**76**

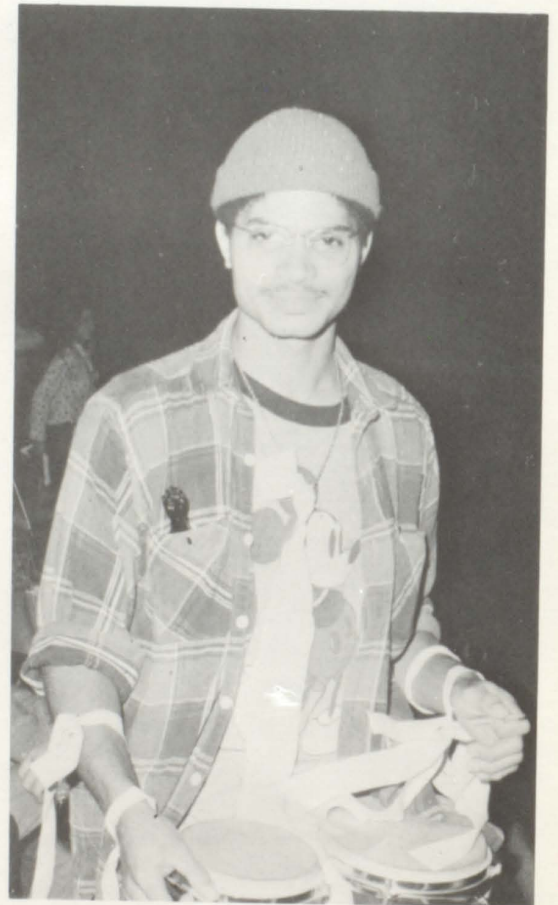

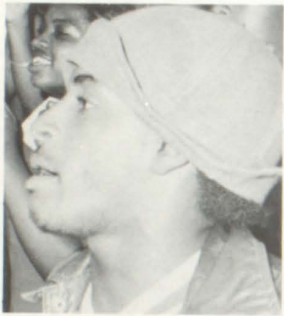

# SAGA 1976

*volume seven  
westwood high school*

*life at westwood,  
different things  
to different people.  
a blending together  
made possible  
by each one.*

*faces  
people caught in passing  
living their lives day to day.*

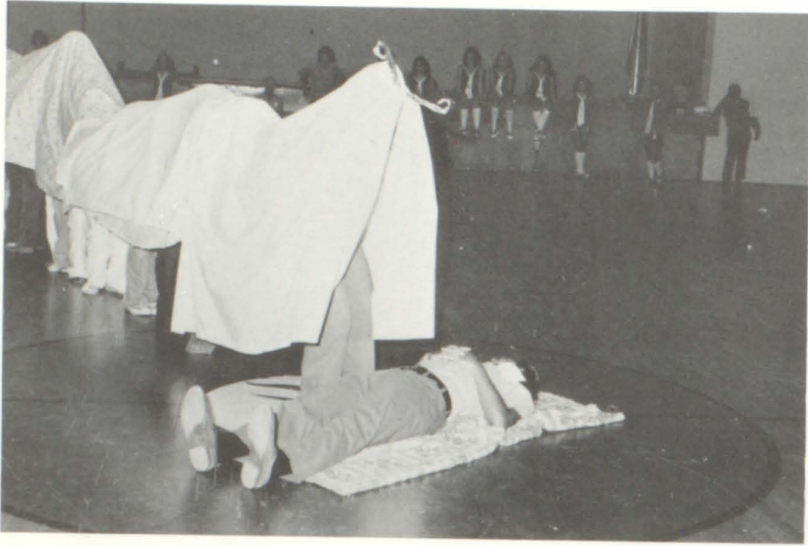

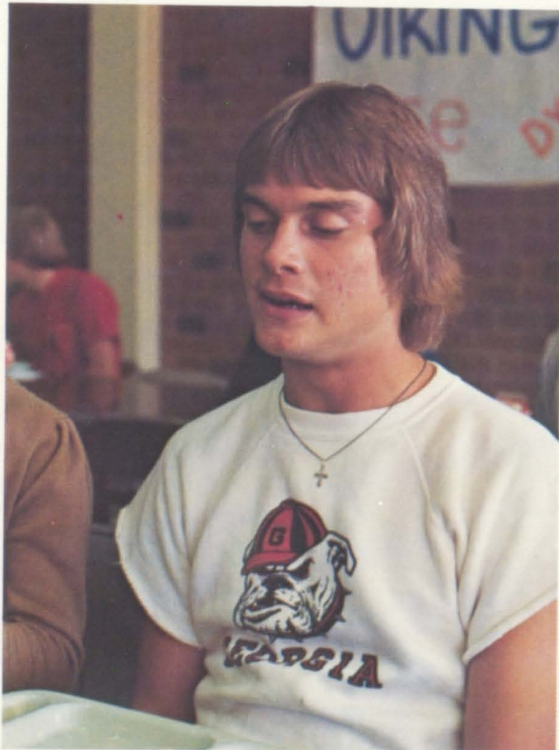

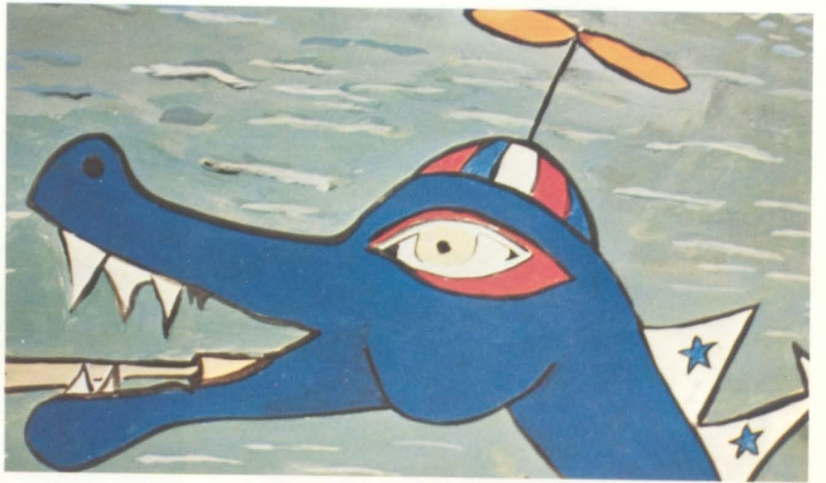

*there are times of stillness . . .*

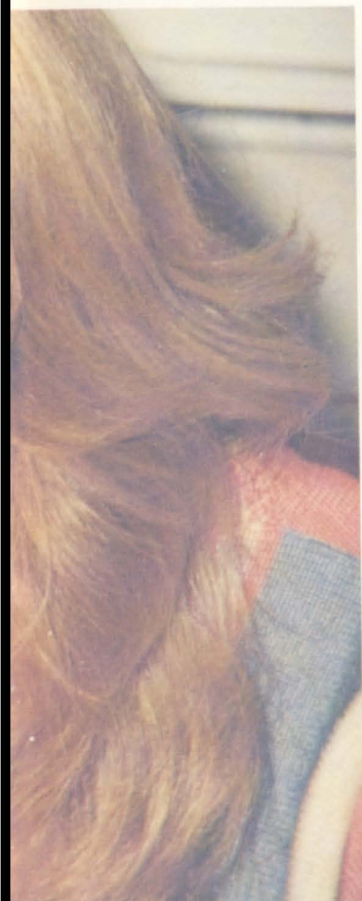

*... and times when,  
trampled on,  
we wait  
for that crucial moment  
when an ocean  
comes tumbling down.*

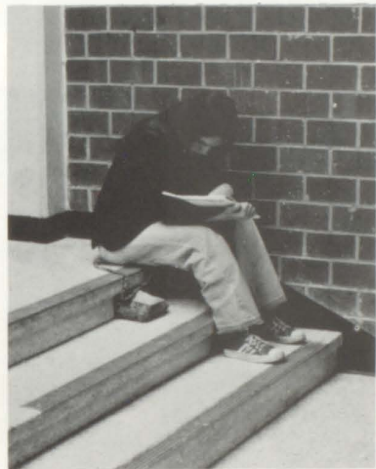

*inventing our own way of life,  
we are sometimes unsatisfied with the results,  
and often surprised by them.  
all of us working together  
to create a totally new year.*

## Gift of youth.

This gift was embodied in a mythical ring belonging to a hero, Ogier the Dane. Ogier's ring not only removed the wearer's infirmities; it also restored his youth. Try your Balfour class ring 50 years from now. Maybe it can do the same.

HOWARD L. SMITH  
Peachtree Corners  
3300 Holcomb Bridge Road  
Norcross, Georgia 30071

representing

*L. G. Balfour Company*  
JEWELRY'S FINEST CRAFTSMEN

The heat melted the sand. Poking his stick into the puddle, a tribesman pulled away a long string. The further he pulled, the thinner it got. Until it hardened. The tribesman didn't know he was seeing a miracle. Or that he was the first man to draw glass into a fiber.

Today, we melt sand plus other ingredients at 2500° F. While the glass is liquid, it flows through tiny holes that shape it into fibers finer than human hair. That's fiber glass. Which can either be made into insulation and construction products. Or assembled into textile yarn — for weaving fabrics and reinforcing products.

Glass in fiber form has a combination of properties you won't find in any other material. Fiber glass is **dimensionally**

**stable, flexible, fire resistant, strong.** These characteristics have made fiber glass an important material. And Owens-Corning is the world's leading maker of glass fibers, producing a wide range of products under the trademark, "Fiberglas."

Over 30,000 end products contain some Fiberglas® material.

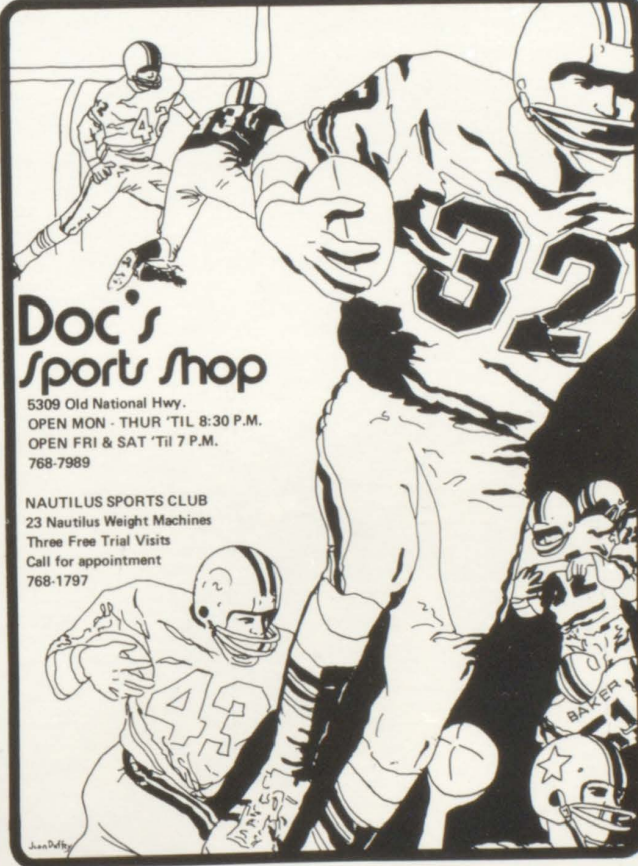

**Fabrics** — which resist fading, shrinking, wrinkling or burning.

**Insulation** — which keeps buildings warmer in winter, cooler in summer. Plus sports equipment, cars, tires and many other things.

At Owens-Corning, we're putting a 10,000 year-old fiber to good use!

*westwood—  
a small reflection of  
american life.  
proud of our past,  
and anticipating our future.*

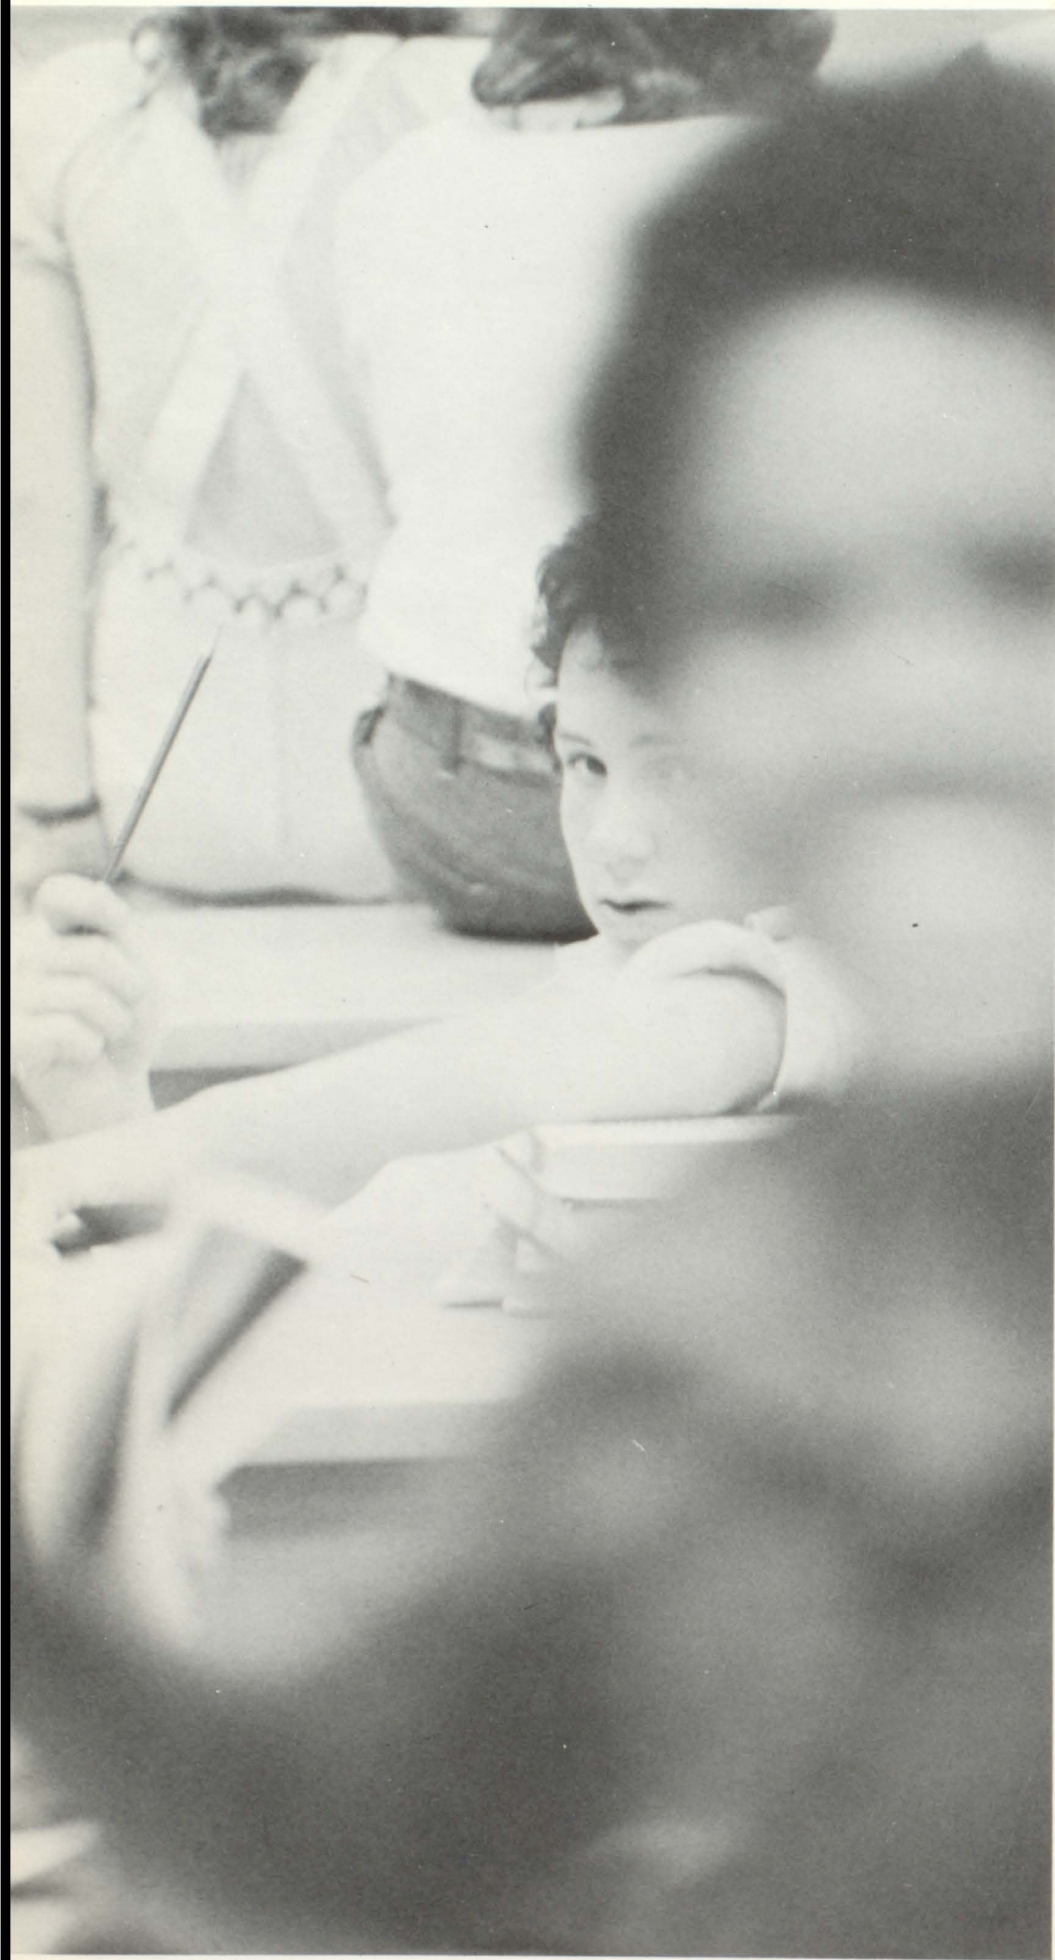

*sometimes it seems as though  
i am lost in the crowd.  
that is westwood.  
faceless, nameless,  
i have no identity.  
but then i realize that  
as an individual,  
i am important.  
i can make a difference.  
for without each individual,  
there would be no westwood.*

*slowly, bit by bit,  
our lives are coming  
into focus.  
we are beginning to realize  
our own worth,  
and to grow within ourselves.*

*the process of change  
goes on.  
we are constantly searching,  
trying to determine  
the direction our lives  
should take.*

*each person here at westwood  
is different,  
separate from all others.  
each experiences his own  
failures and successes,  
and forms his own special identity.  
it is all of these individual  
personalities together which  
form our school, westwood.  
there is something here  
for each of us,  
search and you will find it.*
