The American Dream Is Theirs

By PETER WEST

"Hey, let me have one of those deluxe cheeseburgers," an old man whispers to Pok Yi, co-owner of the Downtown Luncheonette, formerly Horne's, on Hay Street.

Yi smiles faintly, turns and throws a patty on the griddle, next to frying okra and a pot of grits. She and her husband, Yong, don't talk much, saving their energy for flipping burgers, chopping lettuce and scrubbing the shiny Formica tables. The good-natured patrons, most of whom seem to spend hours over their coffee cups in booths along the wall or at counter chairs, don't mind the couple's shyness: They crack jokes and rib them as they would any ma and pa luncheonette owners; and the Yis take it in stride, firing back in hybrid Korean-English.

"You want burger? Okay," Yi replies to the old man.

The scene in the Downtown Luncheonette would have been uncommon 15 or 20 years ago, when ownership of local businesses by Asians was all but unheard of, and the only real Asian presence here was a few Korean and Vietnamese war brides; but times have changed. Today, there are more than 4,000 South Koreans and 300 Southeast Asians, as well as a sizable number of Chinese, Japanese and Filipinos, living in Fayetteville and

Cumberland County. Asians own an increasing share of the city's businesses and restaurants, and their children, most of whom did not speak a word of English before emigrating, are often the hardest working and best students around. According to a 1986 Southern Baptist Convention report, an estimated 542,400 South Koreans and 634,200 Vietnamese currently live in the United States. As of the 1980 census, a total of 3,500,636 Asians of various origins and Americans of Asian descent reside

origins and Americans of Asian descent reside in this country, about 18 percent of whom live in the South. Their numbers, strengthened by immigration from poor, undeveloped Asian countries, are expected to rise steadily far into the next century, the report adds. "Visibly the Asians are growing by leaps and The

bounds," says Elmer Floyd, Fayetteville's Director of Human Services. "With the energy they've got, they quickly become economically sound. I don't know how they do it."

The Yis, who barely speak a word of English, emigrated six and a half years ago from their native Seoul, South Korea, where Yong Yi was a postal employee and his wife was a cook. They have owned the luncheonette three years now and put in long 10½-hour work days, six days a week.

Hiep Le won't take no for an answer. In

"(Asians) use good business practice," Floyd says. "They can take a business and make it work because they're hard workers. And when

they're not working, while others flip on the radio, they're studying English." English instruction, a popular pastime for

new immigrants, is taught nightly, free of charge at Fayetteville Technical Institute, local churches and schools. Recent arrivals are not required by law to study English, but most jump at the opportunity, seeing it as an essential survival skill.

It is not uncommon for an exhausted refugee or immigrant who has put in long hours in a menial job to attend a local English class three or more nights a week, averaging three hours each session. Most do it because there is no returning home; they are here to to stay.

The majority of South Koreans here found their way to Fayetteville through familial connections — some tenuous — to women who married Fort Bragg soldiers. Sisters and brothers, aunts and uncles, and nieces and nephews follow their female relatives, settle and, in turn, send for their own families and friends. Other South Koreans, finding few opportunities in surrounding regions, are attracted to Fayetteville by the prospect of landing jobs and finding support through the city's already large South Korean population. Asians in general have a high regard for community and family, and care for fellow countrymen when far from home.

reflection.

No matter how they arrive, they go to work quickly, often in jobs far below what they had in their native countries: lawyers laboring on factory assembly lines, upper middle-class merchants working as shoe repairmen, former military brass selling insurance and entertainers trading in their microphones for measuring tapes in clothing stores. Most work hard and have tapped into the American dream quickly, says Floyd.

Although the South Korean economy has improved considerably in the past 10 years, overcrowding is rampant, labor conditions are harsh and unemployment is still widespread, says Soe Hee Weatherell, editor of the Carolina News, the first Korean language newspaper in the Carolinas. "It's hard to get a job in Korea," she adds. "Even if they graduate college, they have hard time to find work. Many people come here with high degrees."

Tensions with South Korea's Communist neighbor to the north and fear of war further speed emigration to Western countries, says Weatherell. "There are a lot of (people from other) countries coming to the U.S. for many reasons," she says. "They want to be richer, more freedom here."

of our past."

FROM LEFT, ROSALIE KELLY, J.L. DAWKINS, HURLEY, M.J. WEEKS Fayettevillians Hold All-America City Plaque In Washington

Fayetteville Presented All-America City Award

By TOM KRISHER Of The Times Staff

WASHINGTON — With a jubilant smile and a firm handshake, Fayetteville Mayor Bill Hurley accepted the All-America City award during a dinner ceremony here Monday night.

Presentation of the gold-framed plaque brought a formal end to the hoopla surrounding the award, and Hurley and other city officials said it also marks a new challenge for everyone in Cumberland County.

"We really have just begun," Hurley said, "All of us in Washington certainly hope the momentum will continue." The new challenge, Hurley says, is to continue to make sure projects that have started will be completed.

Fayetteville and seven other cities were chosen for the award this year, mainly because they demonstrated an ability to overcome problems to improve their quality of life, officials of the competition

The All-America City program is

sponsored jointly by the Citizens Forum on Self-Government and the USA Today

See AWARD, Page 5-A

Award____

newspaper. The winners were announced in late March. City officials said the award is more than just winning a contest. They say it will bring favorable publicity to the town and help it

attract industry. "Fayetteville is headed for higher and better projects," Councilwoman Mildred Evans said. "We are looking forward to industry coming here with the jobs

that they would provide." Hurley was presented the award by Ed Rollins, President Reagan's assistant for political and governmental affairs. When Fayetteville was in-

troduced by Rollins, a delegation of about 20 city officials and citizens sent up a rousing cheer. Rollins said Fayetteville had taken a "verbal beating" in the 1970s but rebounded when 10 citizens started a group that grew and helped improve the city.

As a result, he said, "A cluster publ of sleazy bars has been turned into new offices," a reference to the Inc.,

Representatives of the private sector touted the award as a great help for economic development in the area.

From Page 1-A

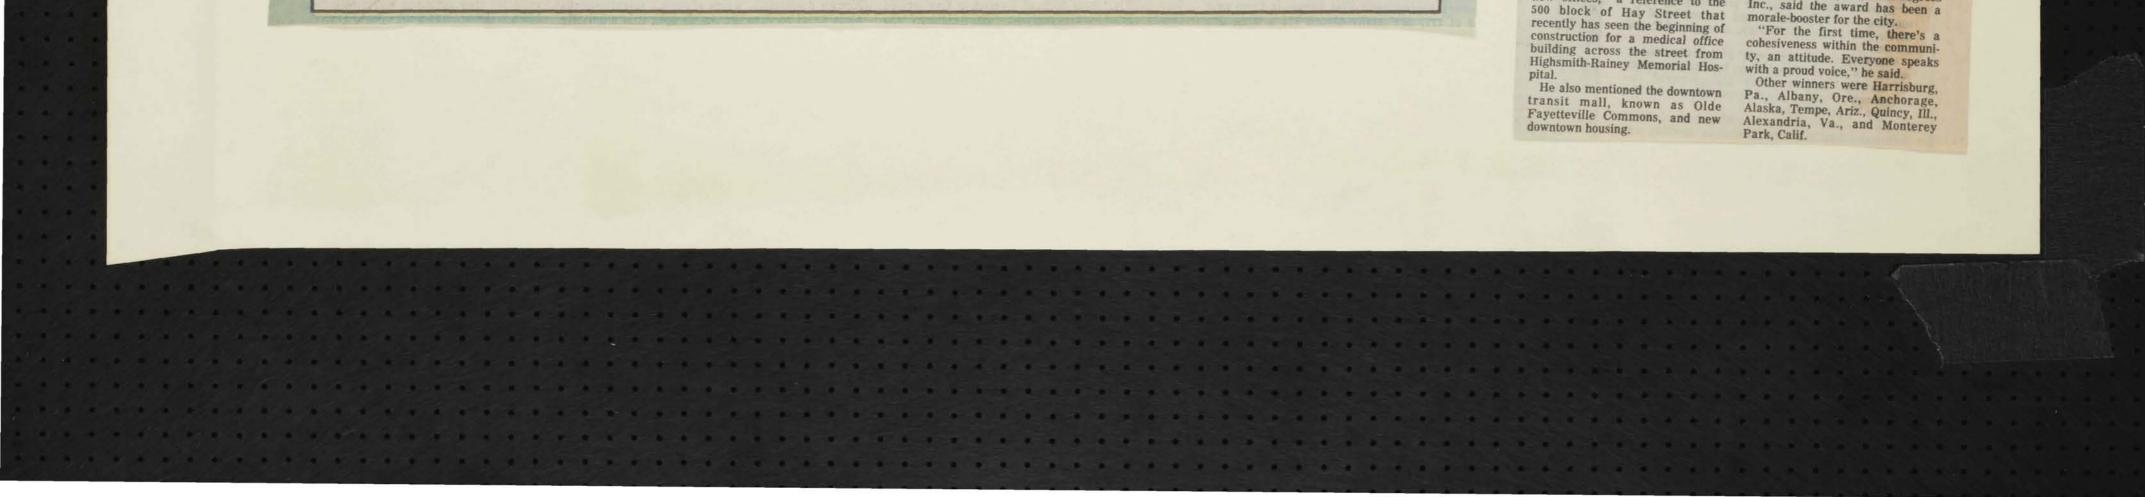

"It tells the rest of North Carolina that Fayetteville is as competitive and as agressive as any other city in the state," said Bobby Suggs, public affairs manager for the Fayetteville Division of Carolina Telephone and Telegraph Co.

"When your big industry looks for a city, they look for cities that are recognized. We don't just blow wind. We do what we say we're going to do," Suggs said.

City Manager John Smith said when a company is considering five or six cities, it will look to see which is more livable and decide to locate there. He says Fayetteville is a great place to live, and the award will bring that to industry's attention.

Aside from the favorable publicity, M.J. Weeks, former chairman of Fayetteville Progress

They're Proud Of The Past

FTI Grads Challenged To Motivate

By JOHN J. MOSER Of The Times Staff

More than 700 graduates of Fayetteville Technical Institutes were told Monday that graduation is just "one step on a ladder to success" ind that they can be successful by using the "motivation that comes from within.

"Purstit of knowledge is a lifelong process; this is not the finishing line," said Fayetteville businessman Doug Fellows, keynote speaker for FTI's 23rd annual commencement exercises. "And I believe you will come to realize that graduation is not the ed of your education.'

Fellow, a 1981 FTI business administration gramate, told the graduates that "I am one of yu. I've been down the road. I'm a always busy."

brother of FTI." And he told them that he was confident they would "be successful because you believe you will - you believe in what you're doing."

"Every day there are people around us who are afraid to take that step - they're afraid of failure," Fellows said. "But you must do more than dream. The world is full of dreamers. But only 1 percent of us reach out to touch our dreams. You can be among that select group of people ... who end up self-satisfied."

Fellows said the "real movers and shakers of the world are those who are

Graduation 'Not Finishing Line' "To them, it's not a matter of work, but of accomplishment." Fellows said. "Of setting goals and achieveing them." But he said the quality which makes the difference between a winner and a loser is motivation.

"The piece of paper you get here tonight does not have a money-back guarantee," Fellows said. "It is worth only what you do with it. Learning things doesn't really teach you a lot unless you use the knowledge you have acquired. I challenge you to meet life head on and win."

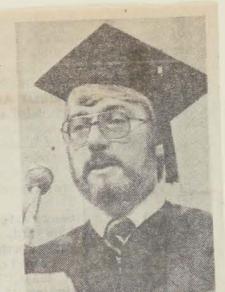

Fellows, a former Fayetteville broadcaster and now owner of Media Reach

Marketing Services, helped form the FTI Alumni Association and in December was named its first president. Earlier this month, he was given the group's first Outstanding Alumnus Award.

During the commencement, 528 associate degrees and 178 diplomas were awarded in 50 curricular areas.

James Ronsley Hurst of Fayetteville, a paralegal technology student, was named winner of the Trox Poland Memorial Award as the outstanding senior class member. Hurst maintained a 3.7 grade-point average during his studies.

The award commemorates the memory of Poland, a former instructor and computer center director at FTI.

DOUG FELLOWS **Keynote Speaker**

FTI Graduates Challenged To Achieve

By CHRIS NELSON Staff Writer

The president of Fayetteville Technical Institute's alumni association challenged the school's 1985 graduates Monday night to set goals in their lives and achieve them.

"The piece of paper you receive tonight does not have a money-back guarantee," Fayetteville businessman Doug Fellows told about 700 FTI graduates. "The value of it you make yourself.

Fellows told the graduates that in a world "full of dreamers," they need to become the 1 percent who are "doers.

"The people who have all the breaks are actually the people who anticipated and positioned themselves for those breaks to come," he said.

The graduates have already faced the challenge so many are afraid of by educating themselves, he said. But in today's high-tech era, education is "something you do forever."

The education they have now and will earn in the future can be used to better society and their own community, the graduates were told. The future is up them,

said Fellows.

"I challenge you tonight to become a significant human being," said the Newark, N.J., native. "I challenge you to pick up the pace and make us all run a little bit faster.'

Fellows himself has "picked up the pace" at FTI by organizing its first alumni association last fall and becoming its first president. Earlier this month he was named Outstanding Alumni of the Year.

Fellows has worked for a number of local radio stations since graduating from FTI and now owns his own media marketing firm here.

"I'm no one extra special," he told the graduates. "I'm one of you ... a product of FTL."

FTI awarded 528 associate degrees and 178 diplomas in 50 curricular areas Monday.

James Hurst, a graduate in paralegal technology, was awarded the Trox Poland Memorial Award, in part for keeping a 3.7 grade point average at FTI since beginning school there in 1982. The award includes a \$100 stipend. Mar Log Str.

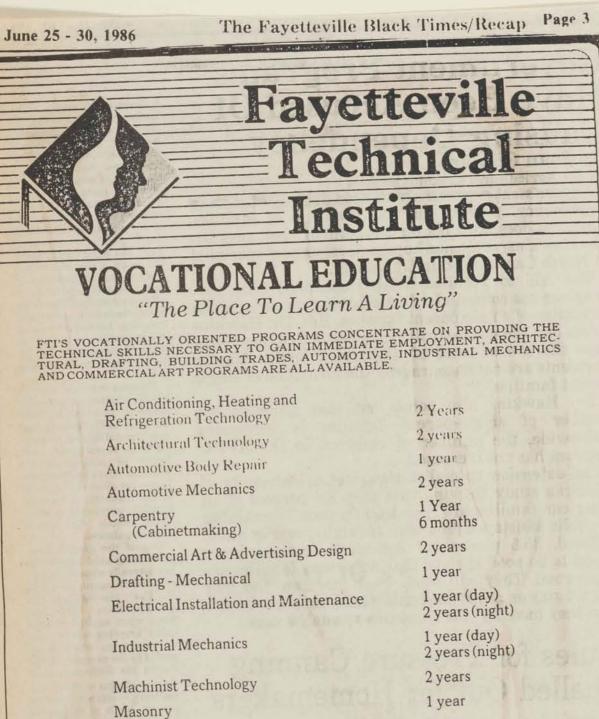

The award is in memory of Poland, a

"Pledge that you will be more than than average, that you will go beyong mediocrity," he said.

former instructor and director of FTI's Computer Center.

FTI Foundation Board Gets Started In School's First Fund-Raising Effort Fayetteville Technical Institute Monday introduced the FTI Foundation Board of Directors, a new fund-raising arm expected by a consulting firm to raise \$400,000 yearly for the school. The 15-member board met for the first time Monday with FTI officials to begin discussions on how to raise supplemental funds. The Foundation, formed last January, is the first money-raising organization for the school. Members of the board include local business and civic leaders. Pat Hickmon, FTI's director of institutional resource development, said eight to 10 more members should be joining the board by January.

Henry Bernhardt, a consultant with Institutional Development Associates of Salisbury, told board members the school will never be able to hire a fund-raising staff and instead would have to depend on the volunteer help of its foundation board to raise funds.

Board members will have to contact other community leaders and businesses to raise funds, said Bernhardt. "We're not talking about going door-todoor, we're talking about encouraging them, cultivating them and their interests," he said. "This is the first step on a journey of thousands of miles and millions of dollars," said Bernhardt. "It ... will enable FTI to do many things it could never do on tax money alone.

Bernhardt said a study shows the school could raise \$60,000 to \$80,000 next year and by 1989 could receive

had then."

By MARY GREENE

An archaeologist, a portrait painter, a banker, a retired colonel, a newspaper editor, a teacher, professors and other local historians will combine their knowledge and expertise this winter to teach a course on "Your Community's Past: A Survey of Cumberland County History.'

Sponsored by Fayetteville Technical Institute, Cumberland County Committee for America's 400th Anniversary and Historic Fayetteville Foundation Inc., the course at FTI will cover local history from prehistoric times to progress in the '80s. It will focus on several specific areas of historical interest, including politics, architecture, religion and the lives of blacks and women.

"It's an opportunity to learn something about the history of the area," said William C. Fields, leader of the course, "It's interesting to know what went

before." The instructors are all local residents with a common interest in history, Fields said. Some are Cumberland County natives, one is from Robeson County, and others have come to this area from other parts of the country. Retired Army Col. Donald A. Seibert, for example, is a transplanted northerner.

"Col. Seibert is a native New Yorker," Fields said with a wry smile, "so we'll have the Civil War from the Yankee perspective."

Each instructor will give a lecture on one or two topics, and many will augment their talk with slides, maps and other visual aids. 2 2 There -

K Jakar Hart 1 175 200 法的论论的论论 STATE HOUSE FAYETTEVILLE, NORTH CAROLINA Site of North Carolina's Constitutional Convention-1789

It is the third time that FTI has offered the course, which runs from Jan. 17 to March 28. Its first two sessions in 1982 and 1983 had classes of 100-125 students, and Fields said demand apparently is still high.

"Certainly the vast majority of the local population consists of people who've moved here in the last generation or less," he said. "Even those who have lived here all their lives may not realize what went on before." Fayetteville, a major inland port, was one of the most important towns of the country in

earlier days, Fields said. "One of the benefits of learning history is to gain a better understanding of why things are the way they are and how they

realize a river is over here they've never stopped to think that's why a city grew up here," And because history continues to happen every day, this year's course will include events that the others didn't cover. "It's only just in the last few years that any of those elaborate and hopeful plans for downtown have begun to take form," Fields said. "People tend to think of,

history as being rather ancient-World War II is even ancient history to some people now. It's all relative." The class will meet 7-9 p.m.

Thursdays in the FTI auditorium. The series is open to anyone 18 years of age or older. The cost of the course is \$10 plusic.

'I'm sure there's a tremendous number of people who don't even realize a river is over here - they've never stopped to think that's why a city grew up here.'

Fayetteville Technical Institue President Craig Allen with faculty and staff at Monday's fund-raising kick-off FTI Launches Fund-Raising Campaign "During the early stages we looked toward this moment with

From Staff Reports

The Fayetteville Technical Institute Foundation launched a week-long fund-raising drive Monday, and has already raised more than \$10,000,

Most of the pledges counted Monday, representing about 35 percent of officials said Monday. the school's faculty and staff, came last week in a fund solicitation training session, said Pat Hickmon, FTI's director of institutional and

The on-campus fund-raising drive will last through the week, and all resource development members of the faculty and staff will be contacted, said Hickmon. Students will not be solicited directly but can make donations, and some

The FTI Foundation was formed last year after a consulting firm told have, she said. school officials they could raise about \$400,000 annually from the The foundation is FTI's first fund-raising body and this is its first fund community. A board of trustees for the foundation, comprised of civic and industry leaders, was elected in January. drive.

apprehension because we didn't know how it would turn out," FTI President Craig Allen told a kick-off gathering of about 200 Monday. But, he added, "We feel it will be helpful to our facility, our staff, and

especially, we always think about our students. Businessman Dave Wilson, a former FTI instructor and chairman of the foundation, noted that most fundraisers start by soliciting alumni, but FTI is asking for funds from those with a closer relationship to the

"We've really done a good thing in letting the people who are most involved day to day in the school be the vanguard and the point men in school.

this endeavor," said Wilson. Wilson later said no monetary goal has been set because it is too early

However, Hickmon said one goal is 100 percent participation by campus to tell what money is available.

In September, selected local business and industry will be solicited for personnel.

FTI Approves First Phase Of \$14 Million Plan

From Staff Reports

The initial phase of a \$14 million proposal to expand Fayetteville Technical Institute 65 percent by 1990 was approved unanimously by the FTI Board of Trustees Mon-

The board approved a capital needs survey for next year that includes the completion of a \$3 million student activities building, addition of parking space, equipment and personnel and perhaps some renovation.

It was the first step in a plan to add four new buildings to the campus. The proposed buildings would add nearly 200,000 square feet of space to FTI, the largest technical institute in the state. Current building space is 309,426 square feet. The survey will be the basis for

FTI's capital improvements request to the state General Assembly next year, according to FTI President R. Craig Allen. The General Assembly allocated \$1 million last year for the student center. On Monday the board approved a contract for design of that center with the MacMillan & MacMillan architectural firm of

date.

Favetteville and voted to pay the firm \$3,170 for preliminary work already completed. FTI officals haven't announced the building site or an anticipated completion

Before another request for more money for the student center is made to the General Assembly when it convenes in February, Allen said FTI officials will begin talks with Cumberland County commissioners to look for local funding possibilities.

After the student center is completed, the long-range plan calls for construction of a vocational building in 1986-87, a general classroom building in 1987-88 and an adult education center in 1988-89.

The building schedule depends on funding. For the entire project, the long-range plan predicted capital outlay needs in excess of \$6 million each from the state and county.

According to the long-range plan, FTI officials think they should be near the top of the list to receive state capital outlay money because of its need. The current building space at FTI represents less than 50 percent of that required by the state Department of Community Colleges for an institution FTI's size, the report said. The plan also said FTI will need the four buildings before 1990 "just to meet needs."

In other action Monday, the board approved 21 nominees to the FTI Foundation Board of Directors

FTI Takes Step To Fund Expansion

By JOHN J. MOSER

The Fayetteville Technical Institute Board of Trustees on Monday took the first step toward funding a \$14 million improvement plan, announced in July, to increase the institute's

size by 65 percent by 1990. The board gave unanimous approval to a capital improvement needs survey, which FTI President R. Craig Allen said will "be the basis for our (capital improvements) request from the state General Assembly for next year." Allen also said FTI officials soon will begin talks with Cumberland County commissioners "to see if there is any possibility of getting the kind of money we're talking about."

Allen said the talks with commissioners will come before the next session of the General Assembly, which begins in February.

A capital improvement needs survey is developed annually by FTI officials for the State Board of Community Colleges but needed approval of the board of trustees this year

because it will be the used in the funding requests.

The long-range plan would add four buildings or nearly 200,000 square feet of space to FTI's 309,426 square feet. FTI already is the largest technical institute in the state.

The needs survey approved Monday includes only the portions of the plan expected to need funding during the next fiscal year completion of a \$3 million student activities center, addition of parking space, equipment and personnel and possibly some ren-

The board on Monday approved a construc-tion contract with McMillan & McMillan Construction Co. of Fayetteville for the center, for which FTI already has received \$1 million from the state General Assembly. The board also voted to pay the construction firm \$3,170

for preliminary work. The long-range plan also calls for building a vocational building in 1986-87, a general classroom building in 1987-88 and an adult

education center in 1988-89. For the overall project, the long-range plan estimated capital outlay needs in excess of \$6 million each from the state and county. The construction schedule, the plan says, "is contingent upon allocation of funds.">

FTI officials have said that county funding would likely come from a bond issue. Allen declined to say how much FTI will ask from the county for the next fiscal year.

The long-range plan said that "(FTI) should be near the top of the list to receive state capital outlay money" because of its need. FTI officials said the current building space at FTI represents less than 50 percent of that required by the Department of Community Colleges for an institution of FTI's size, and that FTI will need the four buildings before 1990 "just to meet needs."

Also on Monday, the board approved 21 people as members of the FTI Foundation Board of Directors.

R. CRAIG ALLEN **President Of FTI**

County Expected To Turn Down FTI On Building Fund

By JOHN J. MOSER Of The Times Staff

Fayetteville Technical Institute's Board of Trustees were told Monday not to expect \$750,000 in county funds requested for 1985-86 capital projects, but were given better news concerning state and federal funds.

FTI officials also announced Monday that they will form a contractual arrangement which would allow students to gain credit at Methodist College for FTI general education courses and would make it easier to transfer FT1 credits to other four-year received by FT1.

colleges and universities. The program, which will require some of the FTI courses to be taught by Methodist instructors, was given unanimous approval by the board of trustees. Though aproval must come from the state Department of Community Colleges, FTI hopes to institute the program next fall, starting with about 14 courses, officials said. The county money was to be the first installment of a contingency fund used to pay for a \$3 million student development center, on begin in December. FTI already has received \$1 million for the center from the state General Assembly and expects to receive the remaining funds in the coming biennium. But the county money

would have allowed FTI to continue constructing the center in phases if the state money did not come as expected. FTI President R. Craig Allen

quoted Cumberland County Manager Cliff Strassenburg as telling him the county "didn't expect such (scheduled city-county) school programs. merger.

"But we are still looking very hard to the state for that \$2 million," Allen said. request for 1985-86, which calls for schools, FTI officials said.

Construction of the student center would be the first phase of an \$18.6 million expansion which would add four buildings and increase the size of FTI's campus by 65 percent by 1990. The plan would add nearly 200,000 square feet of space to FTI, already the largest technical institute in the

a 10 percent increase, "is still in

fairly good shape."

state. Better news in regards to funding came when Allen told the trustees that \$133,000 in federal and state grants recently had been

Allen said that a \$93,000 in federal funds were received earlier this month as the third installment in a five-year cooperative assistance grant and that the North Carolina Department of Community Colleges has approved a \$40,000 grant - the largest amount allowable - for FTI's automotive mechanics program. Under the course transfer ar-

rangement, students taking general education classes at FTI could opt, for no additional cost, to have credits count toward a which construction is scheduled to transcript from Methodist College, FTI officials said.

The program would allow FTI students to accumulate credits for transfer into a four-year program at Methodist or other four-year institutions.

Transferring FTI general education credits has been difficult because some schools would not accept credits for non-technical studies taken at a technical school. FTI spokeswoman Barbara Copeland said. Fourteen other technical institutes across the a (large) funding need for the state already have such transfer

FTI has an agreement with Fayetteville State University which allows such credits to be accepted there, but FSU declined Allen also said Strassenburg told to extend the program to him that FTI's current expense transcripts for use at other

Quilts: Craft Or An Art?

By SUSAN HOUSTON

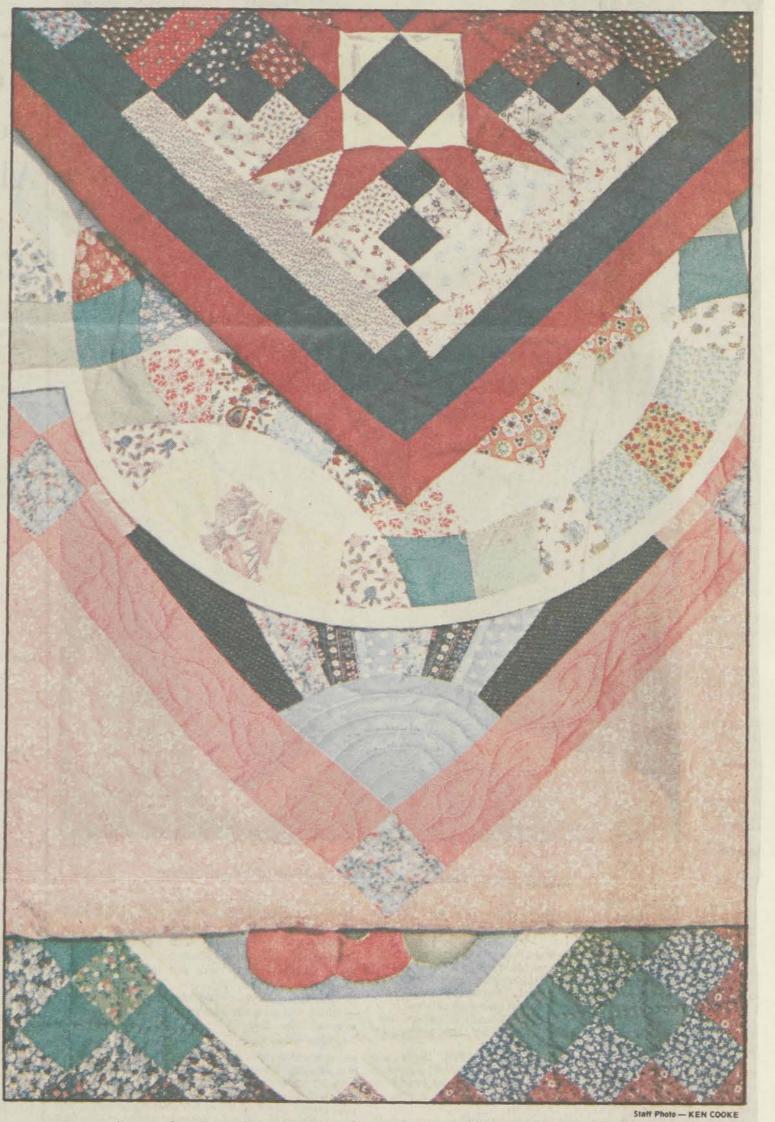

When New Yorker reporter Andrea Lee left the big city to visit her aunt in Ahoskie, she craved a beautiful pure cotton patchwork quilt like the ones her uptown friends had used "to transform their apartments into rustic retreats.' Instead, Lee wrote in the New Yorker

of July 11, 1983, she found a more economical but less asthetically pleasing substitute:

"The big pieced squares she pulled out were strangely disappointing to me, for a reason I could not at first discern ... All of them were exquisitely hand-stitched and showed a strong, spirited sense of design, and all but two were maddeningly to me - made of polyester.

Lee was disappointed because she was looking for artwork from quilters who were making traditional crafts.

Ironic as it may seem, these quilters whom Lee described as using "stretch polyester in boldly patterned prints" or 'patches printed a Fred Flintstone design

- are the true traditional quilters.

That's the conclusion of Dan Patterson, chairman of the curriculum in folklore at the University of North Carolina at Chapel Hill and peruser of several master's theses on quilts.

Patterson explained that a quilter is practicing a traditional craft when she uses scrap material, learns the patterns from friends or relatives, quilts with a group in a bee and uses the quilt on the bed to keep warm.

"Quilting is the strongest of all the traditional crafts for three reasons: You saved cloth you didn't want to throw away," Patterson said. "It was also a social activity where you could talk, laugh and tell stories, and it offered a scope for active imaginations.

Traditional quilts are usually brightly colored because they are a patchwork of whatever is available. "It would take money to control the colors of the quilt," Patterson said.

Artistic quilters are able to control just how their quilts will look. They use pure cotton or muslin, buying yards of new cloth at the time just for the quilt. They learn their patterns from books, quilt individually and use the patchwork for clothes or as decorative wall hangings or bedcovers.

The big city quilts Lee had seen were probably made by someone who used subdued colonial colors and small prints to create a patchwork that looked like a more traditional craft but had the background of fine art.

Quilting - the art that is a craft and the craft that is an art - is the focus of the three-day Quilt Fest '84, which opens today at Methodist College's Reeves Auditorium

A total of 78 pieces of patchwork quilts, wall hangings, clothes - will be displayed 11 a.m. to 6 p.m. today, 10 a.m. to 6 p.m. tomorrow and 1 to 5 p.m. Sunday. Admission to the show and the quilt making demonstrations is \$1.50 for people age 16 and over and \$1 for senior citizens

The fest is sponsored by the Tar Heel Quilters' Guild, a social and teaching organization dedicated to the preservation of patchwork. But are the 60 members of the guild artists or craftsmen?

"We're both!" said Kathy Gray, quilt show coordinator for the group. "It's such a precise craft that it becomes an art whether you want it to or not. Each one of them has to be done mathemati-

A sample of patchwork quilts that will be on display at Quilt Fest '84

cally and precisely or you will not have a it's not the same as the days when flat piece of fabric. "Designs for quilts are changing. one quilt.

There's more art now than there was a long time ago," said guild member Jean Adkins, who operates The House of Quilting from her home.

"(For) my first quilt, I used feed sacks and I would buy a yard or half-yard of material at a time," she said. "I'd sew a round 'til I used it up and then buy another.

Adkins, who has been quilting for 25 years, has been part of the evolution from craft to art. She learned some patterns from her mother and mother-in-law, but since then she has taken and taught quilting classes through Fayetteville Technical Institut

Quilting is a social event for Adkins, but

community women gathered to work on

"Sometimes we still get together and work on a big frame," she said. More often, she and the other members of the Tar Heel Quilters' Guild meet in one room to work on separate quilts. They also piece and sew their quilts individually at home. Since the mid-1970s, there has been a

surge in the demand for quilts, Gray said. She credited a bicentennial interest in all things colonial and the back to nature movement of the '70s for the patchwork passion.

About a thousand quilters in North Carolina are plying their busy fingers to satisfy this modern quilt craving. "There are some (quilters) in almost any

community," Patterson said. "It cuts across any kind of barrier. It's practiced in towns and countrysides."

This preoccupation with patchwork must seem strange to the older women who used to make quilts out of flour sacks, funeral wreath ribbons and scraps of old clothes. A handmade quilt now commands a price of \$250 up to \$1,000, Adkins said

At times, they, must side with the Ahoskie woman who told the New Yorker reporter, "I'd rather sleep under a blanket or under one of those nice Sears comforters. We all grew up with quilts, and they wore out, and it wasn't anything special. What are you going to do with a quilt when you get it, anyway - hang it on a wall?"

Top technician

Sp4 Anita Klein takes Pvt. 1 Ben Spaulding's blood pressure in the back of an Army field ambulance. Klein culminated six challenging weeks in the Emergency Medical Technician - National Registry Course, by being recognized as the Distinguished Honor Graduate. Klein, a senior aideman in the 429th Medical Company (Ambulance), 44th Medical Brigade, 1st Corps Support Command, finished first in a class of 20 students at Fayetteville Technical Institute. Klein's classroom accomplishment climaxes a year of personal achievements. She was cited in October 1983 for providing prompt, expert emergency treatment to a soldier who had incurred injuries during an airborne operation. Earlier in the year she had also been named the honor graduate of her Basic Leadership Course. (Photo by J.J. Jones)

classes

ART: The fall session of adult art classes begins Sept. 10 at the Fayetteville Museum of Art. Offerings include Oriental brush, watercolor, drawing, oil painting, oil portraiture, pastel, basketry, calligraphy, graphics and crafts. Information: 485-5121. Cosponsored by the museum and Fayetteville Technical Institute.

BASIC EDUCATION: Reading, writing, spelling, math and consumer education skills will be taught in Adult Basic Education Classes at Massey Hill Recreation Center, beginning Sept. 4. Register anytime before the first class. Free. Information: 484-0263.

METHODIST COLLEGE GENERAL EDUCATION TRANSFER PROGRAM

Home for the summer? Want to continue or get an early start on your college education? Why not join us this summer on the FTI campus, where FTI and METHODIST COLLEGE have joined together in offering A GENERAL EDUCATION TRANS-FER PROGRAM.

Two full years of Freshman/Sophomore courses.
 Low in-state/out-of-state tuition rates.

Credits are awarded by Methodist College and are transferable to other four year colleges or universities that accept transfer credits from Methodist College.
 Day or evening schedules

Classes Begin July 10 - Classes End August 15

By JOHN J. MOSER

Fayetteville Technical Institute's Foundation Board of Directors met for the first time Monday and began discussions on how to raise the \$400,000 a year in supplementary funding that a consulting firm says it can.

The 17-member board, made up of business, media, civic and community representatives, will supervise the foundation, which was begun late last year to secure grants and other resources for the school.

Before the foundation was formed, FTI had no real supplementary income, according to Thronton Rose, a member of the new board and finance chairman for FTI's Board of Trustees. Pat Hickmon, FTI's Director of Institutional Resource Development, said the new board

first order of business will be to "make others aware of (FTI's) needs.' "Before we ask the community to support us,

Board Begins Quest For FTI Funds

they have to be aware that the people who represent the institution are giving their support," Mrs. Hickmon said.

Henry C. Bernhardt, president of the Salisbury-based Institutional Development Associates (IDA), said a three-month study conducted at FTI shows that \$60,000 to \$80,000 in supplementary funds could be realized by next year, and that the school could be receiving \$400,000 a year in supplementary funding by 1989.

"This is the first step in a journey of thousands of miles and millions of dollars," Bernhardt told the new board. "It will make a eventually will grow to 25-35 members, and its very good institution a great institution, and

will enable FTI to do many things it could never do on tax money alone.

He said the new funds will come from state and federal grants, an annual giving program, special private and corporate gifts, alumni and friends of the institution and other sources. Fundraising will begin with an on-campus drive this year, he said.

Mrs. Hickmon declined to estimate how much she thinks the foundation can raise, saying it 'would be premature to set a monetary goal." "I think that will be left to the board," she said.

IDA was hired in December to conduct the study and help implement an institutional resources development program at FTI. The

FTI From Page	1-B	2	
firm was paid \$2,500 for the study and will be paid \$8,000 a year over the next three years to act as a consultant and to conduct re- search, FTI President R. Craig Allen said. The new board conducted no business Monday, but received suggested by-laws and articles of incorporation for the foundation, on which it is scheduled to vote at its January meeting.	The members also heard strategies in identifying and cultivating constituents and fund raising, and were told the duties and responsibilities of being a board member. "We're not talking about going door-to-door," Bernhardt said, "We're talking about encouraging people (to give) — cultivating them."	The new board also received encouragement from FTI officials. Board of Trustees Chairman Harry F. Shaw said the meeting was "one of the most important ever at FTI." "FTI is at a point where it can extend its influence in the commu- nity," Shaw told the board. "And you'll be embarking on a journey	you'll thoroughly enjoy." Members of the foundation board are Jessie Byrd, Maureen Clark, JoAnn Copeland, Tony Corley, Johnny Evans, Joe Holinshed, the Rev. Glenn Holt, Joel Jenkins, Richard Lewis, Steve Logue, Albert McCauley, Richard Player, Karen Rand, H.D. Reaves, M.J. Weeks, Thomas William Jr. and Dave Wilson.

FAYETTEVILLE INSTITUTE

FTI Puts Asbestos Behind, **Opens Massey Hill Annex**

By CHRIS NELSON

BSERVER, Friday, September 5, 1986

Fayetteville Technical Institute is in the process of abandoning the asbestos-laden Honeycutt Building and moving continuing education classes formerly housed there to an annex in Massey Hill, officials said Thursday.

Fayetteville Tech has acquired space in a building at the county's Massey Hill School and will occupy about 10 classrooms, said William Sease, FTI vice president for contining education.

Programs to meet in Massey Hill include: adult high school diploma, human resource development,

building since September 1985, according to officials. "It has created some anxiety on our part, in terms of health and safety of the students, and the insurance is prohibitive," said Forest DeShields, an assistant to Sease. "So we're not going to use that building for classes.'

Sease said one office remains in the building, but it is

to be moved within a month. The state has told FTI that the asbestos has to be removed, and FTI officials have said they plan to raze the building and use the land for parking. In the event the building is destroyed, the asbestos would still have to first be contained.

ELISABETH CRANDALL ELISABETH CHANDALL "If you are serious about finding a job, don't give up just because you've been turned down a few times. Take the time and let HRD help you. They will work with you and help you lind the job you have always wanted. It worked for me! I am the Medical Information Coordinator at the Department of Family Medicine at UNC-Chapel Hill and Ilove it."

DIANE REILLY "Without HRD, I would not be where I am now. HRD gives you self-condifence and it makes you sen-conditience and it makes you feel good about yourself. With the guidance of the HRD Staff, you can be a success! Presently, I am employed at Fayetterville Technical Institute in the High School Dinlorge Program." hool Diploma Program."

emergency medical technician, the comp reading lab, food services training, and training for mentally retarded adults as semi-skilled workers.

About 525 students will meet each week at the Massey Hill annex, said Sease. "We will really keep that building full with educational activities from about 8 in the morning to about 10 in the evening," he said. Classes are to start Saturday morning.

The Honeycutt Building was acquired from the Cumberland County Board of Education earlier this year in a three-way land swap between FTI, the school board and county commissioners.

The building was diagnosed in February as having 5 to 10 percent asbestos in the material sprayed on its siding and wood paneling underneath.

Asbestos is a cancer-causing material that is toxic if inhaled. Environmental Protection Agency rules prohibit its use and require that any already in public buildings either be removed or contained. Fayetteville Tech has had classes and offices in the

ture in "Not for Children Only," a five-part lecture-discussion series being offered this fall by the Cumberland County Public Libary.

He said in a telephone interview he will speak on controversies, sexual stereotyping and the history of fairy tales.

"Until 100 or 200 years ago fairy tales were for the whole community and not just children," he said. Sullivan also will talk about "Tatterhood and Other Tales," a book, he says, with strong female characters doing things male characters might

normally be expected to do. "Tatterhood," Sullivan said, offers "a new look at fairy tales which haven't been popular but are as old as the fairy tales more well-known."

The class gives participants a chance to reread books they loved as children or read what they missed. The list includes old favorites such as "Charlotte's Webb" and "Little Women" and contemporary fiction like "I Am the Cheese."

"Not for Children Only" is held from Sept. 17 to Nov. 12 at the Headquarters Library on Maiden Lane. Programs are from 7 to 9 p.m. Copies of discussion material are provided for all registered participants. Duke University offers continuing-education credit. Space is limited, and registration is required. Call 483-8600.

"Not for Children Only" is one of many adult-education opportunities being offered this fall around the Cape Fear Region by schools and organizations. Fayetteville Technical Institute and other members of the state's community college system have scheduled continuing education courses from floral arranging to gourmet cooking to postal-exam preparation.

As in years past, the Red Cross will teach first aid, and the Fayetteville Power Squadron will sponsor free safe-boating classes. In addition to the familiar courses, new offerings will include "Customizing Vans" and "Microcomputers for Parents."

Plan A Van

What's the world coming to when even customized vans are rolling off an assembly line?

Scotty Biggs, who has been in the van business for 10 years, says it has gotten to the point where everybody's customized van has the same windows, tables, televisions, baggage racks, consoles, couches and captain's chairs.

All that's fine and good, but it may not suit your needs if you just want to haul your fishing nets to the beach on weekends and

roofs, wiring and lighting. He will explain how materials can be used which will combine function and good looks.

"It's for the fellow who wants to do it himself," he said.

"Customizing Vans" begins Sept. 30 at Byrd Senior High School. It is offered from 6:30 to 9:30 p.m. Tuesdays through FTI's Continuing Education Division. The fee is \$20. Call FTI, 323-1706.

Art For Everyone

If you ever took a whirlwind tour of Europe and promised yourself you'd take the time someday to learn about all those museum masterpieces that whizzed past, here's the course for you.

This fall the Fayetteville Museum of Art offers "From Renaissance to Rococo," a survey of art from the 15th to 18th centuries, for travelers, art lovers and anyone interested in learning a little more. The class will touch on the old masters such as Leonardo, Michelangelo, Botticelli, Rubens and Rembrandt. There also will be the lesser-known artists Guilio Romano and Jacopo Pontormo.

Topics include the Venetians, the Baroque movement and the Northern Renaissance. said

"From Renaissance to Rococo" begins Oct. 13 at the museum. Eight programs will be offered on Monday mornings through Dec. 1. Series ticket are \$15 and will be sold at the museum. Call 485-5121.

It's All Greek To Me

One of the pleasures of Amphitrite Manuel's basic Greek class is her habit of occasionally treating the class to examples of national cuisine such as baklavas, a rich desert made of thin, flaky layers of pastry with chopped nuts and honey.

Mrs. Manuel, who has taught the class through Fayetteville Technical Institute's Continuing Education Division for three years, has impressive credentials to teach the language - she was born and raised in Greece.

She also has plenty of opportunity to keep in practice. Her husband, Chrysostom, pastor of Fayetteville's Sts. Constantine and Helen Greek Orthodox Church, also is Greek, and she listens regularly to the shortwave radio broadcasts of the Voice of Greece

People have different reasons for studying Greek. The class attracts some students

into Bibical studies or desire a basic knowledge of the lanaguage for travel, she The class will be introduced to Greek beekeeping.

sounds and fundamentals of the modern language. Students will learn to read said. simple texts and use short sentences in conversation with limited vocabulary.

But the fun part is the commentary on life, music, culture, customs and politics from a native Greek viewpoint.

"Basic Greek" begins Oct. 2 at Terry Sanford High School. Classes are from 7 to 9:30 p.m. Thursdays through Dec. 11. The fee is \$15. Call FTI, 323-1706.

None Of Your Beeswax

Several years ago Fayetteville Technical Institute offered a beekeeping course. The organizers expected an enrollment of about 15 - the minimum necessary for the class to break even. As it turned out, people swarmed to the

class. At least 40 showed up, recalls Charles Koonce of FTI's Continuing Education Division. One of those people was John Roach, a

surgeon at the Veterans Administration Medical Center. He said his wife read about a course in auto maintenance and signed

up, so he decided to take a class himself. He enrolled, something clicked, and Roach is now president of the Cumberland County Beekeepers Association and instructor for an upcoming FTI course on The hobby attracts people from

accountants to farmers to psychiatrists, he "It's something anybody can do in their back yard," Roach said. "It's not like raising an animal. You can work with them or not. It doesn't hurt the honey to stay

there for a month. "Beekeeping" begins Sept. 30 at Byrd Senior High School. Classes are from 7 to 9:30 p.m. Tuesdays and Thursdays through Dec. 11. The cost is \$20. Call FTI, 323-1706.

children are learning in school."

for school computers around the state and in Cumberland County computer labs have been established for kindergarteners through high school seniors, according to Mrs. Parnell. "The children are coming home speaking computerese that's totally

Greek to their parents," she said. Mrs. Parnell said the course will teach parents about the new computer curriculum and terminology which have developed since they were students.

> "We're going to start with the basics how to turn the computer on and off, how to load a disc, how to operate a printer," she said. The class will cover how to evaluate computers and software and determine

WAN

Topics will include word processing, LOGO computer language used by elementary and junior high school pupils, and BASIC computer language used in junior and senior high schools, she said.

Mrs. Parnell's "Microcomputers for Parents" begins Sept. 30 at Southview Senior High School. The class will be held from 6:30 to 9:30 p.m. Tuesdays through Dec. 9. Another session begins Oct. 1 and will be offered from 6:30 to 9:30 p.m. Wednesdays through Dec. 10 at Edgewood Elementary School. The fee is \$15. Call FTI, 323-1706.

children's needs, she said.

Computers For Parents Sylvia Parnell, who teaches seventhand eighth-grade math and science at Southview Junior High School, says she proposed the idea of a computer course for parents to Fayetteville Technical Institute. "I am a parent and try to stay abreast of

what's happening in the schools," she said. "I felt there was a need and interest in other parents to understand what their The legislature has appropriated money

Would you like your volunteer service to be different from your everyday work? Well, Scouting is different, and you might find that refreshing. The skills you use in your work may be helpful to your volunteer service, but it won't just be more of the same. One of the most interesting ways to serve youth through Scouting is to work as a leader. As your son signs up for Scouting you will be asked to help the Cub Scout Pack or Boy Scout Troop that he signs up with.

shape the young people who will ultimately own it and run it.

It is the purpose of the Boy Scouts of America to provide for boys an effective program designed to build desirable qualities of character, to train in the responsibilities of participating citizenship, and to develop in them personal fitness, thus to help in the development of American citizens who:

■ Are physically, mentally, and emotionally fit ■ Have a high degree of self-reliance as evidenced in such qualities as initiative, courage, and resourcefulness # Have personal and stable values firmly based on religious concepts . Have the desire and the skills to help others . Understand the principles of the American social, economic, and governmental systems # Are knowledgeable about and take pride in their American heritage and understand America's role in the world . Have a keen respect for the basic rights of all people . Are prepared to fulfill the varied responsibilities of participating in and giving leadership to American society and in the forums of the world.

The Boy Scouts of America accomplishes this purpose by making its program available in partnership with existing groups having compatible goals, including religious, educational, civic, fraternal, business, labor, and governmental bodies.

September and October Is Join Scouting Time.

BOY SCOUT TROOPS

He said the state provides funds according to the total number of credits of all students rather than the number of students enrolled.

FTI Trustees Chairman Harry Shaw speaks at ceremony

FTI Breaks Ground For Student Center

THE FAYETTEVILLE OBSERVER, Monday, July 21, 1986

By CHRIS NELSON

Fayetteville Technical Institute officials broke ground this morning for the school's first new building in 10 years, a \$3 million, 50,000-square-foot student development center.

"We will today, symbolically at least, turn over new ground for the future of FTI with this project," Harry Shaw, chairman of the FTI Board of Trustees, told an audience of - about 100 at the building site on Devers Street next to the Horace Sisk Building. "With this new center we will be able to serve our students better than we ever have before."

The new center will house student recruitment, counseling and placement services, along with the school bookstore and lounges and study areas for students, said Craig Allen, FTI president.

Actual construction on the center should begin around Aug. 1, said Manuel Harris, project superintendent for Security Building Co., the general contractor.

In June, FTI Trustees allocated \$3.085 million toward construction of the center. The allocation capped a three-year drive to raise the money with funds coming mainly from the state General Assembly and the Cumberland County Board of Commissioners, which finances the school's normal capital outlay.

Stoff Photo - KEN COOKE Temony On hand at today's ceremony were state Sens. Tony Rand and Lura Tally, an FTI trustee, and Reps. C.R. Edwards and Don Beard, all of Cumberland County. County commissioners were represented by board Chairman Morris Bedsole and J. McN. Gillis. Fayetteville Mayor Pro Tem J.L. Dawkins represented the city. "Without these folks, this would not be possible," Shaw said.

7B

Rand said in an address that the new center will help FTI prepare for the needs of the 21st century and shows FTI's commitment not only to students but to business and industry in the area.

"Any society is judged a great deal by what it does for education and what it does for its people to prepare them for a better life," said Rand.

According to Shaw, FTI has more than 7,000 students in its regular curriculum and between 40,000 and 50,000 in its continuing education program. It has a state budget of \$14.8 million and local funding of \$2.5 million.

Its enrollment makes FTI the secondlargest member of the state's community college system.

"Since I was elected in 1980, I don't think I've seen anything grow like this institution," Bedsole said in his remarks.

Tally noted that with its counseling services, the new center will be where students will make the decisions that will most affect their futures.

"I think it will be a terrific enhancement to our students and our student development people to have this building available," said Allen. He added that the benefits of the center will spill over into the community because it will have multi-purpose rooms and dining facilities that will be available for civic functions.

At the ceremony's close, Dawkins, Shaw, Beard, Gillis, Edwards, Rand and Bedsole donned hardhats and took shovels to a hard-baked ground to symbolize commencement of construction. Tally and Tom McLean, chairman of the trustees' building and grounds committee, supervised.

Thus, it takes two students taking half of a full load to be calculated in the funding formula. Craig said that part-time and full-time students should be considered equally because the amount of credits a student is taking does not change the school's expenses in supplying those students services. Allen said that more funds must be allocated for the schools to provide current equipment and instruction for training workers for modern industries. o:Allen said the members of the commission gave no reaction to his address.

Rep. Nick Jeralds of Fayetteville is a member of the commission, which tours the state eavery two years to prepare recommendation to other state officials about state funding plans. CPR Classes To Be Held

Heart attacks claim a large number of lives each year. Approximately 90% of these victims died before help arrived because CPR was not started soon enough. Become a member of the "Heart Saver Team". The Cumberland County Rescue Squad, FTI, the American Heart Association, and the Region "M" Council of Governments are sponsoring FREE CPR classes to those who participate in the Heart Saver Program.

On January 12, classes will begin at Dana's Seventy-First Day Care Center at 6 p.m. and at Kid's World Creative School and Day Care at 7 p.m. On January 20, classes will begin at Show Biz Pizza at 6 p.m. and on January 26, classes will begin at the Koala Day Care at 7 p.m. For more information call 323-1706.

THE FAYETTEVILLE TIMES, Friday, August 22, 1986

FAYETTEVILLE TECHNICAL INSTITUTE/FORT BRAGG Continuing Education FALL QUARTER '86

REGISTRATION INFORMATION

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

You may register by phone for any course in this advertisement except English as a Second Language, High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state check can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call 497-5217, 497-5584, 497-5691, or 497-1112.

For curriculum credit courses (indicated by a *t* before the title), the tuition rate shown is based on the in-state rate of \$5.50/credit hour. Military service members and dependents qualify for this tuition rate. If you require military tuition assistance, please call 497-1112 prior to the first class meeting.

Any person sixty-five (65) years of age or older is fee-exempt for any course shown in this ad -- both credit and non-credit.

Active-duty army personnel are fee excempt for any Continuing Education (non-credit) course indicated by an asterisk (*). Fayetteville Technical Institute reserves the right to cancel any class because of inadequate facilities, insufficient enrollment or lack of

qualified instructors.

FTI Trustees Request **Funds For Center Site**

A Staff Report

After learning the state has campus. An access road may be approved the purchase by Fayette-ville Technical Insitute of a former said. grocery store, the FTI Board of Trustees Monday voted to request funds from the state to renovate it for use as a center for business and industry.

Fayetteville Tech in June purchased the former Winn-Dixie on Fort Bragg Road for \$427,400. The 27,720-square-foot building is to be renovated at an estimated price of \$831,600 to house offices, classrooms and offices, according to a plan outlining FTI's capital needs.

The center will be designed as a facility to provide training in new and updated technology to industry personnel in the Cumberland County area, officials said. It will also provide a center for educating

also gives the school a chance to establish a new entrance to built from the lot, officials have

In other business Monday, the trustees adopted policies giving faculty more opportunity to appeal administrative reprimands, and an ability to accrue compensatory time off.

The new grievance and appeals process gives all contracted employees an opportunity to respond to reprimands before going into a formal appeal before the faculty evaluation committee, said Stacy Weaver Jr., board attorney. Avenues of recourse include discussions with immediate supervisor followed by an appeal to the dean and, if necessary, the

pertinent vice president. Weaver said the pre-hearing appeals process is new and was dded in light of recent U.S.

FTI Chief: Enrollment Drop Won't Hurt State Funding

By JOHN BRAY Fall er rollment at Fayetteville

Technical Institute is down 3.5 percent f rom last year, FTI President Craig Allen reported at a trustees r neeting Monday. But Allen said the number of so-called full-time equivalents,

which the state uses to allocate funds to the school, has increased 3.2 percent over last year because students are registering for more credits.

Under the state funding formula, the hour s of part-time students are totaled to equal what officials call full-time : equivalents.

He sai id 5,990 students have been enrollect this fall. But he said registration will continue for about a month and that an additional 1,000 students are expected to enroll, maising enrollment to last

Trustees also approved changing the school's grievance policy to require school officials to give an employee reason for action before firing the employee. A hearing for employees also is part of the change, officials said.

FTI attorney Stacy Weaver said he recommended the change in response to a U.S. Supreme Court decision affecting the method used to dismiss employees and that the change is not required.

FTI President Allen said that while the measure had not been an official part of school policy, it was a part of regular school procedure. "I don't know that it's different from the way we handle things," Allen said. "If you are going to terminate someone you would normally call them in."

Trustees also approved request-

training and continuing education

programs. Officials also reported an agreement between FTI and Cumberland County school officials allowing FTI to hold part of its continuing education program in a Cumberland school building adjacent to Massey Hill School.

Linwood Powell, Allen's assistant, said FTI last year held the classes - which he said involve about 600 students - in the Honeycutt Building on property adjoining FTI's campus.

But he said a state building inspector reported in April that the 1940 vintage building did not meet standards for the handicapped and had problems with electrical wiring. Allen said the building also has asbestos in it, an insulating material the federal Environmental Protection Agency has said is hazard-

this glorious occasion.

Hi, everyone!

Isn't this fall weather beautiful? I am enjoying it to the fullest. Indian summer is my favorite season.

Graduates Featured

This week we have our senior citizens who will graduate tomorrow. It is with a feeling of pride we bring them into the limelight. Personally, I know how they feel and each of them has my blessings. I present them to you in their

own words. These are the graduates of Fayetteville Technical Institute Spring Lake Senior Citizens Adult High School Diploma Program.

In Reflection

My name is Mrs. Mae B. Bonner. 1 am from Macon, Georgia. We have been living in Spring Lake for about 30 years. My husband, Ralph W. Bonner Sr., and my son Ralph W. Bonner Jr. live here

also. I have finished my high school education since I have been here. Miss Mildred Chase was my teacher. She is a fine person. She takes up a lot of time with her students. I have enjoyed going to school under her.

My name is Mrs. Thelma J. many years. Farmer. I am a native of Cumberland County after years on the farm in Robeson County. We did not have a lot of time for education. After raising children and trying to improve my education, I decided to enroll in the

something and want it bad enough, My hobbies include baseball, basketsball, hunting and fishing, gardening and a round of golf oc-My thanks and gratitude to my mother and grandmother also. casionally. Of all my hobbies fishing is my favorite. Mary A. Jones I am Paul Kelly. I was born Oc-

Mildred Chase, "We are honored to have Mr. McAurthur as one of our oldest students to receive his high school diploma. He is 78 years young.'

My name is Charlotte A. McArthur.

Since I started in this class, I have enjoyed my teacher and my classmates. It has made a difference since I have gone back to school. I have more confidence in myself.

support they have given me. I am a widow. I have five children: three boys and two girls. I have 12 grandchildren and one great-grandson. I enjoy sewing and making

ceramics.

To FTI, I want to say thanks everyone and to my teacher for being so understanding. My name is Mary McIntyre. I am a resident of Spring Lake, North Carolina and have been for

I am the mother of 11 children, ten boys and one girl. I was married at a young age and was unable to finish school. I always dreamed of going back to school. So, by the help of God and the Senior Citizens, it became possible.

I enjoyed going back to school.

At one point I decided to quit, but

and friends to continue on. I also

give credit to my instructor, Miss

Chase. She is a beautiful person. I

thank her for her understanding,

her kindness and most of all her

Adult High School Diploma Program at Fayetteville Technical Institute. It has been an enjoyable ex- I was encouraged by my husband, perience. I am married to Mr. Joe McIntyre, some of my children Robert Farmer, and am the mother of one daughter. I also have five grandchildren and five greatgrandchildren.

When I entered into the educational program, it was a great effort to get back into the books. But I achieved my goal. It was hard, but it was well worth the struggle. Going back to school has given me confidence in myself, that at my age, I can do something worthwhile. I've succeeded. Now I can go on a little further. Thanks to FTI and my instuctor,

adult years in the Spring Lake community, I decided to move to Miss Mildred Chase, who has been New York where I lived for 52

my inspiration. If you want years.

.... Free CPR classes will be offered

to persons who participate in the Heart Saver Program, sponsored by the Cumberland County Rescue Squad, FTI, the American Heart Association, and the Region "M" Council of Governments. Classes will begin Monday at the

Hope Mills Fire Department on Golfview Road and Rockfish Road at 7 p.m. An all day class will be held on Sept. 27 at the Church of God of Prophecy Day Care Center on Legion Road from 8 a.m. until 2 p.m.

For more information, call 323-1706.

Send announcements for Community Notes to Darlene Green, The Favetteville Times, P.O. Box 849, Favetteville 28302, or call the Times at 323-4848. Items must be received by the Tuesday prior to publication each Thursday morning.

Starting on Sept. 29, the Adult High School Diploma Program of Fayetteville Technical Institute will be offering classes at their new location at the FTI Annex on Southern Avenue. The annex is located to the left of Massey Hill Jr. High School. Morning, afternoon and evening

courses will be taught from 8 a.m. to 9:30 p.m. Monday through Thursday for the public's convenience. For more information, call Fayetteville Technical Institute at 323-1706 or 323-1379.

The Arts Council of Fayetteville/Cumberland County recently awarded \$8,260 in Grassroots Arts Funds to six local agencies which will sponsor arts events in Cumberland County. The funds are made available through the Grassroots Arts Program of the N.C. Arts Council. A grant of \$1,875 was awarded to the Cumberland County Schools for a band clinic to be conducted by the U.S. Marine Corps Band. The County Schools also received a \$1,000 grant for the Very Special Arts Festival. The Cape Fear Regional Theater received a \$1,000 grant for guest artist Harriet Oser to conduct acting classes and to

perform in "Brighton Beach Memoirs." The Writer's Ink Guild received a \$1,000 grant for their second anthology. A challenge grant of \$1,500 was awarded to the Fayetteville Museum of Art for "Celestial Suspensions," a series of sculptures by Tom Grubb to be placed throughout the county. A second challenge grant of \$385 was awarded to the Dance Theater of Fayetteville for Dance Movement classes for clients at HSA Cumberland Hospital. Cross Creek Pipes and Drums was granted \$1,500 for uniforms. Grassroots grants are awarded

for creative arts programs of high quality that fill a community need. The next application deadline is Dec. 1, 1986. For guidelines and further information, contact the Arts Council at 323-1776. ...

For additional information, telephone 497-1112/497-8893

COOPERATIVE EDUCATION: Fayetteville Technical Institute's Co-op program is designed to enable qualified students to combine classroom learning with career-related work experience. Academic credit is earned toward graduation for professional work experience that is closely related to the student's academic study. Cooperative Education is considered a vital part of the learning process as it enhances the student's academic knowledge, personal development, and professional preparation. For further information, contact the Cooperative Education Office at 323-1961

SERVICEMEMBERS OPPORTUNITY COLLEGES ASSOCIATE DEGREE (SOCAD): In addition to its membership, FTI is one of approximately 50 institutions providing occupational and flexible SOCAD programs on more than 200 Army installations worldwide. These programs lead to associate degrees and most correspond to enlisted and warrant officer job specialities. Currently, FTI offers SOCAD programs in: Public Administration, Criminal Justice, Business Computer Programming, Food Service Management, and General Occupational Technology.

Prevention 'Learn Not To Burn' **Through FTI Classes**

By JEFFERY WOMBLE

As Frederick J. Curley, a field representative for Fayetteville Technical Institute puts it, "fire is not a rich nor poor man's problem. It does not only follow one race or creed and it attacks the young as well as the old."

Keeping this in mind, FTI, in cooperation with the Cumberland

County Volunteer and Fayetteville 0 90 Fire Departments, will host -"Learn Not To Burn" classes in observance of National Fire Prevention Week for Oct. 5 through 11. During the en-

tire week from 7 until 9 p.m., an CURLEY information class and film entitled "Fire Power" will be shown, directing homeowners on how to protect their homes and families in

the event of a fire. The session will be held at every fire station in Fayetteville and Cumberland County.

"The film will have an actual scale house to show how a room can be engulfed in flames," Curley said. "Most people don't realize it, but temperatures in one burning room of a house can be anywhere between 1200 and 1400 degrees Farenheit."

Prior to Fire Prevention Week, over 10,000 fliers will be printed and distributed by the fire departments in Fayetteville and Cumberland County showing families to the fire station nearest their home.

Families are invited to a session at their local fire department or at a department of their choice.

"The people will go to the session for two hours and several hundred fliers, brochures and pot holders will be given out," Curley said. "The pot holders are to be kept in the kitchen to remind them of fire safety."

Most of the fires that occur in the United States take place in the homes, according to Curley. He says that over 93 percent of fires are residential and 74 percent of those that die in house fires die from asphyxiation (stopping of the pulse and loss of consciousness as a result of too little oxygen and too much carbon dioxide in the blood). "Most people think that those

who die in house fires die because they burned up," Curley said. "That's not the case. They die from smoke inhalation and that's why all homes need smoke detectors." Curley also says that in the

United States, 33 people per day die as a result of fires and that 70 will be injured or disfigured. That is why FTI and local fire

stations are beginning to take

Probe: Phony State Teachers Paid \$1 Million For 'Classes'

was paid to phony teachers for fictitious classes offered through a Pender County branch of Cape Fear Technical Institute in a scam that may have involved up to 30 people, an investigator says.

"Fictitious classes were set up, names in the phone book were listed as students and fictitious teachers signed a contract," said Michael G. De Silva, assistant New Hanover County district attorney. "And monthly,the check for the instructor would have been mailed to the person whose name appeared on the contract."

The State Bureau of Investigation's probe of the scam, involving classes ranging from

RALEIGH (AP) - More than \$1 million auto mechanics to cake decorating, began about four weeks ago, he said.

"As of (Thursday), they can substantiate \$1,113,000 of funds paid to teachers that basically did not exist, fictitious teachers for fictitious classes that were never held over a six-year period," De Silva said. "One person is 7 years old, and in the last six years he earned \$52,000."

De Silva said the 7-year-old, whose name was listed as a teacher, turned out to be the son of Carol Newton of Castle Hayne, the only person charged so far. He said more charges are expected after the case goes before a

50

See SCAM, Page 3-A

Scam

From Page 1-A New Hanover County grand jury Oct. 27.

"No one has been charged who's an employee of the school yet, but they will be. I would prefer not ... to mention names or titles," De Silva said. "It will go higher. The next level would more than likely be employees of the school."

A suspect loaged in the New Hanover jail on an unrelated charge is expected to be charged in the class scam case on Monday, he said. The suspect has told reporters that in 1984 he ran 240 classes and only about 40 of them were real, De Silva said.

"He would arrange classes, find out what kind of classes citizens would like and then go find teachers," he said. "He was very imaginative. He came up with all kinds of classes. They just didn't exist." State officials planned to alert other schools to beware of similar schemes, he said.

"Last week, I attended a meeting and there were auditors from (State Auditor Ed) Renfrow's office, (North Carolina Community College System President) Bob Scott's office and another office," De Silva said. "The man from Bob Scott's office was planning to send a letter out to all the presidents of the community colleges to make sure it is not happening there."

The letter was not sent, however, because the investigation by the SBI is still under way, said Mark Van Sciver, a spokesman for the state Department of Community Colleges.

"I'm sure it has gone up and down the state by now, but not through us," Van Sciver said.

Ms. Newton, 30, was being held Friday under \$600,000 bond on a charge of obtaining payment under false pretenses. De Silva said investigators believe she received \$204,000 over a number of years.

Ns. Newton had contracts with Cape Fear Technical Institute to teach various classes between Jan. 8, 1981, to May 30, 1986. She began teaching a home baking and cake decorating class for \$7 an hour of class time. Her latest contract was for \$9.50 an hour to teach canning and freezing, said Ada Davis, a school spokeswoman.

"The SBI agent said he thought about 30 (people were involved). Most of them never receiving money, just permitting their mailbox to be used as a drop point and they would just turn the check over," De Silva said.

Around Spring Lake

By Verna Owen

Hi, everybody! Well, last week was a very busy week and I had a few more news items than usual. I hope before the week is over I will have a full column for this week. Birthday Wishes

We have a few birthday wishes this week. Congratulations are in order for Mrs. Pat Hudson of this city who celebrated her birthday Sept. 21. Happy birthday Pat from all your friends and many happy returns of the day.

Also, happy birthday to my husband's brother, Mr. Norman Owen of Washington, N.C. from Verna and Arlis and Jean. Norman celebrates today.

Happy birthday to Sis, Vara Barbour of Benson, who will celebrate her bithday October 6. Many happy returns of the day, sis.

New Grandson

Mrs. Virginia Wells is pleased to announce she has a second greatgrandson. His name is James Andrew Burris. The parents are, Capt. and Mrs. Larry Burris. The mother is the former Cindy Weatherly of Spring Lake. We wish the parents and baby

the best. Cindy and Larry came down from Virginia Beach September 15 to attend Cindy's fifth high school reunion (Pineforest) held at Green Valley Country Club.

Cindy enjoyed seeing old classmates and having experiences.

Starling, Pope Family Reunion The Starling and Pope family reunion was held at Godwin Com-

munity Center. It is an annual event.

cock and Geddie Funeral Home. Mrs. Virginia Wells noted there Rev. Earl McLendon, former were at least five generations prepastor of Spring Lake United sent. Virginia, a former resident of Church and Rev. Reed Sheppard, Spring Lake, and granddaughter Shelly Bennet attended. Virginia's officiated. Mrs. Muriel Allen played the

brother, Roddie Pope of Virginia Beach, accompanied them to the Grace."

Hollandale Advent Christian Church celebrated their annual homecoming last Sunday, September 21. According to Mayor and Mrs. Vernon Hobson, there were about 300 in atten-

They noted there was plenty of fingerlicking good food for everyone and lots of wonderful fellowship. This dinner kicked off the revival that was held this past

Note of Sympathy We regret that my dear friend,

form the membership of a death in the community. We're all going to miss Faye American Legion Post and She has touched many lives. American Legion Auxiliary held She loved her Lord with a passion their respective meetings last On His promises she could always rely. Thursday evening, September 25, I shall treasure those precious moments at the post home on Manchester When we held hands to pray Right away her outlook was brighter Road. Commander Robert Browning And she said, "that made my day." was in charge of the Legion Her grandchildren were her pride and joy Meeting and as president, presided Especial Eddie and Mike over the Auxiliary Meeting. They seemed to understand The membership voted to send Whatever might be her plight. At night they were her faithful guardians. Her nurse adn doctor by day. They stood by her through thick and thin, And helped her in many-a-way. Her daughter and son-in-law Polly and Ralph Were a blessing to her each day, They sacrificed in many ways Which helped to brighten her day. She prayed so hard to get well So she could repay the good deeds. But she knew God would have His way.

Faye Syphrit passed away. The funeral services were held at Adto Mr. Howard Draper, who

> Carolina. Mr. Draper was an elementary school principal in Spring Lake for many, many years.

> > lady's night.

organ. She accompanied herself with two beautiful hymns, "How the Spring Lake Lioness Club was Great Thou Art" and "Amazing observed with a luncheon at the Western Steer on Sept. 23. Burial was in Lafayette Memorial Cemetery across from Frances Bell, Daphine Gruff and the V.A. Medical Center. There yours truly attended. After was a brief graveside service in preliminaries a short business which I read a poem. Her daughter

Polly and I would like to share the poem with our readers. A Tribute to the Memory of Faye She was a special friend to me; I loved her very much, And during the time of her illness

I tried to keep in touch. If I could turn back the pages of time I'm sure I'd have visited more. She looked forward to seeing her friends Whom she both loved and adored.

Birthday Greetings A special birthday wish goes out

The regular monthly meeting of

Johnsie Hiler, Betty Hobson,

meeting was held. The group plan-

ned what they would do for a

Mrs. LaVerne Berrien com-Graduates.

Mr. Richard Higgins, town supervision, was recognized. He introduced the Center Coordinator Mrs. Genola Williams. Together they presented each of the female graduates with a red rose and a trophy to each of the male graduates from the Town of Spring Lake. Miss Chase gave some closing remarks. Mrs. Mae Bonner represented the gradautes in expressing her appreciation to all who had helped to make this program possible. Dr. Robert Craig Allen gave closing remarks and accepted a check for F.T.I. from the graduates.

Senior Citizen's Doings Well, graduation day came to a close last Thursday. There were eight graduates who breathed a sigh of relief when it was all over. The program kicked off at 2:30 p.m. at the Senior Center on Fourth Street. Muriel Allen played Pomp and Circumstance as the dignitaries and graduates took their places.

Mrs. Margaret Hardee was mistress of ceremonies.

Every one joined in on the hymn, "All Hail the Power of Jesus Name." Dr. C.R. Edwards, pastor of

First Baptist Church, of Fayetteville, gave the Invocation. Miss Mildred Chase saluted the graduates. Mrs. Hardee introduced honored guests. Mr. William Sease, vice pres. for Continuing Education gave some brief remarks; Mr. Raymond Gatti, Director of Extension Education, Fort Bragg, spoke briefly to the group.

mended the graduates on a job well done and also recognized last year's graduates. Mrs. Berrien is coordinator of A.B.E.E.S.I., and Academic Education/Fort Bragg. Mrs. Muriel Allen sang a solo, "Whatever It Takes." Mrs. Hardee recognized Mayor Hobson who commended the graduates and told them the key word is LOVE. At this time Verna Owen recited a poem, A Tribute to

reunion.

Church

dance.

week.

Instructor Mildred Chase presents a check to FTI President Dr. Craig Allen. The award was donated by the graduates.

member. Our prayers are with the Larsons Sam and Betty Faircloth. He's always aware of our needs. Mrs. Virginia Allen will visit them and also Joe and Lillian On Saturday morning, Sept. 20, Bruner, another couple who have

\$25 to the American Cancer fund as a memorial to Mr. Festus Barbour, (brother-in-law of Verna Owen), who was a cancer victim. Mrs. Owen agreed to visit Barbara Larson whose brother is very ill at her home and find out their

needs. We are glad to enroll Mrs. Larson's daughter as a junior

and also two more loyal members,

God called our beloved Faye To a place where there is no pain or sorrow (See AROUND, page 7) And the night is as bright as the day.

Dr. C.R. Edwards gave the benediction. The blessing, led by Muriel Allen, was sung in unison by all, "God is Good." Following the ceremony, a delicious meal was served. Trip

The seniors are planning a day at the fair tonight. Seniors are in-

FTI Graduates Law Enforcement Class

The Fayetteville Technical In- the Faymenille Police Departstitute Law Enforcement Training ment. Class graduation ceremony took place at City Hall on Friday.

Graduates include Ray Adcox, sponsored by the N.C. Division of Forest Resources; and Wade R. Brabble, William M. Britton, Brenda R. Gonsalves, David E. Houp, William P. Mitrisin, David Moody, Kellie K. Shipman and FTI an Internet by

F. Eator Bernice N. Oakes, Terri A. Putma Horace J. Smith, Robert M. inth, Alvin Surkin and Geronim R. Valenzuela were sponsom by the Cumberland County Smiff's Department. Renal Lee was sponsored by

Graduus Billy L. Davis, Duane

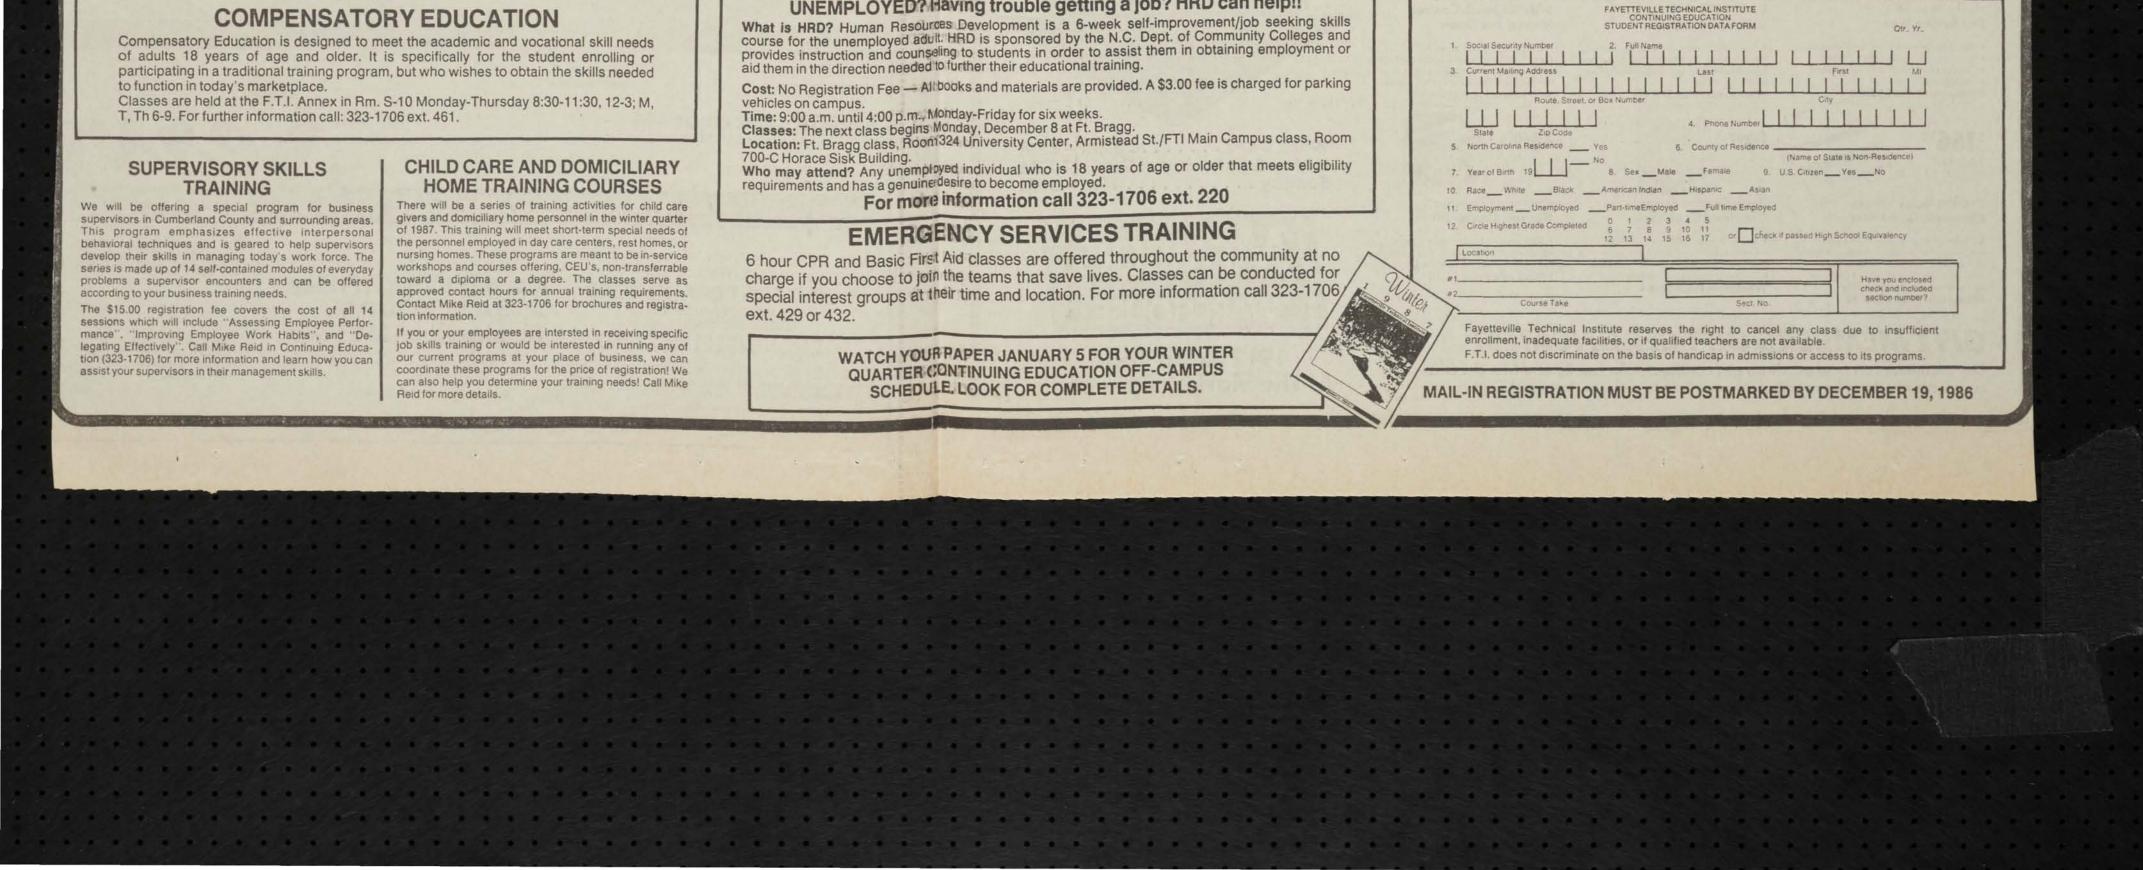

Larry G. Smith, all sponsored by the Howkills Police Department.

700-C Horace Sisk Building.

Location: Ft. Bragg class, Room 324 University Center, Armistead St./FTI Main Campus class, Room Who may attend? Any unemployed individual who is 18 years of age of older that meets eligibility requirements and has a genuine desire to become employed.

For more information call 323-1706 ext. 220

SUPERVISORY SKILLS TRAINING

We will be offering a special program for business supervisors in Cumberland County and surrounding areas. This program emphasizes effective interpersonal behavioral techniques and is geared to help supervisors develop their skills in managing today's work force. The series is made up of 14 self-contained modules of everyday problems a supervisor encounters and can be offered toward a diploma or a degree. The classes serve as according to your business training needs.

The \$15.00 registration fee covers the cost of all 14 sessions which will include "Assessing Employee Performance", "Improving Employee Work Habits", and "De legating Effectively". Call Mike Reid in Continuing Education (323-1706) for more information and learn how you can assist your supervisors in their management skills.

CHILD CARE AND DOMICILIARY HOME TRAINING COURSES

There will be a series of training activities for child care givers and domiciliary home personnel in the winter guarter of 1987. This training will meet short-term special needs of the personnel employed in day care centers, rest homes, or nursing homes. These programs are meant to be in-service workshops and courses offering, CEU's, non-transferrable approved contact hours for annual training requirements. Contact Mike Reid at 323-1706 for brochures and registra tion information.

If you or your employees are intersted in receiving specific job skills training or would be interested in running any of our current programs at your place of business, we can coordinate these programs for the price of registration! We can also help you determine your training needs! Call Mike Reid for more details.

ADULT BASIC EDUCATION

Classes in basic reading, writing, arithmetic and consumer education for adults without a high school diploma are offered throughout the city and county. Classes are available during the day and evenings.

Take advantage of this educational opportunity, call 323-1706 for further information. COMPUTER ASSISTED BASIC EDUCATION LAB

Have a problem with reading, writing, mathematics, CABEL can assist you. The lab is located in the F.T.I. Annex at 10621/2 Southern Avenue. The lab hours are Monday through Friday from 8:00 a.m. until 5:00 p.m.

COMPENSATORY EDUCATION

Compensatory Education is designed to meet the academic and vocational skill needs of adults 18 years of age or older. It is specifically for the student enrolling or participating in a traditional training program, but who wishes to obtain the skills needed to function in today's marketplace. Classes are held at the F.T.I. Annex in Rm. S-10 Monday-Thursday 8:30-11:30, 12-3; M, T, Th 6-9. For further information call: 323-1706 ext. 461.

EMERGENCY SERVICES TRAINING

6 hour CPR and Basic First Aid classes are offered throughout the community at no charge if you choose to join the teams that save lives. Classes can be conducted for special interest groups at their time and location. For more information call 323-1706 ext. 429 or 432.

Registration will be held during the first class at the location of your choice.

or older.

FTI does not discriminate on the basis of handicap in admissions or access to its programs.

Registration fees for continuing education courses vary with the type of course and are predetermined by legislative regulation. All courses are either \$15.00, \$20.00 or \$25.00. Persons 65 or older are fee exempt. Students are responsible for buying books and supplies as necessary.

Refunds will be given only for canceled classes.

REGISTRATION

Where space is available, registration will continue through the second week of class.

TEACHER

RENEWAL

CERTIFICATION

WHEN: All weekday classes will register from 6-7 PM, January 12-15, 1987, at the Center cafeterias or designated rooms. Saturday classes will register in Bidg, #34, Army Skill Center (SKCT) on Friday, January 9 and Monday, January 12 from 9 a.m. to 4 p.m.

TUITION COST: In-State \$5.50 per credit hour Out-of-State, \$42.00 per credit hour. ACTIVE DUTY MILITARY PERSONNEL AND THEIR DEPENDENTS ARE CONSIDERED AS IN-STATE) (Active duty military may be eligible for tuition assistance which pays from 75-90% of tuition depending on rank and length of service. Tuition Assistance forms must be processed prior to registration). PAYMENT: Fees are payable at the time of registration. Payment may be made by cash, in-state check, VISA or Mastercard

SERVICE MEMBERS OPPORTUNITY COLLEGES ASSOCIATE DEGREE (SOCAD): In addition to its SOC membership, FTI, is one of approximately 50 institutions providing occupational and flexible SOCAD programs on more than 200 Army installations worldwide. These programs lead to associate degrees and most correspond to the enlisted and warrant officer job specialities. Currently, FTI offers programs in these curricula: Public Administration, Criminal Justice, Business Computer Programming, Food Service Management, and General Occupational Technology.

INFORMATION: For additional information, telephone 497-8893 or 497-1112.

FAYETTEVILLE TECHNICAL INSTITUTE/FORT BRAGG CONTINUING EDUCATION

FALL QUARTER '86

REGISTRATION INFORMATION

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

You may register by phone for any course in this advertisement except English as a Second Language, High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state checks can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call: 497-5217, 497-5584, 497-5691, or 497-1112.

For curriculum credit courses (indicated by a / before the title), the tuition rate shown is based on the in-state rate of \$5.50/credit hour. Military service members and dependents qualify for this tuition rate. If you require military tuition assistance, please call 497-1112 prior to the first class meeting.

Any person sixty-five (65) years of age or older is fee-exempt for any course shown in this ad -- both credit and non-credit.

Active-duty Army personnel are fee exempt for any Continuing Education (non-credit) course indicated by an asterisk (*).

lle Technical Institute reserves the right to cancel any class because of inadequate facilities, insufficient enrollment or lack of qualified instructors.

Lewis, Evans Win Seats **On Cumberland Board**

Democrats Robert C. "Bob" Lewis Jr. and Johnnie Evans handily defeated Republican John "Chico" Carter III on Tuesday night for two seats on the Cumberland County Board of Commissioners.

In unofficial tallies, Lewis, 55, a retired 71st Elementary School principal, garnered 22,726 votes, or 39 percent of the ballots cast in the commissioners race. Evans, 46, a Vander farmer and businessman, received 21,453 votes, or 37 per-

cent. Carter, 33, a Pembroke State University administrator, finished a distant third with 13,619 votes, or 23 percent of the total, unofficial tallies show.

The election of Evans and Lewis means the Board of Commissioners will continue to be run by five

TOM GRUBB-visiting artist A Celestial Sculpture For Hope Mills Record,

The Christ Episcopal Church on South Main in Hope Mills was established in 1847. The original building burned and was rebuilt in 1932. The church is quaint, picturesque, seeming to belong to another era. The church garden is now the site of a new era in sculpture. On February the 26th, a "celestial sculpture" was erected by visiting artist Tom Grubb.

In The Arts Journal June of 1983, Tom Grubb's sculptures are described with the adjectives linear, enovironment and temporary. They are, according to critic Robert Hayward, " ... elegant forms with multilayered and subtly powerful metaphors."

Grubb's background is varied and in no small way contributes to the artistic statements he makes. Of his work, he says, "The sculptures that I fabricate are abstract images derived from first hand experience as a missile technology instructor in the United States Army and as a Captain of commercial fishing boats in the North Atlantic Ocean. By activating a great amount of space with very little

By LAURIE WILLIS

The Cumberland County Board of Commissioners is considering a request to fund a proposed center for applied technology building at Fayetteville Technical Institute, FTI President Craig Allen told the school's trustees Monday. "Originally we asked the commissioners for a bond issue to fund the building, but they preferred an alternative method and said they would consider our request along with other county agencies at funding time," Allen said. "If FTI's request ranks high

enough on the commissioner's priority list when compared to other county needs, the commissioners would borrow the funds from a lending agency to be paid back over a 10-year period," he said.

The board had asked the commissioners for a \$7.8 million bond referendum to finance the center and renovate four campus buildings - Lafayette and Cumberland halls, the Paul H. Thompson Library and the Horace Sisk Building - but was

now our buildings are overcrowded and the equipment is old, but we still are providing adequate train-ing," Powell said. "We just need better facilities."

At the meeting, architect Dan MacMillan showed preliminary drawings of the proposed building that would go next to the student union now under construction on Hull Road.

MacMillan's drawing proposes a circular drive off Hull Road with limited parking space, he said. He also showed plans to convert

the former Winn-Dixie store on Fort Bragg Road into a center for business and industry. The business and industry build-

ing has a \$1 million budget and will The proposed building — which would house 28 classrooms, 27 be 30,000 square feet, MacMillan said. Community College Pitch Goes Unheard By CHRIS NELSON Stoff Writer A representative of the state Department of Community Colleges,

partment of Community Colleges, speaking at Fayetteville Technical Institute on Monday to lobby local legislators, found his audience missing. Roger Bone, the community colleges' legislative coordinator, told

members of the FTI Board of Trustees the community college system's expansion budget for the 1987-89 biennium includes \$33.5 million in "one-shot needs" that must be funded and another \$177 million for a 17-point expansion priority list. Bone said Cumberland County was a good area to lobby because it is the home of key legislators like Sen. Tony Rand, who will be Senate majority leader this term and chairs the base budget committee, Sen. Lura Tally, who serves on the appropriations, base budget and appropriations-education committees, and Rep. C.R. Edwards, who serves on six different House committees involving the budget or education. Monday, however, only Tally, an FTI trustee, was present. Rep. Joe Raynor, D-Cumberland, had been at the meeting but left before Bone's

presentation. Barbara Copeland, director of communications and marketing for FTI, said all local legislators were invited to the meeting. Some had prior commitments, she said, but Edwards said he could be there, and Rand, an attorney, said he might be tied up in court but would try to make it.

Copeland said 18th District Reps. Alex Warner and Don Beard, D-Cumberland, had prior commit-

Cumberland, couldn't be reached. "That is not a real negative thing," Copeland said of the legislators' absence. "We would have liked them to be there. I think what it does is put the monkey on the trustees' back to go out and talk to the legislators about this (funding

need)." Bone told trustees they are "political appointees" and should use their muscle to lobby legislators for the community colleges. Bone said 90 percent of the

system's budget statewide goes toward people, including salaries for instructors and support personnel and staff development. The package presented Monday includes \$9 million each of the two years to pay the state award for student enrollment systemwide, and \$2.4 million over the biennium for upgrading and retraining faculty. Another \$4.2 million is fourth on the expansion priority list for faculty training. The top item on the priority list is

The top item on the priority list is \$25.5 million each year to improve the system's ability to attract and retain better personnel. Bone said North Carolina ranks lowest in the country in salaries for community college instructors unless fringe benefits are counted, which raises the state's level to about 41st. An across-the-board salary hike of 16 percent above whatever raise the General Assembly may pay all

state workers this year would be needed to bring state community college faculty salaries up to average in the Southeast, said Bone. Bone said the priority list was compiled by surveying school presi-

compiled by surveying school dents and trustees systemwide.

Bamboo-Rope Creations Unique

By Pat Wilson Chances are you've not taken much notice of the little space near the Exxon service station in the town "triangle." Up until this past Wednesday, except for an evergreen which serves as the town's Christmas tree and a park bench, the space was just that -- space.

Tom Grubb, Fayetteville Technical Institute Visiting Artist of the Visual Arts, has activated that space with ropes and bamboo. The artist brought with him not only his skills but his experiences as a sea captain in the North Atlantic and as a missile technician in the U.S. Army when he put together his sculpture, entitled "Celestial Passage.'

The imagery in Grubb's piece comes from the abstracted images in the artists's mind formed when he commanded a 120-foot scallop fishing boat out of New England. "Drawing in space," he calls it as his celestial sculptures reach for the stars, the bamboo and rope reminding one of ship's rigging -- most intentional on the artist's part.

18**B**

Grubb's art is unique in that he is the only sculptor in the world who works with rope and bamboo. "I like to think of myself as carving space instead of mass," he says. "Using primitive materials to explore sophisticated space," appeals to the artist.

Besides the fact that Grubb achieves contemporary art on a large scale at a minimal cost, he chose bamboo to work with because of its linear quality similar to that of ship masts. The artist likes the oriental implications of bamboo and the tensions, or contained energy, that the rope-tied bamboo creates. "I like the philosophical relationship of repesenting man bending in the wind and coming back."

The fact that Celestial Passage is not stationary also reflects the mobile society in which we live. And, visually, when the wind blows, the red, blue and yellow primary colors of the ropes blend, creating an optical effect and the eye picks up secondary colors of pink and purple. (See ART, page 6)

The noonday sun almost peeked through the apex of Tom Grubb's C celestial sculpture as it neared completion

Observance Feb. 8-14 **Vocational Education:** 'Learning A Living'

By JEFFERY WOMBLE

Vocational education in the Cumberland County school system is in a league by itself. With course offerings presently ranging from accounting to

carpentry, what was once a program that consisted of the basic agriculture and home economics courses is now a program that helps youngsters as early as the seventh grade decide their future. As a result of this growing oc-

cupation program, Feb. 8 through 14 has been designated as Vocational Education Week. The theme for the event is "Vocational Education - Learning a Living." Vocational education is nothing

new to Cumberland County schools, having been around nearly as long as the system itself.

"Vocational education has been around a long time," said Peggy Reaves, vocational education director for Cumberland County schools. "When we had the agriculture programs and home economics programs, they were the only programs in the schools." Now the system has more than 85 classes in which students can enroll and learn an occupation that will in some way help them succeed in life. Some of the courses offered in the schools include classes in agriculture education, business and office education, health occupations, home economics-consumer and homemaking, home economics-occupational, industrial arts, marketing, trade and industrial education and special programs geared at helping the disadvantaged and handicapped.

Pre-vocational programs for seventh- and eighth-graders are to help them decide the careers they want to pursue in the future, said Mrs. Reaves.

Mrs. Reaves also said that certain courses such as those in the business field are considered vocational courses.

"We are doing a lot in our own county in the way of computers," she said. "Typing is different. Within the last eight years, changes are being made from manual typewriters and electric to computers. Now when a student takes typing, they are learning on more than one type keyboard."

The special programs are for students who come from economically disadvantaged families or are handicapped, either physically or mentally. The program enables the economically disadvantaged or handicapped student to train for a job with hands-on experience. "Once an employer sees this stu-

dent work, they are pleased," Mrs. Reaves said. She also said that there are certain laboratories set up in each school so that if a student is having

problems with a class, he or she can go and receive one-on-one training from the teacher.

In other courses such as those provided in the health occupation classes, the students are able to

Sculptors.

"Lucy," a wall piece, has the feel of an ancient Grecian statue with its flow of leather outlining a torso. Similarities of the two artists exist in their willingness to push their medium past previously explored limits. Both bring to their art a vast background of varied experiences.

Before becoming a full-time artist, Grubb was in what he calls 'the real world" for 12 years, teaching math in public school and missile technology for the U.S. Army. He also worked as first mate and captain of a commercial fishing boat, which is reflected in the intricate knots of the ropes on his sculpture.

in these (the collages) as with the three-dimensional pieces," he said. "I wanted to abstract these elements into two-dimensions." Layering maps and charts

against one another, he uses symbols, such as stars, as an accent against brown and green tints. The parchment is shellacked to give it a depth and glow as well as

permanance. "Passage of Time" shows charts angled to suggest an arrow pointing upward. The charts incorporated in the pieces are reminiscent of medieval documents set against a sunset. At the bottom of each work is a tiny piece of thread-wrapped bamboo pointing to a circle containing a single star. The circle, Grubb said, symbolizes eternity, and the star shows navigational direction. Bamboo represents humanity in its tenacity and its ability to bend with the wind.

The show continues through April

Community Colleges Link With First Teleconference

By CHRIS NELSON Stoff Write

Representatives of the state's 58 community colleges participated in the system's first statewide teleconference Thursday, discussing issues ranging from continuing "open access" policy to the differences in administrators' and instructors' pay and benefits. Nine schools received a satellite telecast originating

at Appalachian State University in Boone, and participants at the various sites were able to telephone questions to system President Bob Scott and two nationally recognized community college experts.

Fayetteville Technical Institute was one receiving site, hosting 52 educators from 10 area community colleges, said Barbara Copeland, FTI director of marketing and coordinator of the local portion of the

Colleges and coordinator of the event, and short summaries of their papers by Richardson and Luskin. Two call-in sessions were scheduled, with each site taking a turn posing a question.

The first call-in phase started with a question from Southwestern Technical College in Sylva, after which Berlam said, "We're now going to go 500 miles across the state to Beaufort Tech," for a call from Beaufort

County Community College in Washington. A question from Sylvia Pierce, FTI's director of curricular research and development, about whether a systemwide standard of program requirements should be established sparked a debate between Richardson

Richardson was for set standards, while Luskin and Luskin.

"If your students are to compete statewide for jobs, if disagreed. your students are to move into four-year institutions statewide, I don't think each community college can

Mayor Bill Hurley, second from right, and officials gather at fence From left are Robert Fisher, W.A. Bissette and Postmaster Jeff Martin

City, Post Office Dedicate Fence

What began with a disagreement over a planned chain-link security fence at Fayetteville's Main Post Office two years ago wound up with smiles Thursday as city and U.S. Postal Service officials dedicated a new decorative fence.

Mayor Bill Hurley and members of the city appearance and revitalization commissions had objected to earlier plans for a 6-foot chain-link fence topped with barbed wire and fitted with redwood slats. Hurley had contended a chain-link fence at the Green Street post office would be "like putting a \$2 frame around a \$3 million painting.' But Thursday when Hurley, Fayetteville Revitalization Commission Chairman W.A. Bissette, Fayetteville Postmaster Jeff Martin and Robert W. Fisher, Postal Service field division general manager from Columbia, S.C., dedicated the fence they all said they were happy with the compromise. Postal officials said at first they had to stay within a budget for the fence and couldn't afford a decorative one. After months of negotiations and promises of help from Fayetteville Technical Institute and the city Engineering Depart-

gional Postal Service offic came up with more money for fence

The 8-foot black metal fei supported by brick columns match the old brick in a neighbor office at Rowan and Green stru encloses the \$4.5 million post off regional mail distribution cen addition. The center opened 1 spring, and the fence was finished November, but only recently got special U.S. Postal Service logos two of the brick panels fac Green and Rowan streets. The Green Street panel, whe

the officials posed for pictur Thursday morning before movi to the Kyle House for a brief cer mony and reception, is flanked plants and trees.

The fence was designed by thr former FTI students, Chris Kuike Richard Collier and Robert He niger, under the direction of R Wilson, head of the FTI architect al technology department. It w installed by the post office at a c of about \$30,000. The city kicked in an estima \$10,000 in services by providing construction drawings from the l students' conceptual design overseeing the construction.

Tommissioners decided Tuesday infat to consider financing the participation certificate, and in fiscal year.

THE SPRING LAKE NEWS PAGE 6

Art

AKE NEWS SPRING LAKE, NORTH CAROLINA WEDNESDAY, JANUARY 28, 1987

(Continued from page 1)

Celestial Passage is a temporary sculpture and that also is a reflection of the mortal existence of each of us. The artist, however, hopes that his piece will stay in mind long after it has physically left the triangle. The 38-year-old artist was not alone when he created Celestial Passage. Art students of Spring Lake Junior High School helped during the several hours of actual construction on January 14.

Often when he has worked on pieces in the past, passers-by have stopped to help. Grubb likes the idea that he's working on something that others can be a part of. "It makes people feel like it's more their piece," he explains.

Grubb's rope and bamboo pieces are constructed in public areas where people who don't go to art museums can see them. "Sometimes people will ask, "What is it? What does it represent?' If the art starts questions and dialogue, we've got a suc-cessful piece of art," he says. The scupitor usually selects a "more natural" setting for his piece but the triangle area is highly visible and it was the site offered to him by the town. It presented him, Grubb admits, with one of the most complex places he has ever put a sculpture. Surrounding signs, flags, etc., are a visual distraction. That doesn't appear to bother the artist, however, he

dimension. "It's almost a time capsule with cars whizzing by," he says of the piece and its "busy" location. The bamboo used in the art pieces Grubb designs and constructs in the county come from Robeson and Cumberland counties. He harvests the pieces himself -- with permission, of

says the space takes on a new

counties. He harvests the pieces stat himself -- with permission, of ava course. Sometimes he shows this photographs of his works so scu that property owners can better Lin assist him in locating sizes and ject qualities.

Grubb's artistic skills can easily go from working with temporary, primitive materials he used in Celestial Passage to permanent, high technology pieces -- "still dealing with general spacial concern," he stresses. When he creates a permanent piece at Robeson Technical College, he'll finish a series of three of the hi-tech pieces that form a trianguler "constellation" when viewed on a map -- or from the sky. The completed pieces are in Waynesville and Greenville and are constructed of anodized bronze, bronze cables and turn buckles.

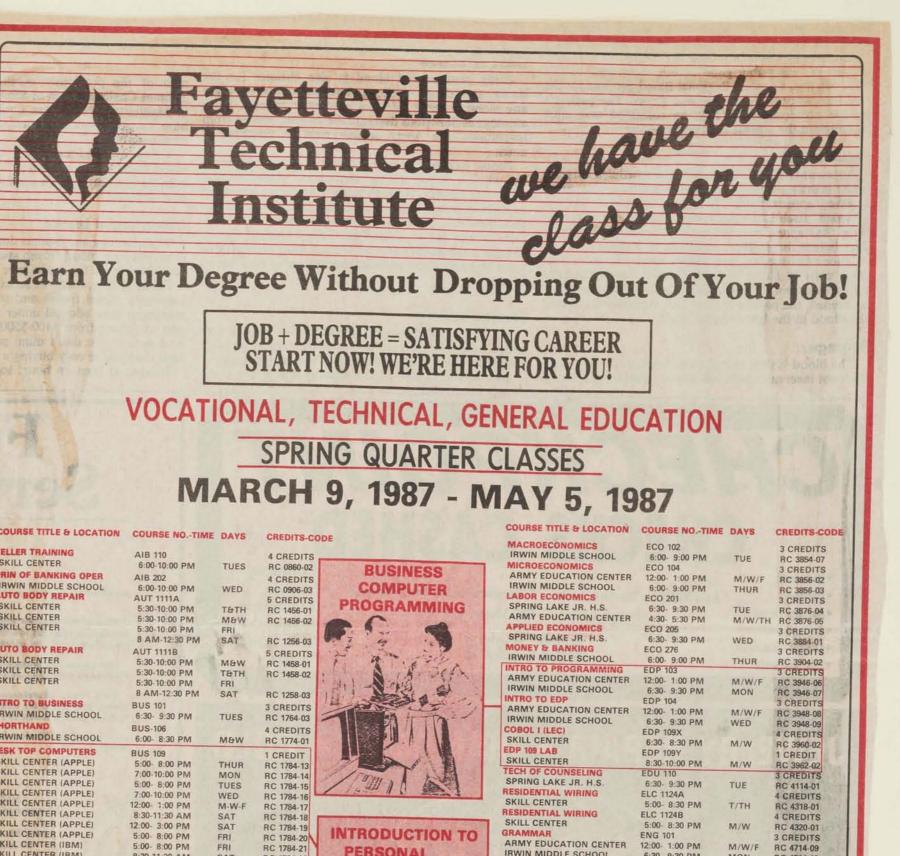

At the end of each hi-tech piece is a cylindrical time capsule which contains messages to the future from various people - including children and some elderly folks. The time capsules are to be opened at the turn of the century.

Future works by Grubb will

have solar panels to weather station equipment board," Grubb says, usin nautical expression from past occupation. The perfect balanced pieces will monito wind speed, wind direction and barometric readings. As part of his visiting artist status, Grubb has made himself available to the community. In this area, he has created sculptures at Fort Bragg, Linden and Stedman with pro-

jects planned for Pope Air Force Base, Hope Mills and Wade. In the meantime, Celestial Passing is available for viewing by the many who pass through town. Grubb would be happy if you stopped by and walked around the work of art. Similar to a fine-tuned musical instrument such as a harp, the ropes and bamboo reach upward. And, at noon, as your eyes follow the curved bamboo pieces upward, you'll find the sun passing through the open space at the end -- just the way the artist intended. Should a gust of wind pass

through, you're in for an additional treat to the senses. The bamboo pieces will click together and you'll hear a musical quality -- perhaps reminding you of the gentle song of sea waves lapping against the shore. Or, close your eyes, suspend your imagination, and, amid the noise of traffic, you can visualize a sea siren stroking her harp.

You're looking smarter than ever."

into the earth, he said.

When a particle from space enters the detector, a computer records its path and the time it took to pass through the block. A printout can then be made of particle's track.

"We can get a picture - not a photograph - of a track of a particle coming through this block," Marshak said.

The research may help prove the existence of a previously unknown form of matter, Marshak said. Marshak's findings have not been verified by other scientists. But that has not prevented the U.S. and British governments from beginning construction of a larger. \$15 million detector to replace Marshak's \$500,000 model.

"The discovery of Marshak's is about the only thing around right now that challenges established ideas on the structure of particles," said Francis Halzen, a physicist at the University of Wisconsin.

"That's not a criticism; it's the ultimate compliment," Halzen said. "There is nothing in present physics, or the physics we can foresee, that can be used to explain this signal.'

The new, more sensitive detector is being built about 2,300 feet deep in the Tower-Soudan mine, which was abandoned in 1963 by U.S. Steel. The 3,300-ton detector, which is about 100 times larger than the existing detector, is expected to be operating by 1989.

Physicists elsewhere have tried unsuccessfully to track the particles.

"It could be a statistical fluke," Jack Vander Velde, a professor at the University of Michigan who operates a detector 30 times the size of Marshak's in a salt mine 2,000 feet below Lake Erie.

"On the other hand, it could be something very unconventional that nobody else has found that eventually will be confirmed," Vander Velde said. "We take it seriously in that we are looking very hard to try to confirm this, but so far we haven't."

A detector in an automobile tunnel in the Alps near the French-Italian border has also been searching unsuccessfully for signs of the particles for about a year, Marshak said.

Marshak controls the computer by telephone, calling it several times a day to check the data. No one is stationed at the detector, which is about 200 miles north of Minneapolis in Tower-Soudan State Park.

Radiation reaching the mine appears to be in the form of subatomic particles called muons, Marshak said. The muons apparently result from the collision of other particles with Earth or its atmosphere, he said.

Many scientists think that Cygnus X-3 is a two-star system composed of a neutron star - a very small, dense star - orbiting a larger companion.

Marshak said the detection of muons in the mine follows a 4.79-hour cycle, which could correspond to the regular eclipsing of the

CONTINUING EDUCATION - SPRING QUARTER 8/

REGISTRATION INFORMATION

1.

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

You may register by phone for any course in this advertisement except English as a Second Language. High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state checks can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call: 497-5217, 497-5584, or 497-5691.

FTI And The Schools

Members of the Cumberland County Board of Commissioners argue that their slashing attack on the school budget notwithstanding, they are not anti-education.

They can support that stand, but not with credible illustrations from the school budget, into which they are proposing to put nearly \$6 million less local money in the next fiscal year than was budgeted for this fiscal year.

They cannot support it with their performance on the teacher pay plan, which they are holding hostage for \$11,000 in administrators' raises. Nor can they support it with their handling of the budget for buildings and equipment, which they propose to slash by \$1.8 million.

All of this is a bald attempt to use budgetary intimidation to circumvent state laws which bar them from expropriating the powers of the Board of Education.

The example they can use to support their lame contention that they are not anti-education is the proposal to fund Fayetteville Technical Institute's new Center For Applied Technology. To get the estimated \$5.6 million required to build the center, the proposed county budget includes a commitment of \$767,000. It would be repeated every year for a total of 10 years, paying off a loan for construction of the center, a loan to be floated soon after adoption of the 1987-88 county budget.

There is no question about the need for the center. It is obvious that in a nation where industry invests tens of billions of dollars a year in factory automation, and in a county where the leading private industrial concerns have mounted sustained and effective efforts to surpass the best that their competitors can based on personal suspicions, personal devise, workers frequently need retraining. The Center For Applied Technology will be the major appealing to the populist sentiment against public place in Cumberland County where they can go to get that retraining.

women who have full-time jobs and families to children to the commissioners' politica? support, not students fresh out of high school. It is tions, which they believe will be welle both tragic and pitiful that the same county commissioners who grasp the importance of minimum.

serving those workers through a sustained, significant investment in FTI seem to overlook the fact that failure to invest adequately in the Cumberland County schools is crippling citizens who in the future will be those very adults who seek retraining at FTI.

In fact, it is crippling the county and in its small way the state and the nation.

Youngsters educated in overcrowded, underequipped classrooms by underpaid teachers enter either college or the job market educationally stunted. Most will as a result have tragic difficulty competing with their equals from other, better-run counties in North Carolina.

They will be unnecessarily disadvantaged in the competition with their equals from states where education is more highly valued. And they will be hobbled in the competition with their peers from abroad, who will be vying for the same jobs just as surely as all of the people in a line to fill out applications are vying for the same jobs.

Any of the commissioners can answer that they don't want to hurt the students. No, they just don't want to overpay the top administration. They aren't satisfied with the care with which the school board oversees the expenditure of the school budget. They don't trust the school administration to honestly state the kind and magnitude of the schools' needs, and so on.

Yet the raw statistics of the county's underinvestment in its schools, as compared with virtually every other similar size county in the state, rebuke the commissioners and undercut their arguments at the root.

We are left with a portrait of a conflict animosities and the political opportunism of adequate salaries for top school administrators.

To that we must add an obvious desire to Overwhelmingly, they will be men and sacrifice the future of Cumberland Cover holding both taxes and educational

Ex-'Winston Man' Stamping Out Crime

By RODGER MULLEN

You're attending a workshop on protection against violence and sexual assault. You know you've seen the instructor before, but you just can't place the face ...

Wait a minute, it's coming to you. That billboard along the interstate. The one showing the husky-looking guy smoking a cigarette. Could it be ...?

It could, and it is. Steve Bigelow's hair is shorter now, he's lost a little weight, but the mug is the same one that was plastered on billboards advertising Winston cigarettes a few years back.

But Bigelow's days as a cigarette-ad model are behind him now. For that matter, so are his days as a professional bodyguard and a sometime actor in beer commercials.

Prevention of crime is Bigelow's concern now, and that's why he'll be conducting a workshop entitled "Personal Defense Against Violence and Sexual Assault" Saturday from 9:30 a.m. - 5:30 p.m. at Fayetteville Technical Institute.

The workshop is designed to provide practical advice on avoiding personal violence and dealing with it if it does occur. Also covered will be the psychological motivation of rapists and assaulters and the moral question of how to respond to violence.

"It's geared toward teaching people how to deal with

is to reduce the chance of ever facing violent crime."

It's difficult to envision anyone more qualified than

Bigelow teaching a class on protection against violence. Schooled in four martial arts, Bigelow has earned a black belt in one of those martial arts techniques, Hwa Rang Do. He was also a high school wrestler and boxer.

Bigelow had ample opportunity to put those skills to the test during stints as a police officer and as a bodyguard to the rich and powerful in Aspen, Colo. The bodyguard stint lasted about four years, while

Bigelow was working for Executive Security International. During that time, Bigelow taught firearm use, hand-to-hand combat and also served as a bodyguard for wealthy businessmen, he said.

Bigelow is reluctant to talk about his experiences as a bodyguard but says he bears scars from those days. "I mainly got out of it because it was too fast paced

and too dangerous," he said. "You were the last line of defense and if it came down to throwing yourself in the line of bullets to save your client, you were really expected to do that."

The cigarette advertisement came about after Bigelow answered a Winston casting call, he said. The company was looking for healthy-looking young men to

violence in their lives," said Bigelow, now North Carolina deputy director of crime prevention. "The aim dangle cigarettes from their mouths, and Aspen was full of aspiring models who fit the bill.

Bigelow said he was one of many models the company used in its advertising, all of them from the same physical mold - sort of the Winston equivalent of the Marlboro Man.

"My face was on billboards all over the country," Bigelow said.

The irony is that Bigelow doesn't smoke. That fact became obvious when he tried to look convincing with a cigarette between his lips.

'They'd say, take it out of your mouth, you don't know how to smoke a cigarette," Bigelow said. The problem was solved by painting a cigarette into the picture.

Bigelow's short-lived commercial acting career also included a bit part in a Coors beer commercial.

"It was fun and it was real good money," Bigelow said. "If I was in Aspen, I'd probably still be doing that stuff.'

But Saturday, Bigelow has a much more serious mission than selling cigarettes. He'll be sharing tips and ideas that may save someone's life.

The workshop will probably open with a talk by Bigelow. After that, a question and answer session will

See BIGELOW, Page 17-A

Bigelow_ From Page 16-A

be held to find out the concerns of will try to teach the workshop the group Then Bigelow will lead the group in warm-up exercises followed by demonstrations of some martial arts techniques designed to ward off or escape an attacker. Bigelow

participants how to recognize potentially dangerous situations and how to avoid them. Bigelow said a "red flag" should go up in a person's mind if they are in an isolated place with a stranger. "Prevention of crime is really said all of the simple moves he will

participants are expected to be comes down to the decision of the women, Bigelow said men are also individual person, he said. "No third person can tell you welcome. In fact, he said, men are exactly what to do," Bigelow said. more likely than women to become victims of violent crime.

"We explain an awful lot about what sexual assault is," Bigelow said. "I think it's vitally important

"I say, think for yourself and decide for yourself." "Personal Defense Against Violence and Sexual Assault" is

THE FAYETTEVILLE TIMES, Thursday, June 11, 1987

Fayetteville Technical Institute and Methodist College Student Affiliates of the Fayetteville Chapter of the National Association of Accountants will co-sponsor a CPA-CMA Seminar for area students and others on Friday at 7 p.m. in FTI's Auditorium. The purpose of this seminar is to acquaint interested individuals with how local CPAs and CMAs have prepared for past exams. This

seminar is free and the public is welcome to attend. For mc See NOTES, Page 10-C

RALEIGH (AP) - A senior legislative financial analyst says more than 40 percent of the \$14.3 million budgeted for adult basic education programs in community less than half - \$212,623 - on colleges last year was diverted to those adult students with less than other projects, and more than \$3 an eighth-grade education. million cannot be traced.

committee on education.

grams, Ashcraft told the committee.

about \$2.5 million was returned to

the state General Fund. Ashecroft

says she does not know what hap-

"There's no way to track that

money," Ashcraft told committee

members who asked. "I've asked

Community college officials are

not required to spend adult basic

education funds on adult programs.

But the House and Senate Approp-

riations Committee on Education,

which received Ashcraft's report,

say it might study proposals to limit

that question myself."

how the money is spent.

pened to the remaining \$3.3 million.

Of the \$5.8 million not spent,

President Bruce Howell said The General Assembly voted four much of the remaining \$328,250 years ago to increase by 100 perwas spent to serve those slightlycent the amount of adult basic better-off students who were trying education money each of the 58 to get their high school diploma at community colleges receives. Wake Tech.

"The money was offered as a carrot, as an incentive, to offer the eighth grade," Howell told the special programs to help adults who Charlotte Observer. are illiterate," legislative analyst Charlotte Ashcraft told a budget Howell also said the schools received so much new adult education In 1985-86, the colleges received

money so fast that it has been \$14.3 million for adult basic educadifficult to spend it wisely. "We're building a program," he tion programs, which are geared to those adults with less than an said. "You build a program like you eighth-grade education. But only build a building - one stone at a \$8.47 million - or 59.1 percent time.' was actually spent on those pro-

Central Piedmont Community College in Charlotte, the state's largest community college, appears to be an exception to the habit of underspending. School officials say they spent more than was allotted in 1985-86.

Wake Technical College in Raleigh was allotted \$540,873 in

adult basi education instructional

funds in 1985-86. The school spent

"Adult basic education is very important at Central Piedmont and has been for years," said President Ruth Shaw.

In 1985-86, Central Piedmont was allotted \$203,635 in adult basic education funds. Though Ashcraft says the school diverted \$39,178 of that amount to other programs, it spent considerably more than that the state's allotment on its Adult Basic Learning center.

Community Colleges Fumble...

It is reasonable to wonder what in the world is going on in North Carolina's community colleges these days, in addition to phantom classes, padded enrollments and make-believe education.

The latest wonderment is what happened to the adult basic education money.

Four years ago the Legislature doubled the appropriation the community colleges get for basic education for adults. The noble goal was to cut illiteracy and semiliteracy in the adult population, one of the state's most vexing problems.

In 1985-86, the community colleges received \$14.3 million to help adults with less than an eighth grade education.

Now it turns out that only a little more than half of the \$14.3 million actually was spent for basic education for adults. So where did the rest of the money go?

Some of the community colleges simply diverted the money to other programs, which they are allowed to do regardless of the Legislature's intent. Some of the money was returned to the state by community colleges unable to detect a need for adult basic education or at a loss as to how to provide it.

And some of the \$14.3 million - about \$3.3 million - just disappeared. There is no suggestion that the state has been fleeced, as it was with the phantom classes and padded enrollments. A senior financial analyst for the Legislature simply can't find what happened to the \$3.3 million.

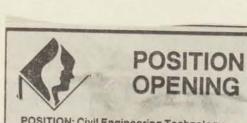

This is ridiculous, even by bureaucratic legislative and academic standards.

...But FTI Didn't

here.

The serious questions as to what happened to and found the attendance rate to be 75 percent of nearly \$7 million in funds for Adult Basic those enrolled. The auditors found that the Education programs in the community colleges figures at other community colleges and

THE CURATOR of the Black Museum of Scotland Yard in

and technical institutes need not be asked here in Cumberland County.

Fayetteville Technical Institute spent the money for what it was supposed to be spent on - adult basic education.

The state auditor's office recently checked the books and found "no exceptions" to be noted. Audit personnel also checked (without advance notice) 115 of the 500 classes in operation at FTI

technical institutes ranged from 15 percent to 85 percent. FTI received a complimentary letter from former Gov. Bob Scott, president of the community college system for its good record. What FTI is doing ought to be the rule, not the

exception. But it's nice to know that none of the

missing or misspent money was lost or misspent

London, William Waddell, will present a slide presentation tour of the museum and speak on solutions to several unusual crimes tonight at 8 o'clock in Fayetteville Technical Institute's auditorium. The free program is sponsored by the Criminal Justice Association and the FTI Foundation.

THE FAYETTEVILLE TIMES, Friday, March 27, 1987 **FTI President's List Announced**

Fayetteville Technical Institute has announced its winter quarter president's list, which includes the following students from the Cape Fear Region:

Community Colleges Fumble...

...But FTI Didn't

It is reasonable to wonder what in the world is going on in North Carolina's community colleges these days, in addition to phantom classes, padded enrollments and make-believe education.

The latest wonderment is what happened to the adult basic education money.

Four years ago the Legislature doubled the appropriation the community colleges get for basic education for adults. The noble goal was to cut illiteracy and semiliteracy in the adult population, one of the state's most vexing problems.

In 1985-86, the community colleges received \$14.3 million to help adults with less than an eighth grade education.

Now it turns out that only a little more than half of the \$14.3 million actually was spent for legislative and academic standards.

basic education for adults. So where did the res of the money go?

Some of the community colleges simply diverted the money to other programs, which they are allowed to do regardless of the Legislature's intent. Some of the money was returned to the state by community colleges unable to detect a need for adult basic education or at a loss as to how to provide it.

And some of the \$14.3 million — about \$3.3 million - just disappeared. There is no suggestion that the state has been fleeced, as it was with the phantom classes and padded enrollments. A senior financial analyst for the Legislature simply can't find what happened to the \$3.3 million.

This is ridiculous, even by bureaucratic

For N.C. Panel A Cumberland County teacher has been appointed by Gov. Jim Martin to serve on the North Carolina Adviso-

Teacher Picked

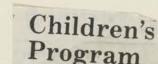

Cumberland

ry Council on Vocational Education.

Tommie B. Evans, who chairs the foreign language department at Pine Forest Senior High School, EVANS was named to replace Ronald Bostian of Salisbury, who has resigned, according to an announcement from the governor's office.

The council advises the governor, the U.S. secretaries of education and labor, the State Board of Education and the State Board of Community Colleges on vocational and general education matters.

Ms. Evans received a bachelor of arts degree from Shaw University in French, English and Spanish and continued her language studies at North Carolina Central, West Virginia University, Virginia State

The serious questions as to what happened to nearly \$7 million in funds for Adult Basic Education programs in the community colleges and technical institutes need not be asked here in Cumberland County.

Fayetteville Technical Institute spent the money for what it was supposed to be spent on - adult basic education.

The state auditor's office recently checked the books and found "no exceptions" to be noted. Audit personnel also checked (without advance notice) 115 of the 500 classes in operation at FTI

and found the attendance rate to be 75 percent of those enrolled. The auditors found that the figures at other community colleges and technical institutes ranged from 15 percent to 85 percent.

FTI received a complimentary letter from former Gov. Bob Scott, president of the community college system for its good record. What FTI is doing ought to be the rule, not the exception. But it's nice to know that none of the missing or misspent money was lost or misspent here.

University and Appalachian State University. She is a member of the National Education Association, North Carolina Association of Educators, past president of the Foreigh Language Association of North Carolina and president of the Cumberland County Foreign Language Association.

She also serves on the Fayetteville Technical Institute Board of Trustees and is a part-time Spanish instructor at the Ft. Bragg branch of Fayetteville State University.

Shelter Addition Planned **Animal Haven Marks Its First Anniversary**

By JEFFERY WOMBLE It all started one year ago in the kitchen of Viola Bowling's home.

She and other concerned citizens such as Jill Ross and Barbara Radcliff dreamed of a place in the Fayetteville area where animals who were abandoned or abused by their owners could have a chance at life.

After years of planning and dedication by themselves and the community, what was once a dream is now a one-year-old reality.

Animal Haven, 3927 Bragg Boulevard, will celebrate its first anniversary as a home for pets on Monday.

Constructed in 1985 by ma-sonry students at Fayetteville Technical Institute, the 961-square-foot building has the capacity to house up to 35 cats and dogs.

"We are permitted to have 35 animals total," Mrs. Radcliff said. "It's the Department of Agriculture that gives us our license and they determine our number and we break it down as we please."

Unlike other animal shelters who put their animals to sleep after a certain length of stay, Animal Haven keeps the pets as

long as they need to because as Mrs. Ross puts it, "there is an owner for every dog." "We don't put these animals to sleep," Mrs. Ross said. "They stay with us as long as they need to. I may be an optimistic

realist, but I'm a firm believer in the fact that out there somewhere, there's an owner for every one of these dogs. "The SPCA is a national

organization and restricts the adopting of pets to certain areas and certain families, but Animal Haven serves southeastern North Carolina and anyone is welcomed to adopt a pet."

Through the course of Animal Haven's one year of operation at its new shelter, more than 700 cats and dogs in all colors and sizes have come through its doors, a number that both Mrs. Ross and Mrs. Radcliff are both proud of, because they say no animal has ever been turned

away. Besides taking in animals, the main objective of Animal Haven is to find homes and families that will take care of the animals and provide for their safety and well-being.

Funded only by private donations, the plight of Animal See HAVEN, Page 5

ENROLL NOW

Full-Time Classes Beginning In The Following Vocational/Technical Programs:

Plumbing and Pipefitting

Designed to train you to repair or install plumbing systems in residences and small commercial buildings. Includes courses in plumbing and pipework and blueprint reading.

Drafting

Drafters prepare drawings of objects to be manufactured by skilled craftspeople. Skilled Tradesmen employed in local area industries.

Masonry

Prepares you to work in the construction industry as a bricklayer or mason capable of utilizing a variety of building materials and methods. Includes classes in blueprint reading and fundamentals of bricklaying.

Machinist

Develop the basic skills in the use of a wide range of power metal working tools and equipment. Includes classes in technical drafting and machine shop theory and practice. Machinists are highly skilled workers in the manufacture of metal and plastic goods.

FAYETTEVILLE TECHNICAL INSTITUTE/FORT BRAGG

Continuing Education WINTER QUARTER '87

REGISTRATION INFORMATION

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

You may register by phone for any course in this advertisement except English as a Second Language, High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state checks can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call: 497-5217, 497-5584, or 497-5691.

Any person sixty-five (65) years of age or older is fee-exempt for any course shown in this ad.

Active-duty Army personnel are fee exempt for any course indicated by an asterisk (*).

Fayetteville Technical Institute reserves the right to cancel any class because of inadequate facilities, insufficient enrollment or lack of qualified instructors.

FAYETTEVILLE TECHNICAL INSTITUTE/FORT BRAGG **Continuing Education** WINTER QUARTER '87

.

and the second second

REGISTRATION INFORMATION

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

You may register by phone for any course in this advertisement except English as a Second Language, High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state checks can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call: 497-5217, 497-5584, or 497-5691.

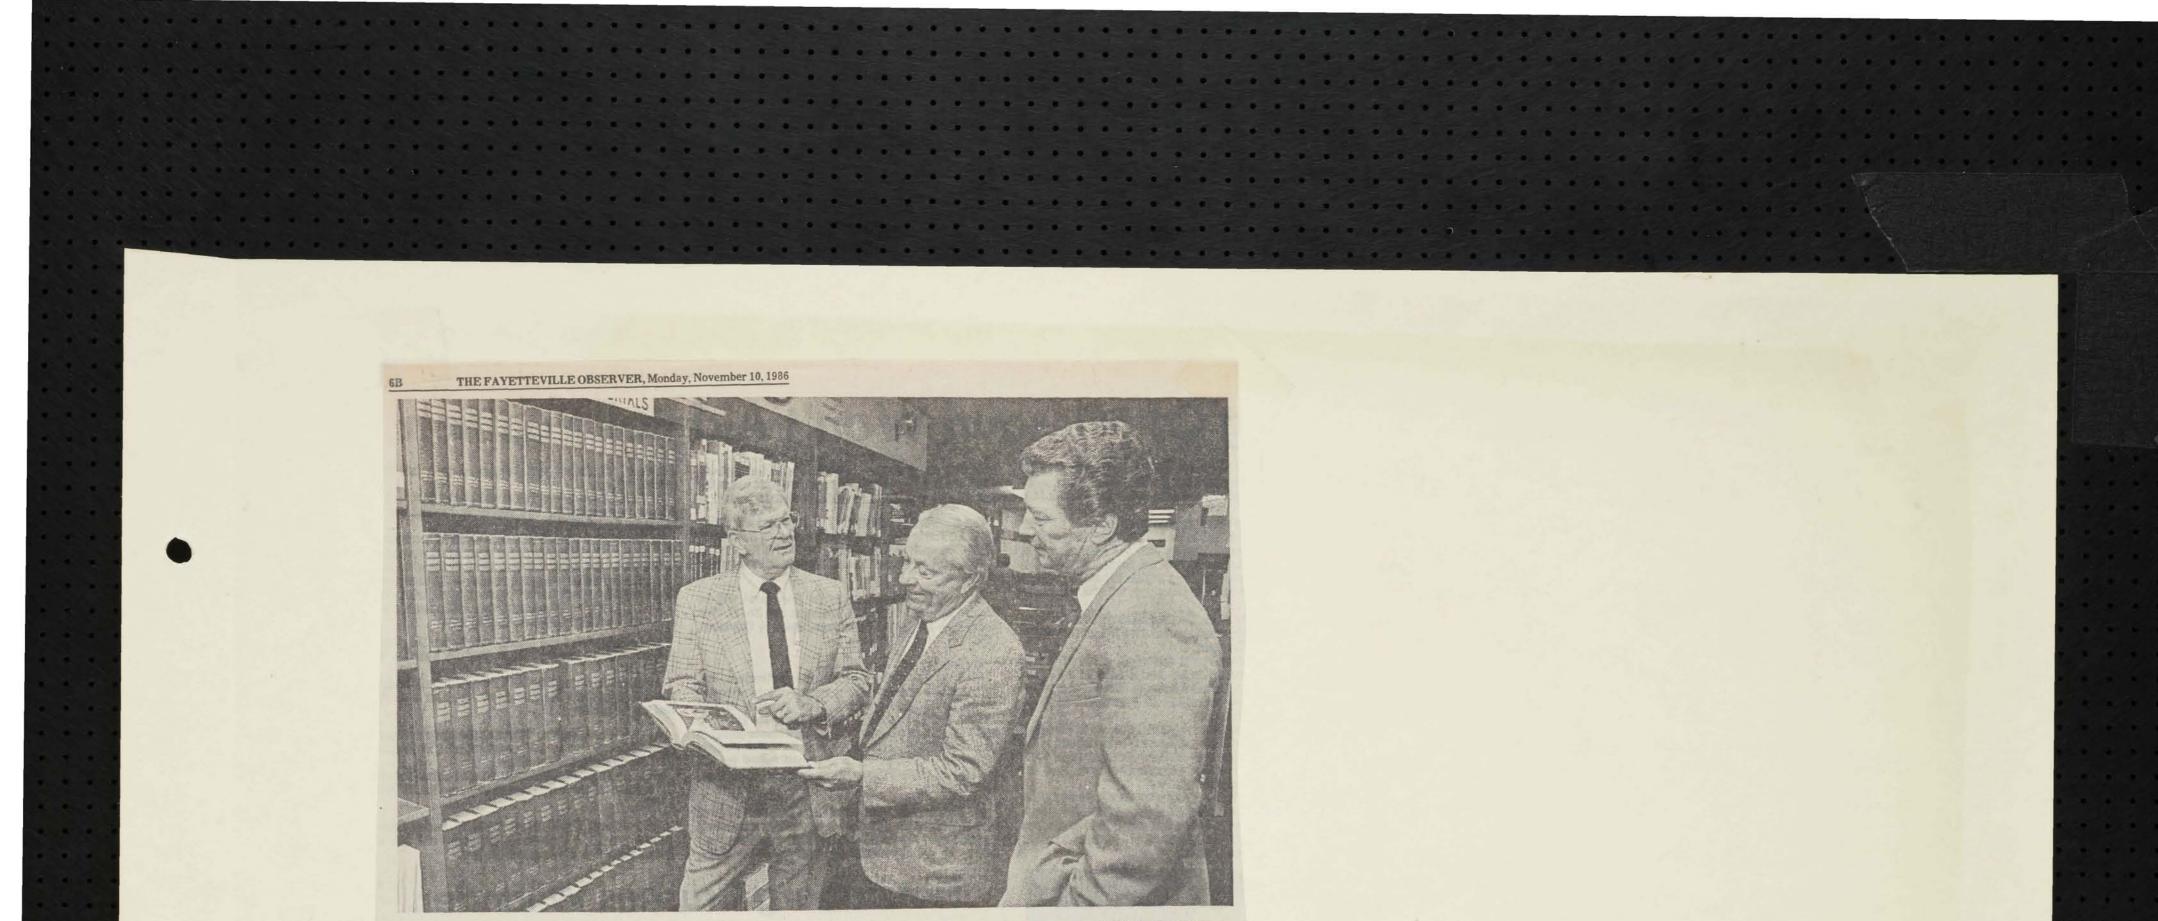

Any person sixty-five (65) years of age or older is fee-exempt for any course shown in this ad.

Active-duty Army personnel are fee exempt for any course indicated by an asterisk (*).

Fayetteville Technical Institute reserves the right to cancel any class because of inadequate facilities, insufficient enrollment or lack of qualified instructors.

William H. Pierce, left, shows the National Geographic bound collection, dating back to 1899, that he has given to the Fayetteville Technical Institute libary. With Pierce are M.J. Weeks, FTI Foundation president, and Craig Allen, FTI president

FTI Gets Gift Of National Geographic

Fayetteville Tech officials have been pro-

1889, said Pierce.

By CHRIS NELSON

A 103-volume collection of National Geofather and passed down through the generations, graphic magazine - a veritible chronicle of the he said. first half of the 20th Century - has found a home at Fayetteville Technical Institute.

cessing the magazines for use in the school's The collection, donated by Fayetteville oplibrary and formally received them from Pierce tometrist William H. Pierce, includes leatherbound six-month volumes of the monthly this morning. magazine from 1899 to 1953.

resemble the brown tooled-leather of the National Geographic began publication in magazine bindings. Pierce's collection was started by his grand-

Pierce's father had the early volumes bound in leather in the 1940s, he said. Volumes from 1947 are in the more familiar library-standard green cloth and cardboard binding. Aside from some shelf wear, the collection is

in fine condition. The pages of the magazines have not faded,

Pierce said an initial appraisal of the collection puts its worth at \$8,000 to \$9,000. Volumes printed before 1910 are worth as much as \$1,000 apiece, he said.

"When they get back before 1910 they're kind of rare - there's not that many," said Pierce. "I guess they're (FTI) kind of proud to have the best collection in the county.'

Pierce said he first offered the collection to Methodist College, where his brother, Richard Pierce, had served as president, and then to the Cumberland County Public Library but was turned down because both institutions already had extensive collections of the magazine. However, those collections don't go back to 1899, he said.

Fayetteville Tech Librarian Susie Rose said the school already had a National Geographic collection from 1954; the better part of it also was a donation. Of the latest gift, she said, "We're just tickled to death, even if we were third on the list." Pierce shies from recognition for his gift,

saying it is a donation from his whole family and that the magazines belong in public use. "I'm very pleased FTI has got them because I think there's nowhere you can get an idea of current events like in National Geographic," he

said. "I grew up with them, and I'm 64 years old. They're a good referential tool. I've always used them." In addition to the 103 volumes, there are three

boxes of pull-out maps, also dating from 1899, said Rose. The boxes are wooden and made to

and National Geographic's pioneering color photographs of the 1940s are strikingly vivid. Earlier color printings were from paintings, and they, too, have retained their original clarity. In the earliest volume, for the year of 1899 right after the Spanish-American War - there are two articles on America's newly acquired Phillipine Islands, and others such as: "Porto Rico," "The Belgian Antarctic Expedition," "The Wellman Polar Expedition," "The Caroline Islands," "The Redwood Forest of the Pacific Coast," and "How Far a Whale May Carry a Harpoon."

Maps from the earliest editions show only the coast of Africa and call the uncharted interior "Darkest Africa," said Rose. "Every time I walk by that truck (holding the

collection) I pick one up," she said. "I'm transfixed."

Haven_

Haven has not been an easy one, donations so that lab equipment but they have survived.

The group is still seeking donations from outside sources to pay for an additional wing so that more animals can be taken in. Animal Haven officials estimate the cost of the new wing to be in the area of \$9,000. "FTI is going to build the

5/21/87 Paraglide

Instructor Mildred Chase presents a check to FTI President Dr. Craig Allen. The award was donated by the graduates.

Classes are offered at both FTI - Main Campus and the Spring Lake Community and Cultural Center for 6 weeks from 9 am-4 pm/ Mon.-Fri. February 2 - March 13 — Spring Lake February 16 - March 27 — FTI - Main Campus For more information call 323-1706, ext. 459

Essay

'Whatever It Took'

Graduate Beulah King receives a hug and a rose from Spring Lake Supervisor Richard Higgins.

president of Fayetteville Technical

Mrs. Elaine Scoops, assistant

By Pat Wilson In the class of '86 the women

were all dressed in white and orchid right down to their toes. Each had a corsage pinned on her left Indeed they had and the eight graduates who shared more than bodice. The men wore black suits and ties and orchid shirts and 565 years of living among them adwhite boutonnieres. ded one more experience to their

Family members and friends lives. gathered for the graduation and secretary of the North Carolina there was a celebration afterward. Roses were handed out and the Division of Aging, commented that the Raleigh office was well sharing all around of hugs, kisses and handshakes.

graduate of the Class of '85, senior volvement of area seniors and the structor. Many thanks to her. ladies who paved the way by being many programs initiated at the South Fourth Street.

Mrs. Mae Bonner speaks for the graduates. FTI President Dr. Craig Allen listens.

best summed up the seniors' Institute, told the graduates he was thoughts in the essay she wrote He said he couldn't tell them about life because they had lived it. the eight graduates.

What We Have Accomplished Many things have passed through my mind since I have started back to school and, guess what, everything has changed. I have learned different methods of doing all subjects.

We worked together as a team in our class. Miss Mildred Chase, our aware of "what's going on in Spr-ing Lake," referring to the in-und handshakes.

Education has taught me a great the first to earn their high school center. Thursday's graduation deal. I have learned how to live

diplomas at the Senior Center on ceremony was further dignified by and work with other people and the appearance of Dr. C.R. Ed- that is the key to our society.

You couldn't keep from smiling wards, 17th District representative, The greatness of education is not with pride. When Muriel Allen and pastor of the First Baptist so much where we come from, but played and sang beautifully Church in Fayetteville, who gave is what direction we're going. It was just like starting all over. I

Perhaps Mrs. Mae B. Bonner

"Whatever It Takes," you knew the invocation. Congratulations to the couldn't be prouder, achieving the that even though it was a religious song, the title words couldn't have graduating seniors of 1986: Beulah impossible. For me, the impossible dream is King, Paul Kelly, Charlotte been more appropriate for the oc-MacArthur, Thelma Farmer, Mary standing before you today saying, Jones, Charles MacArthur, Mary "Thank you, Thank you, Thank casion. Prior to giving out their high McIntyre and Mae Bonner. you." school diplomas, Dr. Craig Allen,

COOPERATIVE EDUCATION: Fayetteville Technical Institute's Co-op program is designed to enable qualified students to combine classroom learning with career-related work ex-perience. Academic credit is earned toward graduation for professional work experience that is closely related to the student's academic study. Cooperative Education is considered a vital part of the learning process as it enhances the student's academic knowledge, personal development, and professional preparation. For further information, contact the

REGISTRATION: November 24, 9:00 A.M.-7:30 P.M. November 25, 9:00 A.M.-3:00 P.M.

Who may attend: Persons who have completed high school or have attained the N.C. High School equivalency (GED) scores. A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

Cost: In-state resident \$5.50 per quarter hour (maximum \$66), out-of-state resident, \$42.00 per quarter hour (maximum \$504), (additional fees include a \$3.00 activity fee, required textbooks, and a student parking fee.)

Payment: Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or Master Charge. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

> Accreditation: FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits and is recognized as a Servicemen's Opportunity College (SOC). Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution. the gaining school or institution.

FTI Seeks \$7.8 Million Bond Referendum

By JOHN BRAY

A resolution asking the Cumberland County Board of Commissioners to prepare a \$7.8 million bond referendum to finance building renovations and construction at Fayetteville Technical Institute was adopted Tuesday by the school's trustees.

Officials said \$5.6 million of the funds would be for constructing an 80,000 square foot applied technology center, and the remaining funds would be for renovating Lafayette Hall, Cumberland Hall, the library and the Horace Sisk Building.

All of the projects are part of a long-range construction and expansion plan prepared by the school, which officials said needs additional building space to accommodate its programs and enrollment.

FTI Vice-President for Fiscal Affairs Robert Carter said the resolution, which will be drafted by the board's attorney, asks the commissioners to arrange the bond issue but does not specify the type of bonds.

"We're going to ask the county commissioners for a bond issue but it would be their decision about how that would be done," he said.

Options open to the county, a state treasurer's office official said, would be general obligation bonds, which are backed by taxpayers, or creation of a special fund for the projects and financing them on a pay-as-you-go

FTI, part of the state's community college system, receives operating and capital funds from the state and county

FTI President Craig Allen said the technology center

would house "high tech" programs such as civil engineering and robotics.

Asked about alternatives to a bond issue, Finance Committee Chairman Thornton Rose said, "The only other way to raise the money would be for the state to grant the money, or the county commissioners."

But Rose said the state has provided \$4 million over the last three years for construction of a 50,000 square foot student activities center, expected to be completed next December, and \$1 million for renovation of the 27,720 square foot Winn-Dixie building on Ft. Bragg Road, which the school recently purchased to house a business and industry training center.

"So it's now our turn locally," Rose said. He added

See FTI, Page 5-A

FT

that an additional \$3.8 million would be needed to equip the proposed technology center and that the funds would be sought from the state.

The student activities center and the Winn-Dixie building were both part of the long-range plan, which was first prepared in 1984 and updated last year. Allen said the two buildings represented important

From Page 1-A

gains in needed space and that construction of the technology center would "satisfy the need for facilities for some time," he said.

The updated long-range plan also calls for a 4,800

square foot horticulture building and renovation of the Honeycutt and Neill Currie buildings. The last bond issue passed by the county for FTI was in 1975, according to Allen's administrative assistant Linwood Powell, who said the \$3.5 million issue was for purchasing the Sisk building and the property it is

located on. Trustees' Chairman Harry Shaw asked that each trustee sign the resolution. "I think that would demonstrate to the commission-

ers that we are 100 percent behind it," he said. Officials said they wanted the referendum in May. Asked why the issue was not proposed to coincide with a General Election, Shaw said, "We'd like to have it as a separate issue." He added that voters would be

better able to identify with the issue under such an arrangement. In other business, trustees approved Director of Cooperative Education J.C. Basnight to replace Vice President of Academic Affairs Charles Plummer, who

is resigning.

By GREG BARNES Of The Times St

The Cumberland County Board of Commissioners on Monday postponed action on a proposed \$7.8 million bond referendum for Fayetteville Technical Institute to allow county staff time to study alternative financing methods.

FTI officials are requesting a referendum in May to fund a \$5.6 million applied technology center and \$2.2 million for renovating four buildings on the campus. But commissioners unanimously agreed to wait until a scheduled Feb. 16 meeting before making a decision. Commissioners wasted no time looking for financing alternatives. Commissioner Mary McAllister asked

building costs, and Commissioner Virginia Thompson Oliver suggested that other financing methods should be explored.

But Mrs. McAllister was told by Harry Shaw, chairman of the FTI Board of Trustees, that the state sets tuition rates at FTI.

The request was among three major building improvement proposals to come before commissioners on later join the committee. Monday, including \$50,000 to help refurbish a former library in downtown Fayetteville for the Arts Council of Fayetteville/Cumberland County and a new branch library in Hope Mills.

In an unrelated matter, the board appointed a study

issue.

whether tuition could be raised to help offset the committee to consider merger or other alternatives to unify the county and city recreation departments. The committee will be comprised of the county and city managers, parks and recreation directors and chairmen of the city and county recreation advisory committees.

Commissioners stressed that outlying municipalities should be provided opportunities for input and perhaps

In the FTI building proposals, the school hopes to build an 80,000 square-foot applied technology center

that would house 28 classrooms, 27 laboratories, faculty See COUNTY, Page 14-B

and administrative offices, advanced technology is displacing community college system and reaccording to Shaw. many in the area's workforce. The center would provide new "high-tech" programs such as civil engineering and robotics, and existing programs such as drafting, computer technology and tool and die, officials have said. Shaw said the 25-year-old institute has provided a catalyst for industries to locate in Cumberland

"If FTI is going to meet the from the state and county. demands of industry ... it must have FTI's proposal also seeks \$2.2 your help," Shaw told commissionmillion to renovate Lafayette and ers. "How we fund it really makes Cumberland halls, the library and no difference to us, but we feel the the Horace Sisk Building. Shaw said need is there and it should be renovations would not occur until after the center has been built. funded. Shaw called FTI the most Commissioners indicated that funds "overcrowded, overused" higher edfor the renovation may not need to ucation facility in the state. be included in the proposed bond County and that the timing for a

FTI is part of North Carolina's

From Page 1-B

FTI is hoping for a decision at the ceives operating and capital funds Feb. 16 commissioners meeting because it wants to hold the bond referendum in May. Officials said 72 days are required between the time the board authorizes a bond election and a vote is held. In other building improvement projects, commissioners agreed to earmark \$50,000 as part of an estimated \$553,000 renovation of the former Frances Brooks Stein Library for the Arts Council.

Job Seeking Skills To Be Taught Here

new center is right because

"It's hard to find a job around here."

You hear those words all the time. Employment is available, however. It's landing a job that gets tricky.

Fayetteville Technical Institute's Human Resources Development is offering a six-week course in town that is designed to help individuals find the jobs they seek. The course will begin this coming Monday, February 2, at the Spring Lake Regional Cultural and Community Center. It is a free course and all study materials are provided.

"We're excited about having the course here in a new facility and doing something for Spring Lake," says Helen Jones, counselor and recruiter for HRD.

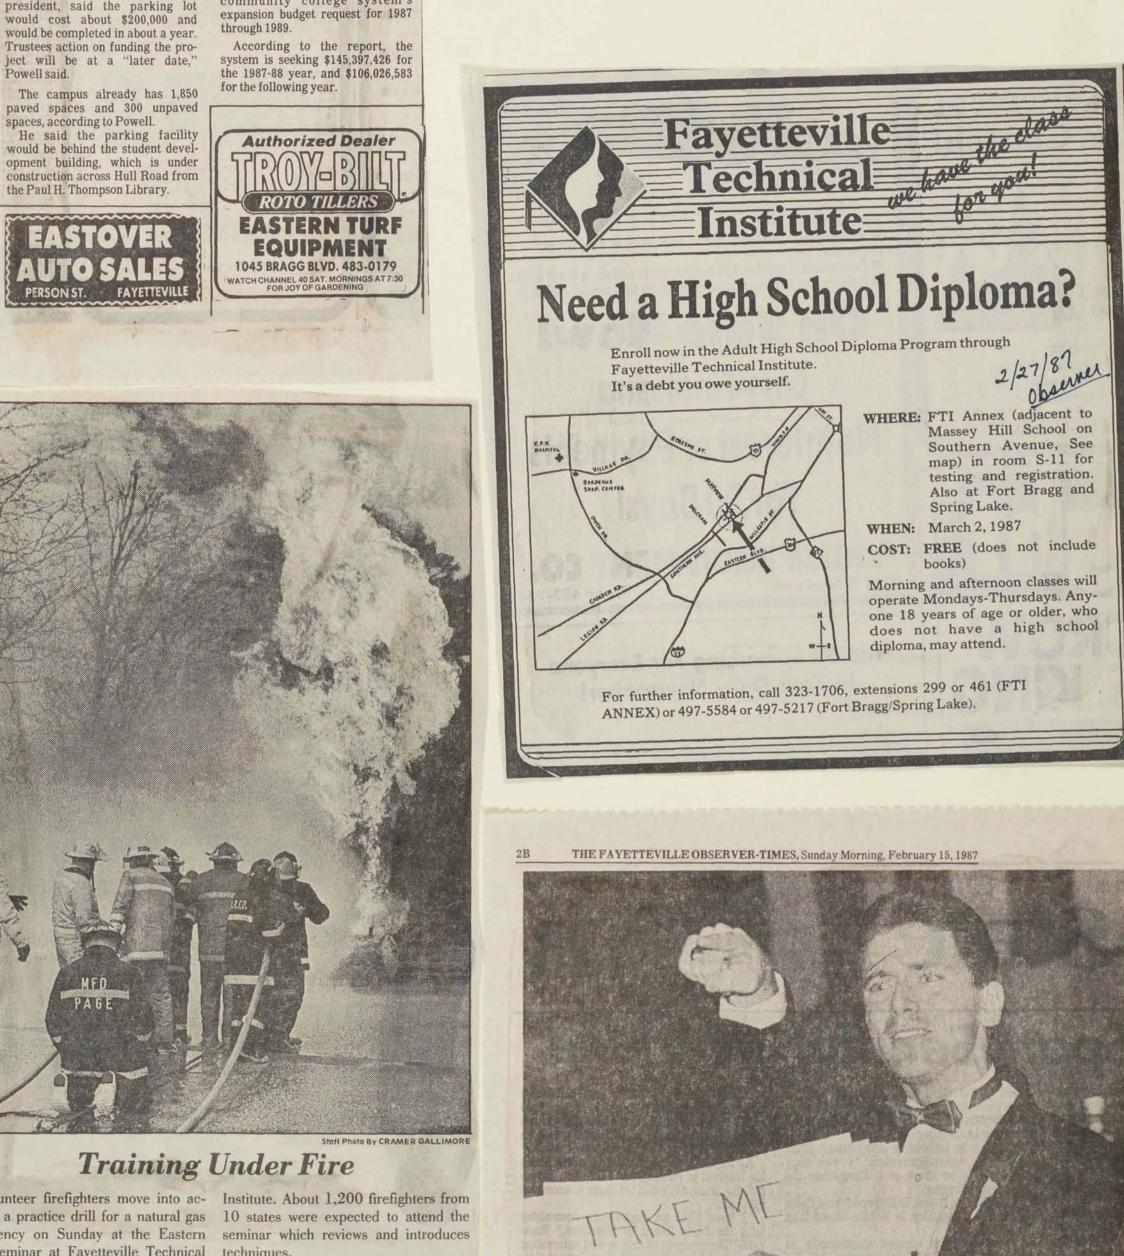

Those who have looked to HRD for the skills they need to obtain a job range from adults without high school diplomas to persons holding masters degrees who don't know how to market their skills, according to Jones. While many of those taking advantage of the HRD classes are transient people who aren't familiar with the area and what it offers, retired military personnel have also completed the course. Most students are young, however, and most in the Spring Lake, Fort Bragg and Pope Air Force Base area are military wives.

FTI Hires Firm To Des

Fayetteville Technical Institute Board of Trustees on Monday ap- proved hiring an engineering firm	"If you're out here any classes are in, you will no could use additional Powell said.

f you're out here any time when les are in, you will note that we d use additional spaces," ell said.	
other business, the board re- ed a report about the state munity college system's nsion budget request for 1987 ugh 1989.	
ccording to the report, the em is seeking \$145,397,426 for 1987-88 year, and \$106,026,583 he following year.	

A variety of backgrounds and cultures is represented. "We have students from all walks of life because the area is this way," Jones notes.

The bottom line is, according to Jones, "Do you have a sincere desire to become employed or better employed?" If so, and you're 18 years or older and meet eligibility requirements, contact Jones at 323-1706, extension 459, or call Jim Lucas, community center director, at 497-6609.

Helen Jones talks about the Human Resources Development course slated at Spring Lake's community center.

The classes are held from 9 a.m. until 4 p.m. weekdays with an hour off for lunch. That time frame is selected partially because the course is treated as though it is a job. Emphasis is on an individual's finding a job that matches with

his or her abilities and interests. "Sometimes people do not know what they want to go into," Jones says, "We administer an interest inventory test to them." Career information is also made available.

Jones offers a composite of an individual who might need HRD, "She could be a female in her late 40s, married for 20 plus years, made her occupation that of homemaker and hasn't worked outside of the home." She continues, "Perhaps she's going through a separation and is in a position to become independent but out of the work force, lacks confidence and doesn't know where to start. She may have some skills that need refining and technology has changed things a lot."

When asked what the HRD course would do for this individual, Jones replied, "We're going to look at her strengths and weaknesses and determine areas of improvement. She may have some strengths and abilities she hasn't thought about.

The prospective employee will be given job information and a resume will be developed for her. She'll be taught job interview techniques and mock interviews will be taped and played back. Motivation, building self-confidence, and marketing skills and abilities will be areas of emphasis. "We'll also help her plan an effective education goal and provide emotional support through counseling," Jones says.

Volunteer firefighters move into ac- Institute. About 1,200 firefighters from tion in a practice drill for a natural gas 10 states were expected to attend the emergency on Sunday at the Eastern seminar which reviews and introduces Fire Seminar at Fayetteville Technical techniques.

The last week of classes, students apply what they've learned in the classroom by actually going out on a job search and reporting on the progress.

Although HRD does not guarantee job placement, they will provide job leads. A job developer will be making contacts with employers in the area. Also, employers may contact HRD because of the past success they have had after hiring HRD attendees. Tracking students, done for a year after they've "graduated," is important to HRD directors. Funded by the North Caorlina Department of Community Colleges, the success of students determines from year to year whether or not the course will continue. Out of 58 community colleges in the state, 45 have initiated HRD.

FTI To Offer Training Program For Retarded Adults

By CHRIS NELSON Staff Writer

Fayetteville Technical Institute officials announced Monday the formation of an education program for learning-disabled and mildly retarded adults at its Massey Hill Annex.

The program is funded by \$25,000 in state funds, FTI President Craig Allen told the school's board of trustees at a monthly meeting Monday. The money is a portion of a grant from the General Assembly to the

.....

The FTI program will offer remedial education and socials skills to adults identified as having learning handicaps, said William Sease, vice president for

academic instruction. "We here at FTI feel there is a special population we have not met the needs of," he said. "And the community college program is under court order to provide education for these but if the program does not receive special people."

Action On School Smoking Is Delayed

By JOHN BRAY Of The Times Staff

A policy to ban smoking by students in the Cumberland County public schools and toughen employee smoking regulations was presented to the county Board of Education Tuesday, but no action was taken

School board members briefly discussed the measures and decided to consider the matter at the board meeting next month.

The board also removed the \$100,000 tendent C. Fletcher Womble on Pine the board is entitled to reject any bid.

Valley Loop and voted to re-advertise the property.

The house, declared surplus property by the board July 1, had been occupied by Womble at no cost for about six years as part of his contract. The board's action came after board attorney

Maynette Regan reported for a second time that no bids had been received from the board's advertisement of the house, appraised at \$125,000. New Year holidays. Students in grades 10-12 are permitted

"I feel like if we remove the minimum minimum bid price set on the house we might get some bids," said board formerly occupied by Deputy Superin- member Henry Clark. Ms. Regan said

Assistant Superintendent for Facilities Jerry Wood said two people told him set by principals, according to Superin-Jerry Wood said two people told him they would submit bids if the minimum tendent Jack Britt. But Britt said the price were removed. He declined to identify them.

to smoke in designated places at

School employees are prohibited from

hibition to cover any time employees are supervising students, including after Under the recommendation of the regular school hours. board's policy committee, the smoking Britt said employees would only be permitted to smoke on school property ban, if approved by the full board, would be effective Jan. 5, when students return from vacation after the Christmas and at designated sites.

The board also swore in Robert McCoy Jr. to replace board member Junior Edge, who resigned in August. McCoy was a member of the Fayetteville school

proposed policy would extend the pro-

Schools.

board before the county and city school systems merged last year. In other business, the board: Appointed former board

member Edge to serve on the Terry Sanford Attendance Area Advisory Council, replacing McCoy. • Declared as surplus the Hull Road property, the former site of

the city school system's administrative offices, and approved deeding the property to Fayette-ville Technical Institute, which is located across the street.

The board's action is part of, a three-way property transaction involving the county in which the school board would gain full use of an office building located next to the Cumberland County Memorial

Arena. The building is next to the board's central office and is currently shared with other governmental agencies which will move to offices in the county's proposed Agricultural/Expo building when it

is completed. Approved allowing Employee Benefit Systems, Inc. of Fayetteville to offer school employees a plan that company officials said

would increase take-home pay by removing some health and child care costs from taxable income. Company officials said they have tentatively scheduled to meet with school principals on Oct. 21 to discuss the plan.

From Page 1-B

specified times.

Cumberland County commissioners agreed last month to hire the firm to administer the program for county government employees. Tentatively accepted a bid of etteville for a roughly 1-acre piece

of school-owned property on Winslow Street. The board's action came after a coin flip was used to determine whether Floyd's bid or a bid by Jay Morris of Fayetteville would be accepted. Morris also bid

\$80,000 for the site. According to Wood, \$80,000 was the minimum bid for the property, which he said had been owned by the city school board. He said the property has been vacant for about two years.

Ms. Regan, the attorney, said the property would be advertised for 'upset bids" before Floyd's bid is accepted. She said the coin flip was reco-

mended by officials from the University of North Carolina's Institute of Government and had been agreeable to Floyd and Morris. • Gave final approval to

changes in student attendance and evaluation policies that were approved last month. The policies outline reasons for excused absences from school and remove a proviso that permitted high school students to miss up to seven days of \$80,000 from Sonny Floyd of Fay- school in a nine-week grading period and still receive a passing grade

> Under the old policy, students could make up work they missed regardless of the reason for their absence and still earn credit. Students who are unlawfully absent under the new policy will be allowed to make up work but will not receive credit.

A minimum of 150 total hours of course work, or its equivalent as determined by the principal, must be completed for a high school student to pass a subject, according to the new policy. A total of 165 hours are available in a 180 day school year, according to Associate Superintendent William Brown.

THE FAYETTEVILLE TIMES, Wednesday, October 15, 1986 8A **INVOLVEMEN'I**

FTI Sculptor Bringing Art To The People

said

By MARK PRICE

Cumberland County - the world's largest art gallery?

That sounds pretty far out, but if sculptor Tom Grubb has his way, all of Cumberland County could soon be museum property.

Grubb, artist in residence at Fayetteville Technical Institute, will begin work today on a six-month project to put up large outdoor sculptures in small communities all over the county, including Linden, Stedman and Wade.

The first such sculpture will go up at Ft. Bragg from 9 a.m. to 3 p.m. today with the help of dozens of school children. Work will be near the Ft. Bragg Crafts Center.

Grubb calls the project "taking art to the people." "We felt by placing art in these rural areas, where it's not feasible to have exhibitions, it makes it easier for the schools and clubs to get involved and see art. It will be a learning experience they will remember for some time," Grubb said.

"We want people in these rural areas to feel a part of the overall art scene in this county. With this program we can start a dialogue that will help them understand contemporary art."

Each mounting of these rural "celestial sculptures" will be coordinated with the schools and interested clubs in that area, in order to get as many involved as possible, Grubb said.

Dates and locations for other sculture raisings include: Nov. 12, Linden; Dec. 10, Stedman; Jan 14, Spring Lake; Feb. 11, Hope Mills; March 11, Wade; April 8, Pope Air Force Base.

Once the sculptures are raised, they will remain on the site for about a year, Grubb added. All seven sculptures will be different in design, though each will consist of bamboo and rope.

In addition to reaching school children and county residents, the artist wants to make an impression on military personnel at Ft. Bragg and Pope Air Force Base

"Many times the soldier is removed from his

community environment. This gives them incentive to explore local culture and the art of the area," Grubb

The project is being supported through a Grassroots Grant from the North Carolina Arts Council and contributions from the Fayetteville Museum of Art, The Arts Council of Fayetteville/Cumberland County, Inc., and Fayetteville Technical Institute.

Grubb is encouraging school officials in areas designated for sculptures to get in touch with him for further information. Grubb can be reached at FTI at 323-1961, extension 209.

-----Senate Campaign Sanford Declares He's **On No One's Coattails**

'Whiny' woman speaks, Page 6B Campaign spending, Page 6B

By PAT REESE

U.S. Senate candidate Terry Sanford, exhibiting the same fire that won him the governor's office in 1960, lashed out at his opponent Thursday, declaring he will "go to Washington wearing the yoke of no man, not even the president.'

Sanford was referring to his opponent, Sen. Jim Broyhill, R-N.C., who has closely allied himself with President Reagan throughout the campaign.

In an appearance at Fayetteville Technical Institute, Sanford also ridiculed Broyhill's criticism of his 1961 push for a sales tax on food saying it helped build the community college system.

"My opponent ... now after 25 years ... doesn't have the guts to come right out and say the tax is wrong," Sanford said about Broyhill television ads attacking the tax. "Instead, he puts some whiney little woman on television saying, 'I'll never forgive Terry Sanford for putting that terrible tax on me.'" Sanford said he doesn't need the woman's forgiveness, and the 138 members of the General Assembly "who had the courage to act" on the tax do not need her forgiveness.

Sanford spoke at the FTI observance of Community College Day before a crowd of about 300 students and supporters. The stop was part of a campaign tour of community colleges Thursday which included appearances at schools in Craven, Pitt, Guilford and Gaston counites.

Allen Expects FTI Bond Backing \$7.8 Million Is Sought For Building, Renovation

By JOHN BRAY If the \$7.8 million bond issue that Fayetteville faculty. The projects are part of a long-range facilities plan

said would provide badly needed space for students and campus, about half of what would be needed to meet the state recommendations, according to Allen. But he called the state standards "ideal," and said

Sanford

(Continued From Page 1B)

He said his decision to push for a 3 percent sales tax on food and non-prescription medicine in 1961 generated funds that helped build the 58-campus community college system.

Sanford said Broyhill had stopped airing television commercials critical of the tax because he had discovered North Carolinians supported it.

But Broyhill spokesman Doug Haynes said campaign strategists decided ahead of time that the commercials would run only two weeks, according to The Associated Press. They were discontinued Oct. 6, Haynes said.

Several of Sanford's longtime supporters said they were pleased with the his speech in Fayetteville. "It's like old times," said real estate developer Tom McLean, who served on the state Highway Commission when Sanford was governoradministration.

Reece Lancaster, former county Democratic chairman and now head of the Alcohol Beverage Control board, and Fayetteville attorney Doran Berry said they are encouraged by what they see as a positive change in Sanford's campaigning.

Sanford praised the community colleges and technical schools, saying they "opened the door of opportunity for all North Carolinians.'

He said the schools are providing opportunities for those who cannot attend the traditional four-year colleges, for those who want to return to school to broaden their education and for those who never had the opportunity to learn to read or write.

"The General Assembly took a

construction is not approved, the "cramped kinds of conditions" that are "certainly less than desirable" will continue, FTI President Craig Allen says. The school's trustees have agreed to ask the Cumberland County Board of Commissioners to approve the bond issue, and Allen said he believes the commissioners and voters will support

for a school with its enrollment, he said. Two projects already are under way to relieve overcrowding, a 50,000-square-foot student development center and a 27,720-square-foot business and industry training center. ALLEN

The two buildings and the applied technology center would add 157,720 square feet of building space to the

the school could operate comfortably with the additional space provided by the three buildings.

The proposed applied technology center - which would house 28 classrooms, 27 laboratories, faculty and administrative offices and resource areas - primarily would provide space for existing programs such as drafting, computer technology and tool and die, according to Larry Norris, vice president for academic affairs.

"It will give us some badly needed shop, classroom and lab areas," Norris said.

"I don't want to give the impression that we are not See FTI, Page 2-B

FTI wants \$5.6 million to build a technology center and \$2.2 million for renovations, measures officials

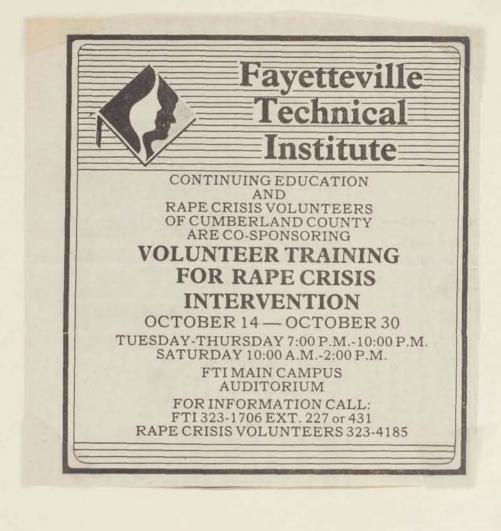

FTI	From Page 1-B	a series and the series and series	harden alanist star
operating a quality education pro- gram, because we are," Norris said. "But we have more students in shops and labs than the rooms were originally designed to accommodate." Asked for to describe the impact of the overcrowded conditions, Norris said that "a lecture class that would normally meet in a classroom is meeting in a lab, and our shops and labs are overcrowded." If's simply generally an overcrowded situation," he said. Alen added that labs are used constantly and that different pro- grams must share the same space. There is no downtime to set up and make preparations," he said. Offials said the bond issue pro- posal also calls for renovations involving four buildings — Lafayette and Cumberland halls, the library and the Horace Sisk	<text><text><text><text></text></text></text></text>	<text><text><text></text></text></text>	ventured a request of this nature," he said. County voters passed a \$300,000 bond issue for FTI in 1964, a \$900,000 bond issue in 1968 and a \$3.5 million issue in 1974, according to a school report. "So it's not like they've been going down on a frequent occasion and asking for money for facili- ties," Allen said, adding that the referenudum is targeted for late April or May. He also said he is confident of gaining the support of voters. "I think we have a good base for support. And I think that people realize how far we've have come, and that we have needs that haven't been met." he said, adding that "FTI enrolls in classes more than 40,000 voting adults each year and we have a lot of businesses and industries that count on FTI to provide well-trained employees."

problem and turned it into an opportunity," he said. "They had the political courage to get the job done and get it paid for." Sanford said Broyhill's attack on the sales tax has not worked.

"How dare he try to fool the North Carolina people by coming on (television) and giving them half the story? Of course it's backfired on him," Sanford told reporters after the speech. "It was insulting to the intelligence of the people of North Carolina and now they know

"Mr. Sanford is the one who has insulted the people of North Carolina with the new negative ads he's put on the air," Haynes told the AP. He referred to a commercial in which a Broyhill supporter is asked what Broyhill has accomplished in his 24 years on Capitol Hill. The supporter has no answer. Haynes said a small fraction of the state's education budget was generated by the food tax. "In our opinion it is a tax that hurts people more than it helps education.' Sanford on Thursday also attacked the Reagan administration, saying it has turned its back on textile and apparel workers and has a foreign trade policy that ignores the American worker.

nominated for several different awards since joining the Rainbow Girls. She was selected for the Ms. Service Title award twice within the last two years. She was also given the outstanding officers award, the past worthy advisor and the outstanding worthy advisor awards from the Spring Lake assembly #62.

Ms. Santiago-Vega was recently awarded a four-year academic scholarship and a scholarship for veterans affairs. She has been on the Statue of Liberty honor roll and has received first place in a candy sales fundraiser for the last three years.

Ms. Santiago-Vega is a 1986 graduate of Pine Forest Senior High School and while attending the 11th grade there she received first place in the sponsors award in the Miss Pine Forest Pageant.

Once a year Ms. Santiago-Vega works with the Cystic Fibrosis Foundation. In her spare time she enjoys spending time with her close friends, going to the movies, dancing, swimming and skating. She is presently employed with Toys R Us in Fayetteville and Wood Lake International Yacht and Country Club near Pinehurst.

The daughter of Mr. and Mrs. Justino S. Santiago-Vega, Ramona plans to transfer from Fayetteville Technical Institute to either Methodist or Pembroke College. She is majoring in Business Administration and hopes in the near future to go into management or open her own business.

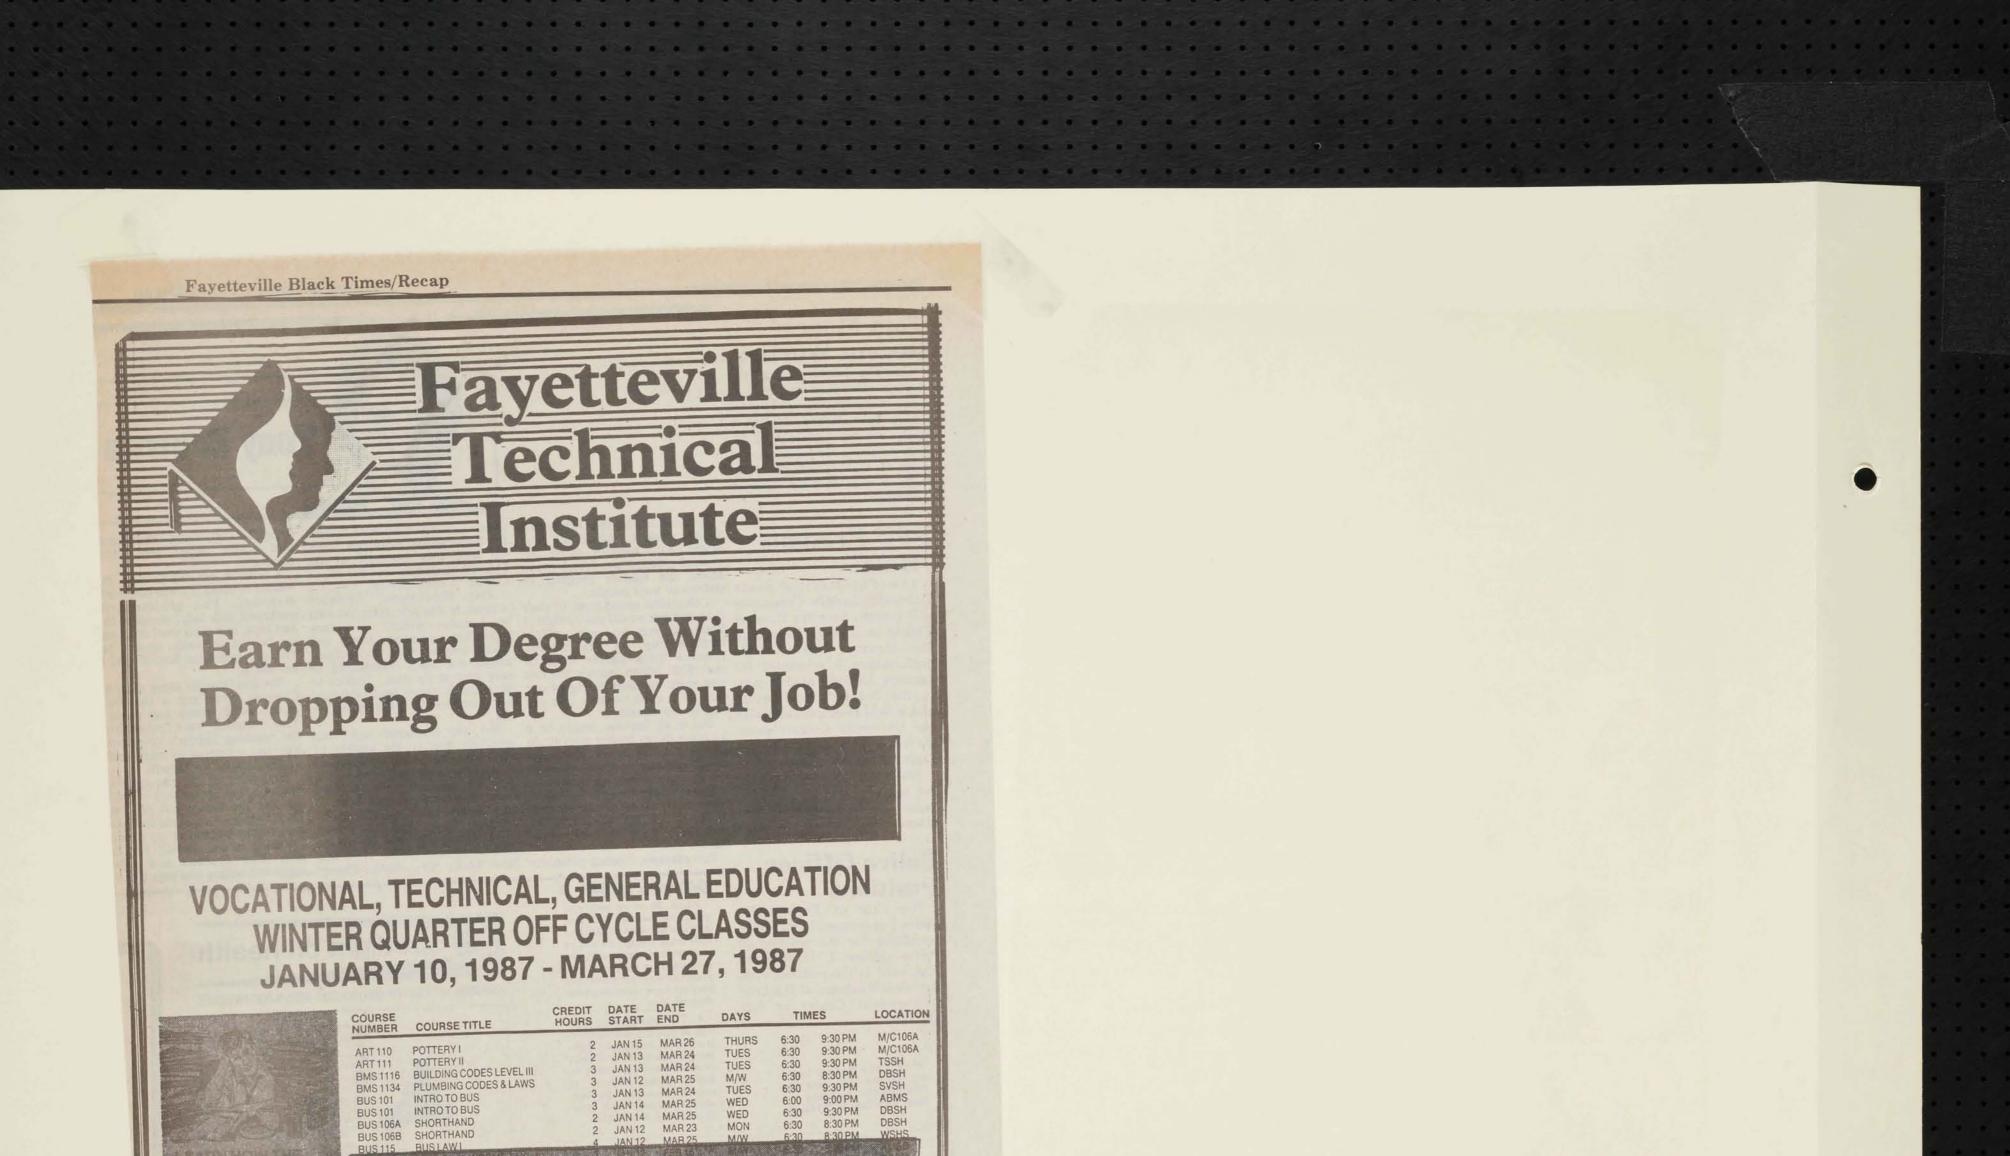

Ms. Santiago-Vega says even after she turns 20 years old she wants to continue to work with the Rainbow Girls on a volunteer basis.

If you know of an outstanding student, please contact The Spring Lake News at 436-2051. Ask for Debora Little.

Who's Who The 1987 edition of Who's Who Among Students in American Junior Colleges will include the names of 56 students from Fayetteville Technical Institute who have been selected as national outstanding campus leaders.

Artist's Visit Will Leave Sculpture In The Triangle

Known for his "celestial sculptures," Fayetteville Technical In-stitute Visiting Artist Tom Grubb has been working on plans for a sculpture in Spring Lake.

Work is to begin today and Spring Lake Junior High School students will be assisting as Grubb constructs his bamboo and rope art. The triangle where NC Highways 24, 87 and 210 intersect is the site he has chosen for his piece, and he expects his work will be finished at day's end.

Grubb is a Lexington, North Carolina, native who received his undergraduate degree in political science and history at Appalachian State University at Boone and a master's degree in fine arts in sculpture and drawing from East Carolina University in Greenville.

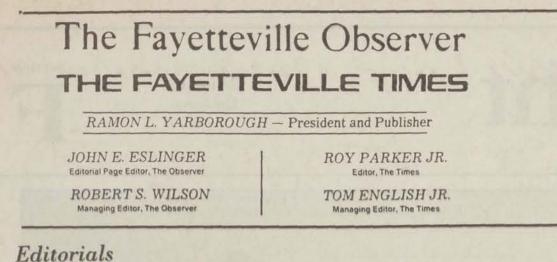

Under the Visiting Artist Program, an artist is placed with a sponsoring college and serves as a resource for the community.

Grubb has placed his celestial sculptures at Fort Bragg, Linden and Stedman. Future projects are planned for Hope Mills, Wade and Pope Air Force Base.

"The scupltures that I fabricate are abstract images derived from first-hand experiences as a missile technology instructor in the United States Army and as a captain of commercial fishing boats in the North Atlantic Ocean. By activating a great amount of space with very little mass I try to direct the viewer's attention upward off-earth toward alignment with the stars and survival in the 21st Century," the artist says about his work.

Grubb's projects are made possible through a Grassroots Grant from the North Carolina Arts Council and contributions from the

Fayetteville Museum of Art, the Arts Council of Fayet-"A wise man will see to it that his acts always seem voluntary and not done by "Architecture is frozen music." Goethe teville/Cumberland County, Inc., and FTI. He is available for free compulsion, however much he may be compelled by necessity." lectures and slide presentations to the public, and may be contacted at FTI by calling 323-1961, extension 209.

FTI's Bond Issue

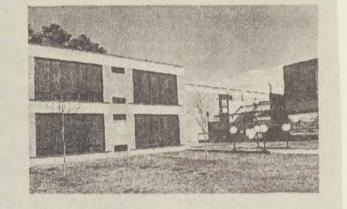

American industry spent \$18 billion on factory automation equipment in 1985 and is expected to spend \$36 billion more by 1990. American manufacturers must automate or be driven under by competitors in countries like Mexico, where the average wage laborer takes home \$40 a week for working much longer hours than the average North Carolina industrial worker does for \$340 a week.

Nor are manufacturers alone in their passion for efficiency through automation. The result is a nation in which people must be increasingly skilled in order to get and keep a basic job. By 1990, three out of four jobs are expected to require education or technical training beyond high school.

In North Carolina, the bulk of the task of providing this new training is falling on community colleges and technical institutes, most of which are not well-equipped to do the job.

A 1983 study done by the N.C. Board of Science and Technology found that over 65 percent of the scientific and technical training equipment in this state's community colleges and technical institutes was over five years old and one-third was over 10 years old.

It was obsolescent. The situation at Fayetteville Technical

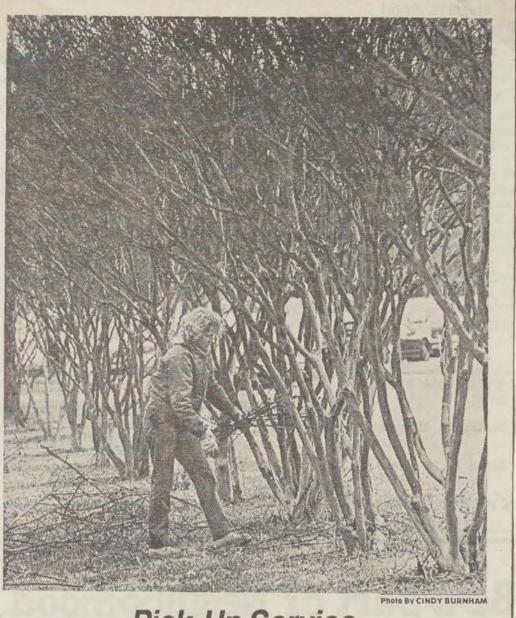

FTI's Cumberland Hall

Many of those students would, of course, be young high school graduates who had yet to get their first jobs. But a lot of them would be experienced workers trying to quickly learn the skills required to keep a job or to get a new job before they run out of money with which to pay the family's bills.

Millions of us will be going back to school like that.

It is reliably estimated that by the end of this century, between 5 and 15 million American manufacturing jobs will become as obsolete as some of the equipment students at North Carolina community colleges and technical institutes are asked to train for the future on.

Pick-Up Service

Melinda Wolf, an employee at Fayetteville Technical Institute, picks up following a recent tree-trimming.

Institute, this state's oldest technical institute and one of its best, is not a gleaming exception to that lamentable norm. Yet FTI has set out aggressively to remedy its problems, which include maybe half the classroom space required: for the student population it serves.

Among other things, FTI has, through careful and responsible planning, identified a strong need for a \$5.6 million structure to house a center for applied technology and \$3.8 million for new equipment to be used in that center.

On Tuesday the FTI board of trustees agreed to ask the Cumberland County Board of Commissioners to approve a bond referendum to pay for the \$5.6 million building and make \$2.2 million in badly needed renovations to existing structures there.

It is a proposal which deserves approval, both by the commissioners and by the voting public. An improved FTI will pay this county back, both in beneficial economic development and in chronic unemployment problems which do not materialize.

The kinds of training which would go on in that science and technology center are right at the core of what modern industry is doing to make itself more efficient and its products more saleable in a marketplace where products made all over the world must vie for the consumer's money.

Students would learn to work with automated machine tools, with computer aided design and computer aided manufacturing equipment, with the kinds of electrohydraulic robots commonly seen in photographs of automated assembly lines, with fiber optics systems and with similar equipment and technologies. Another 5 to 15 million services jobs will also become obsolete.

There will probably be new jobs to replace the old, according to the U.S. Bureau of Labor Statistics. But the new jobs will require a higher level of skill, and that means displaced workers will have to be retrained at facilities like the one proposed by FTI.

In the absence of such retraining, workers will find themselves accepting whatever lowskill, low-wage jobs there are, or languishing in joblessness. In a high-tech economy, nothing will rescue them except retraining, and business will not flourish in communities loaded down with the undertrained and unemployed.

But communities with labor forces rich in workers who have the increasingly complex skills required to perform at a high pitch of productivity in the late Twentieth Century workplace are the ones that will grow, economically. They will do so by attracting branch plants of existing corporations as well as by the generation of entrepreneurial "growth from within."

The latter is something the heavily high-tech Massachusetts economy has excelled at in great part because that state's workforce has such a high level of educational achievement — the highest in the nation — and its equivalent of our technical institutes offer first-class training on up-to-date equipment.

It's a question of whether we want to have jobs and growth here.

If we do, we'll see to it that FTI has what it takes to do a first-class job.

It's a tough job but someone's gotta do it... Art students from Spring Lake Junior High School assist as Tom Grubb constructs his "celestial sculpture" of bamboo and rope in Spring lake's triangle area. The students are, from left, Carl Wagaman, Todd Lindsay, Angela Drummond, Noel Alfonso and Robert Ortiz. They worked on the project on Wednesday of last week.

Hall To Again Serve On School Board Spring Labe June 21, 1987

Retired Spring Lake businessman Howard L. Hall Sr. has been appointed to serve on the Cumberland County Board of Education.

Hall, who had previously served for 24 years, was selected by school board members to fill the seat vacated by Alex Warner, recently elected to serve the 18th District in the State House of Representatives. Hall is the only Spring Lake resident to serve as a school

board member. Howard L. Hall Elementary School on Andrews Road was named for the longtime Spring Lake resident in ceremonies held October 4, 1981. He has also served as a member of the Fayetteville Technical Institute Board of trustees since 1962, currently holding the office of secretary.

sinesss been Hall and wife Maude operated Dale Sundries, located on Main Street, for 26 years. They later opened Hall's Garden Center on South Main and operated that establishment for eight years until his retirement in 1982.

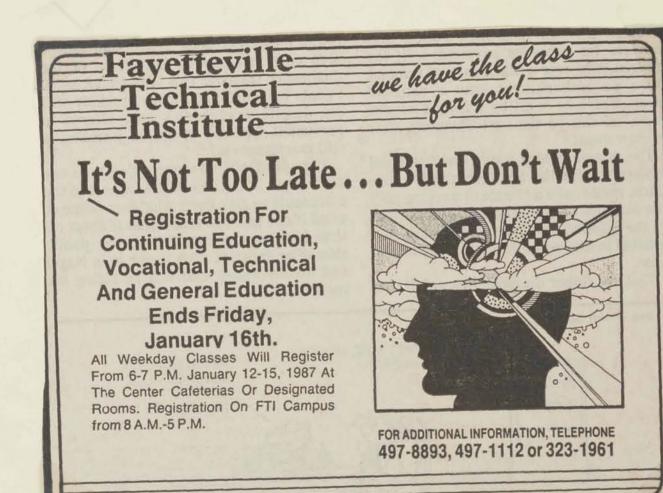

> Hall was on the town council when Spring Lake was incorporated in 1951, serving as mayor pro tem for eight years.

The Halls have three grown children, all were students of Spring Lake schools and are graduates of Pine Forest Senior High School.

Mildred Hall Hice, a graduate of East Carolina University, became a school teacher and is now in private industry in Charlotte. Howard Hall Jr. has been with the North Carolina Highway at West Jefferson James Dale Hal of ECU, is city ex Carolina Natic Jacksonville, NC.

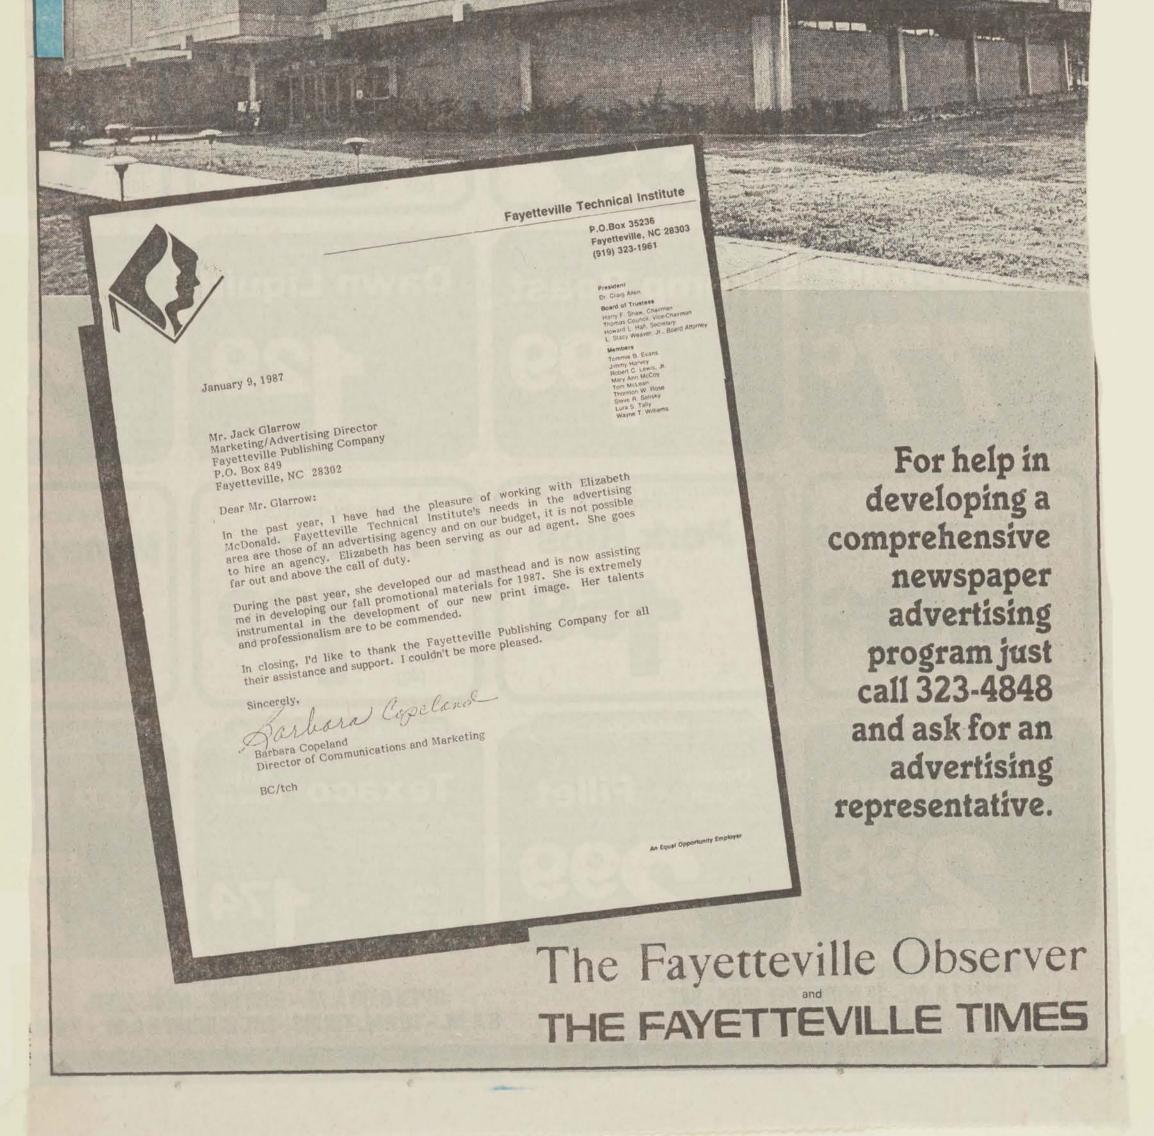

Patrol for 16 years and is stationed at West Jefferson. James Dale Hall, also a graduate of ECU, is city executive of North Carolina National Bank in

Howard L. Hall Sr.

FTI Found 'Trim' **In Enrollment Audit**

By CHRIS NELSON

A state audit of Fayetteville Technical Institute's continuing education program found no enrollment "padding" and an average attendance rate of 75 percent, FTI officials say.

Auditors visited FTI in February in the wake of disclosures last year that more than \$1 million was paid to phantom instructors for classes that did not exist at Cape Fear Technical Institute in Wilmington.

William Sease, vice president for adult continuing education at FTI, said auditors spent three weeks at FTI and reported no such problems.

A letter from State Auditor Ed Renfrow to FTI President Craig Allen says auditors visited 115 of 500 continuing education classes and found a 75 percent attendance rate. Sease said statewide attendance rates fluctuated from 35 to 85 percent.

Fayetteville Tech, with 300 to 900 continuing education classes being conducted for bout 10,000 students each quarter, has the gest enrollment in the state community 'ge system.

frow has also reported that an average

10 percent class padding exists statewide, but none was found at FTI. "All and all it was a very complimentary report, and we were very happy to receive it," Allen told FTI trustees at a meeting

Monday. Class padding most often occurs when a specific number of students must register in order for a class to be held, but there is a shortfall and people who have no intention of attending the class are registered for it, said Sease.

Schools in the state's Department of Community Colleges, like FTI and Cape Fear Tech, are funded by the state on the basis of enrollment, therefore padded classes can be financially beneficial.

Renfrow earlier this month called padding a "significant problem" in the Department of Community Colleges and said three schools in addition to Cape Fear Tech had been referred to the State Bureau of Investigation because of the practice.

Sease said FTI has been following a set of accountability guidelines for continuing education classes that were adopted by the state and FTI earlier this year.

(See FTI, Page 2B)

\$5.6 Million Sought For Technology Center FTI To Ask For More County Money

Fayetteville Technical Institute will ask county commissioners for more than \$9 million in its 1987-88 budget, an increase of almost \$6.5 million over this year's budget, mainly to finance a proposed Center for Applied Technology.

The total FTI budget, including state and federal funds, amounts to \$31,939,672. The \$9,017,059 county portion is up from \$2,571,860 funded for 1986-87. The FTI Board of Trustees approved the budget at its monthly meeting Monday.

The local portion of the budget includes \$5.6 million for the Center for Applied Technology, and was put in the budget as a line item at the request of the Cumberland County Board of Commissioners. Fayetteville Tech officials had originally requested a bond referendum to fund the center, but commissioners rejected that idea saying they would put the project in a capital improvements plan and decide later how to fund

Increases in maintenance and operating costs make up \$423,770 of the increase. The increase depends on whether FTI continues using its Massey Hill Annex on loan from the Cumberland County Board of Education, or whether it will acquire the Ramsey Street and Hillsboro Street schools property for classrooms, officials said. Trustees also on Monday voted to ask

commissioners for the Ramsey and Hillsboro streets property when the school board declares it surplus. Fayetteville Tech officials have budgeted \$158,061 for operation of the two schools in 1987-88 and \$37,100 for renovation. In addition, the budget calls for \$635,778 for site and grounds improvements and alterations and repairs for the entire campus.

Electrical and other operating costs are also expected to rise next year when FTI begins making full use of the Neill A. Currie Jr. Building on Hull Road as a center for continuing education and completes renovation of a grocery store on Fort Bragg Road for a vocational education center.

The budget lists increases of \$141,000 in electricity, \$26,400 in telephone costs, and \$155,117 in salaries for operations and mainte-

nance personnel.

In other business Monday, trustees reap-pointed R. Craig Allen as FTI president and increased the local portion of his salary from \$15,810 to \$16,522.

The board also voted to rescind the school's merit pay policy for instructors effective July 1, 1989. The policy currently pays merit raises of up to 12 percent of total salary for "educational achievement," said John McDaniels, vice president of personnel.

McDaniels said it is no longer needed because all FTI instructors have met the Southern Association of Colleges and Schools requirement of holding a master's degree plus 18 hours of credit in the field they are teaching. The policy pays more for doctoral degrees, he said, and is no longer cost-effective.

Current instructors will have until July 1989 to complete further education requirements and qualify for a merit pay increase, said McDaniels. Newly hired instructors will be required to have master's degrees plus additional work in their teaching field, or in some cases can be hired if they agree to meet educational requirements within a specified time.

FTI Trustees Approve Budget For 1987-88 Of \$31.9 Million

high-tech equipment.

The Fayetteville Technical Institute Board of Trustees approved a \$31.9 million 1987-88 budget Monday that calls for county participation to the tune of \$9,017,059, including \$2,746,281 in operating funds and \$6,270,778 for

capital outlay. The proposed overall budget is approximately 21 percent higher vear's \$25,277,737, than the current Shaw said the increase is related to and the proposed county portion is uncertainty about whether FTI can about 31/2 times the 1986-87 recontinue using the Massey Hill quested funding of \$2,571,860. Most School for adult education or of the increase is in capital outlay - up from \$280,258 for the current year. It includes \$5.6 million for building a Center for Applied as substitutes. Technology. "They asked us to put the \$5.6 million in for the whole building, contingencies," he said. then they would make a determiniation on how to fund it." whether the FTI board will opt to Board Chairman Harry Shaw said, referring to county officials. Shaw remove asbestos from the old

said county commissioners rejected Honeycutt School on Hull Road so it an earlier request to approve a can be used for classrooms. The former school was used by Fayettebond referendum to finance the ville City Schools for offices until building. Shaw said the proposed city and county schools merged in building will house classrooms and 1985. The Honeycutt building and The proposed allocation for the Neill Currie Building, formerly

building alterations and repairs the administrative center for city also saw a substantial gain from the schools, became the property of the current year, from \$106,544 in county and the county in turn 1986-87 to \$546,278 in 1987-88. allocated them to FTI, Shaw said.

(Continued From Page 1B)

"If you're the largest in any system, you're the most vulnerable to an audit," Sease said. "So we expected an audit. We felt very secure that we had guidelines and practices in place that would prevent misuse of state funds." State guidelines require documentation of students - including two forms with their signature and Social Security number - and four separate steps to identify pro-

spective instructors. Guidelines

Sease and Allen said these procedures are followed at FTI already, with direct salary payments to begin this month. Both characterized the recommendations as a

formality. Sease said all classes are visited by one of six section directors in the continuing education program, and visits on registration night are not counted. "If it cannot be checked

on, we don't run it," he said. Sease said he personally visits about 15 classes each week and anytime attendance is less than 50 percent the director in charge must

also require that all classes be visited each academic quarter, a random sample of students be contacted to verify registration and attendance and that instructors submit time sheets to get paid. Renfrow's letter to FTI suggests three steps to be taken to "further strengthen the school's monitoring efforts." They include contacting students who do not attend courses they are registered for, unannounced visits to classes after registration night and making in-

explain. He said about two out of 50 than 50 percent attendance. reports are made to Sease. person payments to a random group of instructors each month. recommendation.

visited in a month may have less In addition, since March 27, registered students are contacted randomly each night by a team of workers and asked a variety of questions about their classes. Daily Allen also told trustees that the school has combined course lists from the six separate continuing education divisons into a single master list at the state auditor's

whether they will need to renovate the Ramsey Street and Hillsborough Street Schools to use "We have to get it in the budget, because we have to cover all Another question mark hinges on

electrical costs in 1987-88 - from \$320,000 in 1986-87 to \$461,000 in the proposed budget.

Study In Black **Crime Is A Way Of Life For Curator Of Macabre**

Reed says, eyeing the Sherlock Holmesian briar pipe lying on his kitchen table. Actually, his houseguest has lain two pipes there side by side, but it's the one with the larger bowl that attracts the attention of my host.

In the absence of this as yet unnamed guest, I silently ponder this trivia. True, there are similarities between the man I am about to meet and the fictional supersleuth of the A. Conan Doyle novels. Both are Londoners, both share an interest in the detection of crime and, presumably, a good smoke.

But I know my man as a 30-year veteran of the Metropolitan Police Force of New Scotland Yard - invariably portrayed as the well-meaning but bumbling foils to the eccentric, brilliant Holmes. Would a former policeman affect the personal habits of the non-criminal personality who most consistently has shown the fellows at Scotland Yard in a bad light?

The Londoner approaches. And William Waddell is not wearing a houndstooth overcoat and deerstalker hat. Dressed in a conventional blue pinstripe suit, red foulard tie and red pocket square, he solves the little mystery by ignoring the big briar pipe and choosing the smaller one instead.

He tamps down tobacco from a green pouch into the bowl of his pipe and gives a short history of his career in criminology -30 years as a Scotland Yard policeman and the appointment as curator of Scotland Yard's Black Museum, the world's oldest museum on crimes and criminals. The exhibits of sometimes grisly artifacts of 850 London crimes are open only to policemen,

then writing taunting messages and poems to Scotland Yard, still fascinates almost everyone after nearly a century.

The Fayetteville Observer

I've been told that studying the Ripper murders is a hobby of his, but his grimace at the idea indicates that it's more like an occupational hazard. Every week, he receives an average of three new letters about the Ripper murders.

"Yes, Jack the Ripper. There's not much I haven't seen about it or read about it," he says in the patient, bored tone of an English teacher who has heard six reports on the same book in one class period. "I've got a list of suspects, or a list of people who were suspected to be Jack the Ripper, that stretches from the ceiling to the floor."

Among the possible Rippers are several doctors, a butcher, a female abortionist and even Prince Albert Victor, the Duke of Clarence and grandson of Queen Victoria. Waddell is particularly amused at accounts that say convicted murderer Dr. Thomas Neill Cream, an American who poisoned several London prostitutes in the decade following the Ripper murders, shouted a confession as he was hanged. 'What does that sound like? 'Jack

kkkhhhhuuuu,'" Waddell gurgles. "Next year I think I'll write my own book, and I'll call it 'The Final, the Final, the Final, the Final, the Absolutely Final Solution to Jack the Ripper' and then get rid of it. When you realize that people are sitting down all around the world, studying Jack the Ripper" - the Briton can't contain his mirth - "the mind boggles for me."

Nevertheless, Waddell does have a pet theory about who really was Jack the Ripper. He says circumstantial evidence points to Montague Druitt, a lawyer and teacher who committed suicide by jumping into the Thames about a month after the

last Ripper murder.

William Waddell is curator of the Black Museum, the world's oldest museum of crime

athologists, forensic scientists, lawyers, coroners and others with a legitimate interest in historical criminal precedents.

"The subject matter is not suitable for everybody to see," Waddell explains. "Don't get some wrong idea that I'm some cadaverous creature who saves bits of body or something like that. I'm not. I'm basically a criminologist."

Waddell brings his expertise in crime detection to Fayetteville for the second time in two years at the invitation of Reed. who teaches a class in criminal justice at Fayetteville State University. The trans-Atlantic friendship began when they were both 19-year-old military policemen in England - Waddell for the Royal Air Force and Reed for the U.S. Air Force. (Waddell also introduced Reed to the British girl who later became the American's wife.)

This week, Waddell will be a guest lecturer in Salemburg at the North Carolina Justice Academy, in Raleigh for a group of community college criminal justice educators as well as for classes at Fayetteville Technical Institute and FSU. He will also give a free public lecture at 8 tonight in the FTI Auditorium. His topic will be the more notorious crimes and criminals with a niche in the Black Museum, which is the subject of Waddell's as yet untitled book to be published next year.

Exhibits for the Black Museum are chosen because of their historical or instructional importance. Waddell himself was involved as a policeman in one of the instructional exhibits, the Hosein Brothers. In a painstaking investigation, Scotland Yard proved Arthur and Nizamodeen Hosein kidnapped and murdered Muriel McKay (whom they mistook for the wife of Australian-born publisher Rupert Murdoch) even though her body was never found.

"They say she was cut up and fed to the pigs. That's what they say," Waddell says. Forensic evidence disproved the pig theory, with calcium deposits in the fireplace seeming to indicate that the body was burned.

But while detectives have much to learn from exhibits like this, his general lecture audiences are drawn to the more sensational crimes, especially murders - the Brides in the Bath, the notorious Dr. Crippen and, of course, the still unsolved case of Jack the Ripper. The story of the psychopathic murderer who strangled at east four (and some say nine) prostitutes in London's East End in 1888, slashing their throats and disemboweling their bodies,

But, Waddell emphasizes, there's nothing to prove Druitt was the Ripper. The tools so important to crime detection today hadn't been invented at that time. Fingerprinting wasn't yet an accepted practice, blood had not yet been divided into types and today's sophisticated methods of analyzing body tissues and cloth fibers were still in the future.

Instead detectives relied on eyewitnesses, the process of deduction and their own hunches, still a valuable tool to modern policemen, Waddell says.

"In every detective, there is a gut reaction to the criminal. That's the best way you can describe it. That's the hard-line detection. There's no technology in the world to help you at that stage to get the answers," he says.

Some have even gone too far in relying on technology, he believes. While he acknowledges the usefulness of such modern methods as using dental records and DNA specimens for identification, he's skeptical about items like the "smellograph" examining a sample of air from the crime scene to see if a person's scent is there and an American detective's suggestion that police take imprints of suspects' buttocks.

"How do you get a butt print from a criminal?" he asks. "How do you ink it? How do you get them to roll it across the paper?

Waddell faced a similar dilemma in 1969 when a burglar was convicted on the evidence of an ear print, which the suspect had left when listening at the window. "Somebody said, 'Ah, we should take ear prints," he says. "I can't think of a more useless time waster than taking ear prints. Ears don't mean that much in solving crime. "The only interesting thing that I've found

in looking at the heads - I've got these 37 death masks - the only common factor amongst them all is that they have small ears. Which means I'm not going to be a murderer," Waddell says, pulling the lobe of his goodly sized left ear.

Statistically, most murderers have names that begin with the letters A through M, he adds, but what practical use is that knowledge? "What a nonsense. What rubbish," he says.

These days, detectives are more likely to face barriers that are not physical but bureaucratic. Obtaining proper search warrants, interrogating suspects under strictly

FTI Agrees To Handle **Auto Mechanics Class**

the state

By CHRIS NELSON

Trustees of Fayetteville Technical Institute Monday approved a plan to offer automotive mechanics to students in Cumberland County's Terry Sanford and E.E. Smith high schools, contingent on approval by the Cumberland County Board of Education.

Larry Norris, FTI vice president for academic affairs, said the program would be available to 22 students from the two schools for two hours of instruction five days a week. The students would earn high school and college credit simultaneously.

Automotive classes now at Sanford and Smith are taught at Reid Ross Junior High, a former high school. A spokesman for the county schools said officials would like to move the classes out of the junior high, and FTI's offer is being better than they can be met by transporting them (students) across the county to another public school," he said. Norris said two schools are included in the proposal so there will be enough students available to justify the cost.

The county schools also offer automotive classes at Douglas Byrd, Cape Fear, Pine Forest and South View high schools. A body shop class is offered at Westover High School. State law allows community colleges to offer classes to high school students as long as they do not compete with or duplicate what the Shaw joked.

public schools offer, said Norris. In other business Monday, the FTI Board of Trustees re-elected this years' officers for 1987-88: Harry Shaw, chairman; Thomas Council, vice chairman; and Howard Hall, secretary. Shaw said in the coming year he would like to see the school deal with traffic problems and its asbestos-laden Honeycutt Building.

Shaw said he is concerned about the safety problem caused by heavy traffic along Devers Street into Skye Drive through campus. Studies have shown that the thoroughfare is used by travelers from the eastern part of Fayetteville to shopping areas along Morganton Road. With renovation of a grocery

store adjacent to FTI on Fort Bragg Road into a center for applied technology, a controlled entrance to FTI will be available to effectively eliminate Devers Street from campus traffic, he said.

considered. CONTINUING EDUCATION - SPRING QUARTER '87

REGISTRATION INFORMATION

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

1.

You may register by phone for any course in this advertisement except English as a Second Language. High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state checks can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call: 497-5217, 497-5584, or 497-5691.

NG EDUCATION—SUMMER Q

REGISTRATION INFORMATION

All courses listed in this advertisement are open to anyone eighteen (18) years of age or older. Fayetteville Technical Institute does not discriminate on basis of handicap in admission or access to its programs.

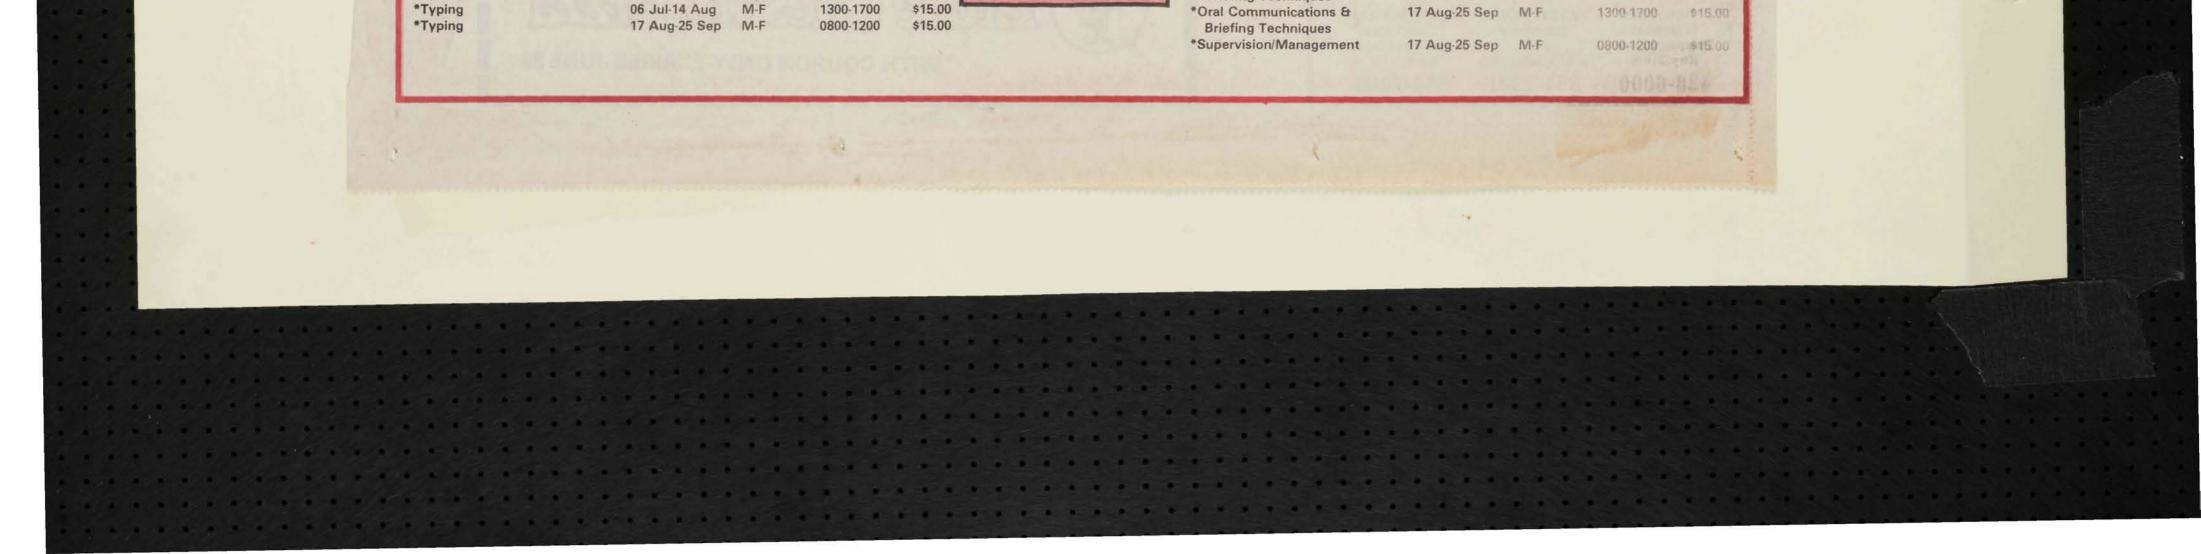

You may register by phone for any course in this advertisement except English as a Second Language. High School Diploma and ABE. Registration fees are payable at the first class meeting (in cash, in-state check, or money order -- no out-of-state checks can be accepted). In addition, students are expected to purchase any books and/or supplies required by the course. To register, call: 497-5217, 497-5584, or 497-5691.

Any person sixty-five (65) years of age or older is fee-exempt for any course shown in this ad. Active-duty army personnel are fee exempt for any course indicated by an asterisk (*). Fayetteville Technical Institute reserves the right to cancel any class because of inadequate facilities, insufficient enrollment or lack of qualified instructors.

Job Seeking Tips Spring Lake News, June 3, 1987 FTI Class Helps Get That Job

By Jennifer Milelli Mullen Spring Lake News Editor

You need this job. You're sitting in the personnel office nervous, sweating, talking to the director. Your leg twitches, your hands fidget, you can't think of what to say and the director keeps asking you to speak up.

A week-later, and the call comes - you didn't get the job.

This scenario is played over many times a day with discouraging results to the job seeker. But Fayetteville Technical Institute the class. "I left high school 20 dying how to interview properly. wants to help discouraged job seekers win those jobs.

"People don't realize that getting a job is a job in itself," said Sharmon S. Herring, a job developer with FTI. "The Human Resources Development class helps to make the person a more professional job seeker."

The six-week course is designed for the person who just can't seem to win the job interview.

"A lot of people don't know the right answers. They don't even know the questions," Herring said. "There's a right way and wrong way to do it."

The key to the class is teaching the job seeker the proper skills and

Former students agree it works. it again." Claire Dennis, 36, had been searching for a job on and off for teaching techniques used in the the past seven years, but couldn't class is video taping the students in the program follows the students win during the interviews. "I got mock interviews. discouraged," she said. "We actually take our students

But then she heard about the into the media center where they FTI class and decided to try again. have two mock interviews and She started her first job as a part- their taped and played back," she time clerical worker at a local said. hospital Monday. Dennis has also gone back to school.

"I was afraid," Dennis said of is at the end of the week after stuyears ago this year. I thought I was dumb.

"But the program was great. I enjoyed being there everyday," she said. "I recommend it for anyone, young or old."

Ronald Allen, 28, completed the course a few months ago. Since then, he is working with a temporary employment agency and continues to look for full-time work.

He said before the course, he was shy and didn't talk easily about himself and his work experience.

"Now I go in there and talk as ing back to school. The FTI pro- Cultural Center. An FTI main much as I want," he said. It really gram ranks among the top courses campus class starts June 22.

boosting the person's self-esteem. helped me a lot." I wish I could do in North Carolina. "We're definetly doing Herring said one of the best something right," she said.

Besides the job seeking skills, for one year afterwards, giving job leads and keeping tabs on how the students are progressing.

"We're constantly trying to motivate them," Herring said.

Allen said he likes getting the job tips.

ning all the right skills. The second "They're still trying to help," he said.

All encouraged discouraged job seekers ought to give the class a themselves, they say, 'Oh, I had no chance.

"Just try it, if you don't like it, you can always drop it. It's free and I tell you it was the greatest Dennis said she was surprised thing for me," Dennis said.

> "I'd tell them to go to the class and there's nothing to be scared about," Allen said.

"Keep trying, don't give up, didn't realize that until I saw it. You need to smile so you don't Dennis added. "It works." look so scared. Now I try to smile

For more information about the program, call FTI recruiter Floyd Herring said the programs has Benfield, 323-1706 ext. 459. The next class will be June 8 to July 17 students either getting jobs or go- at the Spring Lake community and

uals schools said the bill would have little impact on their curriculums. And most students, they said, would see little change other than the school's name. Dr. Bill Starling, dean of administrative services at Sampson Technical College, said he welcomed the bill as a way to bring consistency to names of the various technical schools across the state. "The public is confused with technical institute, technical college, then you have technical community college and finally community college," Starling said. Hubert Garner, dean of students at Central Carolina Technical College, said the Sanford-based school also should not be affected by the

Under the bill, community colleges could offer no more than 15 percent of their courses as college transfer courses. Garner said CCTC now has a he said.

But there are schools that oppose the name change. Fayetteville Technical Institute is one of them. "We're still very heavily a technical program," FTI President Craig Allen said. "The board has taken the position that it wants to remain a technical institute. That (bill) would change that."

FTI now has a college transfer contract with Methodist College, which accepts FTI's general education courses and gives the student credit for his first two years of college. The technical institute also has agreements with other schools to accept credit for some of the technical programs.

Allen said that if the bill does become law, there won't be any changes in the way FTI operates. "They don't necessarily have to apply (to the state Department of Community Colleges) for status to offer (college parallel) programs,"

By LORRY WILLIAMS

A bill passed in the state House

last week that would require technical institutions to become community colleges apparently would force a name change only and not a change in curriculum, according to area technical college administrators.

The House voted 89-7 Wednesday to have the state's 30-plus technical institutes become community colleges. The bill now goes to the Senate.

Under the bill, five area technical schools — including Fayetteville Technical Institute, Sampson Technical College, Bladen Technical College, Central Carolina Technical College and Robeson Technical College - would become community colleges.

Proponents of the bill say it would spare the General Assembly from considering bills each year that would rename one or more technical schools as community colleges.

Schools affected by the bill could apply to the state Board of Community Colleges to offer college parallel programs rather than

ally, County Manager Cliff Strassenburg said. The interest rate is projected STRASSENBURG at 6.3 percent, and total payment over 10 years would be \$7,674,000, he said. The county would assure repayment to creditors by pledging a revenue stream such as sales taxes, Strassenburg and county Finanace Officer John Nalepa said, FTI hopes to build an 80,000-square-foot applied technology center that would house 28 classrooms, 27 laboratories, fac ulty and administrative offices. It would be the first of its type in southeastern North Carolina, and officials say it would help attract industry to the county. Strassenburg recommended the alternative financing arrangement over a general obligation bond issue originally proposed by FTI administrators. Commissioners agreed that the financing proposal was the best of four alternatives presented by Strassenburg. But commissioners expressed concern about whether the county tax rate would have to be increased and asked the county manager to review all building projects in the 5-year improvements plan. The \$767,400 annual loan repayment would consume about 1 3/4 cents of the tax rate, Nalepa said. Also included in FTI's building program is a \$2.2. million renova-

FTI Equals 'Community College'

This letter may reflect my ignorance on what is involved in a name change for Fayetteville Technical Institute and exactly how FTI and the surrounding schools would be affected by its Community College status should the school opt to go in that direction. If so, then perhaps one of your excellent editorials on the subject might be warranted as there may be others like me in your reading area.

I personally see nothing wrong with upgrading FTI to Community College status. I see no conflict between FTI's vocational programs or Associate of Arts degree programs in relationship to programs already being offered at Methodist College or Fayetteville State University. I personally feel that any "fears" that FTI would be in direct competition with either Methodist or FSU are unwarranted. Neither do I see that a name change or upgrading would detract or take away from the emphasis that FTI places on its vocational programs. I feel that FTI as a "Community College" would complement the programs already in existence at Methodist and FSU and would not be a duplication of such programs.

For instance, FTI currently has an AA degree program in nursing. Upon completion of this program and passing a state board exam, a student can be licensed as a registered nurse. Once licensed as an RN and out in the work force, it is the desire of many RN's to move upward to charge nurse positions. This usually requires a baccalaureate degree in nursing. Methodist College currently has a nusing program which leads to a baccalaureate

degree. The problem with many AA and diploma (3-year) programs in nursing, is that courses previously taken, will not transfer over to the baccalaureate program. FTI (Community College) working in cooperation with Methodist College could help iron out some of these stumbling blocks.

FTI is well know for its AA paralegal program. As laws are sometimes vastly different in many states, it may be necessary for an FTI student who moves out of state to retake a course somewhere else. FTI as the Community College would lead more credibility for courses already taken to transfer. Certainly, many military members and their spouses are enrolled in this and other programs - often with the intention of finishing in this state, when unexpectedly they receive orders and have to move on. It would be nice if FTI had Community College status for those courses, likewise, to transfer.

One further concern, I do not know who is on whose board/trustee, etc., but is it possible that there might be an unwitting conflict of interest on the part of some of the current trustee/board members particularly with their past and current contributions to both Methodist College and FTI? Again, I may be totally naive and ignorant in this matter and what it all entails. However, I do not understand the inflexibility that I sensed was being expressed by a trustee concerning this matter. Is it I or the trustee who needs educating on this matter? If it is I, then I am always willing to learn and change my opinions if need be.

WILLIAM S. JOHNSON

older and more mature; and I was really shy in high school. I never felt comfortable." Two nights a week for over a year in classes is quite a chunk of time to be set aside. Did this

time demand or their studies cause any problems? Or any benefits? Rebecca's feelings as she

answered were very strong. "I have really enjoyed it and, with the people in our class, we have had so much fun. We've gotten to know each person very well and so we're planning on having some class reunions on down the road. Math has always been my worst subject but I've done much better than I thought I would. Of course, it's been hard getting back into studying again. That is something I didn't enjoy - studying."

Her father, Lester, interrupted. "I do too much studying!"

Rebecca laughed. "I think this has been good for daddy. He is retired and doesn't do all that much. I feel like this has occupied him."

Unlike Tony, whose acquisition of a high school diploma will be a positive influence on future employment, Lester will not use his for any other reason but personal satisfaction. "I worked with Burlington Mills for 20 and a half years. I had a heart attack in 1974 and I've been retired since then." What are Lester's plans for the future! "Just to hang in there as long as I can. As far as

going into some kind of work, I don't see that. On account of my heart condition, I can not do heavy work. I guess I'll take it easy as long as I live and try to work with my children and grandchildren, seeing that they try to do the best for themselves."

Since Rebecca has worked as a homemaker, will she now get a job or take more classes? "Well, I don't really plan to further my education anymore. But I feel that if I need to, I do have my high school diploma now. If something should happen to Bobby (her husband) and I had to go to work. I'll be

Unlike his mother and grandfather, Tony Gainey has more immediate uses for his diploma. "I was married in December to Connie Faircloth and I'm looking for something better for us. Once I get things squared away, I'd like to take some computer courses. I'm looking for better and better jobs."

When the Messenger parted with this family of graduates, they concluded the interview with perceptive advice and some characteristics humor. "Any last words, Mr. Wallace?"

"I'd like to say that I now know as much as my wife does. I have as much education as she." Rebecca added, "I would like to encourage anyone that doesn't have a high school diploma. This is a wonderful opportunity. There are classes offered by FTI in many locations around."

and Ambulance Service to arrive.

A Staff Report

Four cadets from Fayetteville Technical Institute's Basic Law Enforcement academy Thursday had an unexpected chance to practice life saving techniques they were taught in class.

Their efforts were not successful but the four received praise this morning from the head of the FTI training program.

The incident occurred after cadets left a training class at the Ottis F. Jones Training Center behind the Cumberland County Memorial Auditorium for lunch at about noon.

The cadets, J.C. Thomas and James Hall, assigned from the Fayetteville Police Department, Fear Valley Medical Center by Hansen and Sheriff Ottis Jones.

and Philip Ingle and Fred Linden- ambulance where he was pronounced dead by an attending field from the sheriff's department, drove to the Burger King restauphysician. The victim was identified as rant near Owen Drive and U.S. 301. Alexander Dunn, 69, of 212 Central

According to Gerry Bloom, director of training at FTI, the four Drive. Bloom said the cadets were able men learned that an elderly man to momentarily restore vital life had suffered an attack in a resigns as they worked frantically to Bloom said the victim appeared

safe the man's life. Bloom said the cadets, who are to be in full cardiac arrest and had now in their eighth week of training, stopped breathing when the four had recently received CPR instruction from Assistant Chief Allen They began administering Nobles of the Fayetteville Fire cardiopulmonary resuscitation as they waited for a unit from the Department.

Bloom praised the efforts of the cadets and said he was sending commendations to Police Chief Ron

appear.

unspecified "other costs," which Robert L. Carter, vice president for fiscal affairs, said would include supplies, materials and travel. Approximately \$35,000 will revert to the state, Carter said.

Because many students at community colleges are part-time, enrollment is measured both in actual head count and in "full-time equivalents" (FTE). Figures supplied by FTI President Craig Allen show that the FTE was 4,942 in 1986-87, down 157 from the record high of 5,099 the year before but still higher than the 4,745 in 1984-85. A graph shows that, despite a few peaks and valleys, growth has been constant for the past 10 years.

Canceled classes ranged from ceramics to roadways and parking lots and the remainder for

response to many part-time courses was less than expected. Allen said some of the diverted money will be used for advertising and recruitment to get enrollment back up.

Also on Monday, the board approved a priority list for capital improvements for 1987-88, based on a \$401,000 appropriation from the Cumberland County Board of Commissioners. Included on the list is \$108,100 for renovations to Lafayette Hall and \$99,100 for renovations and boiler replacement in the Horace Sisk Building. Other planned expenditures include \$16,400 for landscaping projects at four buildings, \$4,700 for sidewalks, \$49,500 for paving and resurfacing of on-campus

William E. Sease, vice president for continuing education, reported that, because state auditors found discrepancies in enrollment records in some of the state's communities colleges, others, including FTI, were pinpointed to be audited.

He said the audit resulted in the following recommendations: that supervisors conduct unannounced visits to classes at times other than registration day; that a random sampling of students be contacted by a neutral agency; and that the business office make random inquiries to be sure that part-time instructors receive their checks in the mail.

"This is to certify that instruction is going on and there are no ghost classes," Sease said.

Capital Spending Package Includes FSU, PSU Projects

RALEIGH (AP) — Higher education and the state's ports were big winners Monday as legislative leaders unveiled a \$306.5 million capital improvements package they said was designed to promote economic development.

The two-year funding package includes \$6.35 million for a business administration building at Fayetteville State University; \$2.45 million for an addition to the Oxendine Building at Pembroke State University; and \$2 million to equip a center for business and industry and a center for applied techology at Fayetteville Technical Institute.

"We're trying to continue the best education system in the country" by pumping funds into the University of North Carolina system and the state's community colleges and technical schools, Sen. Aaron Plyler, D-Union, said.

And by targeting the ports at Wilmington and Morehead City for major expenditures, budget leaders hoped to make them "as accessible as possible to the shipping industry and also to people that import and export," Plyler said. "This is a big tool in industrial development.

The spending plan was presented to the Joint Appropriations Committee by its co-chairmen, Plyler and Rep. Billy Watkins, D-Granville. They said the panel would vote on it today.

The bill is one of the two remaining segments of the fiscal 1987-89 budget awaiting action. Last week, the Legislature enacted an \$18.4 billion operating budget.

Legislative leaders said they expected to release today or Wednesday the final bill, which will authorize expenditures by non-state agencies and tor local "pork barrel" projects. In releasing their spending recommendations, Plyler

and Watkins turned down many funding requests. Among the losers were a new Department of Revenue building and a new Judicial Complex that would house the Supreme Court, Department of Justice, Court of Appeals and Administrative Office of the Courts.

Gov. Jim Martin had proposed issuing bonds to get those projects under way.

Plyler said the Legislature had some \$80 million less to spend on capital improvements in 1987-89 than in the previous biennium.

Among the big-ticket items recommended for funding

 \$62.4 million in fiscal 1987-88 and \$52.6 million in 1988-89 for the University of North Carolina system including funds for construction of a business-college building at Appalachian State; a sports medicine facility at East Carolina; a new library at N.C. A&T State; and a pulp and paper lab and textile school building at N.C. State.

Also, there is money for renovations at N.C. Central; a graduate center and arboretum at UNC-Asheville; a biotechnology building, alcohol studies center, and family physicians center at UNC-Chapel Hill; an

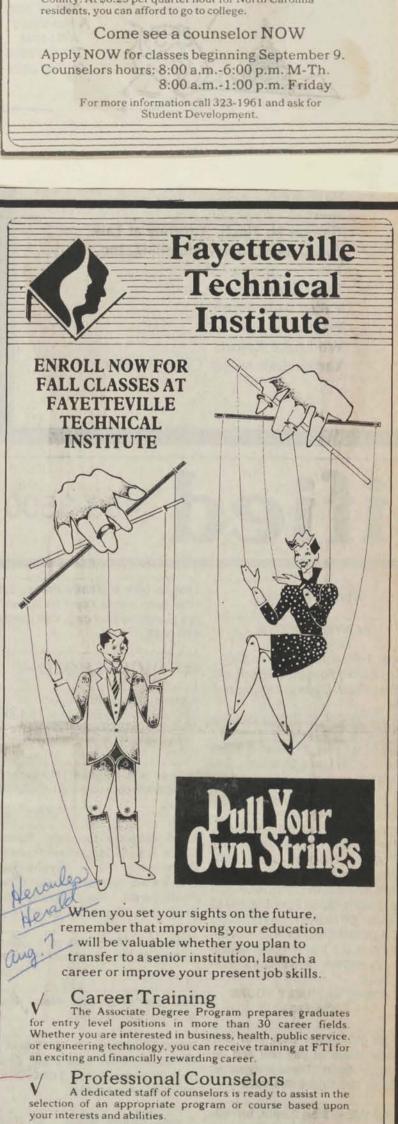

Assembly_

architecture class building and engineering lab at UNC-Charlotte; land acquisition at UNC-Greensboro; and renovations at Western Carolina.

• \$19.9 million in 1987-88 and \$16 million in 1988-89 for developing the state ports and purchasing a 75-acre waterfront tract on Radio Island for use as a future port facility. The N.C. Ports Authority requested about \$46 million.

Plyler said the port improvements, combined with progress toward completing Interstate 40 to Wilmington, would bolster economic growth in southeastern North Carolina.

"I think there will be a lot of development in that area," He said. "That's been our problem so long, not having accessibility to the ports that Charleston (S.C.) has with I-20

running into it. I think it will be a great improvement."

• \$18 million over two years for a "supercomputer" at the N.C. Microelectronics Center. The computer is needed to "keep North Carolina's universities in the forefront of scholarly research and training and to maintain the momentum of the state's sciencebased economic development," the budget document said.

• \$23.1 million in 1987-88 and \$18.7 million in 1988-89 for renovations, new buildings and other needs 'HUGE' N.C. Community College System Now 25 Years Old

RALEIGH (AP) - North Carolina's communi-ty college system has grown huge since its

San Carton

SCOTT

inception 25 years ago, and the president of the 58-campus network wants to see that expansion continue.

"The phenomenal success of the community colleges in terms of their growth and enrollment is self-evident," former governor Bob Scott said in an interview with The News and Observer of Raleigh. "The people were hungry

for it. The General Assembly act setting up the system became law July 1, 1963, and about 50,000 students were enrolled at 24 campuses. Courses were geared mainly toward meeting the needs of industries moving to or expanding in North Carolina.

Starting the new year, enrollment is nearing 700,000 - one in seven North Carolina adults at 58 campuses across the state. Courses range from photography to robotics, and some of the courses carry college transfer credits.

Despite the rapid growth, Scott is worried that the system will grow fat and entrenched.

"We are not a conventional, traditional educational system and I hope we never will be," he said. "One of the things I fear is that now that we're 25 years old ... that we'll become traditional and comfortable and set in our ways. I don't want to see that happen because it would obscure our vision of what's needed out there. We'd be in danger of losing our vitality."

With the growth has come problems, most notably the State Bureau of Investigation probe which revealed that \$1.4 million had been paid for "phantom classes." An audit of 395 classes at 21 community colleges found that 10 percent of those checked were "padded" with students who did not actually attend while some classes had an average attendance of 43 percent of enrollment. "That's almost inherent in a system like this

where you reach out. We take risks and we do go out in those communities," Scott said.

He also explains why the system spent only 60 percent of \$14.3 million appropriated for adult basic education in 1985-86 on that purpose. He said the rest of the money was returned to the state's general fund or used for other educational

"There was an infusion of additional money," purposes. Scott said. "Some of the colleges were not geared

education. They had the money but didn't have the recruiters or staff, so it was well into the fiscal year before they were cranked up. They could have spent the money but it would have been unwise spending. If they could have carried it over and put it into the system later, it would

have been better." The legislative response has been to tighten controls. Pending legislation, for example, would restrict the use of funds to battle illiteracy to that specific purpose and prohibit any transfer of money earmarked for salaries and fringe

Scott has announced plans to appoint a benefits. commission on the Future of the Community Colleges, reporting back by May 1989, the end of the system's 25th anniversary observance.

"I want this commission to examine our system," Scott said. "It was designed in 1963 for an economy that does not exist today. Today, we have a global economy. The demographics are

Competition for state money to keep the system going is fierce. State Sen. Tony Rand, D-Cumberland, has said while the emphasis on community college isn't as great as it could be, he added that "our first priority has to be public education in the primary and secondary schools."

FTI President Craig Allen the funds would be used to rend the former Winn-Dixie buildin, Ft. Bragg Road that the sc recently purchased to hous business and industry center the continuing education progra Clinton, \$700,000; Sandhills Com-

Allen said the design and novation of the 27,720-squarebuilding on a lot adjoining campus probably would consul the entire appropriation. He sa any remaining funds would be us for work on other buildings.

"It's something we had hoped fo but it's not really anything we ha anticipated with a great deal certainty," Allen said of the like appropriation.

Linden Class **Learns What** Was Missed

A rosary will be said at 7 p.m.

By CHRIS NELSON

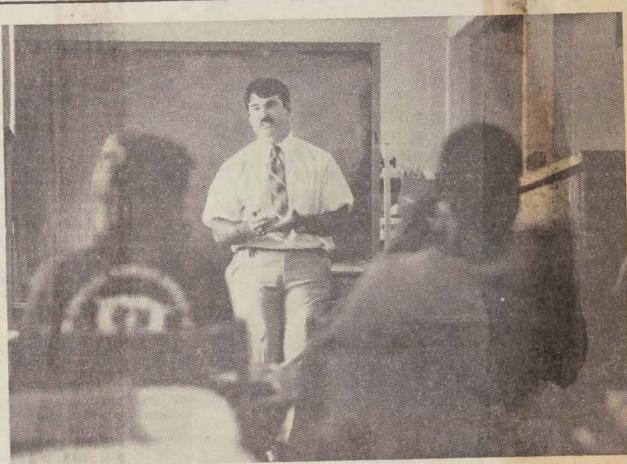

LINDEN - Lola Gainey proudly introduces herself: "I'm 56 and the class of '86.

The grandmother of eight graduated Thursday night from the high school diploma program at Fayetteville Technical Institute. She is one of more than 500 graduates and among 13 who studied at Harris Chapel Holiness Church in Linden.

The group has met under the tutelage of Christine Nordan and Margaret LaFevers since October 1984.

Thursday, July 3, 1986

Military

Nordan said the group began with two semesters studying in FTI's Adult Basic Education program, a curriculum for adults with skills at less than an eighth-grade level. They advanced by taking placement tests to begin the high school diploma program.

Harris Chapel is a small, cinder-block structure with little heating and cooling. Members of the class recalled in an interview this week many nights of bitter cold and many others of stifling heat.

Still, Harris Chapel is their high school, and they will always remember it fondly.

The 13 have ordered class rings, and Gainey, her niece Lois Yoeman and classmate Ruth Winfield will have Harris Chapel inscribed alongside Fayetteville Technical Institute on theirs.

(See DIPLOMA, Page 9B)

Lois Yoeman, Janice Thomas, Jackie Hair and Lola Gainey, left to right, celebrate their diplomas

Diploma

(Continued From Page 1B)

The class at Harris Chapel was the first high school diploma class FTI offered in Linden, said Nordan, although she previously taught basic education there and at another church in town. The fact that the program was available near home was a big draw, the Linden graduates said.

"If this had been at FTI, I wouldn't have done it," Gainey said. "This here is neat."

"It was convenient and it was something I had missed out on," agreed Yeoman, 30. "You know, when you're example to children to finish school, the program pays young and hard-headed you don't want to listen to anyone. When you get older, you get wiser.'

Twelve of the Harris Chapel graduates are women and their story is pretty much the same: marriage at a young age that soon produced children and no time for school. They went back to school, they said, for themselves - and as an example for their children. For Jackie Hair, it was also because she promised her

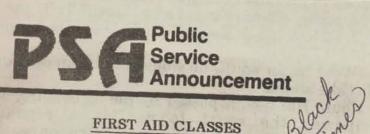

father she would one day complete her education. "I thought it would be nice to get married instead of finishing school," said Hair, 33. "Now, mine (children)

can't say mama didn't finish school. It took me a long time to fulfill my promise. It took me 18 years.' The program teaches the core curriculum required to graduate from high school in North Carolina: four levels each of English, social studies and science, and two of math. To earn a diploma, students must successfully complete the N.C. High School Competency Test.

Graduates receive a diploma from the Cumberland County Board of Education with FTI listed as the school they attended. Besides boosting self-esteem and serving as an

off in other ways. Gainey has been offered a full scholarship to Carter College in Goldsboro that she is considering accepting. "It's a long way to drive for four days a week," she said. Janice Thomas, 25, said she is ready to continue her education, but isn't sure what she'll study. And Yoeman said she is going to start the dental hygiene program at FTI in the fall.

As for Hair, "I'm going to quit baby-sitting," she said. "I'm going to let their mamas look after them and get a iob

Would you know what to do for severe bleeding, stings, bites, accidental poisoning, burns, broken bones, and many more emergencies that may happen to you or your loved ones? If the answer is NO to one or more of the above, then learn how to save a life! Take a Basic First Ald course offered at various locations throughout the community.

The Cumberland County Rescue Squad is sponsoring the Community Life Saver Team in cooperation with Fayetteville Technical Institute. These classes are free to those who participate in the Community Life Saver Team Program. The first classes will be held beginning July 7 at the Ginger Bread House located at 102 Barlow Drive at 6:30 p.m. and on July 19 at the Kiddie Kastle Preschool at 6306 Mary Kirk Drive at 9 a.m.

For more information, call 323-1706 or 323-1379.

-Letters To The Observer-Times 6/30/84 Fay. From Homemaker To Paralegal

I recently graduated from the paralegal curriculum at Fayetteville Technical Institute and would like to take this opportunity to share my thoughts about FTI and to thank some very special people there who have made the past two years such a pleasure.

Having spent almost 15 years as a homemaker and mother, I started at FTI wondering if I could make it through a two-year program and actually come out with skills that would enable me to have a new career. I was nervous about meeting new people (many of them instructors who were younger than I was), worried about whether (along with the responsibilities of home and family) I could find time to study and do homework, excited about the new challenges in my life, and anxious to learn.

The nervousness about meeting new people was overcome by realizing that those people were as nervous as I was. This was a new experience for all of us and talking about it with others who were going through it made it easier to deal with. Many of those new people are now good friends who I hope will always be a part of my life and who will always remain in my memory.

Trying to fit homework and studying into an already hectic schedule was not always easy. Having and administration at FTI; and sadness at the a family who realized how important furthering my education was to me certainly helped. It also helped to realize that the house would not fall apart from neglect if the sweeping and dusting were not done exciting than I had anticipated. Because of the daily and that the children would not suffer from education and training I received at FTI, I now have malnutrition if they had to eat soup and sandwiches a new career - one that is interesting and a few nights a week (although I thought I would rewarding.

Sgt. Jack Laurie teaches management course in noontime classes at Fort Bragg

Sergeant Has 'Class Act'

By JASON BRADY

Every day about half an hour before noon, Sgt. Jack Laurie takes off his starched jungle fatiques and his Green Beret and trades them for a white shirt, tie, slacks and black loafers.

Laurie transforms his appearance because, for an hour each weekday, the operations sergeant for the 5th Special Forces Group becomes an instructor for Fayetteville Technical Institute.

Laurie teaches in a classroom inside the 5th group compound, located off Butner Road and surrounded by a chain-link fence topped with barbed wire.

He teaches students about management, but what's unique about the program is that the soldiers attending the class do so by giving up half of their lunch hour. Capt. Richard Helfer, company commander, gives the students another half hour of regular duty time to attend the course.

"It helps a soldier get promotion points," Helfer said. The idea started several months ago when Laurie suggested the program, and a survey of the troops found response was good.

"This is a time period we could afford to do it. We're not going to pick a time that we have an exercise," Helfer said.

The 5th group surgeon and 5th group legal officer also have expressed interest in teaching a college-level course, Helfer said.

Laurie holds two associate degrees, a bachelor's degree in business managment, a master's degree in human resources development and is currently working on a master's degree in health care administration. He also teaches evening courses at FTI.

personnel managment course. FTI officials came up percent of the grade.

with an agenda that required more than one hour of instruction every day for five and a half weeks. The course earns three quarter credits.

SSgt. Stephen Toker, the support NCO, is more than half-way through earning his engineering degree.

"I hope it will catch on. It's a great opportunity to learn without all the late-night hassels. It affords you the luxuary of daytime classes and studying at night instead of doing both at night," Toker said.

Helfer said he hopes to open any future classes to eligible family members.

Ironically, Laurie describes himself as having been a poor high school student, ranked close to the bottom of his class. He was even a poorer freshman in college, he recalled.

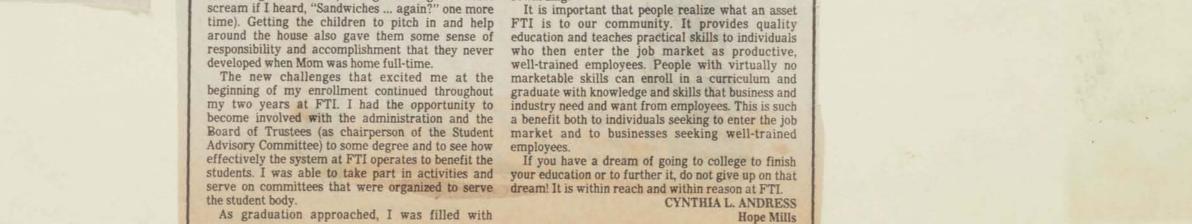

A stint in the Army and Special Forces, he said, bolstered his confidence to again tackle the academic world. "I needed big time seasoning," he said.

Throughout his early military career, superiors were not encouraging. He completed jump school, Ranger school and two days later was in the Special Forces qualification course. Becoming a Special Forces paratrooper, he said, was purely for ego's sake, to show e could become what he considered one of the best.

Teaching the class, Laurie easily slips into military lingo, a kind of second language for soldiers, to describe everyday occurences in personnel management.

"To become a platoon leader, you must first learn to become a squad leader. And before becoming squad leader, you must first learn to be a section leader," Laurie recently told his class during a section regarding on-the-job training in business.

Student preparation counts for 25 percent of the class grade. Tests make up another 25 percent, participation He contacted FTI about starting work for a business 25 percent and a term paper rounds out the last 25

much like someone's living room. "The center is kind of like a doll

Genola Williams

they might no longer have a use for at home," explains Mrs. Williams. "Every senior has a little some-

thing of themselves here." Some of the services offered by the senior center are visits, by representatives of legal aid, social services, social security, and the Cumberland County Health Department. The Spring Lake Fire Department does blood pressure checks every Monday.

Classes offered are the main attraction. Coordinating with Fayetteville Technical Institution, the center offers seniors classes in oil painting, ceramics, porcelain, flower arranging and other fine arts. Coordinating with the state for Spring Lake. Region M program, the center hosts the Joy Program which spreads knowledge through different age groups. For instance, seniors teach ceramics to children on Fridays.

"Seniors can share their knowledge and experience," says Mrs. Willaims, "and at the same token it keeps them young. They need to feel useful and needed."

The center has a social outreach aspect also. Every day a congregate meal is served at lunch between 12 noon and 1 p.m. on a donation basis. Seniors get a warm meal catered by Servomation of Fayetteville which provides onethird daily nutrition.

"It's not the soup kitchen for the under-privileged," Mrs. Williams is quick to point out. "What it is is a social environment. A lot of seniors who would normally eat alone get together. We provide proper nutrition and shopping guidelines. We provide motivation, getting them out of the house."

Mae Frances McQuinn is being paid through the Spring Lake Senior Aid Program to help supervise the serving of the meals. Everyone else who works at the center is a volunteer. They help with meals, answer the telephones, and make crafts for fundraisers. A "Hostess For The Day" greets visitors. Volunteers visit sick per-

adds to the atmosphere which is of each month to brainstorm these new programs and vote on them. house to the people involved here. Genola, "I get their input, in all phases. There's a great deal of

togetherness here."

Genola Williams says programming is her expertise: "I'm very fortunate to be paid for something I enjoy which is programming. I was given the ball and allowed to run with it."

Mrs. Williams graduated from the University of Hawaii with a Bachelor of Science degree in Recreation and put it to use working with teens and the mentally and physically handicapped. She has lived in Fayetteville off and on for 27 years. For five years she was center director of Fayetteville's Community Service Center. Genola is quite happy working

"All I do is greatly appreciated Town employees are always ready to let you know you're doing a good job. That's the thing in a nutshell," says Genola.

She is also impressed with Spring Lake's attitude toward its senior citizens

"This is the only place I've found it to be so, that there is a great deal of concern for seniors. They are cherished, loved and respected.'

Genola is a mother of two and her husband, who is retired from the Army, works in home improvements.

"As far as my seniors are concerned," she says, "there is not a day goes by that they don't bring joy to each other and me.'

FTI's Teacher of the Year.

FTI Begins Drive With 40% Pledged

By CHRIS NELSON

The Fayetteville Technical Institute Foundation this morning kicked off its second annual fund drive with a \$150,000 goal and almost 40 percent already pledged. The foundation, formed in January 1985, raised \$115,000 last year that went toward student scholarships, campus improvements, professional development for faculty and equipment purchases.

Leonard Hedgepeth, chairman of the fund drive, said the campaign will be limited to one month. The 23 foundation board members have been divided into eight teams with pledge prospects divided among them.

Foundation board members already donated \$10,000, he said. Other pledges on hand include \$18,900 from FTI's 430 faculty and staff members, \$4,000 from Fasco Industries, \$4,000 from an anonymous corporation, \$3,000 from Fayetteville Publishing Co., and \$1,000 each from Capital Broad-casting, United Carolina Bank and Home Federal Savings and Loan. "That is a tough goal, but to date we have raised almost \$60,000 so

Civic Center's Opening Celebrated

Some of those responsible for the construction of the Spring Lake Regional Community and Cultural

Center posed for the camera Friday night after ceremonies marked the grand opening of the center. They are, from left, Charlie Prince, head of the Civic Celebrations and Ceremonies Committee; Spring Lake Mayor Vernon Hobson; Larry Norris, Academic Affairs head at Fayetteville Technical Institute; Forest Jernigan, plumbing department chairman, FTI; Leland Ellis, chairman of the Masonry department, FTI; Hubert Hall, chairman of the carpentry department, FTI; and Jim Lucas, center director. Right, Vanda Thompson joined the Senior Citizens Band in entertaining about 150 people who were gathered for the event.

FTI Fund Drive Gets Fast Start With \$60,000 In Early Pledges

The chairman of Fayetteville Technical Institute's Foundation Fund Drive, Leonard Hedgepeth, announced Tuesday at a kickoff breakfast for this year's

campaign that \$60,000 already has been pledged toward a goal of \$150,000.

It is the second year for the community fund raising effort, which last year netted \$115,500, officials said.

Officials said the campaign has begun at a faster pace than last year, when about \$30,000 had been pledged at the outset.

About 150 individuals and businesses are to be contacted by the 31 foundation members during the HEDGEPETH next month, according to the foundation's executive director, Pat Hickmon.

"These are people who have a special tie with the school," Mrs. Hickmon said of the people to be contacted.

Included in the pledges and cash gifts already

received are, \$18,900 from 430 FTI workers, about \$12,000 from foundation board members, \$4,000 from Fasco Industries Inc., \$5,000 from foundation board member Bob O'Sullivan to establish a scholarship endowment for students in the secretarial program, \$3,000 from Fayetteville Publishing Co., and \$1,000 each from radio stations WFNC-WQSM, United Carolina Bank and Home Federal Savings and Loan, according to Mrs. Hickmon.

An anonymous gift of \$4,000 also was received, Mrs. Hickmon said.

The speaker for the event was Thomas H. Clements, a lawyer in Fayetteville who graduated from FTI and later earned a law degree from Campbell University in Buies Creek.

Mrs. Hickmon said the fund raising goal is reachable. "I do not foresee that it will be that difficult," Mrs. Hickmon said. "People know what FTI means to the community."

Mrs. Hickmon said the funds will be used for scholarships, equipment, grounds improvements, staff development and capital projects. Tech graduate speaks

we're well on our way," said Hedgepeth. M.J. Weeks, chairman of the foundation and the leading solicitor

in last year's drive, told Hedgepeth that because of the start made this year, "within a few days you'll have

(See DRIVE, Page 8B)

Drive____

(Continued From Page 1B) your goal met and exceeded; I'll

make that prediction." Last year's campaign started with a little more than \$30,000 already collected, said H.D. Reaves.

This morning's breakfast kickoff featured FTI graduate Tom Clements as keynote speaker. Clements graduated from FTI's para-legal program after switching from the nursing program and in 1983 earned his law degree from Campbell University. He is now a

practicing attorney. "At some point in my life I had a

dream, and that dream crystalized for me here at FTI," Clements said. "The important thing is this school takes people's goals and helps them achieve those goals, or lets them get enough behind them that they can meet other people and modify those goals and work toward them."

attend FTI, increased lighting on campus and awarded "mini-grants" allowing faculty to attend developmental seminars and purchase equipment.

With money raised last year, the foundation provided 12 \$500 schol-arships for high school students to

Fall Festival To Be Held At FTI (Black Times)

The Student Advisory Committee and the FTI Alumni Association are co-sponsoring a Fall Festival October 29, 1986 from 11 a.m.to 8 p.m. in the Horace Sisk Gymnasium. There will be games with prizes, a haunted house, a costume contest, arts and crafts and a yard sale. Free soft drinks will be served to everyone with baked goods for sale to interested persons. The public is invited.

Diplomas For All The Family

By CHRIS NELSON

STEDMAN - Tony Gainey was flunking "everything but PE" when he quit high school in the 10th grade about seven years ago. His mother, Becky Gainey, had made good grades until ninth grade when she discovered boys, then lost

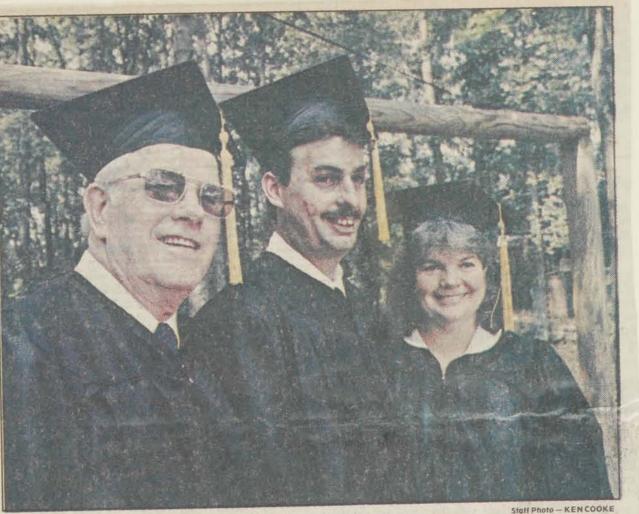

interest in school and quit. Her father, Lester Wallace, never made it through seventh grade, some 50 years ago.

But all three took home high school diplomas from Fayetteville Technical Institute following ceremonies at the Cumberland County Memorial Auditorium Thursday night.

In Becky Gainey's rustic Stedman home a few hours before graduation Thursday afternoon, the family members recalled the year and two months they spent in FTI's adult high school diploma program at a satellite classroom at Cedar

Creek Church of God. "I had some hard studying to do to get through it, but I enjoyed it, so I did, said Wallace. "It took away all my fishing time."

At 64, Wallace doesn't see where the extra education will be much of a benefit to him, other than allowing him to tease his wife that he's

Lester Wallace, 64, daughter Rebecca Gainey and grandson Tony Gainey graduate

uffered.

FTI Awards Contracts For Business Center

The Fayetteville Technical Institute Board of Trustees awarded contracts Monday for the \$1,050,727 conversion of a former 30,000-square-foot Winn-Dixie store on Ft. Bragg Road into a Center for Business and Industry.

D.F. Tally & Sons Inc. was the successful bidder for the general contract, with a bid of \$663,586. Town & Country Plumbing Co. got the plumbing contract with a bid of \$109,550. D.L. Johnson Electric Co. of Wilson was awarded the electrical contract with a bid of \$150,749. All the other firms are local.

Architect Dan MacMillan told the board the center will cost \$34.85 per square foot, a saving of approximately \$15 per square foot over the cost of new construction.

"We'll save by using the steel structure and the brick wall, but new entrance to the FTI campus. essentially the building will be new," he said.

Sidewalls and a new roof will be heavily insulated to make the MacMillan said. And a sprinkler ery.

The mechanical contract will include a dust collection system for the woodworking shop, an exhaust hood for welding booths and a large

system will have a positive effect on insurance rates. MacMillan said construction will begin "as soon as contracts can be put together - in a couple of weeks." Construction time is estimated at 10 months, he said.

FTI President Craig Allen said money already has been budgeted for the project. The former grocery store will

become a complex of offices, classrooms, laboratories for chemistry, electronics and computers, conference rooms and a 1,150 square foot lecture room with raised seats and built-in projection booth, plus an 8,000-square-foot

manufacturing area, MacMillan said. A 150-car parking lot will adjoin the building, and a new road will be cut from Ft. Bragg Road to join the Business and Industry Center to other buildings, creating a

building energy efficient, air compressor to run the machin-

him quit." In the FTI program, Tony said he appreciated the adult atmosphere and was ready to apply himself. "I just had to keep my nose in the books, but I enjoyed it a whole lot more this time," he said. Tony said he's interested in computers and photography but hasn't made up his mind about whether he'll continue in school. "Mama and my wife will probably talk me into going back," he said. Meanwhile, he's working two jobs and plans to start submitting applications for jobs that he was shut out of previously. For Becky and her father, the diploma is mainly a source of satisfaction and pride. All three say they would encourage othrs to join the program. I'm glad I did it," Becky said. "I'm glad Tony did it, and I'm glad my daddy did it. "There's a lot of opportunity that FTI gives in these surrounding areas to get a diploma. You don't have to go to FTI (main campus).

Wallace points out that all of his children and grandchildren now have high school diplomas, except two. "And they're in school now so I expect they'll graduate. If not, I'll have to get my hickory switch."

FTI Awards Contracts To Build New Center to purchase and renovate the building so

said it was satisfied with that bid.

The building will have a

improvements on campus. There is

already \$1 million in what has been done

By CHRIS NELSON

Trustees at Fayetteville Technical Institute on Monday awarded bids worth \$1.05 million for construction of its Center for Business and Industry.

The center, to be located in a renovated grocery store adjacent to campus on Fort Bragg Road, is to become a training ground for area business and industry, said architect Dan McMillan. It is to include a high-power shop area and classroom facilities.

The bids awarded, all to the lowest bidder, include \$663,586 for general contracting to D.F. Tally & Sons Inc., \$109,550 for plumbing to Town & Country Plumbing Co., \$126,842 for heating and air conditioning to Re-

frigeration and Heating Co. Inc. and \$105,709 for electrical work to D.L. Johnson Electrical Construction Co. McMillan said the cost of the con-

standing

1,250-square-foot multi-purpose room tracts amount to about \$50 per square connected to a kitchen and a foot for the 27,000-square-foot building. 1,150-square-foot lecture room with The school saved about \$15 per square seating for 40 and a projection booth, McMillan said. It will also have a foot by having the building shell already computer lab, four conference rooms

McMillan said the contracts allow 10 and a large executive conference room, months for the jobs to be completed six or eight offices, nine stroage areas without fines. and a large shop area.

He added that the bids were competitive. "It's been one of the most the school will be able to spend up to \$3 million on the building. He said the competitive projects we've done in a long time," McMillan said. "For some reason, a lot of people have been interested in this."

The low refrigeration and heating bid, said McMillan, was about \$20,000 less than the other bids. He said he

contacted the low-bidding firm about checking its figures, but the company far, he said.

McMillan said the concept of the building is unique in this part of the state. It has been designed by a committee of area industry leaders as a center where they can train employees in new technology. "It's still pretty much up in the air," McMillan said. "Nobody knows how it will be used or how much it will be used."

The center is in a former Winn-Dixie store, and plans call for building a road from it to the center of campus.

Officials joked Monday that the center will always be known as the Winn-Dixie building.

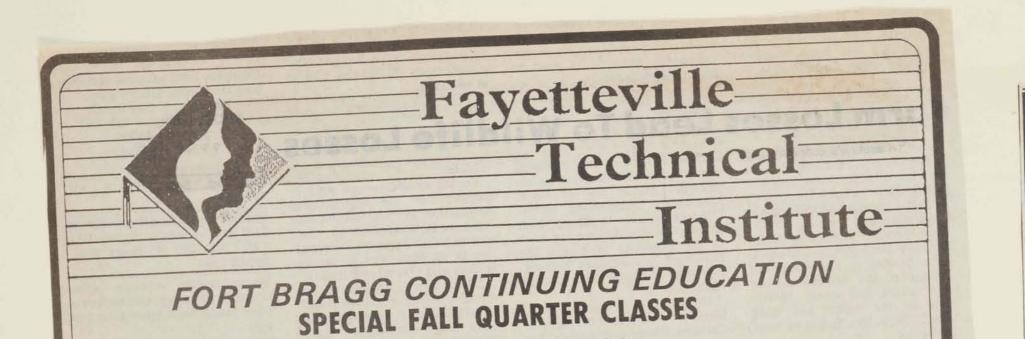

"We feel like the building's going to be good looking; it won't look like a Winn-Dixie," McMillan said. "I hope we can get rid of that label."

civilians pay \$15.

There is one session remaining this year, Nov. 9 - Dec. 18. Classes offered are: Auto Body Repair Automotive Mechanic, Automotive Transmission, Engine Rebuild, Power Generation, Small Engine Repair, Brick Masonry, Carpentry, Commercial/Residential Wiring, Heating and Air Conditioning, Welding, Computer Operator I and II, Computer Programmer/Basic Cobol, FCC General Class Review, IBM Operations, Basic Microcom-puter and TV Repair, Microcomputer Repair, Emergency Medical Technician-National Registry, Medical Assessment Treatment and Triage, Law Enforcement, Counseling and Human Relations, Effective Writing Techniques, Energy Con-servation Course (Self-Help), Motorcycle Repair, Motorcycle Safety Course, Oral Communications and Briefing Techniques, Supervision and Management, and Typing.

Many of the classes offer DANTES testing during the last week of the course -- providing three semseter hours credit if the test is successfully completed. Through a school evaluation, successful completition of an ASEP course may en title the soldier or family member to receive college credit towards an Associate Degree.

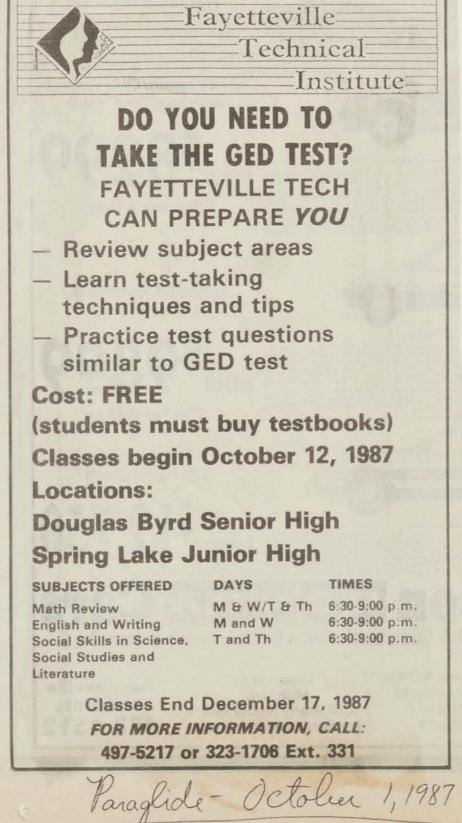

Most of the classes are conducted weekdays, 8 a.m. - 5 p.m., at the ACES Skill Center on Varsity Road (across from One-Stop).

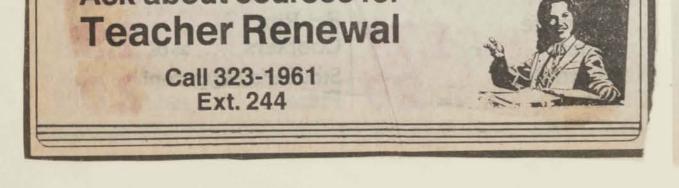

Soldiers should enroll through their Education Annex Counselors: COSCOM (396-4526), Gruber Road (432-4919), 82nd (432-5612), Old Division Area (396-4228), Main Post (396-9286), Womack (432-3018) and 20th Engineer Brigade (396-6724). Family members and civilians must enroll at Bldg. No. 40, ACES

Skill Center. For more information on the Advanced Skills Education Program, call 396-5320 or 396-8722.

With concern about AIDS striking at the heart of health occupations, Fayetteville Technical Institute is employing the latest technology to teach about the deadly disease.

Fayetteville Tech, where about 375 students are enrolled in medical-related areas of study, recently used a grant to purchase an interactive laser videodisc program for acquired immune deficiency syndrome instruction. The program allows viewers to privately extract information from the disc that is pertinent to their sexual preferences and lifestyle.

Cumberland County's Florence Rogers Charitable Trust awarded the FTI Foundation \$6,341.50 to purchase equipment and software for the videodisc program, said Pat Hickmon, FTI's director of institutional resource development.

large. Hickmon said the program has been used already by FTI's dental breaks down the body's immunity hygiene and dental assistant stuto infection. The disease is spread dents because theirs is a high-risk field for exposure to AIDS. It has since been, or will be, available to all faculty and staff and students needles. Though homosexuals and in physical therapy, nursing and intravenous drug users are considother health programs. The grant ered the highest-risk groups for application also says the program contracting the disease, medical will be made available to civic experts now say anyone not taking

(Continued From Page 1B) heterosexual or homosexual preferences and for a lifestyle with many, one or no sexual partners. The program uses actors, text and diagrams to present information. Hibbert said the material covered is factual and explicit. The equipment is set up so individuals can view it in privacy. Because any part of the pro gram can be reviewed instantly, the viewer can hear and see information as often as necessary. The program also includes questions to gauge the viewer's comprehension. Hibbert said the school will eventually house the equipment and the AIDS program in its Learning Lab in the campus library, and it will be open to all students and the public. More laser discs, with academic and (FTI)."

social subjects, and possibly another viewer will be purchased. The grant included funds to purchase a large viewing screen, which Hickmon said will be used to present the overview portion of the program to large groups. Hickmon said she has already been contacted by the Hospice Service of Home Health Service of Cumberland County and the Contact crisis intervention hotline concerning access to the program. Sarah Snead, executive director of Contact, said volunteers for the service are continually updating their training, and AIDS training is needed. "The little bit that I saw, it's a great program," said Snead. "Our interest in it is that there's no need for a duplication of services; there's no need for us to purchase it if it's available through them

4 Police Recruits Are Honored For Efforts To Save Man's Life

Four police recruits in training at Fayetteville Thomas, "a citizen came up and said a man was having Technical Institute had an unexpected opportunity to put their new skills to work on July 2, when 69-year-old Alexander Dunn suffered a heart attack in a restaurant where they were having lunch.

On Friday, the four - James P. Hall and Jancer C. Thomas of the Fayetteville Police Department and Fred Lindenfeld and Phillip Ingle of the Cumberland County Sheriff's Department - were among 17 graduates from the law enforcement program at FTI. And one of their first acts after being sworn in as police officers was to accept Distinguished Service Certificates for their quick action, which revived Dunn temporarily even though he died after reaching the hospital

FTI President Craig Allen presented the certificates. Dunn's widow, Qdell Tyndall Dunn of 212 Central Ave., and two of their daughters, Diana Keeter and Irene Peacock of Durham, were on hand for the

a heart attack in the restroom.' "He had no pulse, and he had turned a deep purple,"

Hall said. The four went into action, administering cardiovascular pulmonary resuscitation, calling for an ambulance and controlling a small crowd that quickly gathered.

"There was no time to think," Hall said. "It was as if someone said, 'Okay, you've had your training. Now produce.' "It was like clockwork," Lindenfeld added. "We

knew what had to be done and did it." It was the first time any of them had been faced with

a need to use CPR skills learned only two weeks before. Mrs. Peacock said her father was taken to Cape Fear Valley Medical Center, where he died within a short time. But his death didn't lessen the appreciation they felt for the four who tried. The family learned the

Veteran Sits At Replica During One Of Its Stops

Replica Listing Vietnam Dead **To Show At FTI**

By HENRY CUNINGHAM

A half-size replica of the Vietnam Veterans Memorial in Washington, D.C., will be displayed Oct. 11-13 on the Fayetteville Technical Institute

FTI, Fort Bragg and Fayetteville officials announced plans at a Tuesday press conference to bring the 246-foot-long memorial to the campus.

The exhibit will be in a wooded area across Hull Street from the Administration Building in the vicinity of Fort Bragg Road and the Eutaw Shopping Center.

The Moving Wall is composed of 70 solid black plexiglass panels and bears the names of 58,132 U.S. military personnel who died during the Vietnam War. Names are listed chronologically.

The wall includes the names of 1,600 North Carolinians, according to Stephen A. Acai Jr., vice president of the N.C. Vietnam Veterans Memorial Committee which dedicated a state monument in May on Capitol Square in Raleigh.

The Moving Wall, which is in North Carolina for the first time, has been displayed in more than 60 communities around the United States to enable people unable to travel to Washington, D.C., to share in the experience of seeing the memorial. Also included are the names of about 1,300

Garden Clubs Hold District Meeting

Dr. C. Bruce Williams III, chairman of the horticulture business and agriculture science technical departments at Fayetteville Technical Insitute, was keynote speaker at the annual meeting of District VIII of the Garden Club of North Carolina at the Holiday Inn on Nov. 3.

Hosts for the meeting were the garden clubs of Fayetteville: Briarwood Hills, Colonial, Cross Creek, Dig-A-Bit, Dig N Dream, Fayetteville, Greenwood, Kalmia, LaFayette Ladyslippers, Pine Needles, The Pines, Town & Country, Woodhaven and Woodland.

Williams, who presented a program on trees, also received an award of appreciation for furthering the objectives of the Garden Clubs of North Carolina Inc.

The morning speaker was state president, Mrs. Robert W. Lee Jr. of Statesville. Also present were the state's first vice president, Mrs. Elmer Swaim of Winston-Salem, and the state's third vice president, Mrs. Gaines Gratham of Fairmont.

FTCC Board Delays Traffic-Plan Study

A committee of Fayetteville Technical Community College board of trustees delayed action Monday on a recommendation to hire a consulting firm to develop a campus master traffic plan after board member Thornton Rose balked at the \$18,750 cost.

"I'm not a great supporter of surveys," Rose said at a meeting of the building and grounds committee. "If somebody would give us \$60 million, we could follow a plan. But the way we have to eke out a building here and there, we never know when we'll get money for a building or where we'd place it."

Linwood Powell, assistant to FTCC President Craig Allen, presented a proposal from Wilbur Smith Associates of Raleigh for an evaluation of campus pedestrian and motor traffic and its parking patterns preparatory to developing a master plan. It identified six areas of concern:

 Whether Hull Road should be closed through the campus. • Development of a

circumferential road for better access to the institution and its parking areas. Resolving problems of

access from Skye Drive and Dever Street.

• Evaluation of pedestrian movement across streets within the campus.

• Evaluation of the campus area east of Dever Street where school buses are parked and possible removal of the former Honeycutt Elementary School.

 Location of a proposed continuing education classroom building.

An engineer for the firm said it would conduct field studies on volume and pattern of traffic, review accident records, inven-

average in educational attainment

CHAPEL HILL (UPI) - In its North Carolina, more than 1.5 and economic prosperity." first 25 years, North Carolina's community college system has helped bring the state into the manufacturing age. Now, its leaders say, it must be transformed to take North Carolina into the information age.

.

> A sprawling system of 58 community colleges — often called "people colleges" — has taught hundreds of thousands of North Carolinians mechanical and manual dexterity skills to do specific jobs in factories, offices or other labor markets.

A commentary on the system released Sunday by the MDC Community College National Advisory cluded. Panel says the mission of the vocational colleges now must teach "the ability to analyze, interpret, comprehend, communicate, and synthesize knowledge, as well as to apply it to unfamiliar problems."

In other words, the workers in a high-tech setting of the future will be required to think for themselves, to understand more complex assignments and communicate not only with other workers, but with machines, too.

The study made for the Commission on the Future of the North Carolina Community College System is an interim commentary that precedes its final report to be made in the spring of 1989. The report says manufacturing

will continue to play a large roll in North Carolina's job market for many years, but trade, service and information management occupations are growing rapidly.

"Manual dexterity was once the synonym for worker competence," the report said. "Tomorrow ... competence will mean mental dexterity."

million state residents - about 45 The report said there is no percent of the adult population simple answer to providing the lack a high school diploma. About education and training for this 800,000 did not complete the eighth group, but it recognized the importance of helping this segment of grade, and still some 25,000 students drop out of high school every the workforce.

"The bottom line is that North "It is the level of competence of Carolina's economic growth is enthese workers, not just mastering dangered by a growing mismatch their crafts, but in their critical between the skill levels of the thinking skills, confidence, work workforce and rising job requireethic, and entrepreneurial spirit, that will support most of North The rapidly changing job re-Carolina's economy," the report quirements are causing problems said. for a growing number of un-

But it estimates educational, technical and that North Carolina will produce workplace skills necessary to funcony 543,000 new entrants into the tion in the economy today," the labor market, of whom 81,000 will lack high school diplomas. This group of workers is re-

"Serving the bottom 50 percent is not only a matter of equity, it is a matter of economic urgency," the report concluded.

CPR Class Information

The Cumberland County Rescue Squad is sponsoring the Community Heartsaver

tory parking space, evaluate pedestrian movement and identify possible bicycle corridors, for the purpose of developing a new campus map showing recommendations.

The work would take about 10 weeks and should be initiated after the fall semester begins, the proposal says.

Holsinger, principal engineer for the company, calls for a 10-week on-campus study and for the plan to be completed by the end of the year for a fee of \$18,750. The FTCC Board of Trustees at

its monthly meeting Monday delayed action on the plan because some members of the Buildings and Grounds Committee were absent. Powell said the board is to consider the plan next month, and the firm's engineer will be present. "To the best of my knowledge those (committee members) that were there were in favor of it," said Powell. "And it's not a spur-of-the-moment type of thing. We have talked about it over the years." Craig Allen, FTCC president, said the school is mainly concerned

with student safety on campus. "We have quite a bit of concern for our pedestrian traffic coming from the old Honeycutt parking lot across Devers Street and crossing back and forth across Hull Road." Allen said. Devers Street, on the

southeastern end of campus, and

New Session Starts May 19 Class Helps Adults Snare That Job

By Jennifer Milelli Mullen Spring Lake News Editor

Before the Human Resource and Development (HRD) Class offered by Fayetteville Technical Community College, Belinda Brokaw was just another application on the personal director's desk.

But after the free six-week course on how to get that job, Brokaw ended her three-year spell of unemployment. She is now training to become a supervisor at Westinghouse in Fayetteville.

Brokaw lives on Fort Bragg, and read about the HRD class in the newspaper. It promised to help unemployed adults hone their job-seeking skills and gain employment.

She started the course Jan. 18 and attended weekdays until Feb. 26.

"It helped me a lot," she said recently. "It taught me how to talk to people and how to do the resume.

After five weeks in the course, Brokaw used the skills she had learned to prepare a resume, then

experience, all she needed as the confidence and ability to tell the personnel director what she could do. "I received the knowledge and skills," she said. "You get with people and get confidence in yourself."

Before HRD, Browkaw was shy and had a difficult time speaking up. But now she handles herself with ease. She encouraged other unem-

ployed adults to take the course and hone their job-seeking skills. The next HRD orientation session is tomorrow, May 19 at 9

The advisory panel said the community college system must be ready to help train workers who will change careers four to seven times over their lifetimes.

"The new challenge for education and training systems is to prepare people not only for the current job market, but also to move from jobs eliminated by technological advances to jobs being created by new technologies to help the factory worker become an electronics technician, or help the auto mechanic become a quality control specialist in a pharmaceuticals plant," according to the panel's finding. The commentary predicts the

average age of college students will continue to rise and by 1990, an estimated three out of every four jobs will require some education or training beyond the high school level.

The panel found that today in

College Hearings Slated At FTCC

The first of four public hearings on the future of the North Carolina community college system will be held in Fayetteville on Wednesday from 2 to 7 p.m. in the Fayetteville Technical Community College auditorium.

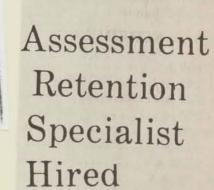

Subsequent hearings will be held at Durham Technical Community College on June 13, Guilford Technical Community College in Jamestown on June 15 and Asheville-Buncombe Technical College on June 23. The meetings have been planned

to solicit thoughts and ideas on how the state's community colleges can best meet the educational and economic challenges of the future. Sherwood H. For James McEachern, caretaker of the rose garden at Fayetteville Technical Community College, life is a garden of roses

Life Is Just A Rose Garden

By JOAN CLIFFORD

Imagine it - life in a rose garden - a silent symphony. It dazzles the soul and leaves you drifting dreamlike through the day. But touch below the petals, and a finger is likely to be pricked. How can something so beautiful have such a sting?

"Isn't that something?" says James McEachern, 60, with a chipper laugh that seems to spark his next action. He gently clips a rose, red-orange, and then trims the thorns. "Got to keep it from biting," he

McEachern, or "Mr. James," has shoveled, sprayed, watered, clipped and pruned in the rose garden at Fayetteville Technical Community College for 10 years. And he still loves his work. You can see him smiling, there on the corner of Devers Street and Hull Road anytime

up and die."

thinking.

up that atmosphere.'

- James McEachern

McEachern stresses the importance of his

family, close-knit and sometimes crowded with

everyone living in and around Fayetteville. His

mother, in her 70s, has her own flower garden,

which, McEachern says, is a major part of her life

But most influential has been his wife, Helen.

as gentle as the roses, or his wife, for that matter.

"We can look at each other and tell what we're

one you love, like an old, favorite shoe - worn and

holey, but you wear them again and again because

they're the most comfortable ones you have.

Sometimes, he says, you have to step back and

reflect; you have to realize how unconditionally the

life pleasurable," he says, gazing at the ground and,

undoubtedly, picturing his wife. "Helen tends to set

"You forget sometimes what she does to make

ones you love love. And then you love them more.

"She's a beautiful person," he says with a voice

He says it's all too easy to take for granted the

since his father died a few years ago.

"It's really amazing to see the roses grow and bloom," he says. In his green gardening attire, he stands a head and arm's length above the flowers.

He's right, his dedication glistens like dew on the roses. And the product is spectacular - a kaleidoscope of colors - crimson, red-gold, hot-pink - silky-smooth petals on finger-thick stems.

But he won't take all the credit. He says he alone couldn't keep up the garden.

"I have a lot of help," he says, nodding intently. Other members of the gardening staff help maintain the roses, as well as the Rose Society, which started the garden in 1971. But perhaps the greatest support system is emotional - his family. In fact, the father of five daughters and two sons

compares nurturing flowers to raising children. "You've got to have attention to thrive and

grow," he says quietly in the garden, his green hat shading deep brown eyes. "That's how it is with your family. Otherwise they shrivel up and die."

McEachern draws his strength from home and "You've got to have year-round job. He begins in February, clearing away the old pine straw and refilling the beds with attention to thrive and the fresh. Then, in April and May, Rose Society members help prune the bushes and plan the new grow. That's how it is season. The roses bloom and fade every six weeks until about November when the frost hits. with your family. Betty Hubbard, chairman of the Rose Society's

rose garden committee, says the rose is one of the Otherwise they shrivel most rewarding flowers you can grow because they last so long and respond to care.

"They bloom for years. And if they're not doing well, just add some organic matter or give them a little extra attention, and they'll respond," says Hubbard, who has been growing roses for 20 years and has 60 rose bushes in her own yard. "It just takes daily attention."

And daily attention is what McEachern provides. You can see and feel the garden's vitality. Lining Devers Street is his favorite, a bed of Canadian Reds - deep, rich crimson with a scent as thick as syrup. Rosy-pink Blaze Climbers loop and wind around the arches in the garden's four corners. Other roses filling the garden are Sun Flare (with yellow, ribbonlike petals), Showbiz (ruffled petals with little smiles in the middle) and swirling Red

Gold In the center of the garden, there is a fountain and small pond, which, McEachern says, used to have goldfish until someone put soap in the water and killed them. Now pennies, shiny and dim, and rose petals dapple the pond.

The newest addition to the garden is a memorial area of miniature roses honoring former Rose Society president Doris Murphy Harris, who died last year. Harris initiated the idea for a state rose garden in 1971, and the city agreed to help fund and maintain it. Ten years later, the Rose Society named it the All American Rose Selection Garden.

"That means the roses are planted in this garden daily pours it out into the rose garden. It's a before anywhere else," says Linwood Powell, assistant to the president at FTCC. If they turn out, if they're pretty enough and unique, then other gardeners start growing them. He says the garden has nearly 100 different kinds of roses.

McEachern consistently cares for the roses in the summer, as they come and go, especially during wedding-filled June and July. He says it's exciting to see weddings in the garden because the colors are so brilliant. Yet, at the same time, it makes you think - life on earth isn't forever.

"In a sense, if you think deeply enough, it's kind of sad," he says staring at the pale-yellow rose brushing his leg. "We're here for a season and then we go. It's just a small space of time.'

That's not the only way roses resemble human life. McEachern says the roses seem to reflect what's around them. He points to a tiny pink rose in the new memorial garden. This one is special, he says. Some roses tend to catch your eye more quickly than others.

"They gain their strength from the soil, and that makes some grow faster. Not that they're greedy," he says. "Some just take better."

People are the same way, he says. "Nobody really knows what they're going to be like until they spring up." He nods toward the new bed of soil, where delicate stems are popping up with a few baby buds.

You'd think he was addicted to the garden that fresh fragrance, those bright colors. It's practically his home.

So how long will he stay? He doesn't know. "It gets so hot out there. It's hard with my illness," he says, referring to his high blood pressure. Smiling, he raises his brows, all those years beaming through his eyes. "I don't feel as young as I used to, but I don't plan for that to stop

Cooperation Among State's Schools Urged By Community College Group

high schools, community colleges, and the four-year they pursue different programs. colleges and universities to provide continuity in education, a study committee was told Wednesday.

the N.C. Community College System held its first of four regional hearings in Fayetteville as it looks at the 25-year-old community college system and assesses its future. Other hearings will be held in Durham, Jamestown and Asheville.

Findings will be drafted into a report and presented to the leadership of the community college system, which will use the information to try to influence the General Assembly, said Dr. E.K. Fretwell, UNC-Charlotte chancellor who chaired the committee on governance, leadership and institutional relationships meeting here.

The committee heard a diversity of perspectives from speakers that included community college administrators, trustee, faculty, student, a feminist and educators on the public school and university levels.

Dr. Roy Carroll, University of North Carolina vice president for planning and general administration, said that the UNC board of governors and the state board for technology is affecting school libraries.

Cooperation needs to be developed among the state's community colleges have different missions because

But he said a point of tension between the two sectors is a refusal of some four-year institutions including A committee from the Commission on the Future of UNC to accept transfer credits from community colleges.

He suggested computerizing requirements of the higher institutions so that students in high schools and community colleges can "walk into a library and push a button" to find out if courses they are contemplating are transferrable.

Dr. Gayle Simmons, executive vice president of Central Piedmont Community College in Charlotte, argued that "stopping points in the educational process are not in the best interests of students.

Other issues addressed by speakers related to an apparent power struggle between local boards of community college trustees, a concern of private colleges about college parallel programs offered by community colleges, a failure of community colleges to place women in key positions, how educational institutions can keep pace with the fast-growing abundance of information and recognition of how

THE FAYETTEVILLE OBSERVER, Thursday, June 9, 1988

Fayetteville Selected For Adult-Education Pilot Program

By ANDREA SHAW Of The Times St

Fayetteville is one of four North Carolina sites selected for a pilot program intended to improve basic education skills of parents of 3- and 4-year-olds and help the children become better prepared to enter the public school system.

The Cumberland County Board of Education's curriculum committee decided on Wednesday to recommend that the school board accept a \$45,000 grant from the William Rand Kenan Foundation in Chapel Hill to initiate the program in September. That recommendation will be made to the school board on Tuesday,

Only parents who have not completed high school will be eligible to participate, according to County

selected, officials said.

"With the dropout problems, we think that prevention starts at an early age," said Associate Superintendent Tryon Lancaster. "This program attempts to provide the adult basic education program, Lancaster improve parenting as well as education."

Fayetteville and Wilmington are the only metropoli-Lancaster said. He said Madison and Vance counties are the only two rural sites selected. Kentucky, the only state with a family literacy program, has 16 sites in its fourth year, he said.

The program places parents and children inside two separate classrooms three days a week for a school year. Children attend a morning pre-school session, while parents are taught basic education skills.

Superintendent Jack Britt. Initially, 15 parents will be adults are instructed in parenting skills. After the nap caster said the committee will also look at free busing session, the rest of the school day is dedicated to parent and child interaction.

> Fayetteville Technical Community College will said.

The program should help parents to get better jobs tan sites chosen for the program in North Carolina, after receiving a GED and encourage children to stay in school, Lancaster said.

> "It should break some of the poverty cycles we've been experiencing," he said. "If we help the child and help the parent, we help the family."

If the grant is accepted, the board would submit a budget to the Kenan Foundation, which includes expenditures for a three-member staff, classrooms, Following an afternoon nap period for the children, transportation, food and instructional materials. Lan- a chance for you and your children.

for parents and children and free or reduced lunches. If approved, a selection committee would begin searching in July for participants.

The grant also provides \$50 per participant for instructional supplies and toys for home use, Britt said.

"The program actually teaches parents to listen and play with their children," he said. "It changes a parent's attitude.

The program could run from three to five years, depending on parental commitment and space within the school system, Britt said.

"Right now, the biggest problem is space," he said. "But, we want someone with a strong commitment in completing the program. We're saying to parents here's

"Whenever we get a mechan with the right degree of skill, it very easy to place them in jobs," h said.

Cumberland County has 16 new car dealerships, all needing technicians. This is not including the many used car dealerships and the independent garages facing similar problems.

Car dealers are bidding among themselves, trying to offer the best benefits to attract the best technicians. One local dealership even advertises that each of its technicians will have a reserved parking place.

These incentives are what should encourage people to enter the field, at least that's what garages and dealerships are hoping. A new program at Fayetteville Tech is also designed to try to increase the number of qualified technicians.

Called Cooperative Automotive Service Technician, or CAST for short, the program will start during the college's fall quarter.

said. Cumberland County has 16 new car dealerships, all needing technicians. This is not including the many used car dealerships and the independent garages facing similar problems.

Car dealers are bidding among themselves, trying to offer the best benefits to attract the best technicians. One local dealership even advertises that each of its technicians will have a reserved parking place.

These incentives are what should encourage people to enter the field, at least that's what garages and dealerships are hoping. A new program at Fayetteville Tech is also designed to try to increase the number of qualified technicians.

Called Cooperative Automotive Service Technician, or CAST for short, the program will start during the college's fall quarter.

Enrolled students will start the program in a classroom setting for one quarter, then work at a garage or dealership for a quarter. Students will alternate between the classroom and garage until the two-year program is completed. A new group of students will be phased into the program with each new quarter.

"It allows them to earn some salary while they come to school, and puts them in a real work situation," said Hubert Hall, coordinator of vocational programs for Fayetteville Technical Community College.
