FTI SERIES PLANS — Mrs. Lura Tally and William Bryant study plans for an international discussion series scheduled to begin Jan. 29 at Fayetteville Technical Institute.

International Topics Set In FTI Discussion Series

Topics of international concern will be discussed in the Fayetteville Technical Institute series, "Great Decisions — 1970" Jan. 29-March 26.

Classes in the series, held in conjunction with the University of North Carolina's Bureau of Continuing Adult Education, will be held from 7:30 to 9:30 p.m. on Thursdays.

Mrs. Lura S. Tally, a community and state leader in continuing education, will head the study group.

The Foreign Policy Association, with headquarters in Atlanta, Ga. and originator of the "Great Decisions" series, is a non-profit organization formed in 1918 to study all sides of every international question affecting the United States.

Series Questions

Questions to be considered in the 1970 series are: What course for the Kremlin in the 1970's? Does U.S. Policy promote military rule south of the border? After de Gaulle, a new deal for France's allies? What role for the U.S. in the struggle for racial equality? Japan: A great power role for the rich man of Asia? The Pentagon and its critics — what policies should prevail? What stakes for the great powers in the Arab-Israeli conflict? United Nations: After 25 years, still man's "last best hope" for peace?

Three international experts are scheduled to speak to the Fayetteville Technical Institute group during the course.

Anyone interested in participating is invited to attend the introductory meeting. A fee of \$3 will be charged to cover the cost of materials.

State Student To Teach At FTI

Fayetteville Technical Institute will provide student teaching experience at the post-secondary level for the first time this summer.

Eric McKeithan, a B. S. candidate at N.C. State University, will instruct technical drafting in the summer session.

McKeithan, of Bladenboro, will begin teaching here June 8.

Sixteen FTI Students To Be in 'Who's Who'

Sixteen second-year students from Fayetteville Technical Institute have been selected as outstanding campus leaders and will be included in the 1969-70 edition of "Who's Who Among Students in American Junior Colleges."

Students were chosen by the campus nominating committee and the editors of the annual directory on the basis of their academic achievement, service to the community, leadership in extracurricular activities and future potential.

Six hundred institutions from the United States and other countries of North and South America participate in honoring outstanding young men and women in their junior colleges.

Chosen from F. T. I. were David Adcock, Mrs. Avary Brisson, Frankie Burch, George Farquhar, Lawrence Hill, Michael Koball, Ronald Koerner, Minson McLamb, John McPhail, Donald Penny, Mrs. Dorie Priddy, Adrian Sadler, John Spira, Mary Stoddard, Linda Strickland, and Carla Summers.

FTI Honors First Nursing Graduates

Fayetteville Technical Institute honored its 1970 graduates in the associate degree nursing curriculum with a luncheon Saturday at the Strac Lounge of Main Post Officers' Club at Ft. Bragg.

President Howard Boudreau welcomed the guests, Dean of Instruction William Sease spoke briefly, and the main address was presented by Mrs. Mary Thomas, president of District 14 of the North Carolina Nurses Association.

Presentations of the pins was made by Mrs. John O'Hale, chairman of the associate degree nursing department.

Forty-one guests attended the luncheon which was given in honor of the fourteen initial graduates from this curriculum at Fayetteville Tech.

Father-Son Team Teaching Together At FTI

Fayetteville Technical Institute now has a father-son teaching team.

James Ronald Christie has joined the staff as an instructor of electronic data processing.

His father, James Henry Christie, is chairman of the welding department.

The elder Christie is a graduate of North Carolina State University with a B.S. in industrial engineering.

Ronald, also a State graduate, holds a B.S. degree in economics.

Ronald and his family moved to Fayetteville from LaGrange, Ga., where he was employed as a program analyst.

Dr. West To Speak At FSU Graduation

Dr. Cameron West, director of the North Carolina Board of Higher Education, will deliver the commencement address for the 93rd graduating class at Fayetteville State University.

Graduation exercises will be held Sunday at 2:45 p.m. in J. W. Seabrook Auditorium.

A native of Walstonburg, Dr. West holds degrees from the University of North Carolina at Chapel Hill.

He was one of the contributors to the state's Long Range Plan for Higher Education.

Dr. West served as academic dean at Pfeiffer College from 1960-66.

Commencement activities began today at the university with an administrative council reception for graduating seniors and their guests in the Charles W. Chesnut Library.

Saturday, the Alumni Convocation will be held in Seabrook Auditorium. Mrs. Eunice Waller of Connecticut College will be the featured speaker.

A baccalaureate service will be held at 10 a.m. Sunday in Seabrook Auditorium.

According to registrar L. M. Means, 160 seniors are expected to graduate. President Charles Lyons and John H. Cook, chairman of the board of trustees, will present degrees.

The annual meeting of the General Alumni Association will be held Saturday at 2 p.m.

President and Mrs. Lyons will host a reception Sunday from 5-7 p.m. at their residence for graduates, parents, friends, faculty and staff.

DR. CAMERON WEST

JOHN SEASGROVES

Seasgroves Is Elected

John Seasgroves of Fayetteville has been elected president of the student body of Fayetteville Technical Institute for the 1970-71 term.

Seasgroves is a graduate of Fayetteville High School and is enrolled at FTI in air conditioning technology.

The new vice-president is Johnny Gregory Jr. He also is a Fayetteville High School graduate.

Jane Stogsdill of Lillington was elected secretary and Charles Conloy of Fayetteville, treasurer.

FTI Now Offers Transfer Program With Appalachian

Credits in 10 fields of technology at Fayetteville Technical Institute can now be transferred to a senior college toward earning baccalaureate degrees, President Howard E. Boudreau announced today.

Boudreau said the plan has been worked out with Appalachian State University whereby students can pursue a "flexible, technically-oriented curriculum culminating in a baccalaureate degree in technology."

Each student's program will be especially tailored to his background and interest in one of three areas, engineering technology, business education or agriculture, Boudreau said.

"Our students need to have the opportunity to continue their education if they so desire," Boudreau said. "Education is not a dead-end road, and it is imperative that we work and cooperate with out universities and our colleges to provide a system whereby our students can transfer their credits in specialized education."

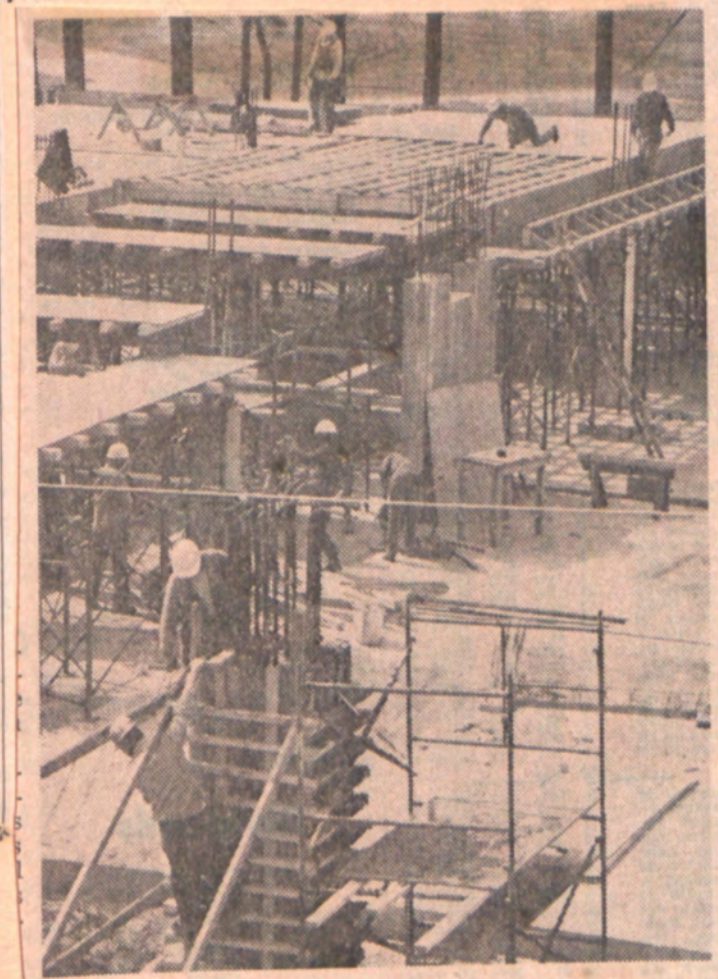

"We are not in any way de-emphasizing technical and vocational education," he said. "In fact, we would be encouraging more people to enter the field of technical and vocational education."

"Upon satisfactory completion of a two-year curriculum the student would have the option of either entering the world of work at this point or he could transfer his credits and continue his education in his respective field," Boudreau said.

Boudreau pointed out that the demand for skilled technicians is increasing across the nation at a rapid rate. To supply the needed personnel, more and more colleges and universities are adapting their curricula toward a degree in technology, he said.

Boudreau revealed that the University of North Carolina at Charlotte has already implemented a program for FTI engineering majors who are working toward a baccalaureate degree in engineering technology.

FTI is accredited by the Southern Association of Colleges and Schools and is one of two institutions in North Carolina accredited in several engineering technology curricula by the Engineers' Council for Professional Development.

GROWING—Fayetteville Technical Institute is growing to meet the demands of the area. Workmen here labor on the new Paul Thompson Memorial Library and Student Union, scheduled for completion in January, 1971. Also under construction is an addition to the engineering building. At present, FTI occupies 68,000 square feet of classrooms and laboratories with another 68,000 feet now being built.

Fayetteville Technical Institute and area members of the American Institute of Architects sponsor the:

EARTH DAY TEACH-IN

Wednesday, April 22, 1970

Morning

10:10 - 10:30 Music by the Chartered Libertines with Frank Lee
10:30 - 10:40 Mr. Bill Lasslett, American Institute of Architects
10:40 - 10:50 Charles Clay
News Media and Support of Environmental Program
10:50 - 11:00 State and Federal Pollution Program
11:00 - 11:10 Question & Answer Period
11:10 - 11:20 County Commissioner
Hector Ray and County Pollution Commissioner
Dr. Karl Hammer
11:20 - 11:40 Question & Answer Period
11:40 - 11:50 Pollution Skit by FTI Students
11:50 - 12:00 City Council - Harry Shaw
Mayor Pro-Temp
Public Works Commission - Mr. Ray Muench
12:00 - 12:10 Question & Answer Period
12:10 - 12:20 Industrial Program
Mr. Monroe Evans
Cape Fear Feeds
12:20 - 12:30 Question & Answer Period
12:30 - 12:40 Educational Opportunities in Environmental Field
Mr. Dean Painter
12:40 - 12:50 Question & Answer Period

Afternoon

FTI labs will be open for visitors to view student activities related to the overall environment. Tours leaving lobby every half hour.

On the hour: FTI bus is available to take interested parties to visit the new city water treatment plant (Tour). Film "Design for a City", Room 109 - Shown on the hour.

SCHOLARSHIP — Charles Taylor (left), president of the Cape Fear Engineers Club, presents a \$500 scholarship check to Howard Boudreau, president of Fayetteville Technical Institute. The money will go to a deserving engineering student at FTI. Others in photo are W. W. Crowell and John R. Nunalee. (Observer photo — Blount)

President's Tea
Sunday at FTI

The annual President's Tea will be held Sunday afternoon at Fayetteville Technical Institute honoring the graduates of the class of 1970. The seniors and their relatives will be entertained in the student lounge by President Howard Boudreau and the faculty and staff at F.T.I.

FTI Honors
Its Students

Five students were presented awards Tuesday night as Fayetteville Technical Institute held its graduation ceremonies at Memorial Auditorium. Merlon Francis, a retired Army veteran with 20 years service, was cited for having the highest scholastic mark in a one-year curriculum, 3.59 in welding. John Spira Jr. was cited for having the highest mark in a two-year vocational course, a 3.95 in FTI's machinest course. Carol Wiskowski was cited for having the highest average ever at FTI, a perfect 4.0 in nursing. The citizenship award went to Raymond Slazyk Jr. and John McPhail was honored as the outstanding student at FTI.

Allie Chalmer

Fayetteville Technical Institute Paves Way For Waiver Removal

On May 26, Fayetteville Technical Institute will hold graduation exercises for 250 seniors at the Cumberland County Memorial Auditorium. Among those graduating, will be 35 women ranging in age from their mid 30s to 60s.

These are the members of North Carolina's first class to complete a course in licensed practical nursing waiver removal. One other technical institute in the state is now offering a similar program.

Why was such a course necessary?

Mrs. Ada Leonard, department chairman of practical nurse education at F.T.I., explained, "To meet present day requirements for licensing, practical nurses in North Carolina must graduate from an accredited school and successfully write the state practical nursing examination."

"Under the grandfather clause from 1947 to 1957, women whose experience in nursing qualified them as LPNs were licensed with one or both of these requirements waived."

"However, federal regulations require the removal of the waiver for personnel af-

filiated with their programs," Mrs. Leonard continued, "and in recent months, it has become increasingly important that these LPNs remove the waiver in order to maintain their positions in the field."

Fayetteville Technical Institute was the first educational facility to offer this opportunity for removal of the waiver.

Assisting in the initial program, is Miss Claudia Dancy. The course began in December meeting two nights a week from 6:30 to 9:30 and all day on designated Saturdays. Clinical work was held at the Cape Fear Valley Hospital. The course met the same classroom objectives as those completed by the students enrolled in the regular daytime curriculum. For those who worked full time, this was a vigorous schedule.

"I was afraid I'd have to quit work and go back to school," admitted Mrs. Margaret McLauren, "I couldn't afford to renew or to resign, so I was happy when F.T.I. offered this course. I hadn't been in a classroom for

45 years, but I'm glad now that I went ahead with the course."

The women agreed that Mrs. Leonard and Miss Dancy had done much to help them through the rough parts and encourage their success.

"The most difficult thing, for many of these women," observed Mrs. Leonard, "is taking tests. They aren't accustomed to reading fast. Many of them have trouble working under speed tests, and this just might handicap them on their state board exams. But I am confident our graduates know the material and have a deep understanding of their professional responsibilities."

Today's critical need for medical personnel calls for more and more women to embark on such a program.

Will F.T.I. offer the waiver removal course again?

Dean of Instruction, William Sease replied to this question, "We will conduct a survey to determine the need for another course. If the results indicate such a demand, Fayetteville Technical Institute will be pleased to offer its assistance once again."

PINNING CEREMONY—Miss Dancy demonstrates the pinning ceremony which follows graduation and the removal of waiver from the practical nurses' licenses.

CLASSMATES—Standing with Mrs. Ada Leonard, chairman of the practical nurse education at F.T.I. are classmates Mrs. Nettie Turlington and Mrs. Christine Barker.

WAIVER REMOVAL CLASS—Miss Claudia Dancy, instructor in practical nurse education at F.T.I. stands with the Fayetteville members of her waiver removal class. Standing from left to right: Miss Dancy, Mrs. Ronie Ver-

rier, Mrs. Etta Owen Cain, Mrs. Jeanne Novello, Mrs. Mable Burnes and Mrs. Margret McLaurin. Seated are Miss Ellen McDaniel, Mrs. Betty Jo Conley and Mrs. Jewel Crome.

These Grads Ready

By ELIZABETH OBENSHAIN
Observer Staff Writer

The students who walk across the stage tonight to receive their high school diplomas will include a 34-year-old mother of ten and a approximately 20 grandparents, all members of the graduating class of Fayetteville Technical Institute's Adult Education Program.

FTI has the same commencement exercise as the other local high schools. The only difference is the graduating students at FTI will wear their "Sunday best" in place of the traditional cap and gown.

The graduating class of 228 persons varies in age from 18 to 60 and includes parents, grandparents and the handicapped. They have studied a basic high school curriculum of language arts, math, science, and social studies.

All the students have been out of school for over a year. FTI offers them a chance to return and get their high school diplomas which they need for a variety of personal and financial reasons.

According to Eli Anderson Jr., General Adult Education Director, adults in their late 50s and 60s who attend night

GRADUATES—Five of the 228 persons graduating from FTI's Adult Education program tonight are pictured here. From left, they are James Jones, 27, who is confined to a local rest home; Mrs. Jesse Thompson, who has

six grandchildren; Clara Horne, who has seven children; Mrs. Mary Godwin, a grandmother of six children; and Mrs. Ethel P. Hobgood, at 56 the oldest member of the graduating class. (Observer photo—Payne)

school are prompted by personal reasons, such as the desire to read a grandson's letter or read a newspaper. They are usually beyond the age where their job situation would be improved by further education.

All of the men enrolled are already employed, according to Anderson. The middle-aged men have found that a high school diploma is necessary before they can be promoted in their jobs or find a better job.

Approximately 30 per cent of the graduating class is young men who plan to further their education either at technical schools or at a

college, after they have received their high school degree.

Several of the women, said Anderson, were "shamed" into going to FTI for a high school degree by their children who needed help with home work which was beyond the academic abilities of their parents.

Financial need may also force a woman to return for a high school diploma.

A woman without a high school diploma is often limited to domestic work, which pays an average of \$30 a week, according to Anderson. With a diploma, a woman has a better chance of

finding a factory job which would pay at least the minimum wage.

The adult education program at FTI is set up to give the individual adult maximum consideration and to let him progress academically at his own speed. Classes range in size from 12 to 15 persons, allowing teachers to give individual attention to each student.

"In adult education, we care. We really care. We make people feel like they are somebody," said Anderson.

"Each night everybody must learn something." That is the method behind adult education.

Adults Will Get Diplomas

Some 228 adults will receive their high school diplomas tonight when the Fayetteville Technical Institute Adult High School Diploma Program conducts commencement exercises.

Dr. Frank B. Weaver, assistant educational director of the N. C. Department of Community Colleges, will deliver the commencement address. Howard Hall, chairman of the Cumberland County Board of Education, presented the diplomas.

FAYETTEVILLE CITY SCHOOLS
Sarah Armstrong, Deloria Arthur, Alberta Best, Ruby Bethune, James Bowles, Nancy Bowlin, Mary Byrd, Worth Campbell III, Marguerite Chappell, Jacqueline Chionchio, Linda Clark, Lillie Cohea, Stephanie Corley, Vik Coughlin, William Dowdy, Maryjane Edens, Myrtle Ellerbe, Carol Ennis, Poccia Fetherston, Bettye Foster, James Garvin, Frances Gaydosik, Berdell Greese, Ellen Hall, Cassandra Harris, Helen Hayes, Joan Helz, Mary Hicks, Patricia Hill, Esther Jackson, and Vivian Jackson.

Also, Helen Johnson, James Jones, Phyllis Jones, Mary Joyner, Augustus Kelly, Larry Landenklos, Sarah Leggett, Jeannette Legdon, Patricia MacFarlane, Carolyn Malloy, Linda McDougald, Eula McLaughlin, Leanna Melvin, Lilliane Michalski, Doria Milnap, Mary Milnap, Norma Milton, Teresa Morgan, Mary Moton, Annie Nettles, Elizabeth Niffenegger, Connie Olivares, and Cassie Perkins.

Also, Gail Perry, Sylvia Pyley, Robert Prevattie, Jimmie Rorschach, Donna Saye, Dorothy Scott, Christie South, Mary Smith, Virgie Smith, Linda Spearsman, Dorothy Spears, Deborah Spivey, James Sruka, Hazel Stevenson, Ronald Stone, Toni Sullivan, Elizabeth Thompson, Jessie Thompson, Alice Timm, Rena Volitis, Ronald Volz, Petrona Walton, Mary Webb, Denise White, Sandra Williams, Cora Williams, and Beulah Wright.

CUMBERLAND COUNTY SCHOOLS
Dawn Abbott, Denise Artis, Sadie Barefoot, Ellen Baxter, Sarah Bedeole, Terry Belcourt, Maudie Bell, Barbara Besean, Santha Rickford, Frances Blackmon, Farnan Blanton Jr., Ann Blue, Keike Braswell, Ernestine Brown, Add Bule Jr. III, Larry Bule Jr., Daniel Bullard, Ellen Bullard, Mary Bullard, Earlene Byrd, Christine Carrow, Sheron Carter, Julia Clanton, Sarah Brock, Colie Clark, Barbara Coffman, Leslie Colvin, Miller Cook, Homer Cox Jr., Elizabeth Croon, Elizabeth Cushing, Betty Daniels, Joyce DeBrihl, Lee Douglas, Anita Evans, Charles Fair, David Faircloth, Virgie Frander, Helen Franklin, John Freeman, Betty Fleming, and Rosemary Garland.

Also, Betty Gibson, Mary Godwin, Barbara Goodman, Joan Hair, Louise Hall, Sylvia Hall, Mary Harkness, Howard Harris, Velma Harris, Billy Hayes, William Hendrix, Maria Hernandez, Joyce Hill, Ethel Hobgood, and Ben Holloman.

Also, Clara Horne, Rachel Houston, Johnny House, Sheila House, Hubert Hubbard, Martha Hughes, Wiley Hunsgriff Sr., Patricia Jackson, Edna Jackson, Elizabeth Jackson, Joyce Jackson, Teresa Jackson, Viola Jacobs, Carolyn Johnson, James Johnson Jr., Rebecca M. Johnson, Rebecca Johnson, Belinda Jones, Charla Jones, Norman Jones, Calphurnia Jordan, Irene Kelly, Barbara Kosiowski, Barbara Kroos, Ann Lanthorn, Lynn Lloyd, and Onie Lockery.

Also, Deloris Lucas, Roberta Manning, Margie Marrowain, Linda Matthews, Jannie McDonald, Kenneth McDonald, Sylvia McDonald, Donald McFeyer, Dorothy McKay, Marlene Mickey, L. B. McLamb, Frances McLaughlin, Lenora McLaughlin, Gay Meador, Annie Melvin, Doris Miles, Betty Miller, Pearlie Mobley, Dorothy Moore, Donald Mosby, Thomas Moseley Jr., Alberta Murphy, Thomas Murrin, James Murrell, Billy Nunnery, Jean Nunneley, Mildred Page, Betty Parke, Imogene Parrish, Donna Partney, J. E. Peacock, Jacqueline Peck, and Georgia Peters.

Also, Melissa Poche, Virginia Poole, Richelien Powers, David Powell, Betty Price, Charlotte Regester, Betty Rich, Elaine Roberts, Jonnie Robertson, Elene Robertson, Barbara Ronfeldt, Michie Sablan, Mary Sellers, Loretta Simmons, Betty Taylor, Janice Tyndall, Joyce Watson, Patricia Wade, Donald Wells, Candy Wesel, Jerrie West, Margaret West, James White, Joan White, Sybil White, Josephine Whitley, Catherine Williams, Joy Williams, Barbara Woodcock, Sarah Wright, and Janice Young.

FTI Commencement

Fayetteville Technical Institute held graduation ceremonies Tuesday night at Memorial Auditorium.

Dr. Woodrow B. Suggs, president of Gaston College, delivered the commencement address. FTI president Howard Boudreau and board chairman Thornton Rose presented diplomas and degrees to the graduates.

Degrees and diplomas went to:

CANDIDATES FOR DEGREES

Accounting: Elizabeth Beasley, Darrel Bennett, Joseph Brock, Ted Grinnin, II, Phyllis Jones, Winfred King, William Lee, Jr., Vicki Matthews, Ronald Phibbeck, Harley Smith, Carla Summers, Claudia Williams.

Agricultural Business Technology: Thurman Bailop, Bobby Brodzinski, Gary Jackson, Michael Koball, Marshall Ray, Lawrence Smith Jr., Michael Tait, and Joseph Ward.

Air Conditioning & Refrigeration Technology: Wesley Branch, Carl Butler, William Cashwell, William Faircloth, Robert Franks Jr., John Griffin, Lawrence Hill, Jimmy Lamb, Johnny Loper, John Maxwell Jr., and Michael Mills.

Associate Degree Nursing: Ruby Fort, Sylvia Goodwin, Paula Haney, Jane Hart, Patricia LeBeau, Madeline Nason, Alva Porter, Ginger Porter, Doris Priddy, Esther Ray, Claudia Seasons, Reveshia Swinson, Lillie Thigpen, and Carol Winkowski.

Business Administration: Joseph Baker, Christopher Bardfoot, Edward Bates, James Blue, Michael Bryant, Sylvia Bunce, Barbara Burch, George Farquhar, Ann Fitzgerald, Leona Gregory, James Horne, John Jeffreys, Johnnie Johnson, Ronald Koerner, Harold McLeod, Warren Milner, Brian Morrison, John Norris, Arthur Parham, Carl Pollock, John Souder, William Stepp, and William Stump.

Civil Engineering Technology: Durwood Adama, James Atkins, Timothy Barbour, Jack Christian, Earl Eilenburg Jr., Woody Fassel, John Ivey, Timothy Johnson, Gerald McCauley, James Merritt, Millard Owen III, Donald Penny, Harold Phillips, Michael Plummer, Herbert Porter, Charles Riggan, Walter Roberts, Jr., James Simmons, Raymond Slazak Sr., Richard Tryon, Alan Villareal, Andy Willett, Washington Woodlief.

Electronics Engineering Technology: Harold Davis, Stephen Dees, Wayne Gardner, Clebert Jackson, Clyde Kinlaw, Tony Lamb, John McPhail, Dennis Moore, Robert Presaley, Jimmie Russ, Charles Shoets Jr., Raymond Slazak Jr., Danny Stanch, Arthur William Wallace, and Jerry Wilks.

Mechanical Engineering Technology: Avary Brisson, Allen Brock, James Carrington IV, Margaret Davis, John Gilliam, Joseph Harris, Ronald Horne, Shelby Johnson, Roy Lee, Harvey Lewis, William McMillan, Patricia Mackley, Lois Parker, John Simmons, and Luby Warren.

Environmental Engineering Technology: David Adcock, Harold Autry, Milton Bowen, Deborah Huddleston, Horace Hyatt, Linda Strickland, Lattie Tyndall Jr., and Malcolm Wilkins.

Secretarial Science: Lynette Autry, Dorothy Carter, Linda Embrey, Donna Hales, Charlene Seasons, Dorothy Spakes, Mary Stoddard and Harriet Wills.

Week-Long Workshop Set Monday At FTI

A week-long workshop for principals, guidance counselors and vocational teachers from Fayetteville and Cumberland County will be held at Fayetteville Technical Institute beginning Monday.

The conference was arranged at the suggestion of Dr. Craig Phillips, state superintendent of public instruction, to promote better understanding of vocational training at secondary and post-secondary levels.

In addition to the FTI staff and faculty speakers Monday, Dr. Charles Law, director of vocational education from the State Board of Education, will address the conference on "The Dignity of Work."

Other special speakers will include N.C. State University professors Dr. Selz Mayo of the Department of Sociology and Anthropology; Dr. Joseph Nerden, industrial education; and Dr. Edgar Boone, head of the Department of Adult Education at NCSU.

Miss Alice Sumrell, guidance director for the Johnston County Schools, will describe a testing program now in use in some schools.

Niles E. Compton of FTI, coordinator of the conference, said "the purpose of this conference is to assist course planning of high school students choosing technical and vocational careers."

"It is hoped that this workshop will create a greater awareness of the scope of technical and vocational training offered in the community college system and at FTI in particular."

Five On FTI Staff Receive Promotions

The promotion of five Fayetteville Technical Institute instructors to department heads was announced today by William Sease, dean of instruction.

Those promoted were Arthur Cavano, developmental studies; Lonnie Smith, English; Richard Jarvis, accounting; Sammy Brown, business administration; and Ronald Christie, data processing.

Mrs. Langdon Joins F.T.I. Faculty

Mrs. Helen Langdon, widow of Dr. Bruce Langdon, has joined the faculty at Fayetteville Technical Institute as a part time instructor in the department of associate degree nursing.

Born in Washington, D. C., Mrs. Langdon was educated in the Virginia and Maryland public schools and received her bachelor of science degree from William and Mary and her master's and registered nurse status from Yale University.

This summer she will attend a workshop for new faculty in associate degree nursing at the University of Maryland and the nursing curriculum development summer school at the University of North Carolina.

Active in civic affairs, Mrs. Langdon is past president of Fayetteville's Woman's Club; a member of Kappa Kappa Gamma national sorority, the N. C. Garden Club, Fayetteville Book Club and Highland Presbyterian Church.

Her hobbies include riding and the raising of horses, dog training, swimming, reading, photography, boating and handicrafts.

She is the mother of two sons, Bruce, Jr. a rising junior at UNC, Wilmington, and Andy, 12.

Mrs. Helen Langdon

NEW LOOK IN ENGINEERING — These five Fayetteville Technical Institute graduates will challenge a predominantly male world when they join an electronics firm in Atlanta next month. Pat Mackley, president of the Student Chapter of the American Institute for Design and Drafting, Edwina Parker, Shelby Johnson, Donna Moore and Belinda Davis have completed their two-year curriculum at FTI and are making plans to move to Atlanta, where they have signed with a national electronics firm. The lady engineering technicians, who will share an apartment in Atlanta, major in mechanical engineering technology with the exception of Donna, who chose electronics. Their combined earnings for their first year of employment will amount to \$37,600.

F. T. I. Faculty Members Taking Advanced Course

Clarence Balch, newly-appointed chairman of the technical education division at Fayetteville Technical Institute, is attending a workshop in materials-handling in Boston. An instructor in mechanical engineering technology, Mr. Balch has been awarded a National Science Foundation Grant for advanced study at Rochester Institute of Technology.

Also attending Rochester as a National Science Foundation scholar, is Granville Byrd of F.T.I.'s electronics engineering technology department.

On educational leave from Fayetteville Tech, Franklin Edwards is taking advanced study in micro-biology at East Carolina University.

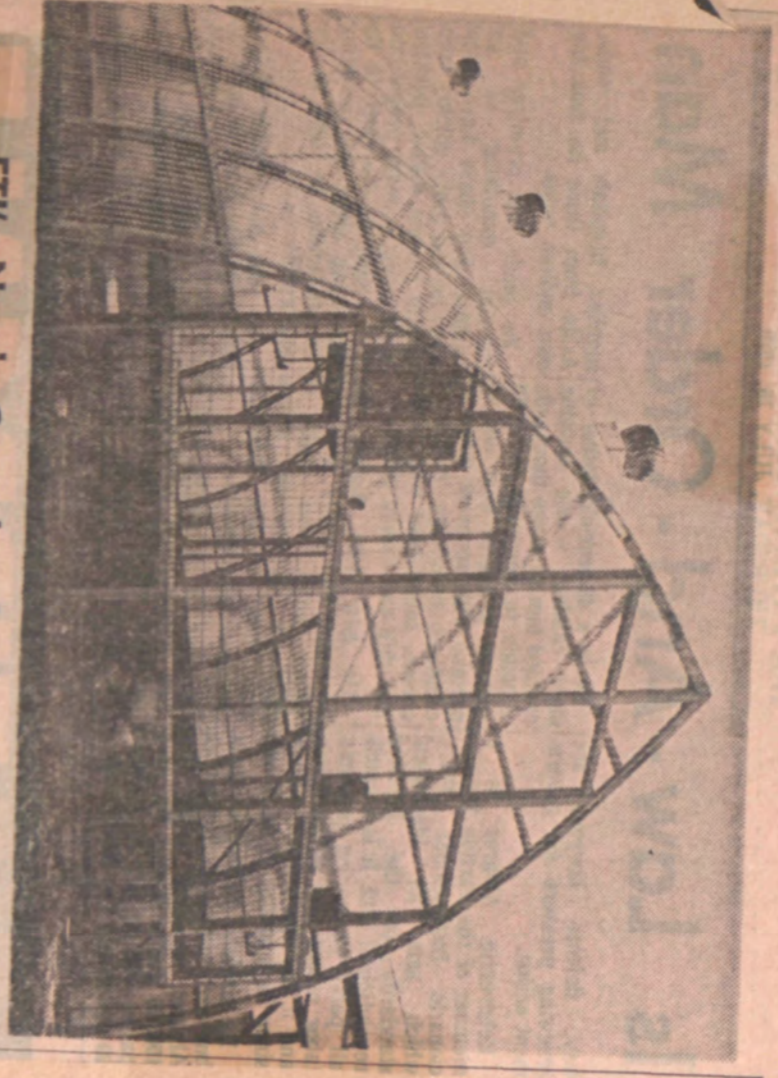

Attending the workshop for new faculty in associate degree nursing, Mrs. Bruce Hanley and Mrs. Bruce Langdon are enrolled at the University of Maryland representing Fayetteville Technical Institute.

RECEPTION—Mrs. I. J. Moore serves Howard Boudreau, president of Fayetteville Technical Institute, at Sunday's tea honoring the 1970 graduating class at F.T.I. Looking on are chairman

of the board of trustees, Thornton Rose, dean of Student Affairs, Niles E. Compton, and dean of instruction, William Sease.

FTI's Newly-Completed Greenhouse

Greenhouse Completed

Fayetteville Technical Institute's newly-completed greenhouse is ready for the opening of the fall quarter. Plants and shrubs will be provided by N.C. State University's School of Horticulture.

The building was completed under the direction of Walter Croon, department chairman of the agricultural business curriculum. Temperature control was installed by F.T.I.'s air conditioning technology personnel.

A recent hail storm damaged some panels of the building, but Croon optimistically remarked that "it will be a good opportunity for showing the students how to repair such damage" and he will demonstrate the technique on class.

Graduates of F.T.I.'s agricultural business technology program are prepared to enter the fields of production of agricultural products, marketing and processing and agri-businesses which work directly with farmers.

Today's trend toward larger farming operations and non-farm control of production has created many employment opportunities for these graduates in the Cumberland County area.

In-the-Field Training

By JOANN MacMILLAN

Seven civil engineering technology students are back in Fayetteville Technical Institute's classroom after spending spring quarter in an experimental co-op program with North Carolina's Department of Highways.

These young men were selected because of their skill and interest in highway work and participated as F.T.I.'s first co-op study group.

The regular civil engineering tech course covers six quarters at Fayetteville Technical Institute. The co-op plan runs eight. However, this program does not extend beyond two years because the quarters are absorbed into the summer sessions allowing students to graduate within the time usually allotted for an associate degree.

They attend regular classes for two quarters of academics and return to class for two more quarters. With 14 members in the class, seven are in the field while the others are on F.T.I.'s campus.

This initial co-op program offered a special educational opportunity to the participating students. James Britt Jr., a graduate of Fayetteville High School, and Donald Collier from Central High

were assigned to the Asheville area to work on Interstate 40 after attending regularly scheduled classes during fall and winter quarters at F.T.I.

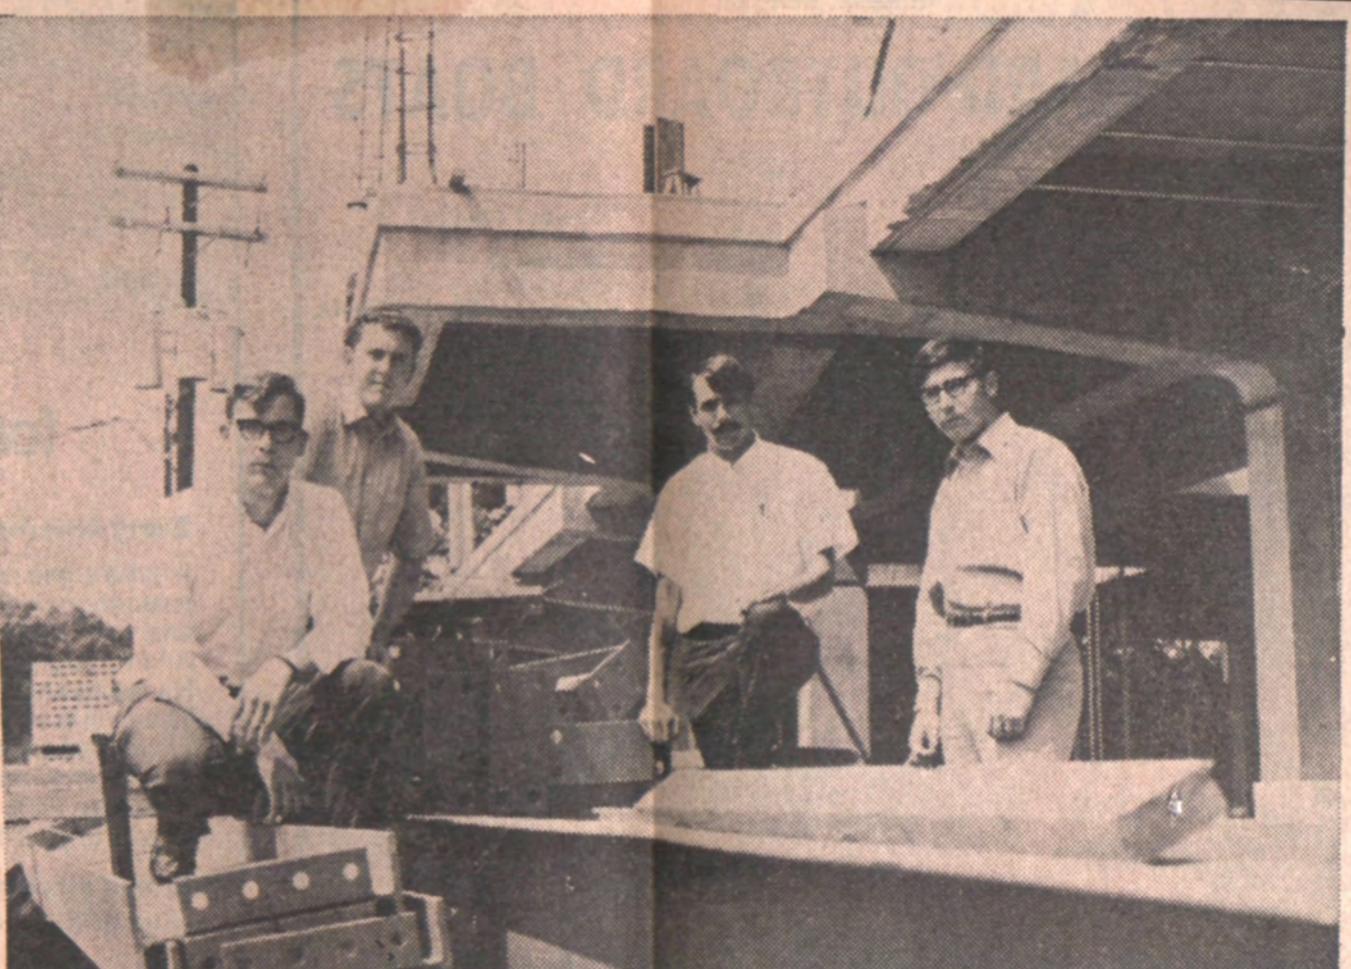

Charlotte Project

James Vascovich, a Terry Sanford High School graduate, and Philip Stephan from New York's Allegheny Central High were assigned to Beltway Construction in Charlotte.

Neil Kaiding, class of '57 at Booneville High, N.Y., remained in his present hometown of Clinton for the quarter. Richard Helfast Jr., a graduate of Pine Forest, and Henry Mullen, class of '55 at Bunn High, were assigned to the Cumberland County area.

Kaiding and Mullen had worked previously with the N. C. Highway Department and each decided to enroll in F.T.I.'s civil engineering technology curriculum in order to up-grade their positions. They found Fayetteville Tech's one-year pre-technical program helpful preparation for returning to the classroom.

"The most difficult thing was simply learning to study again," admitted Mullen.

Civil engineering technology students Donald Collier, James Britt, Phillip Stephan and James Vascovich discuss girder design and function.

Seek Degrees

The five other members of the co-op group plan to continue beyond the two-year curriculum and earn a bachelor of applied science degree in civil engineering technology from the University of North Carolina at Charlotte.

The co-op idea is employed by many of the members of North Carolina's Community College System. At F.T.I., under the direction of Robert Carn, the students selected must agree to the eight-quarter system and follow through to graduation while maintaining a minimum grade point average of 2.0.

Robert Carn, department chairman, is a graduate of Pennsylvania State University and holds a bachelor of science degree in civil engineering. He has had 10 years' experience in heavy construction work and was retired as a lieutenant colonel after 30 years' service in the Army Corps of Engineers.

Did the instructors find any change in the students after

their on-the-job experience? "Our teachers found them a far more responsive class after being in the field," stated Carn. "There simply is no substitute for this kind of learning."

How did the students react to the spring quarter on the job?

"It was much more interesting than being in class all day," said Vascovich, "however, more hazardous."

Fled Explosion

"Once you got used to dodging traffic you felt pretty safe," agreed Britt, "but one day the crew on the other side of the mountain forgot to warn us they were blasting. We heard an explosion; the sky turned black, and rocks were falling in all directions. We retrieved our instruments and ran like crazy!"

"I had to kill two water moccasins in a ditch on the Raleigh Road," volunteered Helfast. "Just one more thing to look out for."

Is conservation a concern of civil engineering?

"Indeed it is," agreed Carn, "however, the engineer

must see both sides of the issue and be sure what he plans is both economically feasible as well as within the concerns of the conservationist."

What place does the technician have in the field of civil engineering today?

"Sixty percent of our graduates go to work for the N.C. or Georgia State Highway Commissions in the construction, field location, roadway design, maintenance, traffic engineering or photogrammetry departments. The others find employment in airport construction and maintenance, city engineering, urban renewal, railways or U.S. Geodetic Survey and consulting engineering firms.

"All of these are the responsibility of the technician. The engineers do the research and development. They dream and theorize. The technician does the doing."

"Just keep in mind," said Kaiding, "civil engineering technology involves more than bushaxes and bulldozers — it's an interesting and challenging field."

Symposium Is Planned

Fayetteville Technical Institute will hold a business and industry symposium Wednesday and Thursday.

W. Richard Bryan, executive director of community services for the Goodyear Tire and Rubber Co., parent company of Kelly-Springfield, will be speaker at a banquet at Green Valley County Club, initiating the two-day conference.

Purpose of the symposium is to "promote continuing education in the Cumberland County area," FTI officials said.

Twenty seminars will be held on the FTI campus.

Approximately 200 persons are expected to participate, and plans are to make the event an annual affair.

Orientation Held

FTI Names New Faculty Members

Orientation for new faculty members began Monday at Fayetteville Technical Institute. During the three-day program, these instructors were introduced to the various departments and curricular offerings at Fayetteville Tech. On Tuesday they visited Richmond Technical Institute and Sandhills Community College, sister institutions in North Carolina's community college system.

Simpson is a graduate of the University of Tennessee where he earned his B.S. in finance and master's degree in business administration.

Fear Valley's Mental Health In-Patient Service will also be a part time instructor in the ADN program; Mrs. June Hanley, R.L.N., received her B.S. degree in nursing from New York University.

earned her undergraduate degree in religion at Shorter College, Rome, Ga., and her master's of divinity degree from Duke University. She was formerly with the Cumberland County Mental Health Center.

A registered nurse, Mrs. Marie N. Kelley, who was a charge nurse at Cape Fear Valley Hospital, will be a full-time instructor in the associate degree nursing curriculum. Her B.S. degree is from Northwestern State College in Louisiana.

Two counselors with master's degrees in Guidance and Personnel Services from N.C. State University were added to the staff, Mrs. Helen C. Winstead and John T. Fernald. Both were previously associated with the Cumberland County Board of Education as counselors. Mrs. Winstead holds a B.S. degree in education from Pembroke; Fernald received his B.A. from U.N.C.

Joining the faculty at F.T.I. are: Business administration instructors William T. Hall and Jimmy B. Simpson. Hall received his B.S. and Master's degrees from East Carolina University where he was an instructor prior to moving to Fayetteville. A former Western Carolina University instructor,

The associate degree nursing staff has four new members. Two registered nurses will be part time instructors, Mrs. Helen B. Langdon and Mrs. Susan R. Helvie. Mrs. Langdon holds a B.S. in psychology and biology from William and Mary College and a master's degree in nursing from Yale University. Mrs. Helvie, who has been a nurse with the Mental Health Center, received her diploma from St. Vincent's School of Nursing and took undergraduate work at Marion College, Indianapolis and Phoenix College in Arizona. Former head nurse at Cape

The newly appointed director of the evening school at F.T.I. is Thomas R. Koballa. He holds a bachelor's degree in history and education. Retired after 20 years' in service in the U. S. Army, Koballa has been director of the M.D.T.A. program and is now engaged in graduate work at N.C. State University.

From Austin, Texas where he was a senior research scientist, Jesse B. Waters joins the faculty as instructor of physics. He has an A.B. degree in math from East Carolina University and took graduate work at Virginia's William and Mary College in physics.

Mrs. Zoe Murphy will be a part-time instructor. She

FTI Counselor ABWA Speaker

John Fernald, counselor at Fayetteville Technical Institute, was guest speaker at the monthly meeting of the Marquis Chapter, American Business Women's Association, Tuesday evening at Green Valley Country Club.

Mr. Fernald used as his theme — "The Role of Fayetteville Technical Institute in the life of Greater Fayetteville."

Although this program offers adult education as well as courses offered to high school graduates, he stressed the advantages offered to those who cannot attend a four year college course. He pointed out that FTI is the "in between program that will give the student an opportunity to further his education and enable him to draw a good salary."

Mr. Fernald was introduced by Mrs. J. M. Jacobs, program chairman. A vocational talk was given by Mrs. Tom Bradford. She described her work as co-owner of TBA, Inc., a local tire service.

Highlight of the meeting was the presentation of scholarships which are offered annually by the Marquis Chapter. Mrs. L. R. Meissner, educational chairman, presented Miss Linda Di Cenzo, who is enrolled in degree nursing program at Chapel Hill, and Miss Cindy Force, who is enrolled at Fayetteville Technical Institute in the secretarial science program, as the scholarship recipients. The scholarship awards were presented by Mrs. E. G. Stoner, chapter president.

COMPLETE LPN COURSE: Completing the licensed practical nursing curriculum at Fayetteville Technical Institute were (left to right) front row, Brenda Wiseman, Deborah Stankwytych, Edith McLamb Wood, Anna Cornish, Elizabeth Garner, Yvonne

Pollhill; second row, Sharon Lee, Linda G. McColl, Mamie Burgos, Linda Orona, Mary B. Faircloth, Irma Chantre and Shelby Smith, who received their pins in a ceremony Friday. (Observer photo—Shaw)

At FTI Ceremony

Thirteen Women Receive Pins

Thirteen women received their pins from Fayetteville Technical Institute Friday marking their completion of the licensed practical nursing curriculum there.

Anna Cornish was recognized as holding the highest academic record for the twelve month program with a grade point average of 3.49. Mrs. Ada Leonard, R.N.

department chairman, presided at the pinning ceremony. Mrs. Janet Shipley, R.N. part-time instructor at F.T.I. assisted. Formal graduation exercises will be held for these students at F.T.I.'s regularly scheduled commencement next May.

After successfully writing the State Board of Nursing Examination for Practical Nurses, the F.T.I. graduates will receive their North Carolina licenses.

Among those completing the LPN program are: Mamie Burgos, Irma Chantre, Anna Cornish, Elizabeth Garner, Linda Orona, Yvonne Pollhill, Shelby Smith, Deborah Stankwytych, and Brenda Wiseman of Fayetteville. Class president, Sharon Lee of Erwin, Edith McLamb Wood of Lillington, Mary B. Faircloth of Hope Mills and Linda G. McColl of Raeford.

FTI's Business Seminar

Fayetteville Technical Institute probably undertook its just-concluded Business and Industry Symposium with some trepidation. It was not just a "first" for FTI but for the state's network of technical institutes. And its success could hardly have been any foregone conclusion.

That the seminar did succeed beyond expectations, attracting a large number of participants to a wide array of sessions, provides another striking example of the vitally important role the institute already plays in the economic advance of Cumberland County and this region of the state. It also emphasizes the even more significant part the institution can be expected to play in the life of this region in the future.

It seems particularly fitting, as well as beneficial for the community as a whole, for FTI to

launch an annual seminar on business and industry. The institute's resources for training personnel was an important consideration in the decision by several modern, well-paying industries to build plants in the Fayetteville area during the last several years. As a result of this economic development, the area is no longer entirely dependent upon nearby military installations for its prosperity and well-being but appears to be well on the way toward a more balanced and thus a healthier economic base.

The successful conclusion of FTI's symposium is an encouraging reminder not just of progress that has been made by the community in the past but also of even greater advance that should lie ahead if the area's leadership measures up to its challenges and opportunities.

Nursing Program Board Has Tea For Students

The board members of the Associate Degree Nursing Program of Fayetteville Technical Institute entertained the faculty and students at a get acquainted tea at the home of Mrs. Mildred Knowles Sunday at 2 o'clock. There are seventeen returning sophomores and thirty-five freshmen students in the nursing program.

incoming freshmen and introduced the faculty: Mrs. Mercedes O'Hale, director; Mrs. Mary James, and Mrs. June Hanley, second year instructors; Mrs. Judy Bradbury, Mrs. Marie Kelly and Mrs. Helen Langdon, first year instructors.

Mrs. O'Hale greeted the guests and gave a brief description of the program. The Associate Degree Nursing Program at Fayetteville Technical Institute is accredited by the National League of Nursing. It is two academic years in length, after which the graduates are eligible to write the state board examination for their license as a registered nurse.

The board members for the year 1970-1971 are: Mrs. Winnie Barnard, president; Mrs. Jean Kelly, vice-president; Mrs. Patsy Mathews, secretary; Mrs. Mildred Knowles, treasurer; and Mrs. Thelma Dove, reporter.

Mrs. Barnard welcomed the

The program, previously limited to four quarters, has been increased to six in order to train skilled technicians. Representing the architectural profession are Paul McArthur, William Laslett and Frank MacMillan. Henry Player will also serve on the advisory committee.

Dean of Instruction William Sease said the committee is needed to "keep instructional levels up to date."

FAYETTEVILLE Technical Institute has selected four consultants to guide its newly-expanding architectural drafting and building trades curriculum.

FTI GIFT—Daniel Meyer, executive secretary of the Blood Assurance Program, presents a check for \$5,000 to FTI President Howard E. Boudreau. Witnessing the presentation at left are Dr. Lyn Holzbach, chairman of the board of directors of the Blood

Assurance Plan in Cumberland County, and Mrs. John O'Hale, director of the Health Occupations Divisions at FTI. At right is Mrs. Richard Kelly, Scholarship Committee chairman for BAP. (Observer photo—Meadows)

Gift From Blood Assurance Program To Aid Medical Career Students

Fayetteville Technical Institute President Howard E. Boudreau, today announced that a gift of \$5,000 from the

Blood Assurance Plan of Cumberland County will assure eight medical personnel of financial

assistance this year as students at Fayetteville Technical Institute.

Established in 1962 as a non-profit organization, the Blood Assurance Plan offers continuous service to the citizens of this area. Under their program, a member of a family agrees to supply one pint of blood each year to the bank. In the event any member of that family requires blood during the year, it is readily available, and only a small laboratory fee is charged.

"One of the most important aspects of the plan is that our files have donors listed for emergency use," explained Mrs. Richard Kelly, chairman of the scholarship committee, "and the rare blood types can be contacted immediately."

Repayable from one to five years following graduation, the \$5,000 gift will serve as a continuing pool of financial assistance to F.T.I. students enrolled in associate degree nursing, licensed practical nurse education, and next year in the dental hygiene curriculum.

FTI Notes 3,600 In Programs

This fall 3,613 people are involved in educational experiences through Fayetteville Technical Institute, the largest technical institute in North Carolina's community college system.

In FTI's daytime enrollment, 20 Tar Heel counties, 11 states and five foreign countries are represented, bringing the total to 886 students in the regular curriculum. Cumberland leads the list of counties with 668 students followed by Harnett with 66, Sampson 38 and Robeson, 31.

Other counties include Alamance, Bladen, Carteret, Columbus, Craven, Davidson, Guilford, Hoke, Johnston, Lee, Moore, New Hanover, Pitt, Randolph, Richmond and Scotland pupils.

As part of the North Carolina Community College system, FTI serves an additional 2,728 adults through its evening program, learning lab, basic adult and extension education, and manpower development training act facility.

Under the supervision of William Bryant, FTI's extension director, 588 adults have already participated in some form of continuing education this fall and new programs designed to improve vocational skills start monthly.

For the pre-literate, and from grades 1 through 12, there are courses in adult basic education offered by Eli Anderson's adult education division. At the moment, 879 are working toward educational goals previously unrealized.

'MISS FTI' AND COURT — Leona Topp, 'Miss FTI, 1970', poses with runners-up. Shown (left to right) are Carol Thompson, 4th runner-up; Sylvania

Flowers, 3rd runner-up; Miss Topp; Ivy Vaughn, 1st runner-up; and Linda Smotherman, 2nd runner-up.

Miss Topp Picked At FTI

Mayor pro tem and member of Fayetteville Technical Institute's Board of Trustees, Harry Shaw, crowned Miss Lenora Topp "Miss F.T.I., 1971" at the annual Harvest Ball Saturday night. A second-year student in electronic data processing curriculum, Miss Topp was chosen by ballot of the student body. She is the daughter of Mr. and Mrs. R. G. Topp of Fayetteville and a graduate of R. J. Reynolds High School in Winston-Salem.

Runners-up for the Miss F.T.I. honor were Ivy Vaughn, first runner-up; Linda Smotherman, 2nd; Sylvania Flowers, 3rd; and Carol Thompson, 4th.

The contest was directed by Tyce Lovette assisted by Dan Pieffer. The Harvest Ball, attended by more than 400 students, was held at the Jaycee Civic Center at the Fairgrounds.

Boudreau Cites FTI Progress

Growth of the physical plant of Fayetteville Technical Institute from a single \$466,000 building to a complex valued at \$4.5 million was outlined here Monday night by Howard Boudreau, president of the institution.

In a talk before the local Rotary Club, Boudreau said there have been three major expansion programs at FTI. The first was a \$445,000 addition to the original building in 1965, four years after the institute was opened.

A \$240,000 engineering and technical building was started in 1967 and a \$900,000 expansion project on this building is now underway, he said. Also under construction is the Paul H. Thompson Library, which is being built at cost of \$700,000 and is expected to be completed in January. New library will include a lounge, cafeteria and recreation room for FTI students.

Boudreau said students enrolled in building trade classes at FTI have constructed several buildings now in use at the institute. These include structures used for offices and institute programs, a large greenhouse and a large brick storage building.

The FTI president said that approximately 70 per cent of the students now enrolled at the institute come from Cumberland County. He predicted that enrollment next year will be about 1,100 students.

He said there is a growing need for a two-year college program at the institute.

Boudreau, introduced by Dr. Robert Stapleton, showed slides of construction programs at the institute.

FTI Engineer Course Wins Accreditation

The mechanical engineering curriculum at Fayetteville Technical Institute has been accredited by the Engineers' Council for Professional Development.

It is the fourth curriculum at FTI to be accredited by the council. Only one other member of North Carolina's community college program has matched that record.

William Sease, dean of instruction, said, "What this accreditation means to the student is that he can be assured of the level of quality education he is receiving at F.T.I. whether he enters employment upon graduation or continues to work toward a baccalaureate degree in engineering technology."

FTI has 36 students working toward an associate degree in the mechanical engineering department, department chairman Joseph Hunt said.

Nurse Students At FTI Receive Green Stripes

Green velvet stripes, signifying second-year status for associate degree nursing students at Fayetteville Technical Institute, were presented by Mrs. Mercedes O'Hare, chairman of the Health Occupations Division, at the first meeting of the Student Nurses' Association September 15.

The program for the meeting was presented by the sophomores and included a skit entitled "The Professional, and Non-professional Nurse".

Officers for the year were selected: Mrs. Winnie Barnard, president; Mrs. Jean Kelly, vice president; Mrs. Patsy J. Matthews, secretary; Mrs. Mildred Knowles, treasurer and Mrs. Thelma Dove, reporter.

Eighty-Five Students On FTI Prexy's List

Eighty-five students of the nine hundred enrolled in the fall quarter at Fayetteville Technical Institute have been selected for the President's list. Each student chosen has earned a grade of "B or better." Those qualifying are: Kenneth Averitte, Douglas Barefoot, Winnie Barnard, Gary Beasley, Donal J. Bennett, Thomas Billings, Michael Bradley, James Britt, Richard Beck, John Brown, Dennis Cashwell, Larry Chappell, Charles Clapper, Donald Collier, Donna Corbin, James Crabtree, Elwood Currier, and Joseph Dunneho.

Also: Janet Edelman, Barbara Emery, Thomas Fleming, David Floyd, John Foy, Mike Fussell, Howard Grantham, Johnny Gregory, Jack Gilmore, John Golski, Richard Halfast, Henry Harris, John Hilderbrand, James Honeycutt, Judy Hood, Lloyd Jackson, Brenda Jackson, Kendall Jamlson, Ernest Johnson, James Jones, Shiela Jones, Neil Kaiding, Jean Kelly, Mildred Knowles, Walter Kolody, Charles Kurzendoerfer, Henry Latham, Lloyd Lee,

Judith Lockamy, Valerie Lugo, William McNeill, Howard McRae, Gayle Martin, Sharon Mason, Douglas Mearns, Nancy Melvin, Sandra Merritt, Anthony Mikolajczyk, Russ Morris, Henry Mullen.

Adrina Nicholson, Broncho Naylor, Bobby Perkins, Eddie Pierce, Robert Pleasant, Jean Provost, Michael Quarterman, Dempsey Ray, Joyce Richardson, Jonathan Rovira, Norman Russ, Harold Sinclair, Harold Smith, John Spars, Joe Spearman, Thomas Stovall, Phillip Stephan, Charles Sutton, and Joene Timmons.

James Vascovich, David Walters, Patricia Warren, Debbie West, Morrison West, Catherine Wilt, Randall Williams and Thomas Wooten.

Boudreau (right) greet Chairman of the Board of Trustees Thornton Rose and Mrs. Rose at Fayetteville Technical Institute's annual evening in the Exposition Room of the Downtowner Motor Inn. Henry A. Rankin Jr. (center), immediate past-president of the board is also shown in the receiving line. Two hun-

dred and eight guests and members of the faculty, administration and staff attended. The Yuletide holidays for F.T.I. began Friday with classes resuming on Monday, January 4. Door prizes for the banquet were contributed by area industries. Musical entertainment was provided by the F.T.I. chorus, directed by Grady McKeithan, and organist Tom Shaw.

F. T. I. Engineers Hear Address By Charles Purcell

The necessity of keeping up to date with the almost daily engineering was the emphasis of an address by Charles Purcell Jr. to the Fayetteville Tech student chapter of Civil Engineering Society on Monday.

Purcell, formerly on the faculty at Fayetteville Technical Institute, is now affiliated with a local consulting engineering firm.

To the forty FTI students enrolled in civil engineering technology, Purcell stressed the importance of becoming involved in community concerns and advised them to endeavor to become certified as junior engineering technicians upon graduating from Fayetteville Tech.

Brenda Jackson

Student Nurse Of Year Announced By F. T. I.

F.T.I.'s "Student Nurse of the Year" is Miss Brenda Jackson, daughter of Mr. and Mrs. Willie Jackson of Wilmington Highway, Fayetteville. She will represent Fayetteville Technical Institute in the District 9 competition on December 9 in Fayetteville.

Other participants to compete for the title will be selected from the nursing program at Hamlet, Sandhills Community College and Southeastern Community College.

A 1969 graduate of Massey Hill High School where she was a member of the National Beta Club, Miss Jackson was chosen from a class of twenty-seven to represent her curriculum at Fayetteville Tech.

Last year's nominee from F.T.I. was Mrs. Winnie Barnard, who was chosen the District 9 "Student Nurse of the Year" at the Sandhills competition.

Scott Proclaims Student Nurse Week

Governor Robert Scott has proclaimed November 6-13 Student Nurse Week in North Carolina. The student nurses at Fayetteville Technical Institute are celebrating the week in various ways. On Monday, the students wore their uniforms to class in celebration of their special week; uniforms are normally worn on the job training.

To become a registered nurse, the graduates of Fayetteville Technical Institute's Associate Degree Nursing curriculum must successfully write the North Carolina State Board Examination. During their two years of study at F.T.I. the students must maintain a minimum 2.0 average. Their instruction includes not only classroom

teaching but actual clinical experiences at Womack, VA and Cape Fear Valley Hospitals under the supervision of F.T.I. faculty members. They also observe procedures at a local day nursery, pediatricians' office and nursing home.

The five faculty members of Fayetteville Tech's ADN program are registered nurses and each instructor holds at least a baccalaureate degree in nursing. The department is under the direction of Mrs. Mercedes O'Hale, R.N., chairman of Health Occupations Division at Fayetteville Technical Institute. She is a graduate of the University of Chicago with a Master's Degree in Administration of Schools of Nursing and Nursing Services.

MEDICAL-SURGICAL NURSING — Student nurses Thelma Dove, Jean Kelly, Mildred Knowles and Winnie Barnard (president of F.T.I. Student Nurse Association) listen attentively

as Mrs. Mary James, R.N., and instructor in Fayetteville Tech's Associate Degree Nursing Curriculum, discusses a problem in medical-surgical nursing.

STUDY LAB — Using programmed material, student nurse Donna Corbin is seated before the screen in the individual study laboratory at F.T.I.

TENDER LOVING CARE — F.T.I. Student nurse, Mrs. Patricia Warren, gives old-fashioned loving care to six-month old Christopher Surey at Cape Fear Valley Hospital. Approving the procedure is Mrs. Marie Kelly, R.N., member of Fayetteville Technical Institute's Associate Degree Nursing faculty. Baby Christopher is the son of Mr. and Mrs. Stoney Surey. Mrs. Warren, wife of C. B. Warren, Jr., of Fayetteville, is the daughter of Mrs. Ruth Cox of Sanford. Eight weeks into the Associate Degree Nursing program at Fayetteville Tech, freshmen are studying Human Life Span and receiving clinical experience at local hospitals. Commitment to the education of the student brings better patient care through the facilities and curriculum provided by F.T.I. (Photo—Tommy Payne, FTI Student)

Eighty-Five On FTI

Eighty-five students, nine hundred enrolled fall quarter at Fayetteville Technical Institute have been selected for the President's Honor Roll. Each student chosen earned a grade of "B or better." PARTICIPANTS — Four of the 20 Fayetteville police officers who took part in the Fayetteville Technical Institute human relations course are pictured here with their instructor. From left, they are Capt. Basil Fouk, instructor Mrs. Zoe Murphy, officers David Higgins and Joe White, and detective Fred Boone.

Police Take Look At Selves, Others

Twenty Fayetteville police officers have just completed a course designed to aid them in dealing with the community and each other.

It was an unqualified success.

For nine days this month, the officers attended three-hour daily classes at Fayetteville Technical Institute in addition to their regular tours of duty.

The course offered the officers personality theories and the understanding of human behavior.

One topic of discussion was the theory of self-actualization, or the necessity for fulfillment of physical, psychological and safety

'We Can... Now Change Things For The Better'

needs as well as the development of self-esteem in order to reach fuller potentials and deeper relationships with people and the world."

Mrs. Zoe Murphy, a psychology instructor at FTI, was instructor for the classes.

Officers taking part were Capt. Basil Fouk, Cpl. William Davis, Cpl. J. M. Riddle, and officers James Baxley, Joe Bell, Terry Botoms, Carl Campbell, William Freeman, Russell Ham-

macher, David Higgins, Roger Holman, Glen Nash, Sam Pearson, Alfred Post, John Rinder, James Sawyers, Robert Shambley, Carson Stewart, Joe White, and detective Fred Boone.

The classes were in addition to the 120 classroom hours received at FTI in areas including mob control, crime investigation, and drug abuse.

One officer said "I worked from 7 to 3, came to class at 3:30, left at 6:30 and went back to the station at 8

o'clock for night duty. That didn't leave much free time but I enjoyed the sessions and learned a lot from them. If we had another class like this, I'd join."

Another officer remarked "I believe everyone in the classes can go out now and help change things for the better."

Bill Bryant, director of continuing education at FTI, said "the series is one more step in helping to present a more positive picture of our law officers who daily protect our lives and property. Perhaps the training will help, too, in attracting qualified personnel to serve as law enforcement officers."

Work Underway On City Rose Garden

By FRANCES HASTY

The establishment of a city rose garden, one of the original projects planned by Fayetteville Beautiful, is becoming a reality.

During the past week, workmen began preparing ground at the corner of Hull Rd. and Devers St. on property belonging to Fayetteville Technical Institute, where in March, 200 rose bushes will be planted in the first stage of the garden.

According to Mrs. W. C. Miller Jr., publicity chairman for Fayetteville Beautiful, the roses are being donated by Jackson and Perkins Company of Medford, Ore. Additional roses will be planted in subsequent years until approximately 730 roses will complete the garden. Roses of all types and varieties will be featured in what is hoped to provide an area of beauty for the community.

Various factors entered into the decision to locate the City Rose Garden on FTI grounds. First, according to Mrs. Miller, it should be in an area where it could be seen and enjoyed by large numbers of people. Maintenance was another important consideration. The FTI site ideally fitted the criteria, for not only is it located in a heavily traveled area, but FTI will provide valuable assistance as part of its horticulture class. The school will pay a gardener and carry out spraying and pruning.

The establishment of a City Rose Garden is a community effort, Mrs. Miller stressed. City street personnel and machinery are involved with the preparation of the soil with the help of FTI maintenance personnel. Fayetteville Beautiful, the Fayetteville Rose Society, and garden clubs in the city are joining in support with plants and materials for the project.

The experts in the Rose Society selected the plants that will be used and will supervise the garden, providing information on pruning, spraying, etc. Not only will the public benefit esthetically but also will reap gardening knowledge for pruning clinics will be held in the garden by the Rose Society, and information will be available on the care of roses for the benefit of the public.

On February 24, Fayetteville Beautiful will sponsor "Arbor Day Tree Planting" in the area, not on-

GARDEN SITE — Workmen clear the foundations of the old Honeycutt housing units in preparation for the City Rose Garden at the Corner of Hull Rd. and Devers St. Shown are (left to right) Andrew San-

ford, city employee, Artis Galbreath and Wailon Whitted, Fayetteville Technical Institute employees. FTI is shown in the background. (Observer photo)

ly for beautification but also for ecology, replacing, Mrs. Miller commented, some of the trees lost in road widening projects.

Dogwood trees will be planted on Hull Rd. from the entrance at Ft. Bragg Rd., back to Horace Sisk Junior High School and Fayetteville Technical Institute. The trees are being furnished by civic groups, garden clubs, Boy Scouts, Girl Scouts, the Fayetteville Woman's Club, Junior Woman's Club, and men's civic groups. Club members will be assisted in the planting by Park and Street Department personnel and members of the Pine Forest High School Key Club and Explorer Scouts.

Individuals can contribute

to beautification but also for ecology, replacing, Mrs. Miller commented, some of the trees lost in road widening projects.

Home owners are also being asked to plant trees on their own property, and many of the local schools are planting a variety of trees on school property throughout the city.

The establishment of a City Rose Garden and Arbor Day Tree Planting are two of five initial projects outlined by Fayetteville Beautiful since its establishment last spring. These two projects are being undertaken now so that the planting might be done at the proper season.

Other projects include an anti-litter campaign, to be climaxed in "Spring Cleaning Week", March 28-April 3; the

beautification of a second corner of Market Square; and an information and hospitality course in tourism.

The week of April 18-25 has been designated "Fayetteville Beautiful Week" when, Mrs. Miller said, "we can enjoy the fruits of our hard work." During the week, a number of special events are being planned including garden and historical tours and special presentations of a cultural nature.

Mrs. Dan (Julia) Reaves, Fayetteville Beautiful coordinator, and volunteers have been conducting an intensive campaign to get the message of Fayetteville Beautiful to the public. Mrs. Reaves and teams of volunteers have given numerous programs and are

available to any interested organization. A nineteen-minute film, "This Is Fayetteville?", helps illustrate the story. Mrs. Miller and Mrs. Thomas McCutchen, co-chairman of Fayetteville Beautiful, will appear and show the film on the Jim Burns Show on Channel 6 at 12:30 p.m. on February 22.

NEW BUILDING — Fayetteville Technical Institute President Howard Boudreau chats with a couple of students outside the new engineering building (background) on campus which has just opened. The tri-level structure offers 25,000 square feet of floor space for labs, classrooms, shops

and faculty office. Construction cost \$711,000 and another \$213,000 was spent to equip it. Chatting with Boudreau are Kitty Hubbard and Noel Bass, second year business administration students. (Observer photo — Shaw)

PLANTING BEGINS — Workers are shown planting the first of the rose bushes at the newly established Fayetteville Rose Garden on the grounds of Fayetteville Technical Institute. Shown in the center is Mrs. Vance Knight, who laid out the garden according to scale and joined in the actual planting

as a volunteer. Beside her is Mrs. Dan Reaves, Fayetteville Beautiful coordinator. FTI students and city employees are aiding in the project. Two hundred rose bushes have been planted, and it is planned to eventually plant 700 bushes. (Observer photo — Blount)

NILES COMPTON, dean of student affairs at Fayetteville Technical Institute, will participate in a joint conference of the Occupational Directors' Association and Student Services Personnel Association at Raleigh.

The sessions will be held Thursday and Friday of this week at the Hilton Inn. North Carolina Attorney General Robert Morgan will deliver a talk on "Responsibilities of Administrators in Post-Secondary Education" at a noon luncheon Thursday.

Other speakers will include Andrew Vanore of the at-

(Continued from Page 1B)

torney general's office, and Dr. Daniel Pollitt, professor of constitutional law at the University of North Carolina. Compton will sit on a panel Friday to discuss "Coordination and Interaction of Student Services and Instruction."

SMOKE TEST — These four environmental engineering technology students at Fayetteville Technical Institute are shown testing the emissions from a specially-

constructed smoke stack. From left, they are Henry Massey, Kitty Kramer, Nancy Melvin, and Joe Stanish. (Observer photo — Blount)

FTI Students Selected For 'Who's Who'

Nineteen Fayetteville Technical Institute students have been included in the 1970-71 edition of "Who's Who Among Students in American Junior Colleges."

Students were selected for their academic achievement, service to the community, leadership in extra-curricular activities and future potential by a campus nominating committee and the editors of the annual directory.

Students named are: Mrs. Winnie Barnard, John Brown, Dennis Cashwell, Joseph Dunneho, Jack Gilmore, Johnny Gregory, Mrs. Jean Kelly, Mrs. Mildred Knowles, Mrs. Gayle Martin, Mrs. Sandra Merritt, Edward Pierce, Dempsey Ray, Joe Spearman and Mrs. Delores O'Neal of Fayetteville; Gary Beasley of Dunn; Noel Bass and Thomas Wooten of Newton Grove; and Marie Shaw and Morrison West of Spring Lake.

Six hundred institutions from the United States and other countries of North and South America participate in honoring outstanding young men and women in their junior colleges.

FTI Graduates In Demand

By JOANN MacMILLAN
Despite the nationwide slowdown in employment opportunities, skilled craftsmen continue to be in great demand.

"This year," commented Niles E. Compton, dean of student affairs at Fayetteville Technical Institute, "there will be approximately 100 different companies visiting the F. T. I. campus to recruit skilled graduates."

Apparently they were confident I'd be around long enough to complete it, so I started work with the help of over 20 competent officers.

Bryant, North Carolina State University doctoral candidate now serving his internship at Fayetteville Tech, is that society must realize the importance of working with one's hands and mind and no longer consider such careers demeaning."

As pay scales elevate in occupational areas, the demand for highly trained personnel increases, there will be a dollar or two a day for anything the rail-

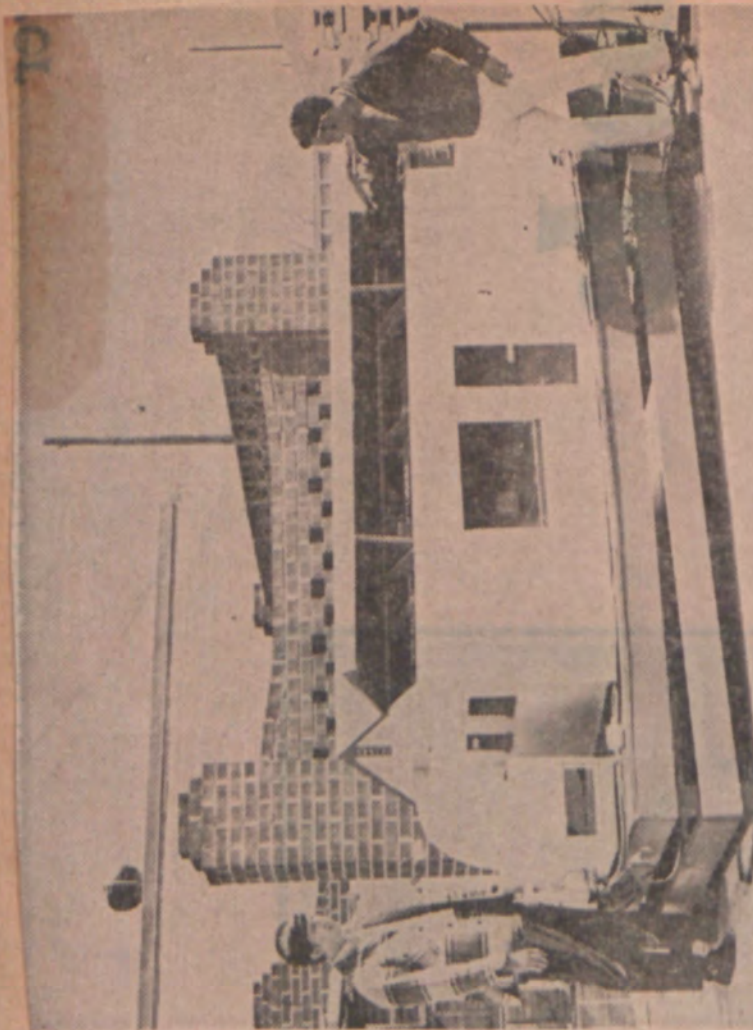

roader, Dr. McMillan

McArthur Firm Picked To Design New FTI Building

Paul McArthur, Architect and Associates has been chosen to design the new Fayetteville Technical Institute administration building, it was announced today by FTI President Howard Boudreau.

Plans for construction of the \$225,000 building are expected to be completed later this year and the 15,000-square foot structure ready for occupancy in 1972.

JAMES SPENCE

Spence To Address Graduates

James R. Spence, president of an Orlando, Fla. bank and a former Fayetteville attorney, will address the Adult High School graduation class of Fayetteville Technical Institute tonight.

Ceremonies for the 375 graduates will be held in the Cumberland County Memorial Auditorium beginning at 8 o'clock.

Others on the program will be Dr. C. R. Edwards, pastor of First Baptist Church on Moore Street; Howard Boudreau, president of FTI; Thornton Rose, chairman of the board of FTI; E. H. Anderson Jr., director of adult education at FTI; and C. Heid Ross, superintendent of Fayetteville City Schools.

Spence is president of the South East National Bank of Orlando. He predicted law here from 1956-59. He later was associated with the old Scottish Bank here as trust officer.

He has been active in public and civic affairs in North Carolina, including serving on the Education Task Force of N. C. from 1969-70, and the State Committee for Continuing Study of High Schools, Junior High Schools and Elementary Schools from 1970-71.

He has written a book, "The Making of a Governor," which was published in 1968.

Nursing Graduates Honored At FTI Luncheon

Fifteen young women were honored with a sendoff into nursing careers Saturday at a luncheon given by Fayetteville Technical Institute for its associate degree nursing graduates.

The nurses have completed a two-year course which qualifies them to become registered nurses upon passing the North Carolina state nursing exams this summer.

Several speakers alluded to the fact that only three single girls remain in the class, most of the rest having married during their two year nursing course at the community college. The married nurses and

their husbands have a total of twelve children "more or less," according to Mrs. John O'Hale, chairman of the Health Occupations Division at FTI and hostess for the luncheon held in the Straac Lounge at Ft. Bragg's officers club.

Featured speaker was Dr. Eloise Lewis, dean of the school of nursing at UNC-G, who used an analogy to the five fingers of the hand to urge the graduates to mix professional skill, concern for the patient, and attention to needed changes in the delivery of health care in pursuing the excellence in

their careers. Guests present included Howard Boudreau, president of Fayetteville Technical Institute, as well as William E. Sease, dean of instruction at the school. Several members of the advisory board of the Institute were also present.

The pinning ceremony, a traditional feature of many nursing graduations in the nation was retained by the FTI nurses although speakers alluded to the fact that many schools have chosen to discontinue the custom.

Graduates are Judy Blair, Judy Lockamy, Janet Edelman, Winnie Barnard, Jean Kelly, Thelma Dove, Sharon Mason, Sandy Cash, Wanda Gillard, Patsy Matthews, Mildred Knowles, Nancy Cone, Arlene Lucas, Denise Pottorff, and Elaine Webb.

The FTI program is the Fayetteville area's only source of registered nurses. Students receive clinical practice training in work at Cape Fear Valley Hospital, Womack Army Hospital, the Mental Health Center, Veterans' Administration hospital, and in private practices and clinics in the city and the area.

Miss Pamela McDaaney

MRS. JOHN O'HALE and Misses Kendall Jamison and Brenda Jackson have returned from Dallas, Texas, where they attended the National League for Nursing Convention. Mrs. O'Hale is chairman of the Health Occupations Division at Fayetteville Technical Institute. Miss Jackson is president of the North Carolina Student Nurses Assn., representing 43 nursing programs in North Carolina. Miss Jamison is president of the District 9 Student Nurses Association which includes Sandhills Community College, Southeastern Community College, UNC at Wilmington, Hamlet School of Nursing, and FTI.

FTI Sets Graduation

The ninth annual commencement exercises for graduates of Fayetteville Technical Institute will be held tonight at Cumberland County Memorial Auditorium.

State Sen. John T. Henley, will address the graduates and guests.

Marshals, chosen from the first year class on the basis of their high scholastic averages, are: Bobby Perkins, Chief Marshal; Valeria Lugo; Randall Williams; Nancy Melvin; Walter Kolody; Patricia Warren, Charles Clapper; Adrina Nicholson; Michael Quarterman; Ernest Johnson; Harold Smith; and Hosea Ray. Pickett Jamison and Douglas Mears will serve as alternates.

Music will be provided by the F.T.I. chorus under the direction of Grady McKeithan with Tom Shaw as organist.

FTI Graduates 200 In 9th Commencement

Ninth annual commencement exercises for graduates of Fayetteville Technical Institute were held Thursday at Cumberland County Memorial Auditorium.

Winner of the "Outstanding Student" award was Gary B. Beasley. The son of Mr. and Mrs. Bruce E. Beasley of Dunn, he is a graduate of Dunn High School and majored in electronics engineering technology at F. T. I.

With a perfect 4.0 average in the accounting curriculum, Mrs. Sandra Marie Merritt was presented with the Two Year Associate Degree Scholastic Award. Mrs. Merritt is the wife of Major Richard Merritt, Jr., U. S. Army, assigned to Vietnam. She holds a Bachelor of Science Degree in English from Cornell University and is the mother of four children.

Also graduating with honors was the recipient of the Two-Year Vocational Curriculum Award, Dennis Vinson Cashwell. A member of the 1970-71 Who's Who Among Students in American Junior Colleges, Cashwell earned a perfect 4.0 average for six consecutive quarters in the machinist curriculum. He is the son of Mr. and Mrs. Colon Cashwell of Fayetteville and a 1969 graduate of Massey Hill High School.

Mrs. Anna Marie Cornish received the One-Year Curriculum Scholastic Award. She is the wife of Sgt. W. F. Cornish now stationed in Vietnam. She achieved a quality point average of 3.50 during

her enrollment in the practical nurse education curriculum at F. T. I. Mrs. Cornish is presently employed at Cape Fear Valley Hospital.

Receiving the Citizenship Award was Mrs. Carol Bryant Bachelor, secretarial science student and wife of SFC. Billy Bachelor of Fort Bragg. This award is given to the student who most typifies the highest qualities of good sportsmanship, integrity and college loyalty.

Twenty of the 200 graduates of the class were awarded honors as a result of achieving scholastic averages of 3.50 or better during their tenure at Fayetteville Tech.

Members of the class are:

- CANDIDATES FOR DEGREES**
- Accounting — Douglas Barefoot, Johnny Gregory Jr., Sandra Merritt-x, David Brown, Bonnie Hayes, Stephen Horne, Harry Jackson, Mike Medina, Michael Murphy, Jack Woodward.
 - Air Conditioning and Refrigeration Technology — Glen Crapp, James Honeycutt, James Jones, Thomas Lancaster, Charles Pate, John Seagraves, Freddie Sand, Preston Williams, Thomas Wooten-x, Michael Yates.
 - Associate Degree Nursing — Winnie Barnard, Sandra Cash, Nancy Cone, Thelma Dove, Janet Edelman, Wanda Gillard, Jean Kelly, Mildred Knowles, Judy Lockamy, Carrie Lucas, Sharon Mason, Patsy Matthews, Camia Pottorff, Judy West.
 - Business Administration / Noel Bass-x, Jeffrey Blalock, John Bullock, Pauline Cromartie, William Graham, Robert Keller, Ann Lee, John Lee, William McDaniel, William McFadyen, Dominic Marinello, Gregory Massengill, James Matthews, John O'Brien, Edward Parker, Philip Porter, James Roberts, John Sessoms, Leonard Shaw Jr., Richard Simpson, Penny Stewart, William Strickland, Robert Wilkerson, Charles Williams, Kenneth Williard, Kenneth Lee.
 - Civil Engineering Technology — Joseph Dunahoo-x, Charles Edens, Charles Haas III, Lloyd Lee-x, Claude McArthur Jr., John McMillan, Abner Martin Jr., Gary Horne, Harold Lassiter Jr., James Williams.
 - Electronic Data Processing — John Brown-x, Douglas McRee, Gayle Martin-x, Russell Morris Jr.-x, Deloris O'Neal, Robert Pleasant, Joseph Woodyard.
 - Electronics Engineering Technology — Archie Aries, Gary Beasley-x, Richard Bordeaux, Joseph Childress, Danny Ingram, Kenneth Jackson Jr., Ben Jernigan, Charles Krantz, Pedro Lai, Jimmy Lockamy, Hugh McArtan, John McCallum, Thomas Payne, Ronald Penzo, James Ross, James Taylor, Earl Yundak, Clayton Villareal, Charles Williamson, Mayuree Wonghanchao.
 - Environmental Engineering Technology — Robert Geddie, Thomas McNicholas Jr., Thomas Matlock, Dempsey Ray Jr., Rodney Tart.
 - Mechanical Engineering Technology — Billy Barefoot, Larry Boan, Dennis Carter, Arthur Driscoll Jr., Donald Edes Jr., Danny Faircloth, Rick Ferrell, Harvey Flowers, Jack Gilmore-x, John Golski-x, Donnie Goodrich, David McKethan, George Matias, Crescent Nichols, John Pruitt, Johnny Raynor, Wayne Sessoms, William Tedder, Jayron Wonghanchao.
 - Secretarial Science — Janet Adams, Carol Bachelor, Linda Briggman, Frances Jennings, Shirley Moore, Diane Penny, Janet Shaw-x, Jane Stordahl.
- CANDIDATES FOR DIPLOMAS**
- Air Conditioning Mechanics — Larry Childers, Claude Dowd, Lloyd Jackson Jr., Jackie McLamb, William McNeil, Ronald Smith, Donnie Wood, Larry Woodson.
 - Architectural Drafting — David Buchanan, Danny Locklear, Charles Piner III, Charles Reed, Maynard Rock, Barney Seal.
 - Automotive Mechanics — Donald Bennett, Thomas Billings, James Epps, John Foy, Harold Holcomb Jr., George King III, Jimmy Lee, Edward Pierce-x, Lacy Ray III, Joe Spearman, Morrison West Jr.-x.
 - Machinist — Roger Barbour, James Beasley, Dennis Cashwell-x, James Crabtree, Wayne Dallas, Furman Evans, Ervin Farmer Jr., Johnny Jones, Harry Locklear, Robert Lee, Sherwood Morgan, Bruncho Naylor-x, Practical Nurse Education — Mamie Burgos, Jean Chanre, Anna Cornish-x, Mary Fritchell, Elizabeth Garner, Sharon Lee, Linda McCole, Linda Oruna, Yvonne Pollitt, Shelby Smith, Deborah Stankewich, Brenda Wiseman, Edith Wood.
 - Tool and Die Making — Richard Beck-x, Larry Chappell, Thomas Funnig-x, Joseph Fussell, Henry Latham, George Rues, Harold Sinclair, John Sparr Jr.-x, Thomas Sivall.
 - Welding — Frank Bagley, Christopher Jones, Joseph Locke, James Mason, Grant Simpson Jr., Philip Stephens, John Hall.

FTI Graduates In Demand

By JOANN MacMILLAN
Despite the nation-wide slowdown in employment opportunities, skilled craftsmen continue to be in great demand.

"This year," commented Niles E. Compton, dean of student affairs at Fayetteville Technical Institute, "there will be approximately 100 different companies visiting the F. T. I. campus to recruit skilled technicians and craftsmen from the 250 students scheduled to graduate."

Because the craftsman works closely with the technician, he too, needs a workable background of related subject materials in order to communicate with every member of the work team. At Fayetteville Tech, the emphasis is on manipulative dexterity in the trades; but courses are given also in mathematics, sciences and the social sciences.

With the rapid expansion of

industry and its technological advances, demand has arisen for workers who can enter an occupation with competent knowledge and ability to carry out the required tasks.

According to North Carolina statistics, the economic importance of vocational education cannot be ignored.

It is estimated that the vocationally trained person during his working life will realize a return of \$35,000 to \$40,000 for every \$1,000 invested in his education.

Specialized training which is required for over 75 per cent of today's jobs in not available in the four-year, degree-granting institutions but must be obtained at area vocational centers, technical institutes and community colleges.

In fact, no college degree will be required for 8 out of 10 jobs in the present decade.

Technical-vocational schooling has long been the means, remarked Don

Bryant, North Carolina State University doctoral candidate now serving his internship at Fayetteville Tech, is that society must realize the importance of working with one's hands and mind and no longer consider such careers demeaning.

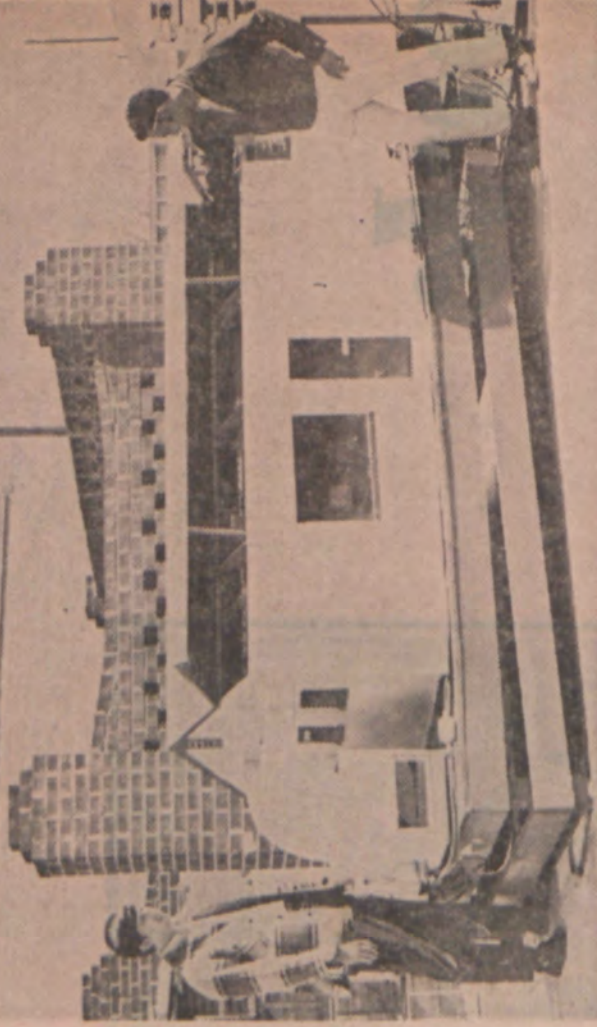

As pay scales elevate in occupational areas, the demand for highly trained personnel increases, there will be even greater opportunities in the latter part of the 20th century. If one's former occupation becomes obsolete, there will be the vocational-technical institute affording retraining for new employment.

As North Carolina recognizes occupational education week, Tar Heels are reminded that instruction in more than 160 different occupations is available through the community college system.

800 educators open meeting here

Dr. Herring assails traditional systems

By LOUISE LAMICA
Education Editor

Academic orientation, rigid salary schedules and bonds of certification were listed Monday as some of the reasons for the gap existing between public schools, community colleges and technical institutes by Dr. W. Dallas Herring, chairman of the State Board of Education.

Speaking to more than 800 instructors and representatives of community colleges and technical institutes gathered at Timme Plaza for a three-day workshop, Dr. Herring opened the conference by challenging those attending to "spread the gospel you are learning here to your colleagues in the public schools. Our grand old public system can learn from you."

Dr. Herring said this gap lies in the realm of total education for everyone, which should involve a complete education for the individual, one which should enable a student to make the most of his skills and talents, and to provide him with the know-how and wherewithal to make the best living possible using these skills and talents.

Dr. Herring charged public schools with failing to be successful in their goals. "If they had been," he said, "we would not need the 'second chance' which community colleges and institutes today offer the adult."

Advocating the need for occupational education within the public schools of North Carolina today, Dr. Herring told the assembly that "it is up to you to get the message out to the people."

"It saddens me," he continued "that so many of our people work at night, hold down regular jobs in the daytime, and attend night classes to get the education they need to develop their skills and talents in order to make a better living."

There is no excuse, Dr. Herring continued, that higher education can find the

means to build bowling alleys and swimming pools at Duke University, "while you teach out of doors. It is inexcusable," he commented, as cheers of applause broke out.

"It is up to the General Assembly," Dr. Herring said, "to give community colleges and technical institutes the money and the freedom to develop a person's latent skills and talents."

"Our adult students deserve a fair shake," he noted. "The time has come they should have it. The sky is the limit today, and there's always room at the top. This is the message we must get out to our people."

Dr. Herring said he felt that public schools today are "too oriented academically" to provide the total education needed by students, and that public schools are "too bound by certification and the academic approach" to help students develop their own personal

skills and ambitions. Dr. Herring has been called the father of the community college plan in the state.

Later, as groups of people milled around he patio of Timme Plaza just outside the ballroom, a scattered poll of listeners agreed with Dr. Herring's statements.

"I agree with him completely that occupational education is the most important thing we can do in education today," said Edwin Campbell of Central Piedmont Community College in Charlotte. "We're having to retrain people who are supposed to learn these things in public schools."

Campbell said he felt that public schools of today are too oriented towards college, when many college students should never go to college. "We need to develop more of an industrial education in the public schools. Help students find their vocations without having to go

through 12 years of public schools and possibly four years of college. Sometimes a college degree isn't the answer. We've had to take college graduates and train them in some skill or avocation. That means that taxpayers pay money to teach these things in public schools, and pay the same tax money again to teach them in community colleges and technical institutes. There is a gap there, and it needs to be looked into."

Chauncey W. Batts, a drafting instructor at Cape Fear Technical Institute, hosts for the workshop, said what impressed him about Dr. Herring's speech was the money poured into established institutions such as Duke University for bowling alleys and swimming pools, while community college and technical institute students work days and nights and go to school in their off-hours to learn skills to enable them to make a better living. "It seems

to point up a definite lack someplace," he agreed.

Dr. Herring was the opening day speaker in the three-day workshop which will feature sessions for instructors, librarians and administrators in the technical institute-community college system meeting all over town for conferences planned to provide informative sessions.

Also speaking Monday was Dr. Howard E. Thompson, president of the North Carolina technical institute-community college presidents' group and president of Wilkes Community College.

The theme of the conference is "Challenge and Change," selected to stimulate participants in effectively continuing their search for excellence of instruction. Being brought to the many workshops planned within the conference are new ideas, constructive criticism, and thought provoking challenges. In short, "an airing of ideas" for all concerned and vitally involved in the work of community colleges and technical institutes.

Sidelights have been planned for participants, among them tours of historical sites including the battleship memorial USS North Carolina. Dr. Leroy J. Care, director of College Transfers at Central Piedmont Community College in Charlotte, was stationed aboard the battleship USS Missouri during World War II.

Dr. Dare planned to visit the battleship Monday afternoon with several others of the conference. "That is a remarkable sight," he commented.

The second day of the conference will begin with a talk Tuesday morning at 9 a.m. in Timme ballroom by Dr. Jerome H. Melton, assistant superintendent of the Department of Public Instruction in Raleigh.

SPEAKER — Dr. W. Dallas Herring, chairman of the State Board of Education, at mike, opened a conference here Monday of 800 representatives of community colleges and technical institutes in the state. Seated, left to right, are A. J. Bevacqua, educational director of the Department of Community Colleges, Roger G. Worthington, program development coordinator, and M. J. McLeod, president of Cape Fear Technical Institute, host for the three-day event. (SECO Photo)

\$116,000 Over Last Year FTI Budget Request Shows Huge Increase

The largest budget presented to the Cumberland County Commissioners during its budget hearing Thursday was \$37,983 from Fayetteville Technical Institute which showed an increased request of \$116,223 over last year.

The proposal, presented by president Howard E. Boudreau, and members of the Board of Trustees, would require \$25,892 from the county.

In addition, the commissioners heard budget requests from a number of other organizations during the board's third hearing. The board is several weeks away from setting the new tax rate.

The majority of the budgets submitted to the board for consideration reflected the higher costs of living with increases in salaries.

Boudreau told commissioners the physical plant had doubled at FTI and that the budget reflected additional personnel hired to maintain the new buildings.

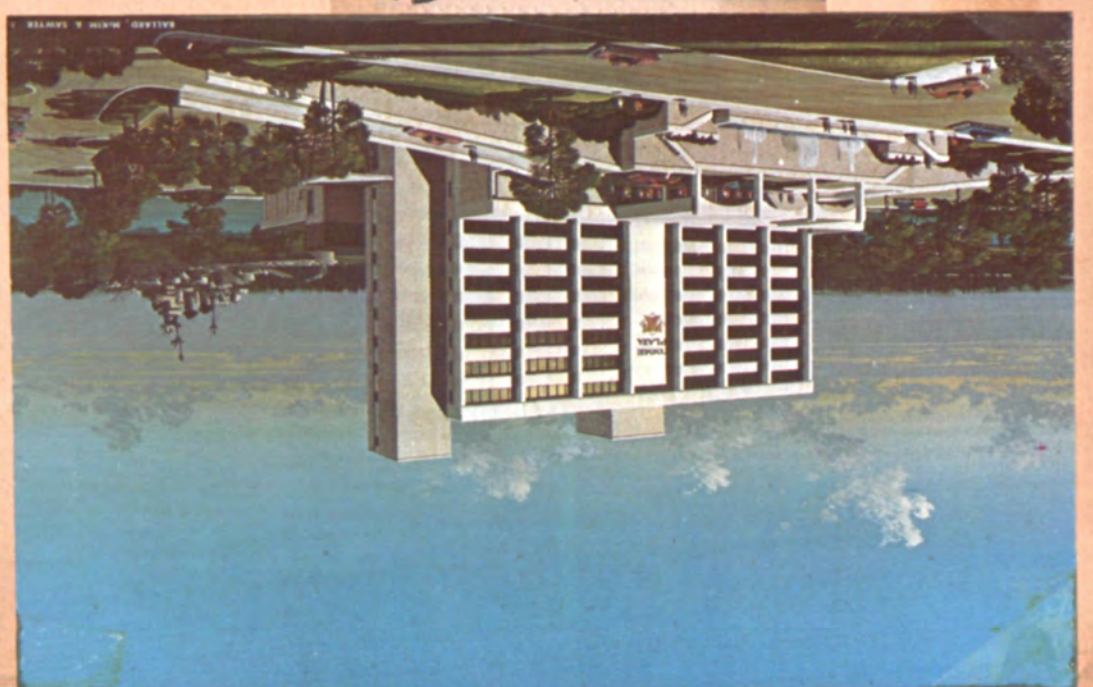

The institute, said Boudreau, will also begin a new curriculum in general education next year, offering night courses for credit. The program, never before in operation, will require the hiring of two additional instructors at salaries estimated at \$11,692 per teacher.

A total of \$301,892 was designated for expenses with \$24,000 going for capital outlay.

MOVING DAY—Tuesday was moving day at Fayetteville Technical Institute where summer school students volunteered to help move 12,000 volumes of books to the new Paul H. Thompson Library. Faculty help was recruited also for the 400-yard round trip,

which was completed in about 1 1/2 hours. Librarian Betty Williamson noted that the new library is one of the largest technical libraries in the state. Its facilities are open to the public for reference. (Observer photo—Blount)

Fayetteville Tech Helps Meet The Need For Qualified Nurses

By JANET GEORGE

Nursing is one field that is always open to applicants and graduates of Fayetteville Technical Institute. The need for qualified nurses has become more desperate lately with the closing of hospital nursing schools. The hospitals have not been able to keep them open because of the tremendous costs.

When classes begin again this fall, the nursing program at Fayetteville Tech will be bringing in 40 students, which is a considerable increase in enrollment compared with the other two classes.

The students come from all walks of life; girls fresh out of high school, wives, and even men. They are required to have successfully completed high school and courses in chemistry and algebra. When the students complete their two year course of study, they are qualified to take the State Board Examination. If they pass it they are licensed as Registered Nurses.

During the course the nurses work in the hospital two days a week, every week. Department assignments are co-ordinated with the present topic of study. Three area hospitals are used for this

clinical laboratory experience: Veteran's Administration, Cape Fear Valley, and Womack Army Hospital. The students work in all of these hospitals which not only give them practical experience, but also teaches them how to work in different hospital situations.

The students are required to take general education courses along with their nursing courses. Fayetteville Tech wants to graduate well-rounded nurses, those who can do more than just "talk nursing."

Fayetteville Tech, being a community institution, is committed to meeting community needs. About half of the graduates have stayed in the Fayetteville area and are working in area hospitals.

The facilities are good, but they need even more classroom and office space. Many organizations have been very kind to the Institute, but they still need more equipment and any donation, no matter how small, would be very helpful.

The citizens of Fayetteville should be very proud of Fayetteville Technical Institute and its nursing program. The program is not only ac-

credited by the North Carolina State Board of Nursing, but is also accredited by the National League of Nursing, which is a voluntary organization.

New At F.T.I. — Draftsmen To Organize

By LEE RIDENOUR
Architectural drafting students at Fayetteville Technical Institute have begun an effort to organize the American Institute of Architectural Draftsmen. The proposed organization would be new to both the state and the nation, and would serve both as a clearinghouse and as a guardian of standards in the architectural drafting field.
Frank Robertson and Carl Samuelson described the proposed organization as "a way to protect the public from the work of unqualified draftsmen" and an attempt to protect the student who has invested two years in formal training from competition by those who "only have a ruler and a pencil," according to Robertson.

Robertson describes the employment situation for draftsmen as excellent at this time: "There's a real shortage of qualified draftsmen in the region and a lot of people with very little experience are being hired."

He and Samuelson and their colleagues, who number about 12 students, down from an original enrollment of 35 in the two-year FTI drafting course, propose to undertake incorporation of the chapter at FTI, a project they have been told will cost about \$1,000 in various legal and incorporation fees. After incorporation, the AIAD plans to approach other technical schools and design schools in the state to expand membership in the new organization.

The high dropout rate in the FTI drafting course, the two students believe, is attributable to the rigorousness of the course. Most drafting dropouts merely change majors and do not leave school, they say.

The AIAD would act as a

licensing agency for draftsmen in much the same way that the American Institute of Architects acts for architects. An immediate benefit to both public and the drafting fraternity would be enhanced professional standards, Robertson believes.

One other licensing and professional agency for architectural draftsmen exists in the country, and is limited to those who live in California, Robertson notes. While that organization exercises a virtual monopoly of control over the regulation of draftsmen in California — "It's just like a union —" Robertson thinks such an extreme is not necessary in North Carolina.

But he believes there should be a licensing procedure or approval-by-peers process which would in some manner measure a draftsman's qualifications to practice.

The two young drafting students are enthusiastic about their own futures in a field where "an experienced man could certainly make \$10,000 a year and up." Samuelson, who is single, is mainly concerned with "doing what I want to do," which at the moment is to design beachhouses somewhere on the Carolina coast. Robertson, married, is still exploring the possibilities in both large industries and smaller architectural firms.

As in any field where a shortage of trained talent is in effect, opportunities for newcomers — women, for example — would seem to be numerous, the students claim. They believe the drafting field would be a natural to utilize reputed manual dexterity of women.

"But our one girl student is getting married, I think. I don't know if she'll ever practice," Robertson suggests.

NEW EQUIPMENT — Checking over the new equipment at Fayetteville Technical Institute are the Dental Hygiene faculty (left to right) Mrs. Tena McQueen, instructor, Mrs. Eileen G. Hoehn, instructor, and Dr. David R. Dunham, chairman of the

department at F.T.I. Mrs. Lorraine Murphy, department secretary, volunteered as a patient for the equipment check. Twenty-five students have been accepted for the fall quarter in the initial class for dental hygienists at Fayetteville Tech.

NEW STUDENTS — A welcoming tea was held in the Paul H. Thompson Library Student Lounge Sunday, August 29th for the incoming freshmen in the Associate Degree Nursing Curriculum at F. T. I. Assisted by the members of the ADN faculty and their second year classmates, the Executive Board of the Student Nurses' Association

received forty young women and two men who will comprise the first year ADN class. Officers of the Association who make up the executive board are pictured left to right: Linda Bell, Reporter; Barbara Emery, Secretary; Ken Ledford, Vice President; Kendall Jamison, President and Dot Copas, Treasurer.

Paul H. Thompson Library

Library Dedication Set Sunday

Fayetteville Technical Institute's new Paul H. Thompson Library will be dedicated Sunday at 2 p.m.

Terry Sanford, president of Duke University and a former North Carolina governor, will deliver the dedication address. A highlight of the ceremony will be the unveiling of a portrait of Thompson by his daughters Ann, Cathy, Jane and Louise. It will be presented by Mrs. Thompson.

Other dignitaries scheduled to appear on the program are State Sen. John T. Henley of Hope Mills, FTI President Howard Boudreau, Thornton Rose, chairman of the FTI board of trustees, the Rev. Wayne Ham of Snyder Memorial Baptist Church, and harpist Joel Andrews, musician-in-residence at FTI.

Following the ceremony, an open house will be held. The public is invited.

HONOR STUDENTS: Three F.T.I. students with a grade point average of 3.5, or better, in the practical nurse education curriculum were awarded honors at graduation Friday. Upon successfully writing the State Board

Nursing Examination, they will become licensed practical nurses. From left to right they are: Mrs. Valeria R. Lugo, Mrs. Betty Jean Provost, and Mrs. Adrina M. Nicholson.

City Rose Garden Work Progressing After Set Back

In January of 1971 groundbreaking took place at the site of the Fayetteville Rose Garden, located on the northeast corner of the Fayetteville Technical Institute campus.

This beautification endeavor is a project of the Fayetteville Beautiful Board and is co-sponsored by the Fayetteville Rose Society. Since its inception the Rose Garden has become a community effort with business and industry donating some materials and many volunteers donating their time and talents to the cause.

Mrs. Vance K. Knight Jr., a member of the Fayetteville Rose Society, designed the garden which at its completion will feature approximately 35 varieties of roses. All roses are being donated by the Jackson and Perkins Rose Company of Medford, Oregon.

The preparation of the site began in January of 1971 with the Street Department personnel, at the direction of Jimmy Jones, superintendent cultivating the soil to a depth of three feet. One-hundred and sixty loads of topsoil, all donated by local building contractors, were brought in to raise the garden to the desired level for proper drainage. Members of the Fayetteville Rose Society, assisted by personnel from the Recreation and Parks Department, at the direction of Bill Kendall, director, volunteered their

time and services in preparing the beds and the actual planting of the first shipment of 240 roses in March of 1971. The soil nutrients added were peat moss superphosphate, lime and fertilizers, some of which were donated by local businessmen. All fertilizer has been donated by local industry.

Unfortunately, the Fayetteville Rose Garden has not been without its problems. It became apparent by mid-summer that problems existed in the soil. The Rose Garden Committee, working with Dr. J. C. Wells, plant pathologist, North Carolina State University, A. L. Hatfield, agronomist, Soil Testing Division, North Carolina State Department of Agriculture, and Bruce Woodard, county extension agent, learned the soil contained a high level of zinc which was not revealed in the testing which took place prior to the planting. The only solution was to remove the roses in order to replace the contaminated soil with fresh soil. This was to be a time-consuming process which involved bringing in approximately 70 more loads of topsoil. Many hours of labor were provided by the City, Fayetteville Technical Institute students and maintenance staff and young men working on Saturdays. When the grading of the new soil is completed it will be treated for weed and nematode control.

VISIT GARDEN — Mrs. Elliot Harris (left), president of the Fayetteville Rose Society, admires a blossom in the FTI Rose Garden. Shown with her are Mrs. William Miller (center), chairman of Fayetteville Beautiful, and Mrs. Vance Knight, who designed the garden.

"We will be ready for that second shipment of roses in the early spring," said Mrs. Harris, president of the Fayetteville Rose Society, and who with the help of Mrs. Vance Knight and Mrs. Dan Reaves, City Beautiful coordinator, have supervised all the work in the garden area. The evergreens which will be planted this fall will be furnished by five local garden clubs. The dogwood trees will be memorial gifts as are two tree roses already planted in the garden.

"Our Fayetteville Rose Garden will feature a fountain in the center as its focal point which will be surrounded by beds of roses extending to the corners where evergreens and dogwood trees will be planted," said Mrs. William C. Miller Jr., chairman of the Fayetteville Beautiful Board.

"We expect to work on this garden for several years and look forward to enjoying the fruits of our labor for many years to come," she added.

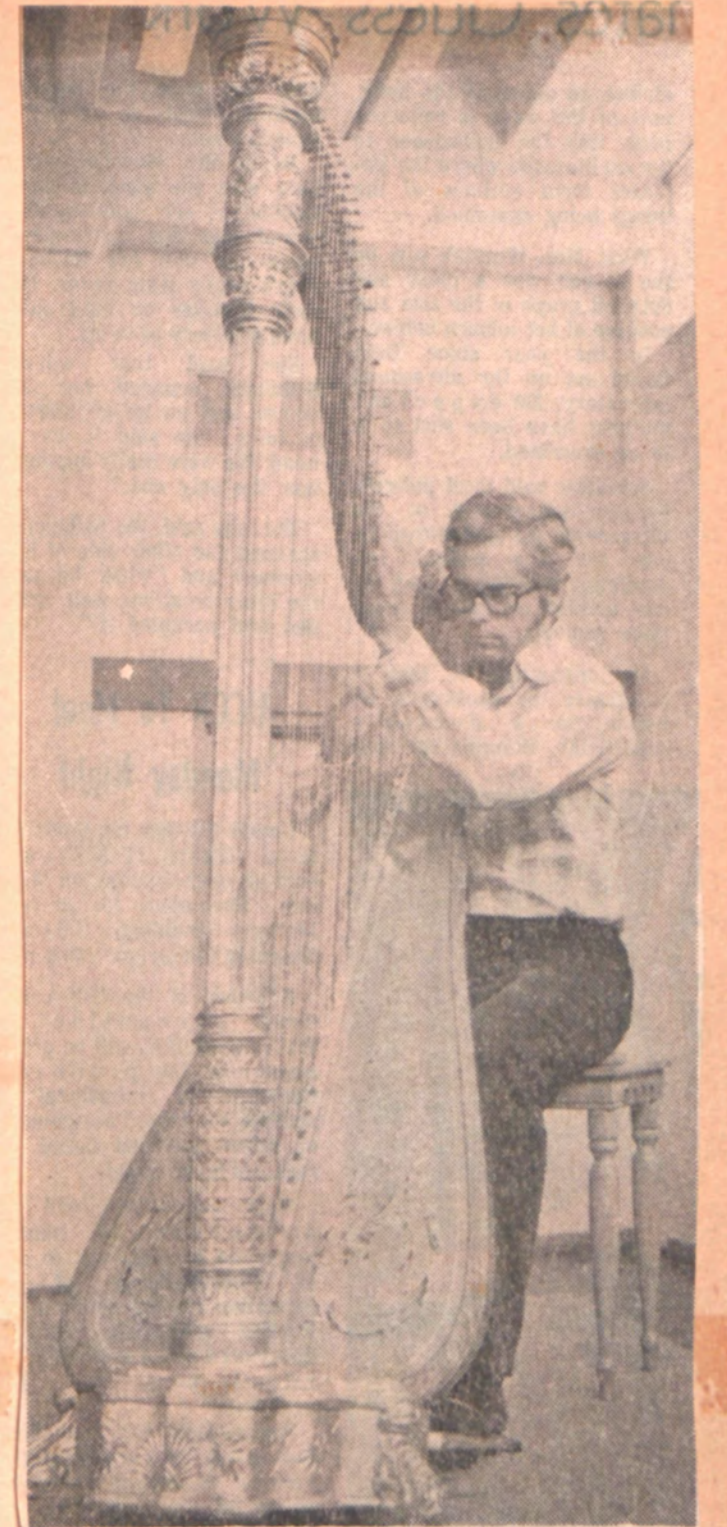

STUDENT NURSE WEEK — Governor Bob Scott has proclaimed the week of November 8-13 as North Carolina Student Nurse Week. Here, Miss Brenda Jackson, second-year student in Fayetteville Technical Institute's Associate Degree Nursing Curriculum, is pictured holding 'Baby Chase', one of the 'Chase Family' of mannikins used to train FTI students in nursing skills. Brenda, president of the North Carolina Student Nurse Assn. representing 33 statewide nursing programs, was on hand for the signing of the proclamation in Raleigh.

SATURDAY, DECEMBER 18, 1971

REAL COOL GREETING — Fayetteville Technical Institute President and Mrs. Howard E. Boudreau found a real cool greeting as they arrived at the Paul Thompson Library and Student Union for the annual Fayetteville Tech Christmas dinner and dance Wednesday evening. Despite the record-breaking

heat, FTI air conditioning and refrigerations students, under the director of instructor Pete Oakes, fashioned the long-haired snowman for the occasion. Because of the unseasonable warm weather, the snowman lost considerable weight during the evening. (Photo — Kim Smith)

CONCERT — Cumberland County's Friends of the Library will meet Sunday evening at Fayetteville Technical Institute in the Paul Thompson Library for a concert by Joel Andrews, musician-in-residence at FTI, and McKellar Israel, pianist. The public is invited to attend the 8 p.m. performance. There will be no charge for admission. Mr. Andrews will conduct a lecture-workshop Monday evening at 8 p.m., first in a series at Fayetteville Tech. The lectures and concerts will be held in the lounge of the Thompson library. (Photo — McLendon)

Institute Is Developing An Intramural Program

Fayetteville Technical Institute's newly-appointed student activities coordinator, Alvin R. Pierce, has scheduled a variety of intramural sports including women's basketball during the winter quarter at FTI.

Each curriculum will be permitted two teams — a 15-man team and an eight-player team for the women. The season will start Dec. 13.

Other activities to be offered Fayetteville Tech students will be bowling, table tennis, billiards and chess. Participation will be from 4 to 6 daily. Karate classes will be taught from 3:30 to 4:30 p.m. daily.

Recreational cards, checkers and Spanish checks will be on the agenda.

"One of the hardest arrangements to make on a campus like ours," said Pierce, "is to provide recreational activities and sports for our students. Many of them commute from nearby towns and also hold down jobs so they are limited as to the time they can give. But these students really need the excitement of competitive sports, and the teams help provide a closeness among students within a curriculum. Although we have no gym at FTI, the new Paul Thompson Library building provides excellent facilities. We will also use the Honeycutt Recreation Building and gyms at several churches."

Pierce holds a B.S. degree in physical education from Johnson C. Smith University

of Charlotte, a Master of Science in physical education from A & T University and graduate degree in vocational guidance from N. C. State University where he earned an additional certificate in education of the disadvantaged.

A member of Fayetteville Tech's student affairs department, Pierce's office is in the Library building.

He and his wife, Sophia live on the Murchison Road with their children, Gary, Angela and Janet.

ALVIN R. PIERCE ... student activities coordinator.

Mrs. Puckett Named FTI Nurse Of Year

Fayetteville Tech's Ruth Puckett was chosen "Student Nurse of the Year" by the students of the Associate Degree Nursing Program of FTI. She represented the institute at the District 9 competition where she won first runner-up for the contest.

She is the wife of L.L. Wayne Puckett and a graduate of the University of Seattle where she received her Bachelor of Arts Degree. A first year student in Fayetteville Technical Institute's Associate Degree Nursing Program, Mrs. Puckett competed in the finals with representatives from Hamlet School of Nursing, Southeastern Community College and the UNC School of Nursing at Wilmington.

Mrs. Ruth Lahde Puckett

Last year's nominee from FTI was Brenda Jackson who was also elected President of the North Carolina Student Nurse Association which included all 44 schools of nursing and represents Associate Degree, Diploma and Bac-

calaureate programs in North Carolina preparing students to qualify for writing the licensing examination to become registered nurses.

Mrs. Puckett is the daughter of the R.N. Lahdes of Los Altos, California.

FTI Holds Seminar

An educational seminar entitled "review of respiratory problems, their recognition and management" will be conducted at Fayetteville Technical Institute on Wednesday afternoon, March 15, from 1:30 p.m. - 4:30 p.m.

The seminar is designed for the medical professionals in the Fayetteville area and is presented as a community service activity by the Adult and Continuing Education Department of Fayetteville Technical Institute.

Hunt Examines Rotary, V-8 Engines

FTI Studies Rotary, V-8 Engines

Models of the revolutionary Wankel rotary engine and the traditional V-8 have been built by Joseph Hunt, chairman of FTI's mechanical engineering technology department. Hunt built the replicas for the students in his thermodynamics class.

These models are 1-5 scale and are activated by pressing a small button which switches on the battery-driven mechanism.

A small, light-weight engine, the Wankel bears the name of the consulting engineer who perfected the principle first used in 1588 as a part of a water pump in the eighteenth century. James Watt tried, but failed, to use the same principle in the steam engine.

The Wankel rotary engine replaces the piston, cylinder and crank assemblies with simple rotating discs which have sections removed to form firing chambers.

The material for the discs

presented a major challenge. They had to withstand high temperatures without the usual incident of easy breakage of the triangular shaped discs. In 1954 Felix Wankel designed the engine and developed oil seals. It was ultimately built in 1957.

"Because the principle is comparable to the V-8," remarked Hunt, "maintenance of this engine should prove easy to learn for the traditionally trained mechanic."

The engine's patent has been licensed to a German, and a Japanese, automotive firm. In the U.S., General Motors has purchased rights for research purposes. A model airplane manufacturer is using the Wankel rotary engine which weighs 14 ounces and produces 1/2 horsepower.

Hunt foresees a great future for the use of the Wankel in chain saws, small aircraft, lawn mowers and pumps.

emergency generators and tractors. He also predicts the Wankel as the favorite engine of the future for racing enthusiasts because it runs at high speed with better balance than the V-8.

"Although the Wankel is still in the experimental stage," commented a second FTI instructor, Edmund Nute of the Automotive Department, "I'm convinced it is soon to replace the V-8. The Wankel is a beautiful engine."

Twenty-One FTI Students In 'Who's Who'

Twenty-one students from Fayetteville Technical Institute have been selected as outstanding campus leaders and will be included in the 1971-72 edition of "Who's Who Among Students in American Junior Colleges."

Students were chosen by the campus nominating committee and the editors of the annual directory on the basis of their academic achievement, service to the community, leadership in extra curricular activities and future potential.

Six hundred institutions from the United States and other countries of North and South America participate in honoring outstanding young men and women in their junior colleges.

Chosen from FTI were Kenneth R. Arnold, Loyd Blackman, Donald Byrd, Charles Clapper, William Daniels, Richard Gray, Roger Houston, Miss Brenda Jackson, Miss Pickett Jamison, William Jones, James Koepke, Walter Kolody, Miss Anne Leamons, Miss Nancy Melvin, Robert Moore, Paul More, Bobby Perkins, Johnathan Rovira, John Reid, David Walters and Mrs. Catherine White.

Harpest, Flutist Join In Concert At FTI

Joel Andrews

Fayetteville Beautiful will join Fayetteville Technical Institute in presenting a duo concert Sunday afternoon at four o'clock in the Paul Thompson Library on the campus of FTI.

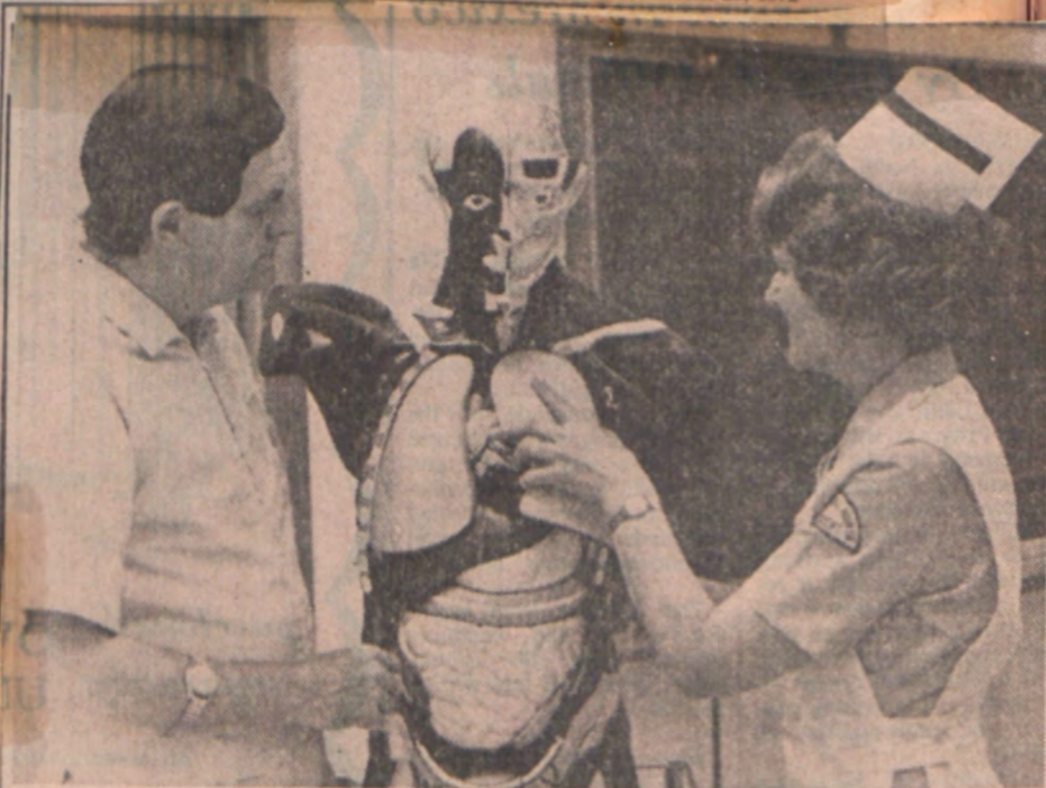

The artists will be harpist, Joel Andrews, musician-in-residence at Fayetteville Tech, and flutist, Don Adcock, assistant director of music at N.C. State University. Adcock also serves as director of the Marching Band from East Carolina University and Columbia University of New York. A popular performer, he and Mr. Andrews have played many concerts together while the harpist was musician-in-residence at N.C. State from 1969-71.

Mr. Andrews, as composer, lecturer and harpist, has become a familiar figure in Cumberland County as he has performed for hundreds of fans during his tenure at Fayetteville Technical Institute.

The public is invited to hear these two outstanding artists at FTI on Sunday. Admission is free of charge.

"It is quite appropriate."

remarked Mrs. Julia Reaves, coordinator for Fayetteville Beautiful, "to terminate our week emphasizing the beauty of Fayetteville with lovely music provided by these talented artists. We anticipate a large audience on this occasion and hope to make the concert part of our annual observance of Fayetteville Beautiful Week."

Robert and Teresa Stanley in LPN Classroom at Fayetteville Technical Institute.

FTI Couple Planning For Career Togetherness

Major (ret.) Robert and Teresa Stanley are enrolled in Fayetteville Tech's Licensed Practical Nursing curriculum and will graduate this summer. Shown above in the FTI classroom, the Stanleys anticipate working together at a local hospital after completing the four-quarter course of study at Fayetteville Tech.

A native of Normandy, France, Mrs. Stanley admitted she "felt the urge to do something. To be an American citizen one must contribute, not just receive these benefits. I feel I can best help others by becoming an LPN."

Fayetteville Tech's 1st male LPN student was assigned to duty at Pope Air Base's dispensary as a doctor's assistant for five years prior to his retirement from the Air Force.

"I like working in the health occupations field," said Stanley, "and I have really enjoyed my training at FTI. We have had clinical experiences at a local nursery and at Cape Fear Valley Hospital. Everyone has been most helpful, patient

and encouraging the doctors, nurses, instructors, everyone."

Heading up Fayetteville Tech's practical nurse education curriculum is Mrs. Ada Leonard assisted by Miss Claudia Dancy, R.N. The program is four quarters in length, beginning in September and continuing to August.

Graduates of the LPN curriculum then take the State Board Examination for Licensure. After successfully writing this examination, licensed practical nurses are eligible to work in any health occupation under the direction of a physician, dentist or registered nurse.

The 26 students enrolled in Fayetteville Technical Institute's Practical Nurse Education program are currently working toward establishing a student-oriented LPN association in North Carolina.

FTI OFFICERS—Newly elected Student Government Association officers at Fayetteville Technical Institute are pictured on the steps of Cumberland Hall. From left to right are Martha Compton, secretary; Ernest Andrews, treasurer; Ed Borst, vice president; and Mike Haynes, president. (FTI photo)

Fayetteville Rose Garden Ablaze With Blossoms

In a Garden beauty abides we see God's marvelous hand at work

These well chosen words are the sentiments of the Fayetteville Rose Garden Committee whose applied knowledge and hard work in conjunction with the miracle of nature have produced the first blooms of spring in the Fayetteville Rose Garden.

In cooperation with Fayetteville Beautiful the Fayetteville Rose Society is a co-sponsor of the Garden. Since the groundbreaking in January of 1971, the Garden has steadily taken shape under the guiding hands of Mrs. Elliott Harris, Mrs. Vance Knight and Mrs. Julia Reaves, city coordinator.

"We are so pleased to have the cooperation of the Garden Clubs and businessmen in Fayetteville who are taking such an active interest in creating the Rose Garden," stated Mrs. William C. Miller, chairman of the Fayetteville Beautiful program. "The purpose of Fayetteville Beautiful is to guide the efforts of civic groups in a well planned beautification and area improvement program for the City of Fayetteville," she added.

"Because of the beauty of the Rose Garden we are receiving many requests for roses for civic purposes, but due to the fact that the roses were donated by Jackson and Perkins Rose Company to be used in a "show" garden, we are establishing a policy that these roses cannot be cut for either civic or private use," continued Mrs. Miller.

Through the efforts of Julia Reaves, a total of six garden Clubs; Dig and Dream, Lafayette, Scotch, Friendly Acres, Greenwood and Greenlawn have taken portions of the Garden as HANDS site projects.

At the present time another beautification oriented group is considering the donation of the fountain for the center of the Garden. At the time of the installation of the fountain the brick walks around the fountain will also be laid. The maintenance of the Garden is provided by Fayetteville Technical Institute personnel.

Mrs. Vance Knight, who designed the Fayetteville

Rose Garden, advises that the garden now features 658 roses all of which were donated by Jackson & Perkins. The tree roses and dogwood trees were donated as memorial gifts by interested Fayetteville citizens.

In announcing future plans for the Garden, Mrs. Elliott Harris, past president of the Fayetteville Rose Society, states that additional roses will be added to the corner beds over the next two years. The Garden will feature statuary and wide trellises which will be mounted on concrete columns. "These items will be added as funds permit," she stated. At the present time the proceeds from the Fayetteville Beautiful Paper Drive are being used on the Rose Garden Project. Should any civic groups or private citizen wish to donate needed items at the Garden, they are requested to contact Mrs. Reaves, who will work with any group in deciding on a project which would be suitable to its means.

Since the inception of the Fayetteville Beautiful program many civic, professional and garden club groups as well as local businessmen have decided to either take a project of civic improvement or to donate to a Fayetteville Beautiful project such as the Market House corner beautification effort. In this way civic clubs and private citizens are making a tremendous contribution to the improvement of Fayetteville, it was pointed out.

It has been said that the people of a city can be judged by the appearance of that city. "I have found this work in our community to be a very heartwarming experience," stated Mrs. Reaves. "I find that private citizens and city officials are eager to cooperate in every way to make our city more beautiful," she added.

Fayetteville Beautiful, the Fayetteville Rose Society and Fayetteville Technical Institute cordially invite the citizens of Fayetteville to come by the Fayetteville Rose Garden to enjoy the roses at the peak of spring bloom. The Garden is located at the corner of Devers Street and Hull Road.

FIRST BLOOMS: Mrs. Julia Reaves (left) city coordinator and director of Fayetteville Beautiful, and Mrs. T. B. Tyson, awards chairman for Fayetteville Beautiful, are shown admiring the first blooms in Fayetteville Rose Garden, sponsored by Fayetteville Beautiful and the Fayetteville Rose Society. Since the inception of the Fayetteville Beautiful program many civic, professional and garden club groups as well as local businessmen have decided to either take a project of civic improvement or to donate to a Fayetteville Beautiful project such as the Market House corner beautification effort. In this way civic clubs and private citizens are making a tremendous contribution to the improvement of Fayetteville, it was pointed out.

It has been said that the people of a city can be judged by the appearance of that city. "I have found this work in our community to be a very heartwarming experience," stated Mrs. Reaves. "I find that private citizens and city officials are eager to cooperate in every way to make our city more beautiful," she added.

Fayetteville Beautiful, the Fayetteville Rose Society and Fayetteville Technical Institute cordially invite the citizens of Fayetteville to come by the Fayetteville Rose Garden to enjoy the roses at the peak of spring bloom. The Garden is located at the corner of Devers Street and Hull Road.

Open House At FTI

Fayetteville Technical Institute will hold an open house next Sunday from 3 to 5 and 7 to 9 p.m. Theme will be "planning a better tomorrow through technology." The event will open with a concert featuring harpist Joel Andrews.

Classrooms, labs and shops will be open to the public for demonstrations of new techniques and skills in applied sciences, health occupations, vocational trades and engineering technologies. Open to the public will be LaFayette Hall, Cumberland Hall and the Paul H. Thompson Library.

Institute.

Planning Togetherness

of Normandy, Stanley felt the urge to be an LPN. To be an LPN one must not just receive a diploma, but also feel I can best help others by becoming an LPN."

Fayetteville Tech's 1st male LPN student was assigned to duty at Pope Air Base's dispensary as a doctor's assistant for five years prior to his retirement from the Air Force.

"I like working in the health occupations field," said Stanley, "and I have really enjoyed my training at FTI. We have had clinical experiences at a local nursery and at Cape Fear Valley Hospital. Everyone has been most helpful, patient and encouraging the doctors, nurses, instructors, everyone."

Heading up Fayetteville Tech's practical nurse education curriculum is Mrs. Ada Leonard assisted by Miss Claudia Dancy, R.N. The program is four quarters in length, beginning in September and continuing to August.

Graduates of the LPN curriculum then take the State Board Examination for Licensure. After successfully writing this examination, licensed practical nurses are eligible to work in any health occupation under the direction of a physician, dentist or registered nurse.

The 26 students enrolled in Fayetteville Technical Institute's Practical Nurse Education program are currently working toward establishing a student-oriented LPN association in North Carolina.

Fayetteville Rose Garden Ablaze With Blossoms

In a Garden beauty abides we see God's marvelous hand at work

These well chosen words are the sentiments of the Fayetteville Rose Garden Committee whose applied knowledge and hard work in conjunction with the miracle of nature have produced the first blooms of spring in the Fayetteville Rose Garden.

In cooperation with Fayetteville Beautiful the Fayetteville Rose Society is a co-sponsor of the Garden. Since the groundbreaking in January of 1971, the Garden has steadily taken shape under the guiding hands of Mrs. Elliott Harris, Mrs. Vance Knight and Mrs. Julia Reaves, city coordinator.

"We are so pleased to have the cooperation of the Garden Clubs and businessmen in Fayetteville who are taking such an active interest in creating the Rose Garden," stated Mrs. William C. Miller, chairman of the Fayetteville Beautiful program. "The purpose of Fayetteville Beautiful is to guide the efforts of civic groups in a well planned beautification and area improvement program for the City of Fayetteville," she added.

"Because of the beauty of the Rose Garden we are receiving many requests for roses for civic purposes, but due to the fact that the roses were donated by Jackson and Perkins Rose Company to be used in a "show" garden, we are establishing a policy that these roses cannot be cut for either civic or private use," continued Mrs. Miller.

Through the efforts of Julia Reaves, a total of six garden Clubs; Dig and Dream, Lafayette, Scotch, Friendly Acres, Greenwood and Greenlawn have taken portions of the Garden as HANDS site projects.

At the present time another beautification oriented group is considering the donation of the fountain for the center of the Garden. At the time of the installation of the fountain the brick walks around the fountain will also be laid. The maintenance of the Garden is provided by Fayetteville Technical Institute personnel.

Mrs. Vance Knight, who designed the Fayetteville

Rose Garden, advises that the garden now features 658 roses all of which were donated by Jackson & Perkins. The tree roses and dogwood trees were donated as memorial gifts by interested Fayetteville citizens.

In announcing future plans for the Garden, Mrs. Elliott Harris, past president of the Fayetteville Rose Society, states that additional roses will be added to the corner beds over the next two years. The Garden will feature statuary and wide trellises which will be mounted on concrete columns. "These items will be added as funds permit," she stated. At the present time the proceeds from the Fayetteville Beautiful Paper Drive are being used on the Rose Garden Project. Should any civic groups or private citizen wish to donate needed items at the Garden, they are requested to contact Mrs. Reaves, who will work with any group in deciding on a project which would be suitable to its means.

Since the inception of the Fayetteville Beautiful program many civic, professional and garden club groups as well as local businessmen have decided to either take a project of civic improvement or to donate to a Fayetteville Beautiful project such as the Market House corner beautification effort. In this way civic clubs and private citizens are making a tremendous contribution to the improvement of Fayetteville, it was pointed out.

It has been said that the people of a city can be judged by the appearance of that city. "I have found this work in our community to be a very heartwarming experience," stated Mrs. Reaves. "I find that private citizens and city officials are eager to cooperate in every way to make our city more beautiful," she added.

Fayetteville Beautiful, the Fayetteville Rose Society and Fayetteville Technical Institute cordially invite the citizens of Fayetteville to come by the Fayetteville Rose Garden to enjoy the roses at the peak of spring bloom. The Garden is located at the corner of Devers Street and Hull Road.

RECEIVE PINS—Members of Fayetteville Technical Institute's 1972 Associate Degree Nursing class are shown after receiving their pins. Seated, left to right, are Brenda Jackson, Patricia Warren, Diane Coul-

bourne, Donna Corbin, Dorothy Copas, Mary Norton, and Linda Bell. Standing are, left to right, Betty Hyde, Joanne Barnes, Barbara Emery, Ken Ledford, Kaye Hill, Kendall Jamison, and Olympia Harrell.

ADA Class Includes First Male

The 1972 Associate Degree Nursing Students at Fayetteville Technical Institute includes its first male student, Ken Ledford, vice president of the Student Nurses' Association who is a native of Asheville. Ledford served in the Air Force as a sergeant prior to entering FTI and is representative of the growing trend toward young men entering the field of nursing.

The annual pinning luncheon for graduating nursing students was held on Saturday, May 13, at the Fort Bragg Non-Commissioned Officers' Club. President Howard E. Boudreau opened the program with a welcoming speech. Miss Judy Siceloff, president-elect of the Student Nurses' Association, gave the invocation. After repeating the pledge of the International Council of

Nurses, the graduating students received their pins from Student to Graduate ADN program at Fayetteville Tech, Mrs. John O'Hale, d.r. Grady Davis, psychology professor at Fayetteville State University, was the guest speaker. He addressed the group on "The Transition from S Student to Graduate Nurse."

The 1972 Class closed the program with the presentation of special awards to Mrs. Shirley Cox, secretary for the ADN curriculum, and to Leo Corbin, husband of one of the graduating students. The two were named "Honorary Student Nurses of the Year." A plaque was presented to the ADN faculty in token of the students' appreciation for their support and guidance. Representatives from Fayetteville's Veterans Administration Hospital and the American Nurses' Association attended the luncheon.

After graduating on May

FTI To Offer Adult Courses

Fayetteville Technical Institute will offer summer school courses for adults in grades 1 through 12 from July 10 through August 21. Registration for these adult basic education and high school diploma subjects will be held in Lafayette Hall at FTI on Thursday, July 6 at 7 p.m.

For further details, contact the director of General Adult Education of FTI.

FTI Nursing Graduates Take Posts

Mrs. Mercedes O'Hale, director of health occupations at Fayetteville Technical Institute, has been informed that twelve FTI associate degree nursing graduates, class of '72, have successfully written their North Carolina Examinations for Licensure as Registered Nurses.

Seven of the dozen RNs have joined the staff at CFV Hospital: Miss Joanne Barnes, Miss Linda Bell, Mrs. Dot Copas, Miss Barbara Emery, Mrs. Olympia Harrell, Mrs. Kaye Hill and Mrs. Mary Norton. Mrs. Donna Corbin will be at Vanderbilt, Nashville, Tennessee; Miss Brenda Jackson, Fayetteville's Veterans Administration Hospital; Miss Kendall Jamison, Georgetown University Hospital, Washington, D. C.; Ken Ledford, Asheville and Mrs. Patricia Warren, Sanford.

Swope Addresses FTI Graduates

John Swope, director of the Fayetteville Area Industrial Development Corp., was speaker at Fayetteville Technical Institute's 10th graduation exercise Saturday at Memorial Auditorium.

President Howard Boudreau introduced Swope. Dorothy Joanne Barnes, Linda Sue Bell, Dorothy Jane Copas, Donna Marie Corbin, Diane Marie Coulbourne, Barbara Eileen Emery, Olympia S. Harrell, Kay Wagar Hill, Betty Anne Hyde, Brenda Kaye Jackson, Pickett Kendall Jamison, Kenneth Rodgers Ledford Jr., Mary Lee Jackson Norton, Patricia Cox Warren.

Business administration: Edgar Charles Bennington Jr., James William Bordeaux, William Ernest Caulder, Paul Christian Curlee, James Ronald Fraser, Richard Ray Gray, Donnie Ray Jackson, Dennis Allen Kemp, Dennis Paul Lee, Thomas Jay Lee, Joseph Anthony Norton, John Davis Palmer, William Arthur Patterson Jr., Daniel Joseph Pfeffer, Robert Larry Weddings.

The following students graduated in these areas:

Accounting: Jerome Alfano, Robert Mitchell Hunt, William Joseph McPhatter Jr., Cherry Bullard Naylor, Rickey Clifton Roller and Jonathan Paul Kovira.

Air conditioning engineering technology: Percy Benjamin Ammons, Earl Lofton Hall, Dexter Dallas Jones, William Barry Jones and Howard Lee Norris.

Agricultural business technology: Leon David Bridgers, William Bucciarelli, Roger Dale Houston, Darium Allen Moore, John Edward Newton, Bobby Hugh Norris and Harold Michael Smith.

Associate degree nursing: Dorothy Joanne Barnes, Linda Sue Bell, Dorothy Jane Copas, Donna Marie Corbin, Diane Marie Coulbourne, Barbara Eileen Emery, Olympia S. Harrell, Kay Wagar Hill, Betty Anne Hyde, Brenda Kaye Jackson, Pickett Kendall Jamison, Kenneth Rodgers Ledford Jr., Mary Lee Jackson Norton, Patricia Cox Warren.

Electronic data processing: Kenneth Ray Arnold, Sharon Lynn Barbry, David Lee Buckner, James Austin Godwin, Howard Douglass Grantham, Janie Kathryn

Hall, Walter Keith Hooker, James Randy Ivey and Paul Frederick Moro.

Electronics engineering technology: Henry Lee Autry, Charles Gregory Bass, Michael Glenn Bradley, James Calton Buie Jr., Jerry Allen Bullard, William Bryan Byrd, Charles Edward Conoly, Ellis Max Guy, Ernest Lee Johnson, DeLeon McLamb Jr., Douglas Lee Meares Jr., Robert Charles Moore, Linda Jo Parker, David Bynum Walters and Nast Trent Woods.

Environmental engineering technology: Kenneth Lemar Averitte, Kitty Anna Katherine Kramer, William Lacy McQueen, Henry Massey, Nancy Lou Melvin, Kent Edwin Penny, John William Reid, Joseph Albert Stanish,

Michael Allen Strickland and Donald Wayne Williams.

Industrial management: Julian Ray Andreade, Donald A. Byrd, William Elton Carter, Ressie Aden Creech Jr., Robert Lee Hilburn, Lovette Grady Holland Jr., Rufus Linwood House, Kenneth Franklin Jones, Bradley Warren McKenzie, Michael David Nepstad, Robert Kennedy Sandlin, James Larry Tingin, William Alan Ward, Michael Lee Whitley.

Marketing and retailing: Charles Alston Archbell, Arthur Doug Bass, Brenda C. Bedsole, Anne Ruth Leamons, Barbara Jean Thompkins.

Mechanical engineering technology: Richard Ernest Brucker, William Council Daniels Jr., Frederick Eugene Holland, Danny Mac

McGuire, William Alton Miliken Jr., Michael R. Walker, Malcolm Earl Williams Jr., Darryl Glenn Wolfe.

Air conditioning and refrigeration mechanics: David Alfred Altman, Harry Junius Auten, Alton Leroy Bynum III, Charles Chester Clapper, J. Billy Ford, Milton Sebastian Hudson Jr., Thomas Kenneth Hutchinson Timothy Warren Liles, Rodney Phillip Lloyd, Anthony Francis Makolajczyk, Richard Irvan Payne.

Architectural mechanics: William Dave Dudley, Steven Dale Faircloth, John W. Hildebrand, Don O'Kelly Lloyd, Robert D. Nixon, Bobby W. Perkins.

Machinist: Loyd T. Blackman, Johnnie Buxton Jr., William Oliver Currie, Marvin Elliott, Fletcher Wardell Fort, Thomas Lea Matlock III, Daniel Rufus Matthews, Larry Robert Mercer, Russell Washington Townsend Jr.

Tool and die making: James Allen Beasley, Michael Alan Bethea, James Everett Crabtree, Jerry Wayne Dunning, Jeffery Wolfe DuRant, Furman Lemuel Evans, Philip Thaddeus Hedrick, Sherwood Allen Morgan II, Broncho Clarenton Naylor, Charles Robert Redwine.

FTI Will Offer Credit Subjects

This fall, for the first time, Fayetteville Technical Institute will offer a full evening schedule of credit-carrying subjects. Last year, more than 3,000 adults attended night courses at Fayetteville Tech. This academic year, an increase of 20 to 30 per cent is anticipated in the evening program.

Formerly, most courses were offered without giving credits which could be applied to a degree or diploma. Local employers and adult students began to request that a program be designed to offer similar instructional content which could also permit the accumulation of credits toward an associate degree or diploma, as a result, FTI has designed a schedule of 100 subjects this fall varying from accounting to welding; from computer languages to American history; from dental health education

to wastewater plant operations.

Non-credit courses have been offered tuition-free at Fayetteville Tech. However, under the North Carolina Community College System, a nominal tuition of \$2.50 per quarter hour must be charged for these courses to a maximum of \$32.00 per quarter. A four hour subject such as surveying would amount to \$10.00 plus the cost of text, tools and instruments.

Registration will be held Tuesday and Wednesday evenings Sept. 5 and 6 from 6:30 to 9. Classes are scheduled from Thursday, Sept. 7 through Wednesday, Nov. 22nd.

Anyone 18 years of age, or older, is eligible to enroll in Fayetteville Technical Institute's evening program and may take up to 12 quarter hours of credit before having to meet all general requirements for admission.

MODERN EQUIPMENT — Use of the latest equipment and most recent techniques in dental offices and laboratories will be the goal of FTI's new evening course in Dental Materials. (Photo by FTI)

FTI Offers Refresher Course For Dental Office Workers

Two courses designed for dental assistants and hygienists, or for those with previous dental office experience, are scheduled for the fall evening program at Fayetteville Technical Institute.

Tuesday and Thursday nights from 7 to 8. Dental health education will be taught. This is a study of information and methods of instruction employed in teaching dental hygiene in the

office, community and school. It is a two-quarter hour course, and tuition is \$5.00 for the fall session.

A second course is the study of dental materials most frequently used in the office and laboratory. Classes will meet from 7 to 9:30 p.m. on Monday and Wednesday evenings at FTI.

Both courses are limited to those who have had some experience in dental offices

and are designed as refresher and skill-improvement classes. Each carries credit toward an associate degree in dental hygiene at Fayetteville Tech.

Further information can be obtained from the director of admissions at Fayetteville Technical Institute. Evening school registration is scheduled at FTI on Tuesday and Wednesday, September 5 and 6 from 6:30 to 9 p.m.

FTI Commencement Held

The first formal graduation ceremony for summer session students at Fayetteville Technical Institute was held Thursday in the Paul H. Thompson Library.

Eighty-five men and women were presented diplomas and associate degrees as parents, friends, husbands or wives and children attended the brief ceremony and reception in FTI's student lounge.

Conferring the degrees and diplomas was President Howard E. Boudreau. Dean of student affairs, Niles E. Compton, introduced the graduates, and William E. Sease, dean of faculty presented the scholastic award to Joseph B. Saxon. Saxon, a native of Mississippi and retired from the Army, maintained a perfect 4.0 average in all subjects taken in Electrical Maintenance and Installation for 4 quarters.

Walter J. Kolody, civil engineering technology, was recognized for nomination to Who's Who Among Students in American Junior Colleges.

Graduating with honors after having achieved a grade point average of 3.5 or better in all subjects were: Walter J. Kolody, Avelino Torres-Billoch, Holt J. Cannady, Jun H. DeLoach, David D. Dodson, Ronald J. Klosener, Shelton D. Noles, Joseph B. Saxon, Therese L. Stanley, Janice C. Unruh and Larry V. Clark.

CIVIL ENGINEERING — Talmage Baggett, Robert S. Crawford, John A. Dawson, Woodrow G. Dobson, Walte Kolody, Gregory Price, Roy D. Singleton, John R. Smith, Charles W. Sutton, Jr., Rodney M. Tart, Avelino Torres-Billoch, Alton West, Randall S. Williams, Ronald S. Williams, Joseph E. Godwin and Ronald Yarbals.

ELECTRICAL MAINTENANCE & INSTALLATION — Randy Artis, Albert Atkinson, Danny Barnes, James A. Blue, Larry D. Bowden, James Breeden, David N. Bryan, John Burkett, Holt Cannady, Jun H. DeLoach, David D. Dodson, Jerry Jones, Ronald Klosner, Samuel McGirt, Shelton Noles, Joseph Saxon and Willie Lewis.

Robbery Was Fast

The bandit who robbed the Quick Stop grocery on E. Russell Street Thursday night was in a hurry.

He walked into the store about 8:12 p.m. and told the manager, Robert L. Pulley, he would shoot him if he didn't empty the cash register by the time he counted 10.

Pulley scooped up the money from one register and shoved it into a paper bag. He turned to the second register.

"No, never mind I have to go," the bandit told Pulley. He took the bag, ordered Pulley to get down on the floor and then fled from the building.

Boating Course

A course in boating sponsored by the Fayetteville Power Squadron will be offered at Fayetteville Technical Institute. Registration is set for Tuesday at 7:30 p.m. at FTI.

The course will offer instruction in proper boat operation and equipping a boat to meet safety regulations.

PRACTICAL NURSING — Brenda Best, Katharyn Carter, Janet Chearning, Doris Creighton, Audrey Davis, Cynthia Garner, Anna Hale, Connie M. Hall, Nita Kirtz, Karen McAllister, Eula McLaughlin, Barbara Mastalaski, Barbara J. Melvin, Maggie Pridgen, Anna Ross, Alease Russel, Joyce Schultz, Judy Shea, Robert Stanlet, Therese Stanley, Emily Sutherland, Janice Unruh, Mary Webb, Norma Wilkins, and Ella Kelly.

WELDING — Robert Beasley, Larry Clark, Scott Jernigan and Charles Reddick.

ASSOCIATE DEGREE NURSING — William E. Stewart and Susan G. Tyson.

BUSINESS ADMINISTRATION — Tommy Byrd, Charles Archbell, John Barbour, Gloria Chance, Douglas Mull, Michael O'Brien.

MARKETING & RETAILING — Agnes Evans, Patricia Sinclair and Deborah Spivey.

INDUSTRIAL MANAGEMENT — Bobby Singletary and William E. McDaniel.

ARCHITECTURAL DRAFTING — Phillip Harrington and Warren F. Jones.

ELECTRONICS — Robin Hood Johnson.

THE FAYETTEVILLE OBSERVER
THURSDAY, SEPTEMBER 14, 1972

HEW Funds Announced By FTI

A total of \$21,465 has been awarded Fayetteville Technical Institute from the Department of Health, Education and Welfare for loans and scholarships to associate degree nursing students.

According to FTI financial aid officer, Norman Sturdivant, these funds will be awarded Fayetteville Tech ADN students primarily on the basis of need. Student loans are to be repaid within ten years beginning the year after leaving the Institute. Scholarships are non-repayable.

FTI now has 75 students enrolled in the two-year associate degree nursing program.

THE FAYETTEVILLE OBSERVER
THURSDAY, OCTOBER 5, 1972

22-23

FAYETTEVILLE Technical Institute has received a \$70,000 grant from the Department of Health, Education and Welfare.

Charles Koonce, administrative assistant to FTI President Howard Boudreau, said the funds will be used for instruction and recruitment and will be directed primarily to Vietnam veterans.

Some funds will also be available to any disadvantaged or handicapped veteran.

FTI is the only North Carolina institution to receive this type of grant and one of 43 two-year educational facilities in the country to receive this aid.

Former Medics Become FTI's First ADN Men

The word "nurse" traditionally conjures up a picture of a lovely feminine vision in white, but this image — as so many of our stereotypes — is changing. Each year more men are working in hospitals as registered nurses, particularly in areas of critical care. Fayetteville Technical Institute's first young men to complete the associate degree in nursing are Ken Ledford and Bill Stewart.

"I was majoring in history at what is now UNC-Asheville," explained Ken, "when I

joined the Air Force. I took a battery of tests and to my surprise, scored highest in the sciences. I joined the medics and was stationed at Pope Hospital for boot training."

Ledford flew as a medical technician during his tour of duty in Europe and was discharged at Pope. "I got out in August of '70, and enrolled the next week at Fayetteville Tech. I've been in school ever since. Even last summer I took a couple of electives to lighten my course load for the fall."

Bill Stewart, the other FTI male nurse graduate, is a native of Rockingham. He, too, was tested when he joined the Army and advised to go into the medics. "I'd never even thought of doing that," Bill confessed, "but I became an aide, attended jump school and joined the 82nd Airborne."

During his six years in service, Bill went to the Dominican Republic and was on active duty in Vietnam.

"Bill outranks me by one stripe," said Ken, "I was discharged a sergeant, he made staff sergeant."

The young men were quick to pay tribute to their wives who supported them figuratively and literally during their program at FTI. The associate degree nursing curriculum at Fayetteville Technical Institute is accredited by the National League for Nursing and covers six quarters or two years' instruction prior to writing the State Boards.

Bill is married to the former Joan Hancock, beautician, and Ken, to Brenda Tincher, public school teacher. "We had 18 and 19 classroom contact hours in addition to clinical work, plus studying, so our wives just had to take over an extra amount of duties at home," said Ken, "as well as earning our living while we were in school."

After successfully writing the State Board Examination for Licensure, the duo will become registered nurses. Each plans to work in an emergency room — Bill at Richmond Memorial Hospital in Rockingham, and Ken at Asheville Hospital while awaiting acceptance in a school for nurse anesthetists. Unfortunately, the young men explained, North Carolina does not have adequate facilities for educating nurses in this field. It is a highly competitive program and the graduates cannot fill the demand for their services. It provides a career with several options. The nurse anesthetist can become a member of a hospital or private surgical clinic team, join an oral surgeon, veterinary physician or enter the armed services' medical corps as an officer. This advanced training re-

MALE NURSES — Bill Stewart (left) and Ken Ledford with their patient, 'Mr. Chase', in the ADN classroom at Fayetteville Technical Institute. (Observer photo—Johnny Horne)

quires two years' instruction beyond the RN status.

How do their wives feel about this plan?

"Joan says if that's what I want," commented Bill, "it's

all right with her, but she is really looking forward to retirement in 1974 or '75!"

Search For Knowledge Of Tar Heel Indians

By JOANN MacMILLAN

Fayetteville Tech students are finding, first-hand, archeology to be the key to North Carolina history. Under the direction of George Hicks, instructor of Western Civilization, the FTI Archeological Society was formed this year, and sixteen students participated in a recent dig in Harnett County.

"Apparently, North Carolina was an integral part of vast trade route that stretched north and south from Peru to Canada at about the same time trade routes were being traced through Euro-Asia. Little evidence remains of these early American Indians. Somehow metallurgy passed them by, and there is a period covering approximately 1,000 years of cultural discontinuity rather like the Dark Ages of Europe," explained Hicks. "However," he continued, "there is evidence that they lived a nomadic life for the first ten to fifteen thousand years. About the 6th century, agriculture appeared and continued well into the time of the coming of the white man."

Site of the FTI exploration was a burial mound in Harnett County. Carbon dates place the time of burial to coincide with the establishment of the famous "Lost Colony" of John White. For it was during the first half of the 16th century that Indian migrants from the south made their way into the Upper Pee Dee Basin and Cape Fear Valley.

The mound contained remains of the victims of the "Drowning Creek Massacre." According to Harnett County historian Malcolm Fowler, the battle took place the "day the birds stopped singing." Legend has it that the Drowning Creek Indians had begun to poach on the Upper Cape Fear Indians' land. They were ambushed. The only warning the Drowning Creeks had was the stillness that settled over Cameron Hill preceding the attack. Over 100 were slain that day.

As was the custom of the Creek nation, victims were left to be scavenged. Later, the bones were bundled and carried two miles to the common burial grounds.

"There are few artifacts to be found," Hicks said, "because it wasn't customary for Creek to bury their dead with possessions for the afterworld."

"Perhaps one of the most important finds we've made was an infant burial urn. Just like those at the Town Creek Ceremonial Mound at Mt. Gilead. The bottom of the urn had been broken to let the spirit out. Otherwise, it was intact, bones and all. We have also found a few arrowheads within a ribcage, but not many. This site had been vandalized to 'pothunters' or amateurs just looking for souvenirs."

"We attempt to be scientific in our digging — using a datum point, strata levels, screening and sifting the earth bit by bit and recording everything we find," he concluded.

The better the past is understood, the more wisely present and future problems can be faced. North Carolina's finest human inhabitants left little evidence of their culture for the 20th century. But some is still to be found. The FTI Archeological Society intends to seek and preserve whatever they can find as a key to Tar Heel history.

DIGGING FOR HISTORY — Fayetteville Technical Institute students methodically excavate an Indian burial mound containing remains of victims of the Drowning Creek Massacre, which occurred about 1590. (Photos by FTI).

Eight Women Join Faculty Of FTI

FTI's Health Occupations Division added five instructors this fall. Mrs. Alene Koonce and Mrs. Linda Spruill have joined the Dental Hygiene Department as instructors. Mrs. Koonce holds a BS degree in Dental Hygiene from UNC at Chapel Hill and is working toward a Master's Degree in Public Health Education. While in undergraduate school, she was pledged to Sigma Phi Alpha, honor society for dental hygiene students. Mrs. Spruill is a graduate of Wayne Community College where she received her associate degree in applied science and has worked as a hygienist in a local dentist's office.

The Associate Degree Nursing faculty has three new instructors. Mrs. Edilberta Woolworth, RN, with 12 years' experience. She is a

graduate of St. Tomas University and received her Master of Education Degree from Loyola University and continued graduate work at DePaul University.

Mrs. Shirley Harris, RN, took her BS degree in nursing from West Virginia University and received her MS. from Boston University. She will be working as a part-time instructor.

Also a part-time member of the ADN faculty is Francine Corrigan, RN. Mrs. Corrigan attended State University of New York for her B.S. degree and Hunter College, City University of N.Y. where she received her Master's Degree. While in undergraduate school, she was tapped for the National Honor Society and listed in "Who's Who in American College, 1965."

Two instructors of English, Mrs. Betty Davis and Mrs. Ann Ashford, are full time FTI faculty members. Mrs. Davis received her B.S. and Master's Degrees from East Carolina University. Mrs. Ashford, an Angier Duke Scholar, was elected to Phi Beta Kappa at Duke University where she earned her Baccalaureate and MAT Degrees.

The newly appointed assistant librarian, Mrs. Ingrid Portner Gibbons, is a native of Enger, Westfalen, West Germany. She received a M.A. degree in English from the University of Freiburg, and took her Masters in Library Science from East Carolina University.

These eight new faculty members bring Fayetteville Technical Institute's faculty number to 80 for the daytime curricula which has enrolled a record-breaking 1201 students in the fall quarter.

Autumn '72

main problem facing the country is in domestic affairs, particularly inflation and a recession both at the same time. Beyond that, he still holds a distinctly unfavorable view of the President personally.

"I can't believe what he says," Surette remarks. "He was elected because he had a plan for ending the war. If we'd have known it was going to take him five or six years he never would have won. When he attempts to make things perfectly clear, I don't understand it."

The rest are all Nixon voters who have switched.

"I don't think he's what you'd call an honorable man," says a retired longshoreman who lives in the Greenpoint section of Brooklyn. "That's why they call him 'Tricky Dick.' Most of the young people are for McGovern, like my kids. They figure under him there'll be more jobs, which will be a lot of bull --- He bulls --- you so much you can't believe him."

But Nixon is a great politician. He knows foreign affairs. I think he tried to do a job with labor, he tried to keep prices down. Maybe the

fi a housewife in Royal bich: "I felt like crying ne got in, but he hasn't that bad. Still there are when I feel like saying, the real Richard Nixon stand up."

Course For Nurses Set

Fayetteville Technical Institute will start a refresher course for registered nurses Oct. 23.

The course, jointly sponsored by FTI and the Cumberland County Hospital System, will be offered in the hope of luring registered nurses who have left the field back to work.

The six-week course will feature 135 hours of class-

room and clinical instruction. The clinical instruction will be conducted in the two hospitals, and will make up about half the course time.

Bill Bryant of FTI said nurses will be taught new techniques, new equipment now being used in nursing, and the instruction will cover the new drug problems.

Mrs. Fawn Rigney is instructor.

About the 6th century, agriculture appeared and continued well into the time of the coming of the white man."

Site of the FTI exploration was a burial mound in Harnett County. Carbon dates place the time of burial to coincide with the establishment of the famous "Lost Colony" of John White. For it was during the first half of the 16th century that Indian migrants from the south made their way into the Upper Pee Dee Basin and Cape Fear Valley.

The mound contained remains of the victims of the "Drowning Creek Massacre." According to Harnett County historian Malcolm Fowler, the battle took place the "day the birds stopped singing." Legend has it that the Drowning Creek Indians had begun to poach on the Upper Cape Fear Indians' land. They were ambushed. The only warning the Drowning Creeks had was the stillness that settled over Cameron Hill preceding the attack. Over 100 were slain that day.

As was the custom of the Creek nation, victims were left to be scavenged. Later, the bones were bundled and carried two miles to the common burial grounds.

"There are few artifacts to be found," Hicks said, "because it wasn't customary for Creek to bury their dead with possessions for the afterworld."

"Perhaps one of the most important finds we've made was an infant burial urn. Just like those at the Town Creek Ceremonial Mound at Mt. Gilead. The bottom of the urn had been broken to let the spirit out. Otherwise, it was intact, bones and all. We have also found a few arrowheads within a ribcage, but not many. This site had been vandalized to 'pothunters' or amateurs just looking for souvenirs."

"We attempt to be scientific in our digging — using a datum point, strata levels, screening and sifting the earth bit by bit and recording everything we find," he concluded.

The better the past is understood, the more wisely present and future problems can be faced. North Carolina's finest human inhabitants left little evidence of their culture for the 20th century. But some is still to be found. The FTI Archaeological Society intends to seek and preserve whatever they can find as a key to Tar Heel history.

DIGGING FOR HISTORY — Fayetteville Technical Institute students methodically excavate an Indian burial

IT'S A FAMILY AFFAIR for the Steven Shoemakers as Mrs. Shoemaker holds son Michael while his father checks his respiration. Mr. Shoemaker is a first year student in associate degree nursing at FTI.

'I WANT TO LISTEN, TOO,' said Dan Thompson when Mrs. Chabot rechecked his blood pressure.

'MY, HOW TALL YOU ARE!' exclaims Mrs. Chabot as she measures Dan Thompson.

'Vital Signs' Clinic Part Of Nurses' Week

Governor Bob Scott has proclaimed October 8 - 14 as Nurses' Week in North Carolina. Fayetteville Technical Institute is educating 75 young men and women to become professional nurses through the associate degree nursing curriculum. Accredited by the National League for Nursing, the Fayetteville Tech two-year program is designed to prepare the students to write the licensure examination for registered

nurses. One of FTI students' first experiences with patients is the "Vital Signs" clinic. In addition to classmates, faculty, staff — and in some cases, family — the future nurses checked some of the children from nearby Honeycutt School. Absolutely painless, the "Vital Signs" clinic involved recording temperature, height, weight, pulse rate, respiration and blood pressure.

FOUR YOUNG VISITORS from Honeycutt School took part in the 'Vital Signs' clinic for first year associate degree nursing students. Student Sherry Chabot takes Dan Thompson's blood pressure as Randy Carter, Parker Lyntch and Beth Cruden look on. (Photos by Earl McLendon FTI)

COOPERATION — 'I'm going to check your pulse and temperature at the same time,' says ADN student Doris Day, as Beth Cruden patiently cooperates.

Course For Nurses Set

Fayetteville Technical Institute will start a refresher course for registered nurses Oct. 23.

The course, jointly sponsored by FTI and the Cumberland County Hospital System, will be offered in the hope of luring registered nurses who have left the field back to work.

The six-week course will feature 135 hours of class-

room and clinical instruction. The clinical instruction will be conducted in the two hospitals, and will make up about half the course time. Bill Bryant of FTI said nurses will be taught new techniques, new equipment now being used in nursing, and the instruction will cover the new drug problems.

Mrs. Fawn Rigney is instructor.

He Shall Have Music Wherever He Goes

By JOAN MacMILLAN

A most unusual sound was introduced to the students at Fayetteville Technical Institute last week as Ken Bruggers, musician-in-residence, presented his first campus harpsichord recital.

This unusual instrument hit its peak of popularity in the baroque period and has been primarily a museum piece since the piano was perfected in the 17th Century.

"It was first used in the Netherlands before Columbus sailed to the New World," explained Ken, "and was well-received throughout Western Europe even following the early colonists to America. The harpsichord was never popular in Eastern Europe. But today, it is beginning to enjoy new acceptance and outstanding musicians are composing exclusively for the harpsichord."

The wooden instrument produces a light, silvery, quick-to-fade sound by plucking strings as opposed to the piano's hammer-on-strings technique. It is an instrument best suited for small rooms and was found in all the courts and fashionable drawing rooms of Western Europe two and three hundred years ago.

The audience at FTI was spell-bound by the bright silvery trills produced by the harpsichord. The piano was also on stage in the student lounge, and together the instruments were used to present contrasts in music styles.

Ken, himself, hand-made the harpsichord used at FTI. It is designed to be quickly disassembled and neatly packed into the back of a station wagon.

The Bruggers, as a team, form a masterful musical combination. Frances Webinga Bruggers is a concert pianist. A native of Venice, Florida, she and Ken met at Hope College, Holland, Michigan, where they each received baccalaureate degrees. Married in 1968, they attended Southern Methodist University in Dallas and earned their Master of Music Degrees—she in piano, he in organ and harpsichord.

Ken has presented organ and harpsichord recitals at Union, Asbury and Hope Colleges as well as at SMU and the University of Dallas. He also appeared in Tulip Time Organ Recital Series in Holland, Michigan. Assigned as harpsichordist with the SMU Orchestra, he was an instructor and church musician while attending graduate school. Ken is a member of Pi Kappa Lambda honorary music scholastic fraternity and the American Guild of Organists. His hobbies are distance running, woodworking and tennis—the last an enthusiasm which his wife also shares.

Frances teaches music appreciation at FTI and gives private piano lessons in addition to serving as Ken's assistant at Sampson and Fayetteville Technical Institutes. A piano instructor at Union College in Barboursville, Kentucky, and pianist for SMU's Department of Dance as well as choir director in Dallas, Frances was elected for Mortar Board while in undergraduate school at Hope College. Besides tennis, her hobbies are reading and knitting.

The charming and talented couple will be available for scheduling concerts and lectures in the Fayetteville area.

"We can hardly wait to go into the community," said Frances, "especially into the schools".

This is the second year FTI has shared a musician-in-residence. Last year, Joel Andrews, harpist, was assigned to FTI and Sandhills Community College. The musician-in-residence program is sponsored by the North Carolina Arts Council and the Department of Community Colleges. The musicians serve both the institutions to which they are delegated as well as the community in which they are located. Those wishing to schedule an appearance by the Bruggers should contact George Hicks, chairman of the department of social sciences, at Fayetteville Technical Institute.

Education A Family Affair At FTI

In the past decade at Fayetteville Technical Institute, there have been several members of the same family enrolled at FTI.

However, the Pelaez father-son combination in the current automotive mechanics curriculum is a first.

Francisco Pelaez is a retired sergeant, E-7, who spent 20 years in Airborne Armature Communications.

His son, Frank, served three years and was discharged in order to attend FTI.

The senior Pelaez is a year

ahead of Frank and has set high academic standards for him. Francisco Pelaez is on the President's List each quarter and holds a grade point average of 3.7.

"I like the Fayetteville area," Pelaez said, "and want my family to remain here. It seems like an espe-

cially good place for a skilled auto mechanic."

"And although I had never had any training in this line of work, I enjoy working with my hands so I came to Fayetteville Tech for their two year program."

"Really, it's been a three year project because I went into the developmental courses first. It had been 30 years since I attended school and things had really changed."

"I speak four languages, but I wasn't sure I could still learn math and other subjects required for the curriculum. To my surprise, I found I could learn, maybe was a little slower than some, but really did better than some of the young kids in my classes."

A native of Mexico, Francisco Pelaez's wife is Argentine and their son was born while they were stationed in Germany.

After completing the Fayetteville Tech diploma in automotive mechanics, Pelaez will serve an apprenticeship with a local auto shop. This will allow Frank time to finish his second year. Then they plan to open their own shop.

There is no generation gap between this father and son. If anything, they are bridging a gap to the future with plans for a career of togetherness in a productive field.

FTI Expands Programs To Reach More People

By BILL WRIGHT
Observer Staff Writer
Fayetteville Technical Institute has expanded its pro-

gram this year, and its influence in the community as well.

Its programs reach into the community in a physical as well as academic way.

FTI is touching the lives of at least 5,000 people this year.

Many of the school's adult education courses moved off the FTI campus this fall when for the first time the institution began offering a full curriculum at night.

In the past, the campus facilities had been at night for adult education.

These programs now are being held in high schools across the county, factories, community centers and other far-flung places.

The result is not only that FTI is being felt in the lives of more people, but its programs are being brought closer to the people in a physical sense.

FTI President Howard Boudreau said, "We're finding that the needs of the people are changing. People here are hungry for education, and if we offer it, they will come."

He said the new direction of the institute "in no way is

taking away from our original idea of offering technical and vocational education to the people."

Arthur Cavano, director of general education, said, "We're past the point where we are a parochial institution interested solely in the needs of our own students. The facility is being used by a number of state agencies."

FTI's adult education programs are being held, as an example, in six high schools in Fayetteville and Cumberland County, and one junior high.

Schools offering these basic courses are Reid Ross, E. E. Smith, Douglas Byrd, South View, Pine Forest and Cape Fear High Schools, and J. S. Spivey Junior High.

Other examples are a course for educable retarded children at the Day Care Center; an adult basic education course for grades one through 12 at the Savannah Community Center; a course in human relations at Ft. Bragg; a communications course at Veterans Hospital; courses in safety and first aid

at Oakdale Elementary School; plus a course in blueprint reading at Black and Decker plant, and other courses in other plants and other centers in the county.

Not only is the Institute reaching out into the county, but other institutions are reaching into the school itself.

North Carolina State University is conducting a course on the FTI campus for recertification of teachers; The University of North Carolina at Chapel Hill is conducting a course for disadvantaged children.

East Carolina University is also using FTI facilities for courses.

FTI is also offering instruction to soldiers about to be discharged and engaged in the Project Transition program at Ft. Bragg. Computer operation and programming is one of the more popular courses offered in this program.

The institute, along with the North Carolina Association for the Blind and the Fayetteville Lions Club, plans shortly to begin teaching braille to blind people.

There are many other programs being offered to adults of the community, including banking, insurance, real estate, boating and flying.

"We have to grow along with Fayetteville and Cumberland County," Boudreau said.

Space is the only deterrent to this growth at the moment, and expansion of the main campus is in the cards for the near future, Cavano said.

If this is accomplished, FTI's opportunities and influence will continue to grow.

FTI Announces Honor Students

A total of 134 students enrolled at Fayetteville Technical Institute have been named to FTI's "president's list."

They are:

Joyce Biggs, Marilyn Duke, Rena Elliott, Kathryn Fenimore, Glen Giebel, David Gilchrist, Kenneth Hoehn, Deborah Hood, Charles Krantz, Charles Melvin, Susan Ryan, Ronnie West and Charles Wrenn.

Also, George Averitt, Clayton Burtrum, Daniel Duncan, Joe Llacuna, Edward McDuffie, Metrah Spencer, Thomas Young, Gary Ahearn, Michale Bryan, Robert Cannady, Wilson Carter, Terrill Hoffman, Roxanne Hopfer, Steven Judge, James Lovell and Joe Ratcliff.

Also, Dorothy Buchek, Marguerite Burch, Sophia Edwards, Delores Evans, Judith Gardner, Carolyn Green, Sandra Hoffman, Linda Howard, Cleve Lovette, Stephen Shoemaker, James Benfield, Robert Lee, Donald Lucas, John McMillan, John Moore, Francisco Patterson, Robert Patterson, Frank Pelaez and Sutee Tantaratanapisal.

Also, Wandra Brigman, Lloyd Ryhne, Clyde Watkins, Ronald Autry, Charles French, Kenneth Fuller, Daniel McInnis, Thomas Saunders, John Simon, Shirley Benson, Carolyn Bleecker, Martah Bock, Cynthia

Cameron, Janet Claussen, Carol Cogdell and Bonnie Gibson.

Also, Deborah Giles, Helga King, Sharon Mabe, Pamela Pearsall, Jaye Pyles, Susan Seaver, Susan Smith, Janet Vitolo, Sandra Waren, Brenda Wiseman, Elizabeth Word, Thomas Butrim, Daniel Goins, William Kinlaw, Charles Kurzenoerfer, Albert McArthur, Thomas Nameth and Donald Vlasko.

Also, Patricia Blackman, Dennis Choy, Harry Harris, Pronapa Ko-Anukullkomol, Joan Mosher, Clinton Nordan, William Westbrook, Eugene Whalen, Barbara Young, Samuel Croom, Henry Czubek, Edward Harris, Harvey McLamb, Alvin Mosley, Donald Parrish, Russell Smith and John Woodyard.

Also, James Fisher, Gary Smith, Ed Wilbanks, Timothy Church, Alton Hardison, Sarah Ingle, Barbara Jess, Stanley Maier, Susan Mercurio, Mary Taft, Rita Adams, Bettie Davis, Rosemarie Hargrove, Jackie Koehne, Peggy Packett, Ruth Ruple and Virginia Veazey.

Also, Malcolm Armstrong, Milton Lock, Thomas Sawyer, Gary Smith, Anthony Vick, Allen Westbrook, Chester Wheeler, Donna Dunn, Debra Flowers, Vicky Fowler, Audrey Hardy, Marshall Holmes, Barbara Jessmer, Vickie Smith, Johnnie Buxton, Daniel Matthews, James E. Hall and Lowell White.

Ensemble To Perform At FTI

A special program of baroque and renaissance music as well as 20th Century selections will be presented by the Fayetteville Ensemble Sunday afternoon, December 3, at 8 p.m. in the Paul H. Thompson Library at Fayetteville Technical Institute.

Six musicians will play seven instruments: FTI's musician-in-residence, Ken Bruggers, the harpsichord; Mrs. Frances Bruggers, recorder; Rob Wilcox, bassoon; Mrs. Linda Wilcox, oboe and English horn; Tim Brown, cello; and Paul Tamblin, flute. Mrs. Wilcox will also sing during the hour-and-a-half program.

The public is invited to attend this concert. There is no admission.

LUTHER (NICK) JERALDS

Jeralds Heads Project At FTI

The United States Office of Education has selected Fayetteville Technical Institute here to pilot the new North Carolina "Upward Bound — Outreach" program for veterans.

This special project is being conducted in eight institutions throughout the Southeast, with FTI as the only school to implement the program in this state.

Luther (Nick) Jeralds, director of the project, said in explaining the project that "less than 20 per cent of eligible veterans are utilizing their educational entitlements and are, therefore, finding it extremely difficult to secure adequate employment. We

are concentrating on veterans who lack a high school diploma and those who need refresher courses before entering post-secondary training.

"The success of our project," said Jeralds, "will depend on our contacting the veteran. We need the help of friends, relatives and the total community in this effort."

In addition to Jeralds, the Veteran's Education and Training Outreach Office (VETOO) is staffed with two recruiter-counselors who will assist in filing applications or forms and inform the veteran of his educational opportunities and financial assistance available to him.

REGISTER TONIGHT

Fayetteville Technical Institute's EVENING CURRICULUM WINTER SESSION SCHEDULE

WHO MAY ATTEND: Any person 18 years of age or older may attend.

TUITION: \$2.50 per quarter hour. (Example — Courses which carry three quarter hours credit cost the student \$7.50 plus text, instruments and tools).

REGISTRATION: Monday, November 27 and Tuesday, November 28 6:30 to 9:00 P.M. at the Paul H. Thompson Library. Classes will be filled on a first-come, first-served basis.

CLASSES BEGIN: Wednesday, November 29 at 6:00 P.M.

Fayetteville Tech Gets Special Army Program

By BILL WRIGHT
Observer Staff Writer

Fayetteville Technical Institute has been designated a Servicemen's Opportunity College in a new program aimed at offering educational opportunities to servicemen.

FTI is the first school in North Carolina to be designated a SOC school.

The designation was made by the American Association of Community and Junior Colleges, and announced today by FTI President Howard Boudreau.

The SOC program was originated by the Association of Community and Junior Colleges and the U. S. Department of Defense in an effort to upgrade the military.

Boudreau said the Defense Department now requires that non-commissioned officers acquire associate in arts degrees before being eligible for promotion.

Associate degrees are those

given by two year institutions after completion of their curriculum.

Because of the serviceman's being moved around, he has difficulty accumulating the necessary college credits to obtain an associate degree.

He often takes courses at a college, only to be moved the next year and enter a new school which will not accept his credits.

The SOC program is an agreement between schools for a more liberal interpretation of each other's credits," Boudreau said.

Boudreau stressed that the agreement is not a lowering of standards.

Credits must be transferred from an accredited school, but if it is accredited, all course credits will transfer among the SOC schools, he said.

Other artificial barriers removed, the chief one being residency requirements.

The SOC program is open

to active servicemen, their dependents, and servicemen who wish to continue their education after discharge. He must begin the program while still on active duty.

FTI's new SOC program will be administered by an advisory council. The military representatives on the council are Lt. Gen. John H. Hay, commanding general, Ft. Bragg; Robert T. Cherry, deputy director of Education; Opal C. Townsend, educational service officer; and Mrs. Joyce E. Carter, Cumberland County Veterans Service Officer.

FTI advisors are William Sease, dean of instruction; Niles Compton, dean of student affairs; William O. Cameron, director of occupational education; and Arthur T. Cavano, director of general education.

Within a few weeks a catalogue will be published listing schools of the nation participating in the SOC program.

FTI's Continuing Education Plan Goes On-The-Job At Workshops

By JOANN MacMILLAN

Fayetteville Technical Institute's continuing education program goes on-the-job as classes are held at the Sheltered Workshop on Winslow St. and the Cumberland Workshop on Cool Spring St. There, clients of the workshops take 30 minutes daily to learn elementary subjects through FTI's continuing education division.

Mrs. Lavis Davis is the teacher at the Cool Spring St. site. "My approach," she explained, "is somewhat unusual. I like to make learning more of a game for my clients. For example, I have taught them to play card games so they can count more easily."

Initially, my students were with me only ten minutes at a time. We began at the kindergarten level with books, pictures and puzzles. As they progressed, we moved the sessions up to 30 minutes. Now, I have 3 or 4 with me at half-hour intervals all through the day."

A graduate of Albany State University, Mrs. Davis' husband is on military assignment to this area. They have two sons.

"My college major was sociology and psychology. This is a new challenge for me, but I find teaching at this level the most exciting work I have ever done. I'm always looking for new ways to introduce learning experiences to my students. In fact, I often awaken in the middle of the night to jot down some ideas for the next day's class," she confided.

Science projects, a newspaper layout and holiday drawings ring the room. Poems and essays as well as classwork in math are kept in each student's FTI notebook.

"It is such a thrill for me," said Mrs. Davis, "to hear a client say on payday, 'Now I can add my own money!'"

"Some of the students are actually reading college literature books. My greatest reward was teaching an 18-year-old to write. It seems as though no one had ever taken time with him. He'd been moved from one set of foster parents to another and just drifted through school. It's a shame really, but he's highly motivated and trying to make up for lost time."

At Winslow St., the classes are held in the "bow room" where millions of pre-tied bows are made on contract order. There, Mrs. Offie Muschick works with two or three students at a time in

LEARNING AID—Completing a crossword puzzle, Mrs. Offie Muschick turns to a jewelry catalog as a reference for two students at the Cumberland County Sheltered Workshop on Winslow St. (Photos by McLendon).

half-hour segments in order to improve their reading, writing and mathematical skills.

"We use just a part of the room," explained Mrs. Muschick. "The noise from the machines really doesn't bother us. Meeting for only 30 minutes each day, accomplishes much more in a shorter time so I can readily see the progress. Last year I worked in another city with 16 primary children in a classroom - but that was too many for too long a time. This way, I see almost daily progress, and I have 30 clients on the roll."

Mrs. Muschick, whose husband is stationed here also, is a graduate in special education from Clemson University.

"One of my main concerns," admitted the attractive blonde, "is to assist them with mathematics. I want the clients to be able to spend their paychecks wisely and without the added risk of being cheated. Our problems are practical and ones which they will face in daily life."

"We also stress safety rules, health and general good grooming. It's fun and rewarding work. Best of all, I can enjoy my students without having to worry about discipline or misbehavior."

They never fail to thank me for helping them each day."

Each client pays his or her way to school in that the time spent in the classroom is deducted from the timecard and paycheck.

Should the clients be expected to pay for the privilege of classroom study?

Milton Bass, director of the Sheltered Workshop observed, "Our philosophy is to place these clients in productive jobs. Their pay is a teaching aid and learning will be more meaningful to them if they are ultimately responsible for the time spent away from their work assignment."

Announcing

FTI'S NEW POLICY FOR SPRING REGISTRATION EVENING CURRICULUM CLASSES ONLY

Due to the tremendous interest in Fayetteville Technical Institute's curriculum courses, and in order to facilitate enrollment in the evening program, FTI will hold registration for four weeks - from Monday, January 29 to February 22, 1973. Adults wishing to enroll may register Monday through Friday at LaFayette Hall between 9 and 12 A.M., 1 to 3 P.M., or Monday and Thursday evenings from 6 to 8 P.M.

ALL FEES MUST BE PAID AT REGISTRATION.

Classes begin Monday, March 5th and are open to any person 18 years of age or older. Tuition is \$2.50 per quarter hour. (Example - courses which carry three quarter hours' credit cost the student \$7.50 plus text, instruments and tools.)

Military Personnel needing military tuition assistance should: (1) Select Courses, (2) Contact appropriate office at Ft. Bragg, (3) See FTI registrar and pay fees.

FTI's Continuing Goes On-The-Job

By JOANN MacMILLAN

Fayetteville Technical Institute's continuing education program goes on-the-job as classes are held at the Sheltered Workshop on Winslow St. and the Cumberland Workshop on Cool Spring St. There, clients of the workshops take 30 minutes daily to learn elementary subjects through FTI's continuing education division.

Mrs. Laveris Davis is the teacher at the Cool Spring St. site. "My approach," she explained, "is somewhat unusual. I like to make learning more of a game for my clients. For example, I have taught them to play card games so they can count more easily."

"Initially, my students were with me only ten minutes at a time. We began at the kindergarten level with books, pictures and puzzles. As they progressed, we moved the sessions up to 30 minutes. Now, I have 3 or 4 with me at half-hour intervals all through the day."

A graduate of Albany State University, Mrs. Davis' husband is on military assignment to this area. They have two sons.

"My college major was sociology and psychology. This is a new challenge for me, but I find teaching at this level the most exciting work I have ever done. I'm always looking for new ways to introduce learning experiences to my students. In fact, I often awaken in the middle of the night to jot down some ideas for the next day's class," she confided.

Science projects, a newspaper layout and holiday drawings ring the room. Poems and essays as well as classwork in math are kept in each student's FTI notebook.

"It is such a thrill for me," said Mrs. Davis, "to hear a client say on payday, 'Now I can add my own money!'"

"Some of the students are actually reading college literature books. My greatest reward was teaching an 18-year-old to write. It seems as though no one had ever taken time with him. He'd been moved from one set of foster parents to another and just drifted through school. It's a shame really, but he's highly motivated and trying to make up for lost time."

At Winslow St., the classes are held in the "bow room" where millions of pre-tied bows are made on contract order. There, Mrs. Olive Muschick works with two or three students at a time in

and mathematics.

"We use just a room," explained Muschick. "The machines read the minutes each day plus much more shorter time so I see the progress. I worked in another 14 primary child classroom - but this many for too long. This way, I see progress, and I clients on the roll."

Mrs. Muschick's band is stationed in a graduate in sports from Clemson.

"One of my clients," admitted the blonde, "is to with mathematics clients to be their paycheck without the add being cheated. On are practical and they will face in dis."

"We also str rules, health at good grooming. It rewarding work. I can enjoy my sta out having to a discipline or m."

20 Complete FTI Waitress Course

"That's just right," said J. E. Jeffrey as Mrs. Bernice Driggers demonstrated the proper procedure for table setting during FTI's waitress-training class. Twenty students completed the 25-hour course which met three days a week at Chris' Steak House. Jeffrey, the instructor is the manager of a local chain restaurant and has had background in managing NCO clubs while in the army.

"What we tried to do," he explained, "is give these women more confidence in their work. The job is a good job and the take-home pay is higher than that of many nurses or school teachers. And it's not as hard now as it used to be. Most places here in Fayetteville have busboys to clear the dishes away. The waitress takes orders, serves the meal and makes the customer feel at ease so he can enjoy a meal."

Other problems the students considered included the serving of small children and the proper method of remedying spills. Courtesy and personality were the key factors for success on-the-job according to Jeffrey.

The students are all currently employed (one girl has two jobs working all morning and into the early afternoon at a beauty shop and taking the early evening shift as a waitress at a cafe.) Most of their employers paid the supply fee for the course.

Those completing the course were: Mary Stone, Kaye Warrington, Ruby Williams, Yudson Arnold, Dorothy Moore, Judy Rogers, Marie Presslar, Evelyn Pargoc, Rosemary Semenza, Frances DeNecochea, Erna Vines, Wanda Ray, Patricia Wilfong, Kathy Couch, Theresia Sweeney, Anna Padrick, Consuelo Klottz, Frances Williams, Bernice Driggers and Debra Long.

FINAL SESSION — Miss Patricia Wilfong and Mrs. Consuelo Klottz listen as J. E. Jeffrey compliments Mrs. Bernice Driggers during the final class of the FTI Waitress-Training Course at Chris' Steak House on Raeford Road.

First Male Nurse Named FTI 'Nurse Of The Year'

Stephen A. Shoemaker has been elected "Student Nurse of the Year" at Fayetteville Technical Institute and is the first male student to receive the honor.

A native of Illinois, Shoemaker attended Prairie State College prior to entering the Air Force. He has served in England where he met his wife, Janis. The couple reside in Spring Lake with two-year old son, Michael.

A staff sergeant, Shoemaker is assigned to the 1st Aeromedical Evacuation Group at Pope Air Base and a full-time student in associate degree nursing at FTI.

In addition to being an active member of the Fayetteville Tech Student Nurses' Association, Shoemaker is also president of District Nine, SNA. He was chosen for these offices on the basis of outstanding leadership ability and the promise of becoming a well-qualified bedside nurse.

"When I enrolled at Fayetteville Tech," remarked Shoemaker, "I was thinking

Stephen A. Shoemaker

of nursing as a status career. However, through giving complete nursing care, I have found nursing to be a caring career. As each day passes, I enjoy nursing more and realize I have chosen the right career for me."

NO CURRICULA — Although fishing is not listed among the 26 separate curricula listed in Fayetteville Technical Institute's catalog, FTI President Howard E. Boudreau has proof positive of his skill in the technology of landing a largemouth bass. This 10-pounder was landed by Boudreau last weekend in neighboring Lee County. (Observer Sports Photo)

**Capping Service
Held At FTI**

Fayetteville Technical Institute held its second capping ceremony for dental hygiene students on the first Sunday of April. Dr. David R. Dunham, D.M.D., and director of the dental hygiene curriculum, introduced the featured speaker, Dr. Reynolds Carnegale, Mrs. Ellen Hoehn, instructor, explained the significance of the capping ceremony to the guests. Instructors Linda Sprull and Kay Irvin presented the caps to: Debbie Bass, Linda Bell, Shirley Benson, Cynthia Cameron, Janet Claussen, Kay Edwards, Susie Faircloth, Bonnie Gibson, Carol Gilleland, Sharon Mabe, Sandra Mayes, Teresa McArthur, Debbie Petsuck, Jaye Pyles, Rebecca Rock, Susan Sever, Nancy Stearns, Kay West, and Elizabeth Word. The Rev. Niles Compton and Howard E. Boudreau, president of F.T.I., also participated in the program. Following the ceremony, a reception was held in the Paul H. Thompson Library on the campus of Fayetteville Technical Institute.

A Cumberland First: Braille For Adults

By Joann MacMillan

"Give a man a pipe he can smoke
Give a man a book he can read."

And his home is bright with a calm delight
Though the room be poor indeed.

(James Thomson: Sunday Up the River)

Brightening the lives of three dozen men and women of Cumberland County is a course in Braille — the language written and read by the blind — now being held at the Center on Cool Spring Street.

A cooperative program sponsored by the department of adult education at Fayetteville Technical Institute, the Lions Club, the Lady Lions, Cumberland County's department of social services and the N.C. Commission for the Blind, the course is a pilot program for the Fayetteville area.

Educational facilities have long been available to the young through the Morehead School in Raleigh, but Cumberland County's adults have not had the privilege of free instruction in Braille. A recent survey showed more than 300 adults were "legally blind" in the Cumberland County boundaries. Many of the men and women were neglected as children and have never been to any school. Some are gradually losing their sight through disease and other problems associated with aging. Some are victims of accidents. All who are attending the classes are highly motivated and eager to learn to read.

The Cool Spring Street facility is operated as a recreational center on weekdays. Braille classes are held Monday and Thursday from 1 to 3 p.m. Instructor for the program is Mrs. Vickie Barefoot of Johnston County, a former science teacher and graduate of UNC.

"When we were living in Nashville, Tennessee," recalled Mrs. Barefoot, "I wanted to participate in some civic endeavor. A course for Braille instructors was offered. I volunteered and found it interesting and rewarding work. When we returned to North Carolina, I was pleased to offer my teaching services again."

There are several men and women in the group who have never been to school nor had even the opportunity to learn numerals necessary for using the telephone. "We try to teach them safety and emergency numbers first," explained Mrs. Barefoot, "then we show them how to play cards and bingo. But reading is the main thing and writing, too."

The Braille system was invented in 1852 by Louis Braille, a teacher of the blind. Characters are raised dots arranged in two vertical rows of three dots to the row. Numerals 9 - 0 and the alphabet are made up of these dots or "cells".

"We find egg cartons cut in half excellent to work with," said Mrs. Barefoot, "we make balls of aluminum foil to represent the dot and then place the ball into the cell to represent the code for the numeral or letter. Usually when a student completes the second half of the reader, he is able to continue on his own and at his own pace."

A dramatic race against time is being run by Mrs. David Hawkins, whose sight is failing. Her husband,

who is a sergeant stationed at Ft. Bragg is learning to read and write Braille also in order to assist his wife when she can no longer see.

"We were so relieved when this program was announced," said Hawkins, "there are no such facilities at Ft. Bragg and we were becoming desperate. My wife does all the housework for the family and being able to continue to read and write is really important."

The Rev. R. M. Smithson, Jr., pastor of Person Street United Methodist Church is another student in the course. This is a refresher class for him. "I attended High Point College and Duke University when I was sighted," he recalled, "however as I began to lose my sight, I learned Braille but haven't used it exclusively. Now I find I need to sharpen my skills so here I am."

Transportation to the classes has been a problem for many of the adults. "We would have three times as many students," remarked Mrs. Gentile, housemother of the Center, "if we could arrange to get them here. The Lady Lions have been most helpful in driving our pupils back and forth but we need more drivers. Unfortunately, due to insurance rules, school buses are not available to the students of this class."

Pupils are seated around tables and grouped into beginners and advanced classes. The former progress to the latter. Also available at the Center are "talking books," records, sewing materials and television sets. "We are finding it very fortunate when someone loses the picture on the television set . . . instead of replacing the picture tube, they often donate the set to us and we, in turn, can place it in a home for one of our clients," Mrs. Gentile said.

The Roosevelt Martins are enrolled in the Braille class. Members of the Senior Citizens Club, they met and were married at the Center last fall. Now they are learning Braille and progressing quite well according to Mrs. Barefoot.

Mrs. Philomena Gentile who is housemother at the Center became interested in working with the blind as a child. "My father died when I was seven. My mother had six children to rear. About the same time, her brother who was wounded in World War I, subsequently lost his sight and came to live with us. He taught me to read Braille. The Library of Congress supplied him with talking books, but I became his eyes, he said. Every night I would read the newspaper to him all the way through . . . editorials, stock market reports . . . everything. Actually, I didn't realize what a good education I was receiving by helping him! He was wonderful, he played chess and checkers and was the American Legion's first seeded chess player in that area of New York. At any rate, my interest in working with the blind is a direct result of my early years."

This first class in Braille concludes April 12. "If the need continues," Charles Smith of FTI explained, "we will arrange to offer it again. Anyone — sighted or not — who is interested in taking the course, can call the department of adult education at FTI. If there are enough to warrant another class in Braille, we will do so."

Mrs. Lillian Green listens to a talking book.

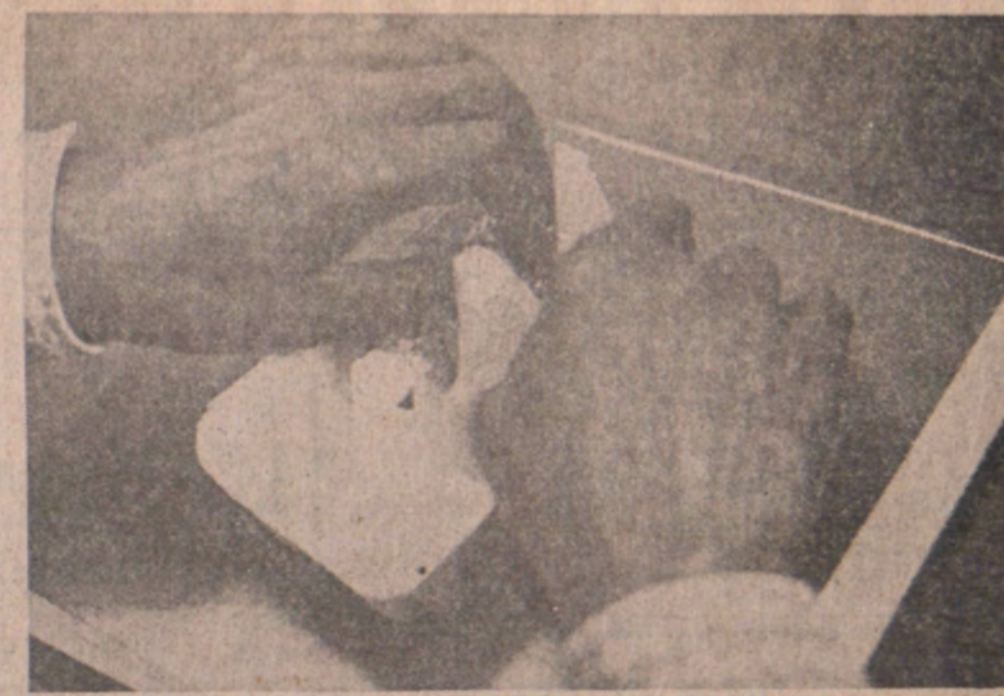

Classes in reading Braille are held Mondays and Thursdays at the Cool Spring Street center. Shown are, from left, Mrs. Margaret Martin, Roosevelt Martin, Dwight Ballentine, and instructor Victoria Barefoot.

Mrs. Victoria Barefoot aids Beulah Burke.

Practicing with egg cartons which help them to recognize the six-dot patterns of Braille are, from left, Mrs. Mattie Jenkins, Mrs. Margaret Martin and her husband Roosevelt Martin.

Braille letters are collections of dots. To recognize the differing punches which mark letters, Blind Center students practice with six-hole egg cartons and foil balls, later moving to the smaller rows of Braille punches.

From left are Mrs. Amie Cocher, the Rev. Rufus Smithson and Sgt. and Mrs. David Hawkins. Mrs. Hawkins is now sighted but is losing her vision, is hurrying to learn Braille.

Fayetteville Technical Institute's Summer School Schedule

First session May 31-July 5, 1973

Second session July 20- Aug 24, 1973

Review Courses

English 91 - Voc. & Reading

FTI Hosts Educators Meeting

Some 1,200 educators are attending the sixth annual community college conference here this week. The conference, which began Monday, concludes Wednesday at Fayetteville Technical Institute.

Monday, Dr. Ben Fountain, state president of the community college system, said the 1973 General Assembly was "good to the community colleges."

Dr. Fountain, who delivered the major speech as a substitute for Rep. Carl Stewart, D-Gaston, who was kept from the meeting by a tornado in his area, said the General Assembly provided funds to develop libraries, purchase new equipment and construct new buildings.

North Carolina is second only to California in the number of schools and total enrollment in the community college system, Dr. Fountain said. A new community college in Iredell County, which opens July 1, will be the 57th institution in the system, he said.

The conference is designed to provide an in-service program where instructors can meet to discuss problems in the teaching field and learn about innovative ideas in education.

Group meetings in approximately 45 areas were scheduled.

FTI Nursing Students Get Pins

A husband and wife team the Edward Townsends, are among the associate degree nursing students to graduate from Fayetteville Tech this year. The annual pinning ceremony was held prior to graduation.

Mrs. Lura Self Tally, representative from Cumberland County, addressed the Fayetteville Technical Institute graduating associate degree nursing students at a dinner in their honor Friday evening at the Downtowner Motor Inn.

President Howard Boudreau addressed the group. Mrs. John O'Hale, chairman of the health occupations department at FTI, presented the pins, emblem of their achievement, to the graduates.

Mrs. Dorothy Buchek, president-elect of the student nurses' association at Fayetteville Tech, gave the invocation.

Those graduating from the ADN program include Miss Deborah Brock, Mrs. Marguerite Burch, Miss Jackie Dixon, Mrs. Delores Evans, Miss Theresa Furr, Miss Doris Gibson, Miss Sandra Hoffman, Miss Linda Howard, Mrs. Jackie Jackson, Miss Diane McColl, Mrs. Gay Meador, Mrs. Keith Partney, Mrs. Yvonne Pollhill, Mrs. Ruth Pruckett, Mrs. Felicia Schafer, Mrs. Judy Sicheloff, Edward Townsend, Mrs. Patricia Townsend, Miss Rebecca Whightsil.

Fayetteville Tech Announces

One hundred twenty three students enrolled at Fayetteville Technical Institute were selected for its President's List for spring quarter.

Those earning a grade "B or better" were:

Lawrence Anderson, Ingrid A. Arrellano, Henry J. Baran, William L. Barthlow, Deborah E. Bass, Shirley Benson, Patricia W. Blackman, Priscilla A. Blue, Mary L. Brown, Dorothy J. Buchek, Roxanne H. Butler, Robert A. Cannady, Wilson G. Carter, Dennis E. Choy, Norman D. Clearman, Mary G. Cook, Gilbert J. Corcoran, Karen A. Cotten, Samuel E. Croom, Mary A. Culbreth, Bettie Davis, Jimmy Dickson, Marilyn B. Duke

and Delores A. Evans.

Also, Larry W. Ferguson, Robert F. Foy, Merland F. Francis, Charles S. French, Robert A. Garcia, Judith E. Gardner, Steven L. Gates, Sib S. Ghosh, Bonnie L. Gibson, Mary E. Graves, James E. Hall, Audrey A. Hardy, Rosemarie H. Hargrove, Harry R. Harris, Sandra N. Hennessee, John P. Hildebrandt, Sandra A. Hoffman, Alma Holland, Sara S. Hood, Jacquelyn Jackson, Michael Jacobs, Douglas C. Jolley, Steven R. Judge, Pornpa Ko-Anukulkomol, Charles E. Krantz, Raymond J. Kuliwicki, Charles Kurzenoerfer and Maurice L. Lancaster.

Also, Lionel D. Lofthouse,

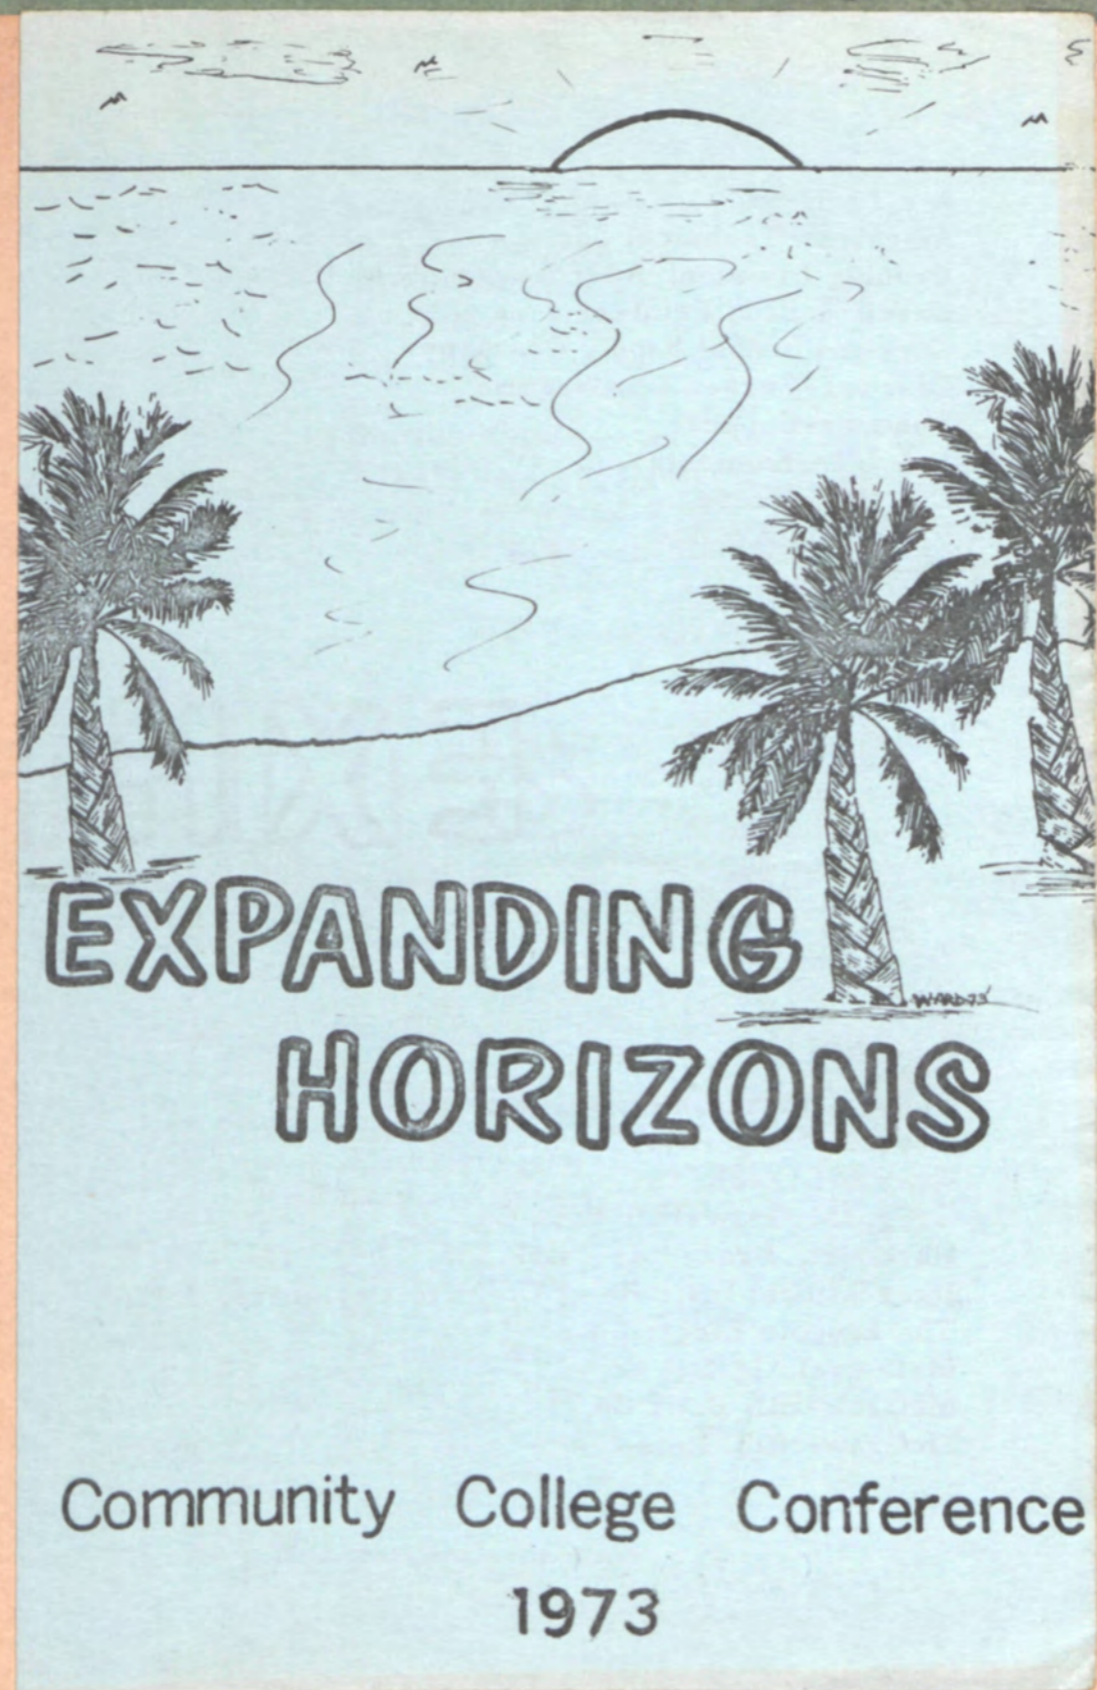

Clevie A. Lovett, Sharon L. Mabe, Jacqueline M. Maguire, Charles D. Martin, Joyce Martin, Gilbert T. Masaki, Anthony F. Mikolajczyk, Jerry D. Morrison, Joan C. Mosher, Alvin C. Musley, Thomas S. Blackman, Kathryn Fenimore, John J. McMillan, Deanna M. Gallant, Fred E. Golding, Janet D. Gwinn, Ronnie L. West, Harvey L. Brisson, Steven C. Core, Daniel R. Matthews, Gary M. Butler, John D. Simon, Clayton L. Burtrom, Deborah A.

Hodges, Estalene Morrison, Larry J. Brewer, Gary L. Butler, Alton W. Hardison, Michael R. Parham and Thomas D. Young.

Dr. Fountain, who delivered the major speech as a substitute for Rep. Carl Stewart, D-Gaston, who was kept from the meeting by a tornado in his area, said the General Assembly provided funds to develop libraries, purchase new equipment and construct new buildings.

North Carolina is second only to California in the number of schools and total enrollment in the community college system, Dr. Fountain said. A new community college in Iredell County, which opens July 1, will be the 57th institution in the system, he said.

The conference is designed to provide an in-service program where instructors can meet to discuss problems in the teaching field and learn about innovative ideas in education.

Group meetings in approximately 45 areas were scheduled.

FTI Nursing Students Get Pins

A husband and wife team the Edward Townsends, are among the associate degree nursing students to graduate from Fayetteville Tech this year. The annual pinning ceremony was held prior to graduation.

Mrs. Lura Self Tally, representative from Cumberland County, addressed the Fayetteville Technical Institute graduating associate degree nursing students at a dinner in their honor Friday evening at the Downtowner Motor Inn.

President Howard Boudreau addressed the group. Mrs. John O'Hale, chairman of the health occupations department at FTI, presented the pins, emblem of their achievement, to the graduates.

Mrs. Dorothy Buchek, president-elect of the student nurses' association at Fayetteville Tech, gave the invocation.

Those graduating from the ADN program include Miss Deborah Brock, Mrs. Marguerite Burch, Miss Jackie Dixon, Mrs. Delores Evans, Miss Theresa Furr, Miss Doris Gibson, Miss Sandra Hoffman, Miss Linda Howard, Mrs. Jackie Jackson, Miss Diane McColl, Mrs. Gay Meador, Mrs. Keith Partney, Mrs. Yvonne Pollhill, Mrs. Ruth Pruckett, Mrs. Felicia Schafer, Mrs. Judy Siceloff, Edward Townsend, Mrs. Patricia Townsend, Miss Rebecca Whightsil.

FTI Hosts Educators Meeting

Some 1,200 educators are attending the sixth annual community college conference here this week. The con-

COOKOUT

The exhibitors and Fayetteville Technical Institute will host a complimentary cookout for participants and family on Tuesday afternoon on the Fayetteville Tech campus at 6:30. There is no charge for the cookout, but each person attending the cookout must submit a complimentary ticket. Tickets may be obtained in the exhibit area on Monday from 1:00 P. M. to 6:00 P. M. and on Tuesday from 9:00 A. M. to 6:00 P. M.

LOCATION OF EXHIBITS - Lafayette Hall

TIME EXHIBITS ARE OPEN

Exhibits will be open Monday, May 28, 1973 from 1:00 P. M. till 6:00 P. M. and on Tuesday, May 29, 1973 from 9:00 A. M. till 6:00 P. M.

GIFTS

A drawing will be made Tuesday, May 29, 1973 at 7:30 P. M. during the cookout, from which several gifts will be given. You must be present to win. The drawing will be made outside the Library Building.

Rose Gets FTI Post

Four the fourth consecutive year, Thorton W. Rose has been selected chairman of the board of trustees of Fayetteville Technical Institute.

Rose, a graduate of N.C. State University is division traffic manager of Carolina Telephone Company.

Other members of the FTI board are Sen. Joh T. Henley, vice-chairman; Howard L. Hall, secretary; William C. Beard Jr., Roscoe Blue; Marion C. George Jr.; Mrs. Dan S. Currie Jr.; Neill A. Currie Jr.; F. C. Franklin; John C. Mitchell, Harry F. Shaw, and Harry B. Stein.

Fayetteville Technical Institute's

SECOND SESSION, SUMMER SCHOOL SCHEDULE includes:

Review Courses

English 91 Vocabulary & Reading
English 92, Composition & Grammar
Chemistry 96, Advanced Chemistry
Math 91 & 92, Basic Math
Math 96, Algebra
Bus. 219, Credit Procedures
Psy. 101, Intro. to Psychology I
Bio. 106, Human Anatomy & Physiology
English 105, English Usage & Composition

Electives

English 106, World Literature
Eco. 205, Applied Economics
Soc. 101, Intro. to Sociology
Drafting 1180, Trade Drafting
His. 106, Western Civilization
Math 1104, Trigonometry
Psy. 206, Applied Psychology
English 204, Speech
Bus. 102, Typewriting

Anyone who has graduated from high school is eligible to attend
TUITION — \$2.50 per credit hour
REGISTRATION — Friday, July 20th 8:30 A.M. to 3:00 P.M.
CLASSES BEGIN — Monday, July 23rd — end August 24, 1973

For more details, contact:

Director of Admissions

FTI Conducts Diploma Session

Fayetteville Technical Institute held its second formal summer session commencement exercises this morning in the Paul H. Thompson Library.

Fifty men and women received their diplomas and associate degrees wearing the traditional caps and gowns for graduation.

Participating in the ceremony were President Howard E. Boudreau who delivered the commencement address; Dean of Student Affairs, Niles E. Compton and Dean of Instruction, William E. Sease.

Receiving associate degrees were Arnold Ray Beard, Harold Brady, Sue Bargerite Brewer and Dorothy Ann McNeill.

Bobby Wayne Waddell received a diploma in air con-

dition and refrigeration.

James B. Cooper, Edward Zeaton Davis, Daniel Lee Goins, Bennie Jerome Graham, Harold Stanley Grimes, William Thomas Kinlaw, Jr., Charles Robert Kurzenoerfer, Albert L. McArthur, Joe L. McCollum, Anthony F. Mikolajczyk, Thomas S. Nameth, Curtis W. Pritchett, Donald F. Flasko, Bobby L. Whittington, and Henry Gleen Williams completed requirements for a diploma in electrical installation and maintenance.

Those who received diplomas in practical nursing are: Rita Jean Adams, Pamela A. Amoroso, Hettie Jane Beamon, Priscilla Ann Blue, Bettie J. Davis, Alva V. Ferebee, Rosemarie H. Hargrove, Martha Ann Harris, Jacquelyn L. Koehne, Patricia J. Landreth, Estalene R. Morrison, Diana E. Newman, Peggy Packett, Louella W. Phillips, Gertrude K. Robinson, Edith H. Ruple, Anna M. Van Regenmorter, Virginia O. Veazey and Deborah S. West.

Graduating with a diploma in welding were: Jimmy Dickson, James E. Hall, Jr., Harold Hudson, James O. McMillian, Videll McRae, Barry Wayne Mack, John Dee Pittman, Charles A. Robinson, Thomas C. Sawyer, James Seagroves, Bobby L. Soles and Lowell K. White.

FTI Sets Special Classes

Special classes will be offered servicemen and veterans by Fayetteville Technical Institute.

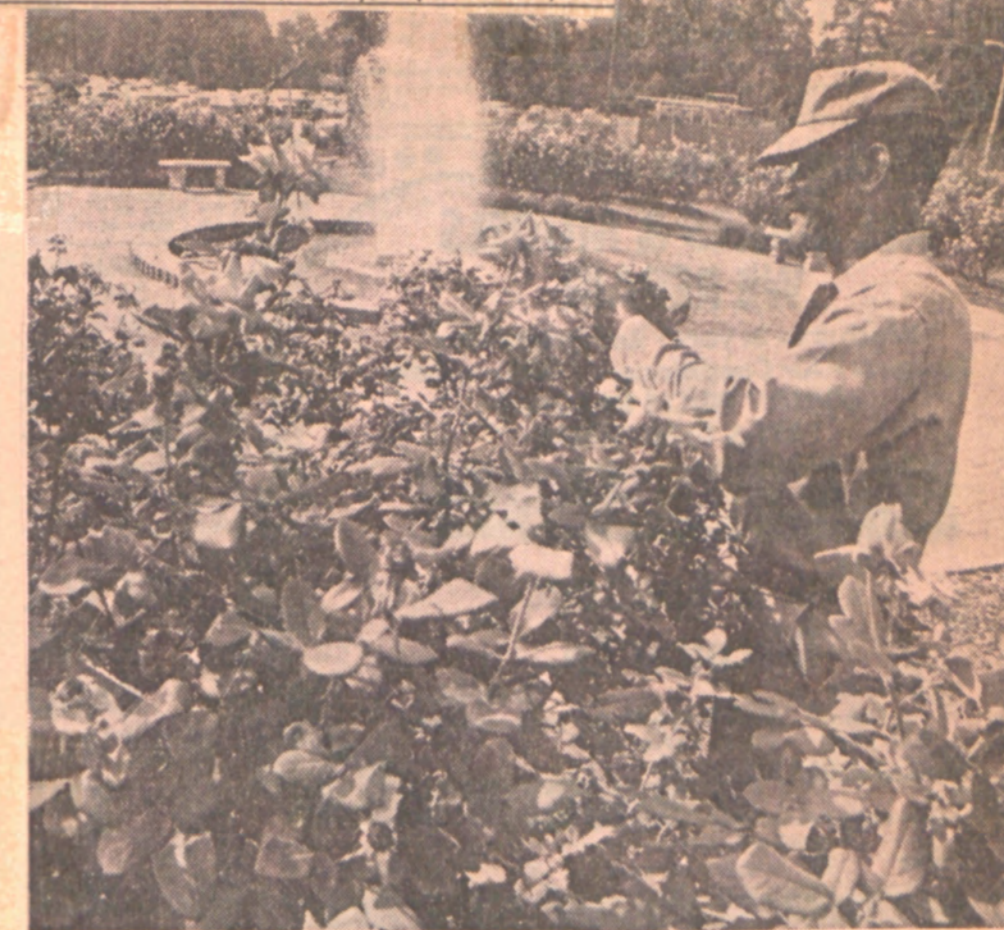

Courses will be scheduled for evenings from 6:30 to 10:00 o'clock at Fort Bragg's Spring Area, Spring Lake and Main Post. Registration ends and classes begin on Sept. 10.

The program is designed so that a serviceman on active duty or a veteran may complete courses leading to a diploma, certificate of attendance or an associate of science degree.

FTI has classes for project transition and PREP (pre-discharge education program) as well as post-secondary subjects. A member of the Servicemen's Opportunity College (SOC) association. Fayetteville Tech's tuition is only \$2.50 per quarter hour. VA funded courses cost \$19.00 per quarter.

Tuition assistance is offered through the Army Education Office on Main Post. All fees are payable at registration which terminates Sept. 10, and is currently being held in room 203, Army Education Center Building across from XVIII Airborne Corps Headquarters.

Additional classes covering 26 curriculums are scheduled for evenings and daytime on the campus of Fayetteville Technical Institute. These courses start Sept. 6. Daytime registration will be held on Sept. 4. Evening classes will register Aug. 27-29 from 6:30 to 9:30 p.m. at FTI.

Tending The Roses

Fayetteville Technical Institute's gardens are something special to Pete Malloy.

CHECKUP — Dr. Ben Fountain, seated in chair, the president of the community college system, took an inspection tour of the Fayetteville Technical Institute campus Wednesday and got a checkup himself in the

dental assistants' laboratory. Howard Boudreau, FTI president, looks on while Dr. Fountain is examined by Teresa McArtan, left, and Linda Sarvill. (Staff Photo — Ken Cooke)

FTI's Technology Program Pays Dividends

By ELIZABETH GEIMER
Staff Writer

Environmental engineering and technology is a fast-developing field today due to the growing governmental concern for maintaining water and air quality standards.

Fayetteville Technical Institute was the first school in the country to develop a two-year environmental technology program to train high school graduates for careers in sanitation, health and environmental work.

This year two of FTI's former graduates in environmental technology and one graduate in civil engineering technology have returned to FTI to serve as interns in the environmental and civil engineering technology courses.

All three students, who are entering their senior years at Appalachian State University, are spending the first quarter of this year as student teachers or "interns" teaching classes and laboratories at FTI.

Rodney Tart of Lillington is teaching a course in sanitary chemistry and biology which despite the title, studies the operation of water plants. He also assists in a course on water supply engineering.

Mike Strickland of Erwin, the second environmental technology graduate, is helping to teach an introductory course and lab in environmental systems (sanitation).

Talmage Baggett of Falcon

is teaching a civil engineering course in surveying and assisting with a course in testing the "ultimate strength" of materials.

Each of the three maintains the most rewarding part of his education took place in the two years he studied at FTI.

"We did twice the work at FTI that we are doing at Appalachian State," said Baggett.

The three are pleased with the fact that students who have graduated from technical schools and enrolled at Appalachian have a higher

academic average than the other students there.

Why did these three students who are college material choose a technical school first rather than going directly into a four-year college?

"I couldn't get the course I

wanted at a four-year college," said Baggett who had worked with the State Highway Department before enrolling at FTI for civil engineering technology.

"At a technical school you get more practical education and get into your work more quickly than at a college where most of the education is theoretical," said Tart.

After two years and untold hours of laboratory work in the environmental technology course at FTI, students are in demand and the State Department of Health, Natural and Economic Resources and local agencies at salaries starting at approximately \$7,800.

"These students are more prepared to make a living after a two-year course than they would have been after a four-year college course," said Eugene Shannon, an instructor in environmental technology at FTI.

"Last year we couldn't give the state as many environmental graduates as they wanted," said Shannon.

All three interns went on for a four-year college degree because this diploma will give them greater job mobility than a two-year degree from a technical school. In their final two years at Appalachian, the three are taking general academic courses to round out their college education.

DEMONSTRATION — Environmental Intern Rodney Tart (center) demonstrates to two Fayetteville Technical Institute students, Edward Welborn and Diane Jones, how to use laboratory

equipment to test the quality of water. Tart is teaching a course in sanitary chemistry and biology at FTI as part of the environmental engineering technology course offered there. (FTI Photo)

FTI Receives Course Funds

Federal funds have been approved for a course in automobile body repair for people of this area at Fayetteville Technical Institute.

A total of \$43,003 was approved for the project under the Manpower Development and Training Act (MDTA).

The project, approved jointly by the Department of Labor and the Department of Education and Welfare, will provide classroom training for 15 people in Cumberland County.

The North Carolina Employment Service determines the need for workers in setting up MDTA projects.
