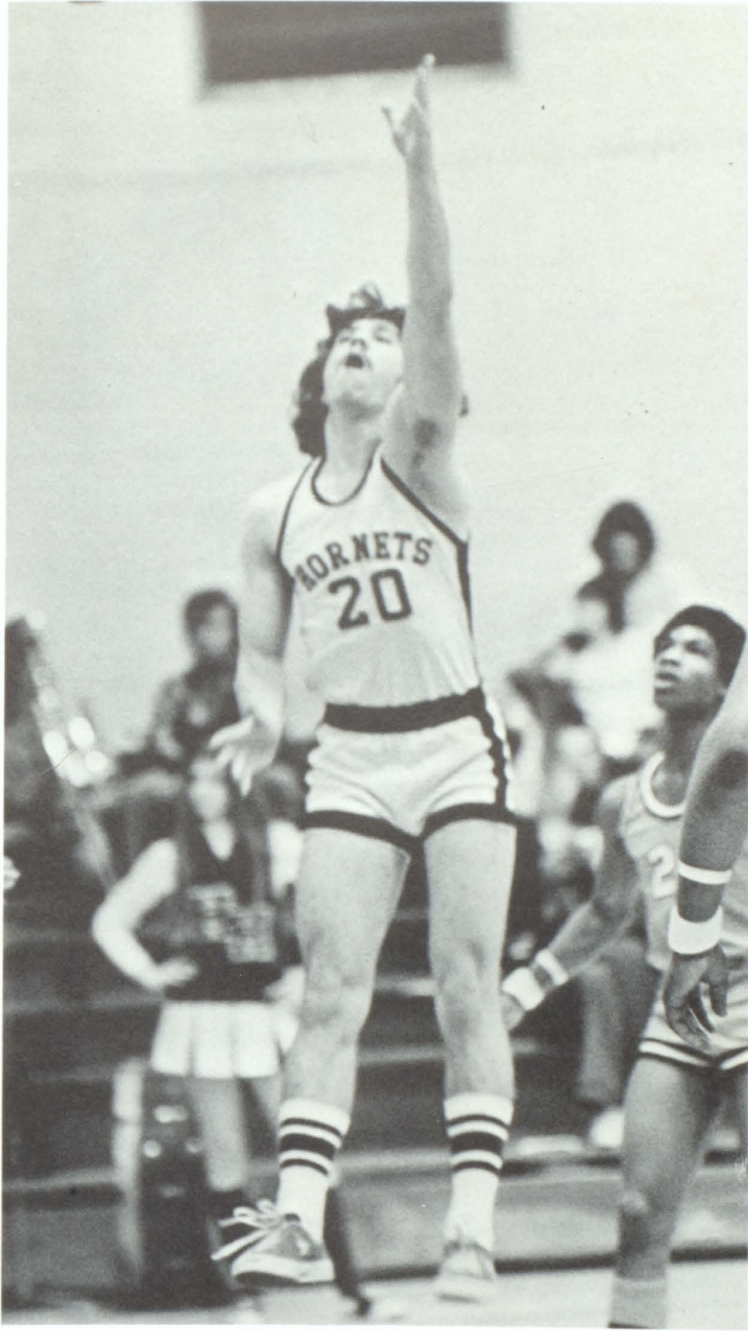

Memories are last memories, soon to be lost, to be replaced by memories . . .
