

FAYETTEVILLE TECHNICAL  
COMMUNITY COLLEGE  
1980-1981

7-1-79 OT  
 A COURSE to train home health care aides is being sponsored by Fayetteville Technical Institute and the

Cumberland County Coordinating Council on Older Adults.  
 The classes to train aides on a part-time, on-call basis to help home-bound older adults, will begin July 16 at FTI.  
 More information can be obtained by calling 323-1961, extension 309.

**classes** 7-2-79 T

**ARTS AND CRAFTS CLASSES:** The Fayetteville Recreation & Parks Department and Fayetteville Technical Institute will sponsor arts and crafts classes from 9 a.m. to 12 p.m. at the Honeycutt Recreation Center. Flower arranging will be offered on Mondays, July 9-Aug. 13, and interior decorating will be offered on Tuesdays and Thursdays from July 10-Aug. 9. To register call 484-5174.

**ARTS AND CRAFTS CLASSES:** The Fayetteville Recreation & Parks Department and Fayetteville Technical Institute will sponsor arts and crafts classes from 9 a.m. to 12 p.m. at the Honeycutt Recreation Center. Flower arranging will be offered on Mondays, July 9-Aug. 13, and interior decorating will be offered on Tuesdays and Thursdays from July 10-Aug. 9. To register call 484-5174. July 5, 1979 - T

**HOME HEALTH CARE AIDES:** A course to train persons to work as home health care aides for home-bound older adults will be offered starting Monday at Fayetteville Technical Institute. Sponsored by FTI and Cumberland County Council on Older Adults. Information: 323-1961, ext. 309. 7-10-79 T

Monday - 8:30-12:30 p.m. Home Health Care Aid class, sponsored by Fayetteville Technical Institute and Cumberland County Coordinating Council on Older Adults, continues Monday, Wednesday and Friday through August 17, at Room 214B, Fayetteville Technical Institute. For more information contact Randy Holloway at 323-1961, extension 309.

**FTI Proceeds With Disputed Courses**

By PHYLLIS GAUGER  
 Staff Writer

A controversial Fayetteville Technical Institute course-expansion proposal is set to go forward without the hearing before the state Board of Education this week that had been expected.  
 The expansion of college-credit FTI courses to various locations around the city, to be offered in the evenings, was strongly opposed by both Fayetteville State University Chancellor Charles Lyons Jr. and Methodist College President Richard W. Pearce.  
 They fear the expansion would compete unfairly with courses offered by FSU. Some of the FTI courses are similar to FSU courses, and they would be offered a mile or two away at a fraction of the cost to students.  
 Howard Boudreau, president of FTI, said Monday that Dr. Larry Blake, the new president of the state Department of Community Colleges, considers the

question to be a local matter, and so the issue was not put on the agenda for the state Board of Education meeting in Raleigh this week.  
 Blake's predecessor, though, Dr. Charles Holloman, acting head of the community college system, had asked Boudreau to bring the question before the state Board of Education for a final decision.  
 Blake's decision cancels out Holloman's request.  
 "We will go forward with our plans," said Boudreau. "Beginning with the fall quarter we will be offering off-campus vocational and technical programs."  
 Blake's decision drew a reaction of surprise from a group of citizens who had planned to go to Thursday's board meeting in Raleigh and lobby against the course-expansion proposal.  
 FSU is one of five predominantly black universities in the 16-campus University of North Carolina system.

The U. S. Department of Health, Education and Welfare is seeking to desegregate the UNC system by getting UNC to spend more money on the black campuses, and by forcing the university system to eliminate course duplications between neighboring black and white universities. UNC is resisting the HEW demands in court.  
 Opponents of the FTI course expansion, including two FTI trustees, Thomas Council and Bruce Pulliam, said the planned expansion would create such duplications between FSU and FTI.  
 At their June meeting, the FTI trustees approved the course-expansion proposal, with three dissensions. At the time, Boudreau said the question would come before the state Board of Education in August because of a special request from Holloman that the state board take a look at the controversial issue.  
 Blake, Holloman's successor, said

he had not been briefed on the question by Holloman. Blake said in a telephone interview last week that he considers the issue to be "a local matter."  
 Dr. Mason Quick, a member of the group of Fayetteville citizens which seeks to block the expansion, said his group plans to pursue the question further.  
 Caletha Powell, another member of the group, said the matter was not on this week's state board agenda, but that it figured the question would come up at another meeting.  
 "I'm disappointed," said another member, Artheus Dew.  
 Thomas Council, a member of the FTI board who opposed the course expansion, said he too is surprised and disappointed. "I think things are going to pretty much follow the course they've charted now," he said.

**Those FTI Courses**

The determination of Fayetteville Technical Institute to offer courses for college credit at off-campus locations in the county is driving a deep wedge between Tech and the two four-year senior institutions in town, Fayetteville State and Methodist College.  
 The courses were considered tolerable, though not particularly welcome, by Fayetteville State and Methodist when they were only being offered on the Tech campus. Both institutions, by special arrangement, have granted credit for the courses to students who transfer from Tech to their campuses. Even so, Chancellor Charles Lyons of Fayetteville State and President Richard Pearce of Methodist have considered the Tech courses to be competitive, overlapping and not especially well-tailored for their own requirements. And when the Tech trustees voted to extend the course offerings to off-campus locations despite the opposition of Fayetteville State and Methodist, the wedge was driven deeper.  
 To be fair to Tech and its president, Howard Boudreau, neither the University of North Carolina system nor the Department of Community Colleges views these courses—at least those taught on technical institute campuses—with much alarm. A report issued in May by UNC and the community college department stated that "instances of duplication are more apparent than real" in these courses, which together comprise the General Education program. The programs "are considered terminal rather than preparatory (and) enroll students with little or no aspiration for a baccalaureate degree...By and large... these programs do not compete with those of senior institutions for the same audience."  
 Tech's plan to greatly expand the course offerings by teaching them at night at several sites may or may not be seen in a different light by UNC and the Department of Community Colleges. It is most unfortunate that the new head of the community colleges, Dr. Larry

Blake, considers the dispute to be a "local" matter and therefore took it off the agenda for yesterday's meeting of the State Board of Education.  
 This "outreach" aspect of the program is unique to Fayetteville Tech, but it could spread to other technical institutes.  
 The problem need never have developed if Tech had accepted an offer by Dr. Lyons to contract with Tech to have Fayetteville State faculty teach the courses. Then the university (and Methodist) would have had assurances that the content of the courses would measure up to, and be compatible with, programs at the senior institutions. Even though 13 other technical institutes have made such arrangements, Tech is holding back.  
 Students enrolled in the General Education courses at Tech are just as worthy as anyone else, but those who transfer to senior institutions with credit for their Tech courses are getting an infinitely better break than first- and second-year students at the senior institutions. Their costs amount to only a few dollars, while Fayetteville State and Methodist students pay much more. So a valid question is raised: Why should the state's taxpayers subsidize college-bound students at the technical institutes to a far greater extent than they do students at the private and public senior institutions?  
 The administrations at Methodist and Fayetteville State, in the final analysis, are the best judges of whether their institutions are being harmed by the competing courses offered by Fayetteville Tech. If they conclude that the harm is real and serious, then presumably they, or their boards of trustees, have authority to protect their institutions by NOT granting credit to students who have taken those courses. Thus Tech, if it wished, could continue to offer the courses to adults who do not aspire to a college degree but wish to broaden their educations without significantly undercutting the two senior institutions.

**State To Take Look At FTI Course Plans**

The president of the state Department of Community Colleges said Thursday the department will examine course expansion at Fayetteville Technical Institute.  
 However, Dr. Larry Blake, community colleges president, said FTI is operating within the confines of a technical institute, and expressed a desire the matter could be settled locally.  
 The inquiry is in response to concerns expressed to Blake and the community colleges committee Wednesday by a Fayetteville group, Friends of Education.  
 The group is concerned that FTI is attempting to become a community college, and that some courses because of similar titles and numbering are misleading students into thinking they are automatically transferrable to a four-year institution.  
 Blake said he would consult with officials at the University of North Carolina, Fayetteville

State University, Methodist College, and FTI on the matter, and let the group know his findings as soon as possible.  
 A few months ago, FTI proposed offering general education and technical-vocational courses for credit, in addition to its continuing education courses, at its nine Adult Education Centers in Cumberland County.  
 The technical-vocational courses for credit have been offered at the Ft. Bragg campus since 1973.  
 At the time, Howard E. Boudreau, FTI president, said the expansion was an attempt to bring education to the people with the intent of them using the credits for course work at FTI.  
 The expansion came under criticism from FSU and Methodist officials who viewed it, particularly the general studies, as duplication and unfair competition. The FTI courses

**Courses**

From Page 1-B

LARRY BLAKE  
 Heads Colleges

would cost \$10 each, much less than those at FSU or Methodist.  
 FTI then withdrew the general studies courses from its schedule in June, and is now offering only technical-vocational courses at the centers.  
 Also in June, FSU proposed to contract the duplicated courses and teach them for FTI thereby eliminating duplication and ensuring transferability. Methodist also made the same offer.  
 Subsequently, the FTI board has requested a feasibility study of the proposal, and it will go to the FTI curriculum committee in the near future, according to William E. Sease, FTI academic vice president.  
 In the group's position paper

presented to Blake, one of their concerns was that expansion would prevent effective integration on the FSU campus, and have an economic effect on Methodist.  
 However, computer analysis of FTI students going on to four year institutions shows that FSU and Methodist benefit the most from FTI graduates. The analysis was done by the community college system.  
 In 1976, FTI had 86 students that went on to four year schools. Of those 58 went to UNC schools and FSU got 29 or 30 percent. Of the 28 that went to private schools, 19 went to Methodist or 68 percent.  
 In 1978, FTI had 75 students continue their education. Of those FSU got 16 or

35 percent that went on to UNC institutions, and Methodist got 29.  
 The committee is also concerned that expansion is "going beyond the mission and purpose as prescribed for the technical institute" which was "to develop as non-resident, multi-purpose, and community centered."  
 Blake said that the commitment of the community college-technical institute is "accessibility." It means geographical, chronological, financial, and academic accessibility, he said.  
 The committee also stated that expansion goes contrary to state House Joint Resolution 1451 that studied unnecessary duplication within the university and community college system.

The resolution recommends a coordinating committee to consider effects of proposed actions, a reassessment of technical institutes mission, and community colleges should contract out their general studies courses at no less cost to the student than if he had taken the course at the contracted institution.  
 This resolution was not passed by the General Assembly, and is irrelevant, according to Blake.  
 Following the resolution the UNC-Community Colleges Joint Advisory Committee did take up this question, however, and found that there were enough mechanisms between the two systems to resolve any overlapping without any additional legislation.

WESTOVER SR. HIGH SCHOOL  
REID ROSS SR. HIGH SCHOOL

**CLASSES BEGIN**  
Mon., July 9 Thru  
Thurs., July 12

**TO REGISTER:** Go to the school of your choice on the night the course is scheduled to meet. Registration begins at 7:00 p.m. each evening. Bring your social security number and \$5.00 registration fee.

**ADMISSION:** Anyone 18 years of age or older.

**REFUNDS:** No refunds will be made for those classes which are offered. Students will also be expected to purchase books if required.

**SCHOOL HOURS:** All centers operate from 6:30 p.m. till 9:30 p.m., with most classes meeting from 7:00 P.M. until 9:30 P.M.

**TEACHING POSITIONS:** Anyone interested in teaching courses in any of the areas listed above should call 323-1961, ext. 246. A college degree is preferred but not required in all areas; however, an expertise within the subject area is imperative.

Fayetteville Technical Institute reserves the right to cancel any class due to insufficient enrollment, inadequate facilities, or if qualified teachers are not available.

GED Placement tests will be given in room 214-A at regular intervals during the quarter. For more information, contact Charles Koonce, extension 331.

FOR ADDITIONAL INFORMATION, Phone Fayetteville Technical Institute, Office of Adult Continuing Education at (323-1961).

# State Board Of Education To Enter FTI Course Dispute

By PHYLLIS GAUGER  
Staff Writer

The state Board of Education's community colleges committee Wednesday entered a dispute concerning new courses to be offered by Fayetteville Technical Institute.

The committee, meeting in Raleigh, directed the new president of the Department of Community Colleges to try to resolve the dispute, said the Rev. C. R. Edwards of Fayetteville, a member of the committee.

The dispute is between FTI and the two other higher education institutions in Fayetteville, Fayetteville State University

and Methodist College. FSU and Methodist College say the FTI courses, to be offered off-campus for college credit, would compete unfairly with them.

The FTI courses would be offered at locations around the city, some close to FSU and Methodist, at a fraction of the cost to students.

Some of the proposed FTI courses are similar to those offered by FSU and Methodist, although FTI cut out of its proposal many of the duplicating courses.

FSU officials are particularly upset because they say the expansion would create the sort of course duplication between neighboring black and white universities that the U. S. Depart-

ment of Health, Education and Welfare is trying to stamp out in North Carolina. FSU is historically black.

Opponents of the course expansion also say the FTI college credit courses are not necessarily transferable to a four-year institution like Methodist or FSU.

The community colleges committee Wednesday heard about the dispute from members of a citizens' group which calls itself Friends of Education and which opposes the course expansion.

Three members of the group, Caetha Powell, Emarretta Felton and William T. Brown made the trip to Raleigh and were allowed to speak although they were not on the agenda, said Mrs. Powell.

Edwards said the community colleges committee did not seek to hold up the course expansion, which is set to begin this fall.

"The state board feels basically we're talking about local autonomy, about decisions that must be made locally," he said.

"However the chairman of the committee did instruct (Dr. Larry) Blake (president of the Department of Community Colleges) to look into the matter and see if he could not help resolve it."

Edwards said he thinks the state board has recognized the issue of course duplication between four-year and two-year institutions to be one that "has to be dealt with."

(See FTI, Page 8B)

(Continued from Page 1B)

## FTI Course Dispute

He said he feels the state board will deal with the larger issue eventually. "This is not the only situation," he said.

When a new state community colleges board takes shape next July, taking over the responsibility for the community colleges system from the state Board of Education, Edwards is confident the issue will not get lost in the shuffle "because it has to be dealt with."

The FTI trustees, at their June meeting, approved the course-expansion proposal subject to final approval by the state Board of Education.

Howard Boudreau, president of FTI, said the acting head of the Department of Community Colleges, Dr. Charles Holloman, had asked him to bring the issue to the state board for final settlement.

But the issue was not placed on the state board's agenda for its meeting this week because Holloman's successor, Blake,

feels it is a "local matter."

Because Blake felt the question should be settled locally, the FTI board's approval stands and the course expansion is set to go forward, Boudreau has said.

Locally the issue has been the topic of meetings among the heads of FTI, FSU and Methodist College, at which FSU Chancellor Charles Lyons Jr. and Methodist College President Richard Pearce said they are unhappy with the course expansion.

In addition, the citizens' group, Friends of Education, opposed the expansion at the FTI trustee meeting in June. At the same time, two FTI trustees opposed the expansion on the grounds that the courses would compete unfairly with FSU and Methodist College.

One solution to the dispute is an offer from FSU that FSU contract with FTI to teach the courses. FTI is studying the possibility, but says it could not be done as early as this fall.

## Two File For Seats On City School Board

An incumbent and a school volunteer have filed with the Cumberland County Board of Elections for seats on the Fayetteville City Board of Education.

Junior Edge will run for a second six-year term as a member-at-large. He is the third board member to announce he will run for re-election. J.W. Pate Jr. announced he will not run.

Mrs. Ellenor T. Barker, 2921 Skye Drive, will also seek one of the three member-at-large seats. Mrs. Barker, a Duke University graduate, has been active in the PTA and school volunteer work for many years.

Edge is manager of LaFayette Bowling Lanes and a Cumberland County native. He is also YMCA board of directors secretary, and a member of the Fayetteville Kiwanis Club and Cumberland County Boxing Commission.

In a prepared statement, Mrs. Barker said, "I am interested in maintaining and improving the quality of education which the Fayetteville city schools provide."

"I approved of the request for a study recently discussed by the county and city Boards of Education. I hope this study will provide the basis for future educational needs of all children in Cumberland County in the most efficient manner."

Other member-at-large candidates include Harry B. Stein, an incumbent; Donald Whitehead, a Fayetteville Technical Institute psychology instructor; William E. Cannon, a Ft. Bragg educational counselor; and Rev. Robert "Sandy" Saunders, pastor at Gethsemane Baptist Church.

Board member Robert H. Dawkins is running again for his District 5 seat. The district is around Reid Ross High School.

## Campus Cooperation

A new analysis of the transfer experience of students from Fayetteville Technical Institute provides an exciting basis for a cooperative higher educational effort in Urban Fayetteville linking the institute, Fayetteville State University, and Methodist College.

The analysis reveals the incredible fact that only 75 of the several thousand students who went to classes at FTI last year actually went on to higher education.

Of that small group, 16 transferred to FSU and 29 to Methodist.

Such figures surely put a new perspective on the controversy over whether FTI should begin providing so-called "general education" courses in its off-campus centers. Authorities from FSU and Methodist had resisted that move, saying it would rob them of potential students.

That hardly seems a deeply-justified worry in view of the small number of FTI students who pursue further higher education beyond the institute campus.

The thousands not represented in that small number surely are a fruitful challenge for cooperation between the three campuses

along lines suggested by FSU. Authorities from that unit of the UNC system suggested FTI contract with it to provide "general education" courses, which correspond to undergraduate humanities courses at FSU and Methodist.

The potential for providing meaningful higher educational experiences for many more students surely is represented in the tiny number of students who go on from FTI now.

The Fayetteville Times has for all its life urged cooperative effort between the community's several educational institutions to afford the resources for better quality education for many more of its citizens.

Surely this is an opportunity to begin that effort. The authorities of the three institutions would be acting responsibly for the entire community and in their own best interests to get together promptly to plot arrangements which could encourage more students to go on to higher education from FTI's classrooms, and for FSU and Methodist to be major providers of the resources and the settings for those students.

## Arts Council Allocates \$4,890 For Local Arts Programs

The Grassroots Arts Fund Committee of the Arts Council of Fayetteville/Cumberland County has awarded \$4,890 to local organizations for programs promoting the arts in Cumberland County.

The Friends of the Cumberland County Public Library received \$540 for the upcoming series "Shared Identity: Our Cultural Traditions." The funds will be used for expenses including speakers, publicity, and film rental. A two-part publication is planned to provide promotional and background information on the program, to provide a forum for the issues raised, and to present a summary of the program's accomplishments.

An art show and competition open to artists of all ages has been made possible by a \$250 grant to the Fayetteville Art

Guild. The show, to be at Lopez Framing Company, will feature demonstrations of painting techniques. The grant will be used for prize money for works submitted in children's and adult categories.

The committee awarded \$600 in matching funds to the Haymount United Methodist Church to establish the "Haymount Concert Series." These chamber-type musical concerts will be presented in the church sanctuary.

The International Folk Festival for downtown Fayetteville received \$1,200 for its publicity and administrative expenses. The festival will highlight the performing and visual arts, crafts, and food of the many cultures represented in Cumberland County's international population.

The Cumberland County Public Library will present a film

series to be publicized with a \$2,200 grant from the committee. The series represents a continuation of the series sponsored cooperatively by the library, Fayetteville Technical Institute and Fayetteville State University in the spring of 1979. The films will be shown in two series of ten films each. Both the fall and spring series will be widely advertised so that all county citizens will be aware of the show dates and locations.

The selections committee will be looking for projects and programs which can generate strong community support for the arts. These should involve talented, imaginative and energetic artists who can make a strong contribution to their audience of the community as a whole. Such projects should

be responsive to an important need in the community in specific cultural fields. They would ideally extend cultural opportunities to people who are not generally involved in the arts, and involve a special effort to provide opportunities for participation by racial minorities.

Fayetteville Technical Institute and the Arts Council are sponsoring a grant writing workshop on Sept. 13 to provide information on the availability of funds and to teach the basics of grant writing. Information on the workshop is available from the Arts Council.

## Friday Sought Delay On FTI Plan

By PHYLLIS GAUGER  
Staff Writer

William C. Friday, president of the University of North Carolina system, three months ago asked that a controversial Fayetteville Technical Institute course expansion proposal be held up "until the issues have been resolved."

Friday wrote a letter to Dr. Charles R. Holloman, former acting president of the state community college system, May 24 on the topic.

The Observer obtained the letter Thursday.

Meanwhile, the course expansion is going forward, despite the fact that a group of local citizens, including two trustees of Fayetteville State University, went to the state Board of Education to object early this month.

FSU Chancellor Charles Lyons Jr. and Methodist College President Richard Pearce have objected to the course expansion, on the grounds that it would duplicate some courses offered at FSU.

The expansion proposal involves moving college credit courses now offered on the FTI campus out to various locations around the city, to be taught in the evenings.

Opponents of the expansion say the courses should be offered only on the main campus, where they are less likely to draw away students from FSU because the FTI courses are much cheaper.

At an Aug. 1 meeting of the state Board of Education's community colleges committee, the committee directed Dr.

Larry Blake, new president of the community colleges system, to try to resolve the issues locally.

The committee did not seek to hold up the course expansion in the meantime.

Howard Boudreau, president of FTI, said today the course expansion is going ahead as planned. Blake told him he is studying the matter, Boudreau said.

Boudreau said he had not seen Friday's letter to Holloman. Blake's predecessor. But he had heard about it, he said.

In the letter, Friday says, "My greatest concern ... is the effect which the proposed program would surely have on our efforts to eliminate a racially dual system of higher education in North Carolina."

"In this instance, the offering of the program as envisioned by FTI would certainly impede, and perhaps negate, all of our efforts to increase minority presence at one of our traditionally black institutions."

"I urge you, therefore, to contact President Boudreau, the Chairman of the Board of Trustees at FTI, and, if necessary, the state Board of Education, to urge them to refrain from approving and establishing such a program until the issues have been resolved and mutually satisfactory arrangements and policies have been agreed upon at the institutional level."

Possibly in response to the letter, Holloman had asked that the course expansion proposal be brought to the state Board of

(See FRIDAY, Page 10B)

## Friday Letter

(Continued from Page 1B)

Education for a final decision. But Blake had reversed the request, telling Boudreau to resolve the issue locally.

Friday's letter was written before FTI altered the course proposal, taking out most of the duplicative courses.

Boudreau said today he thinks "there is no issue at all left any more. There's no general education involved. It's pure voc-tech."

But the course proposal as advertised in FTI flyers does show some business courses that overlap those offered by FSU.

And two FSU trustees, William T. Brown and Emarretta Felton, were sufficiently disturbed about the pruned-down course proposal that they made the trip up to Raleigh Aug. 1 to object at the community colleges committee meeting.

The FSU board of trustees has offered to teach the courses for FTI, saying that would resolve the dispute. The FTI board is still considering the offer.

The FTI board meets Monday.

AN INSURANCE course will be offered at Fayetteville Technical Institute to prepare interested persons for charter life underwriter examinations.

Registration for the course will be Thursday from 2 to 8:30 p.m. in room 357 of Cumberland Hall on the FTI campus.

More information can be obtained by calling 323-1961, extension 343.

## Friday Sought Delay On FTI Plan

By PHYLLIS GAUGER  
Staff Writer

William C. Friday, president of the University of North Carolina system, three months ago asked that a controversial Fayetteville Technical Institute course expansion proposal be held up "until the issues have been resolved."

Friday wrote a letter to Dr. Charles R. Holloman, former acting president of the state community college system, May 24 on the topic.

The Observer obtained the letter Thursday.

Meanwhile, the course expansion is going forward, despite the fact that a group of local citizens, including two trustees of Fayetteville State University, went to the state Board of Education to object early this month.

FSU Chancellor Charles Lyons Jr. and Methodist College President Richard Pearce have objected to the course expansion, on the grounds that it would duplicate some courses offered at FSU.

The expansion proposal involves moving college credit courses now offered on the FTI campus out to various locations around the city, to be taught in the evenings.

Opponents of the expansion say the courses should be offered only on the main campus, where they are less likely to draw away students from FSU because the FTI courses are much cheaper.

At an Aug. 1 meeting of the state Board of Education's community colleges committee, the committee directed Dr.

Larry Blake, new president of the community colleges system, to try to resolve the issues locally.

The committee did not seek to hold up the course expansion in the meantime.

Howard Boudreau, president of FTI, said today the course expansion is going ahead as planned. Blake told him he is studying the matter, Boudreau said.

Boudreau said he had not seen Friday's letter to Holloman. Blake's predecessor. But he had heard about it, he said.

In the letter, Friday says, "My greatest concern ... is the effect which the proposed program would surely have on our efforts to eliminate a racially dual system of higher education in North Carolina."

"In this instance, the offering of the program as envisioned by FTI would certainly impede, and perhaps negate, all of our efforts to increase minority presence at one of our traditionally black institutions."

"I urge you, therefore, to contact President Boudreau, the Chairman of the Board of Trustees at FTI, and, if necessary, the state Board of Education, to urge them to refrain from approving and establishing such a program until the issues have been resolved and mutually satisfactory arrangements and policies have been agreed upon at the institutional level."

Possibly in response to the letter, Holloman had asked that the course expansion proposal be brought to the state Board of

# FTI Criticizes State Audit Report

8-21-79

By PHYLIS GAUGER  
Staff Writer

Fayetteville Technical Institute, defending itself against criticism from the state auditor's office, found the state audit itself at fault in a couple of instances.

At an FTI trustees meeting Monday, Thornton W. Rose, finance committee chairman, said the state audit, concerning the year that ended June 30, 1978, was in error on two points.

The auditors, he said, used an obsolete 1971 manual in examining the school's federal "supplemental educational opportunity grants" (SEOG) program.

And, he said, the auditors had requested that FTI seek approval from the state Division of Construction for extra payment of fees to the architect

for Cumberland Hall, for additional supervision. But the Division of Construction, said Rose, responded that such matters should be dealt with locally by the FTI trustees.

Also at Monday's meeting, FTI President Howard Boudreau reported that he expects the board will be able to take a look at a proposal at its next meeting in September for having Fayetteville State University or Methodist College teach controversial off-campus college credit courses for FTI.

The course expansion, he said, is set to begin this fall. For the moment, the liberal arts courses that caused most of the resistance from FSU officials and others have been taken out of the program, Boudreau said.

But, he said, they might be put back in later. The state Department of Community Colleges, Boudreau said,

is studying the issue "should we come back with math and English."

Officials at FSU and Methodist College have objected to the course expansion, which originally included a number of liberal arts courses, because they say the courses, to be taught around the city at night, could draw students from FSU. The FTI courses would be much cheaper.

The version being offered this fall, though, contains only business courses and vocational courses.

The FTI board Monday also heard from a resident, Marie Presler, who argued that FTI should comply with a state Board of Education policy which says high school students may attend technical institutes.

She argued that "We have 17, 18-year-olds who drop out of school because there's nothing (in vocational training) there."

But Boudreau said the state policy is intended to be used only in a few special cases. He said if FTI allowed many high school youngsters in, it would encourage them to drop out of high school.

He also said the state policy provides for high schoolers to go to technical institutes "if space is available." But enrollments at FTI are continuing to climb, he said, and classes are full.

The FTI trustees also approved architectural drawings for a four-story \$5 million classroom and laboratory building that FTI hopes to build next to the Horace Sisk Building. The money for the structure is not now available.

In addition, the trustees approved the sale of .08 acres off Hull Road to Herbert Fleishman for \$4,500.

## ARTS COUNCIL

### Jeff Mead Leads Off Haymount Concert Series

The Haymount Concert Series, a new endeavor, is a community enrichment project co-sponsored by the Haymount United Methodist Church and the Cumberland County Grassroots Arts Fund.

The concept is to present to the public, a variety of inspiring music by known artists, in the sanctuary of the Haymount United Methodist Church, 1700 Fort Bragg Road, Fayetteville, North Carolina. The concerts will be presented on Sunday afternoons at 3:30 p.m. and the public is most cordially invited to attend. There is no charge for the performances. Arrangements have been made for concerts in September, October, and November of this year and in March and April of 1980. A complete calendar of performing artists and dates will be published later.

The first offering in this series is Jeff Mead, guitarist, singer and composer, to be presented September 23, 1979. Mr. Mead's background is an impressive one. He has composed more than 150 songs and a Christmas Cantata for guitar and four voices. He sang and accompanied a Folk Classical Group which made extensive tours of California prisons, coffee houses and churches. He is living in Fayetteville now and has inspired many with his talent at schools, luncheons, churches and group meetings.

The October concert will feature Steve Hunter, pianist, who is the current Fayetteville Technical Institute's visiting Artist-in-Residence.

This project is supported by the Grassroots Arts Program of the North Carolina Arts Council, a state agency. The Cumberland County Grassroots Arts Fund is administered by the Arts Council of Fayetteville/Cumberland County.

### "Come Into My Garden"

### By Evolyn Joyner 1979 IS THE YEAR OF THE ROSE

This is a year-long celebration being celebrated by all the major horticulture organizations across the country. A few of the groups involved are: The American Association of Nurserymen, The American Horticultural Society, and of course The American Rose Society. Among their duties, their members help maintain the beautiful Fayetteville Rose Garden, located on the corner of Devers Street at Fayetteville Technical Institute.

In this issue I will discuss the care and maintenance of roses for September and we will go into other phases such as choosing your plants and making a place for them at another time.

September 28, 8:00 p.m. The Friday Film Connection begins for this Fall with the showing of "Black and White in Color" at the Cumberland Hall Auditorium on the F.T.I. campus. No admission will be charged. The film series is sponsored by the Cumberland County Public Library in conjunction with Fayetteville Technical Institute. This first film is set in colonial West Africa at the outbreak of World War I. It was the winner of the Academy Award for Best Foreign Film in 1977.

## FTI Board May Study Contracting Courses

8-21-79

By ROSE ANN FROBERG  
Of The Times Staff

The feasibility of contracting general education courses to area colleges will probably be taken up at the next Fayetteville Technical Institute board meeting.

Howard E. Boudreau, FTI president, said Monday that he has met with Department of Community Colleges officials, and is currently gathering information for the FTI curriculum committee.

The curriculum committee will meet prior to the trustees meeting in September to consider the course contracting proposal from Fayetteville State University and Methodist College.

No date has been set for the meeting. Boudreau said that "no issue is at stake for the fall quarter" since only technical-vocational courses will be offered at the nine Adult Education Centers.

In the spring, FTI had proposed offering general education courses for credit at its adult centers, but withdrew them after FSU and Methodist criticized the courses as being duplicative.

Of the 23 technical schools that offer an associate degree in general education, 13 contract courses with University of North Carolina institutions and one contracts with a private college.

Fayetteville Technical Institute An Equal Opportunity Employer

Joan Miller

## An Encore For Joan

Soprano Joan Miller is back in Fayetteville with a line-up of scheduled appearances which will be highlighted by a performance with the North Carolina Symphony.

Familiar to Fayetteville audiences as Fayetteville Technical Institute's visiting artist for 1977-78, she is currently residing in Germany. The Sanford native is teaching evening courses in music history through the European division of the University of Maryland and giving performances for a number of cultural events in Germany. Her husband is Lt. Col. Frank Miller, and he is stationed in Frankfurt, Germany.

"I'm virtually free-lancing. I'm concertizing in Frankfurt," she said. "Germany is very open to all types of music. The Germans are at home with the opera as well as the lieder and more recently musical comedy. They like musical comedy very much. One of their latest favorites is 'My Fair Lady,' and they do it in German. Can you imagine a cockney accent in German?"

While in the states, Mrs. Miller will perform with the North Carolina Symphony Orchestra. She will be the featured soloist at the Symphony's annual pops concert Sept. 20 at 8 p.m. at Cumberland Memorial Auditorium. The concert is being sponsored by the West Fayetteville Rotary Club. A few days earlier, she will be performing with the Symphony at the Cherry Point/Havice Auditorium.

She will perform at First Baptist Church today at 7 p.m., with Harlan Duenow accompanying. She is also scheduled to perform on WECT's "Carolina At Noon" Friday, Sept. 14, at First Presbyterian Church Sunday, Sept. 16 at 10:45 a.m., at Vardell Hall in Red Springs on Sept. 21 in a program sponsored by the Red Springs Arts Council and the Robeson County Music Club, and at Dunn Presbyterian Church on Sept. 23 at 11 a.m.

Mrs. Miller is a graduate of the University of North Carolina at Greensboro and an honors graduate of Yale University, where she received her master's degree.

## Off-Campus Evening Curriculum Schedule

LATE REGISTRATION FOR FALL TERM

Off-Campus Classes Begin: Monday, Sept. 10, 1979 Fall Term Ends: Wed., Nov. 28, 1979

REGISTRATION: 8:00 A.M. - 8:00 P.M., MONDAY, SEPTEMBER 10, 1979  
8:00 A.M. - 8:00 P.M., TUESDAY, SEPTEMBER 11, 1979

STUDENTS MAY REGISTER FOR CURRICULUM, OFF-CAMPUS, COURSES BY COMING TO THE F.T.I. CAMPUS (HORACE SISK GYM) ON SEPTEMBER 10 OR 11, 1979.

CLASSES WILL BE FILLED ON A FIRST COME BASIS.

**WHO MAY ATTEND:** Persons who have completed high school or have attained the North Carolina High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

**COST:** In-state resident, \$3.25 per quarter hour (maximum \$39) out-of-state resident, \$16.50 per quarter hour (maximum \$198.50).

**PAYMENT:** Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or Master Charge. Personal checks drawn on out-of-state banks, second-party checks, and checks in excess of actual cost will not be accepted for payment of fees. All fees must be paid at time of registration.

**TRANSFERABILITY OF CREDITS:** All credits earned in off-campus programs of FTI are fully transferable into applicable on-campus Associate Degree or Diploma programs. Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution.

# Visiting Artist

## 'Icing On The Cake'

Stephen Hunter returning as FTI visiting artist

By FRANCES HASTY  
Sunday Staff Writer

"I'd like to teach the world to sing..." Stephen Wayne Hunter makes no claim on teaching the world to sing. Yet, in a year as a visiting artist in the community, he has filled a lot of corners with music.

Hunter, 27, is beginning his second year as visiting artist at Fayetteville Technical Institute, the first participant in the program to return for a second year.

In the past year the young pianist has followed through on his goal to bring music "directly to the people."

"I have tried to cover as many types of audiences as possible," he said, "especially minority audiences such as the elderly and the handicapped."

In addition, his schedule included innumerable performances as pianist or vocalist for schools, civic clubs and churches. A highlight of the year was his second appearance at Lincoln Center.

Hunter expressed a particular sense of satisfaction in having shared his music with groups of people who might not have otherwise been able to attend one of his public concerts. One such group was comprised of the elderly at one of the nutrition centers. He recalled one memorable occasion with a group of elderly persons when he put aside his classical repertoire momentarily to pull out a hymnbook, to the delight of his audience.

With young school audiences, he enjoys a rapport that perhaps for the first time allows some to discover the feel of the keyboard.

One advantage to working with people in smaller settings, Hunter believes, is that it may reach people who are turned

off by the formality of the concert. "It breaks the barriers down."

Hunter, who views the programs as "the icing on the cake," hopes to do "a lot more of the same" during his second year, in addition to working with instructors at FTI in some of their classes and playing for the entertainment of the students.

If there are any people still around who believe that the serious pursuit of music is all work and no play or makes Jack a dull boy, they should have a conversation with this articulate and engaging spokesman.

He began piano lessons at the age of six, which, he said, "was something I wanted to do." His parents were supportive and enthusiastic but always let it be his choice, he said. They often come to his concerts, but, he said, "they're not sitting there on the front row."

Despite the growing importance of music during his boyhood, he feels his life has been well-rounded. "I was on the debate team, in every club imaginable and never missed a ballgame," he said, offering an example.

While the Pilot Mountain native believes that the pursuit of any specific area, whether music or football, can be taken to an extreme, he sees the importance of presenting opportunities, along with a certain amount of discipline, to youth.

"So much is geared toward mediocrity," he said. "They try to do so many things that they don't do anything really well."

Music was not always his professional ambition. "I wanted to be a Philadelphia lawyer," he said, smiling. Then, in 1968, he was invited to attend Governor's School, and that proved to be the turning point. It was at Governor's School that he

met his predecessor at FTI, Joan Miller, and the paths of the two artists continued to cross, next as college classmates.

Is North Carolina doing well by its talented youth? Hunter believes it is. "North Carolina has so much going on. I have friends who went to New York and are amazed at how many opportunities there are to play in North Carolina...North Carolina is really the state of the arts. There's more than I can take in."

He also finds plenty to like about Fayetteville, besides its closeness to the coast.

"In Fayetteville, interests are certainly varied. Theater is strong, and that includes music and dance. The art museum is a real gem. People who have come in to visit are often surprised to see an art museum of that quality."

Hunter, who has bachelor's and master's degrees in piano from the school of music at the University of North Carolina at Greensboro, where he also taught piano and music theory, is in his fourth year in the visiting artist program, which limits the participating artists to four years. His plans for the future are uncertain. He has been nominated for an International Rotary fellowship for study in Germany, and there's the possibility of teaching or even a concert tour.

The visiting artist program, which began in 1971 as a cooperative effort between the North Carolina Arts Council and the State Department of Community Colleges to deepen the appreciation and cultivation of the arts both within the communities they serve and the host institutions, was funded this year on an emergency basis.

Whether it will continue or not, Hunter believes, "is up to the people."

### 9-21-79 Visiting Artists Perform

TODAY AND SUNDAY - Steve Hunter and Joan Stoltz-Miller, singer, former visiting artists here at Fayetteville Technical Institute, perform in separate area concerts this weekend.

Ms. Miller appears tonight at 8 at Vardell Hall in Red Springs, her program sponsored by the Robeson County Music Club and the Arts Council of Red Springs. Hunter plays "Bach to boogie" at 3 p.m. Sunday at the N.C. Museum of Art, 107 East Morgan Street in Raleigh. Free to public.

STEVE HUNTER: Steve Hunter, concert pianist and visiting artist-in-residence at FTI, performs at 3:30 p.m. Sunday at Haymount United Methodist Church. Free to public. T 10-10-79

STEVE HUNTER: Steve Hunter, concert pianist and visiting artist-in-residence at FTI, performs at 3:30 p.m. Sunday at Haymount United Methodist Church. Free to public. T 10-13-79

'BACH TO BOOGIE': Steve Hunter, a visiting artist at Fayetteville Technical Institute and 1980 Rotary International Scholarship winner, appears in concert 3 p.m. Sunday at the N.C. Museum of Art, 107 East Morgan St. Hunter's piano program features selections "From Bach to Boogie." Free to public. T 9-22-79

JUBILATION T. PICNIC: The Jubilation T. Picnic will be held from noon to 1:30 p.m. Thursday in downtown Fayetteville. Entertainment by the 82nd All American Chorus, FTI's visiting concert pianist Steve Hunter and the Polka-Dots, a Ft. Bragg choral group. Bring a lunch or buy hotdogs, drinks and desserts on sale there. T 10-16-79

### 10-11-79 Arts Council

THURSDAY - 12:15 p.m. Jubilation T. Picnic, a downtown fall festival, is sponsored by the Arts Council of Fayetteville/Cumberland County and Fayetteville Recreation and Parks Department. It was awarded a grant from United Carolina Bank. Local entertainment will include the 82nd Chorus, Stephen Hunter and the Polka Dots. The emcee is Bob Luke. Cross Creek Park, downtown Fayetteville. For more information call 323-1776 or 484-5174.

FRIDAY FILM CONNECTION: "Firemen's Ball," a 1968 film directed by Milos Forman, is the Friday Film Connection, 8 p.m. Friday in FTI's Cumberland Hall. Free. Set in a small Czech village, the film is about a ball given by some firemen in honor of their aged chief. Sponsored by FTI and the Cumberland County Public Library. T 10/8/79

FRIDAY FILM CONNECTION: "Firemen's Ball," a 1968 film directed by Milos Forman, is the Friday Film Connection, 8 p.m. Friday in FTI's Cumberland Hall. Free. Set in a small Czech village, the film is about a ball given by some firemen in honor of their aged chief. Sponsored by FTI and the Cumberland County Public Library. T 10-11-79

FRIDAY - 8 p.m., The Friday Film Connection continues with the presentation of "Nashville," winner of the New York Film Critic Award for Best Picture of 1975. Sponsored by the Friends of the Cumberland County Library and Fayetteville Technical Institute, Cumberland Hall Auditorium. O-T 10-14-79

FRIDAY FILM CONNECTION: "Nashville," a 1975 film directed by Robert Altman, is the Friday Film Connection, 8 p.m. Friday in FTI's Cumberland Hall. Free. A winner of the New York Film Critics Award, the film is about the world of country music and the intertwining lives of 24 desperate characters. Sponsored by FTI and the Cumberland County Public Library. T 10-18-79

FILM CONNECTION: The Friday Film Connection begins at 8 p.m. Friday with the showing of "Black and White in Color," winner of the Academy Award for Best Foreign Film in 1977. First of a series of films shown free to the public at the Cumberland Hall Auditorium at Fayetteville Technical Institute. Sponsored by the Cumberland County Public Library and FTI. T 9-25-79

Monday - 9:30-12 noon, Creative Needlepoint Class, sponsored by Cumberland County Public Library and Fayetteville Technical Institute. The classes will run for ten weeks. Registration will take place at first meeting of the class. Bordeaux Library. 483-1580. O-T 9-25-79

Wednesday - 7-9 p.m. Investments, Stocks and Bonds, a ten-week course sponsored jointly with Fayetteville Technical Institute. Registration will take place at the first class meeting. Bordeaux Library. 483-1580. O-T 9-25-79

Thursday - 10:30 a.m. Puppet Show continues; Frances Brooks Stein Library. 483-1580. Thursday - 8 p.m. The first series of public programs dealing with "Connections: Technology and Change." Sponsored by Cumberland County Public Library and Fayetteville Technical Institute. Cumberland Hall Auditorium, Fayetteville Technical Institute. 483-1580. Free admission. O-T 9-25-79

Friday - 8 p.m. The Friday Film Connection presents the film "Ramparts of Clay" directed by Jean-Louis Bertucelli. Sponsored by Friends of the Cumberland County Public Library and Fayetteville Technical Institute at Cumberland Hall Auditorium. 483-1580. Free admission.

FRIDAY FILM CONNECTION: "Amarcord, a 1974 film directed by Federico Fellini, is the Friday Film Connection, 8 p.m. Friday in FTI's Cumberland Hall. Free. An Academy Award winner, the film is about Fellini's youth in a small town in Fascist Italy. Sponsored by FTI and the Cumberland County Public Library. T 10-22-79

FRIDAY FILM CONNECTION: "The Passenger," a 1975 film by Italian director Antonioni (English dialogue) is the Friday Film Connection, 8 p.m. Friday at FTI's Cumberland Hall. Free. Jack Nicholson stars as a journalist in the suspenseful melodrama set in the North African desert. Sponsored by FTI and Cumberland County Public Library. T 10-29-79

Free. An Academy Award winner, the film is about Fellini's youth in a small town in Fascist Italy. Sponsored by FTI and the Cumberland County Public Library. T 10-26-79

FRIDAY FILM CONNECTION: "Cries and Whispers," a 1972 color film by director Ingmar Bergman, is the Friday Film Connection, 8 p.m. today at FTI's Cumberland Hall. Free. The film explores the relationships among three sisters, one of whom is dying, and their loyal housekeeper. Sponsored by FTI and the Cumberland County Public Library. T 11-16-79

TODAY  
FRIDAY FILM CONNECTION: "Morgan!" a 1966 black and white film directed by Karel Reisz, is the Friday Film Connection, 8 p.m. at FTI's Cumberland Hall auditorium. The film is a British serio-comedy about a working class, pro-Marxist painter who fancies himself an ape. Free. Sponsored by FTI and the Cumberland County Public Library. T 11-23-79

### Friday Film Connection

TODAY - Director Metodi Anonov's 1972 black and white film, "The Goat Horn" is the free art film at 8 o'clock tonight at Fayetteville Technical Institute's Cumberland Hall, sponsored by The Cumberland County Public Library and FTI as part of the Friday Film Connection film series this year. Called a "penetrating study of the position of woman in feudal society," the film concerns a man who tries to rear his daughter as a male after the rape and death of his wife and later attempts to revenge his spouse's death. Free to the public. O 11-9-79

### Fayetteville Art Museum

MONDAY - 7-10 p.m. Method Painting I, co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art. 483-1395.

TUESDAY - 9-noon. Method Painting I, co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

TUESDAY - 3-noon. Watercolor I co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

TUESDAY - 7-10 p.m. Acrylic Painting co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

TUESDAY - 12:30-3:30 p.m., Oil Painting II co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

WEDNESDAY - 9-noon. Drawing I and Oil Painting I co-sponsored with Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

WEDNESDAY - 7-10 p.m. Watercolor I co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

THURSDAY - 9-noon. Elementary Art Methods co-sponsored with Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

THURSDAY - 7-10 p.m., Watercolor I co-sponsored with Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

THURSDAY - 12:30-3:30 p.m., Sketching in Pastels co-sponsored with Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

THURSDAY - 9-noon. Watercolor II co-sponsored by Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art.

FRIDAY - 8 p.m., "Images '79," a fashion benefit sponsored by Fayetteville Museum of Art through Bell's Department Store. Cumberland County Memorial Auditorium. For tickets call 483-1395.

SATURDAY - 10 a.m. to 2 p.m., The Natural Way to Draw co-sponsored with Fayetteville Technical Institute and Fayetteville Recreation and Parks Department, Fayetteville Museum of Art. 483-1395.

FRIDAY FILM CONNECTION: "Ramparts of Clay," a 1970 film, is the Friday Film Connection, 8 p.m. Friday in FTI's Cumberland Hall. Free. Set in a Sahara village, "Ramparts of Clay" explores a woman's questioning the traditional role of women in her society. Sponsored by FTI and Cumberland County Public Library. T Oct 3, 79

THE IMPACT of technology will be explored this week in a seminar Monday and a public program Thursday as part of the "Connections" program sponsored by the Cumberland County Public Library, Fayetteville Technical Institute and WUNC-TV. Monday, the first seminar will discuss questions raised by technological development. It will be held at 7:30 p.m. in the Bordeaux branch of the library. Interested persons should call the library at 483-1580.

That seminar will discuss in depth some of the issues raised by the "Connections" program broadcast today at 8 p.m. on Channel 4.

On Thursday, professors from Duke University and Guilford College will examine the political impact of technology at a forum at 8 p.m. in Cumberland Hall at FTI.

The programs and seminars will continue through December with weekly programs on WUNC each Sunday and Wednesday at 8 p.m., with weekly seminars on Mondays at 7:30 p.m. in the Bordeaux branch and bi-weekly forums on Thursdays at 8 p.m. in Cumberland Hall.

TECHNOLOGY SERIES: The second program in the "Connections: Technology and Change" series is set for 8 p.m. Thursday at FTI's Cumberland Hall auditorium. Featured speakers are Abraham Holtzman and Devendra Garg. Free information. Information: Bolton Anthony at 483-1580. Sponsored locally by the Cumberland County Public Library. T 10-13-79

TECHNOLOGY SERIES: The second program in the "Connections: Technology and Change" series is set for 8 p.m. Thursday in FTI's Cumberland Hall auditorium. Guest speakers are Abraham Holtzman and Devendra Garg. Free admission. Information: Bolton Anthony at 483-1580. Sponsored by Cumberland County Public Library. T 10-14-79

Guest speakers are Abraham Holtzman and Devendra Garg. Free admission. Information: Bolton Anthony at 483-1580. Sponsored by Cumberland County Public Library. T 10-16-79

### Library

WEDNESDAY - 8 p.m. The final public program in the "Connections: Technology and Change" series is called "Technology: The Promise or the Peril?" Hugh Holman from the University of North Carolina-Chapel Hill, will lead the discussion. Sponsored by Cumberland County Public Library and hosted by Fayetteville Technical Institute, Cumberland Hall Auditorium. Free admission. 483-1580.

FRIDAY - 8 p.m. The Friday Film Connection presents "Seven Beauties," an Italian film directed by Lina Wertmuller. Sponsored by the Cumberland County Public Library and Fayetteville Technical Institute. 483-1580. Cumberland Hall Auditorium, FTI.

Scenes from the films "Cries and Whispers," "Morgan" and "The Passenger" are pictured clockwise beginning in the upper left corner.

## Friday Film Connection

### An Encore Performance Of Critically Acclaimed Films

By MARSHA LAMM  
Staff Writer

IF GREAT MOVIES ARE your secret passion, forget about "The French Connection" and plan to take in the Friday Film Connection when it begins on Sept. 28.

Sponsored by the Cumberland County Public Library and Fayetteville Technical Institute, the film series has a generous offering of foreign films, including some of the lesser known award-winning movies such as "Black and White in Color." There are also representative films of the "auteur" directors Federico Fellini, Michelangelo Antonioni and Ingmar Bergman.

There is no real grouping for the ten films in the series, according to Bolton Anthony, head of adult services for the county library system. Subjects range from conflict between French and German colonialists in West Africa at the outbreak of World War I to the intricate exploration of the female psyche to the world of country music against the backdrop of a political campaign.

Open to the public at no cost, the series was first offered last winter when 16 films were featured. Films will be shown at 8 p.m. in Cumberland Hall at Fayetteville Technical Institute.

THIS SEASON'S OFFERINGS are carefully calculated to appeal to serious film buffs and would-be film makers. Often visually rich and artistically experimental, the films are not the casual fare of late night movies.

Opening the series on Sept. 28 is "Black and White in Color," winner of the Academy Award for Best Foreign Film in 1977, although not especially well-known. Directed by Jean-Louis Berruelli, the drama of a young woman unable to accept the subservient role that her people's ancient traditions demand of her is depicted against the setting of an isolated village on the edge of the Sahara. "Ramparts of Clay" is scheduled for Oct. 5.

The impact of political and social forces on the lives of ordinary people is portrayed in "Ramparts of Clay," a 1970 film directed by Jean-Louis Berruelli. The drama of a young woman unable to accept the subservient role that her people's ancient traditions demand of her is depicted against the setting of an isolated village on the edge of the Sahara. "Ramparts of Clay" is scheduled for Oct. 5.

The 1968 film "Firemen's Ball" is, as its title suggests, about a ball given by the firemen of a small Czech village in honor of their aged chief. Directed by Milos Forman, the film exhibits many of the same comic qualities manifested in a later Forman film, "One Flew Over the Cuckoo's Nest." "Firemen's Ball" will be seen Oct. 12.

DIRECTOR ROBERT ALTMAN said of "Nashville:" "It just seems like the proper place for me to be able to equate the analogy of elected officials and politicians — which in many ways, I think, is a popularity contest — with the success of country and western music. As I say, eventually it's just a way of melding a whole view, my view, of that political climate in America today."

Altman's 1975 film is the third movie in the series and the first offered without the distraction of English subtitles. "Nashville" was the winner of the New York Film Critics Award for Best picture of 1975 but general reception by critics was varied. Reviewer Pauline Kael called it "the funniest epic vision of America ever to reach the screen." Scheduled for Oct. 19, this film is a case of see it and decide for yourself.

In "Amarcord" director Federico Fellini tries to recreate the isolation from reality that Italian experience under Mussolini's Fascism. One family is the core of the film with the character Titta presumably representing the film maker himself.

Talking about his 1974 film which won the Academy Award that year for Best Foreign Film, Fellini says:

"Sometimes I'm tired, I say yes ("Amarcord") is really my autobiography. It's a picture about a little town, and I was born in a little town. And, true, it was near the sea (just as the town in the film). But this kind of autobiography, in a sense, means nothing because everything is autobiographical. It is not important that it is something that happened to me. The important thing is that the audience feels that it happened to them. It's my life and also what I've invented."

As an "auteur" director, Fellini is well known for his refusal to be hobbled by a script. He strives to create a sense of spontaneity, and to accomplish this end, he refuses to allow his cast to see their lines until they appear on the set. "Amarcord" is scheduled for Oct. 26.

JACK NICHOLSON PLAYS the role of a television journalist on assignment in a remote corner of

the North African desert in the Nov. 2 film "The Passenger." Directed by Michelangelo Antonioni, the suspenseful film is one of his less successful efforts and was made following a 1973 visit to China.

The main character played by Nicholson is accompanied by an equally alienated "girl" on a treacherous journey through Africa, Germany, England and Spain. He resolves his problems in an identity exchange with a dead man in a portrait of a condition best termed "spiritual paralysis."

The Bulgarian film "The Goat Horn," directed by Metodi Andonov and scheduled for Nov. 9, is the story of a man who revenges his wife's rape and death by turning his daughter into a man. Trouble develops when the headstrong daughter develops a female self and falls in love with a peaceful farmer.

Her father reacts by killing the young man. But rather than seeking revenge, the daughter kills herself, and the father is left alone.

"Cries and Whispers" is another award-winning film offered in the Friday Film Connection. Set for Nov. 16, this Swedish film explores the relationships among four women — three sisters, one of whom is dying of cancer and their loyal housekeeper.

Director Bergman's women are symbols of the dilemma of alienated, suffering human beings that he uses to express his personal view of the world, one that has been coldly abandoned by an uncaring God.

"I think it's terribly important," Bergman has said, "that art expose humiliation, that art show how human beings humiliate one another, because humiliation is one of the most dreadful companions of humanity and our whole social system is based to an enormous extent on humiliation."

Not exactly the makings for light-hearted comedy.

The women of "Cries and Whispers" are charac-

terized as cold and frigid, or mindless and promiscuous, or inexplicably non-heterosexual and insatiably in angst, or servile and bovine. The film was the winner of the New York Film Critics Award for Best Picture in 1972.

VANESSA REDGRAVE IS THE wife of a half-mad pro-Marxist painter who fancies himself as a gorilla in "Morgan," a black and white film directed by Karel Reisz. An archetypal 1960s marital fantasy, the wife decides she needs a more normal life and divorces him while the madness escalates to a hilarious conclusion.

Reviewer Pauline Kael said of "Morgan:" "I think 'Morgan' is so appealing to college students because it shares their self view: they accept this mess of cute infantilism and obsessions and aberrations without expecting the writer and director to resolve it and without themselves feeling a necessity to sort it out."

"Morgan" will be seen on Nov. 23.

The last scheduled movie in the film series is the 1976 Italian film, "Seven Beauties," directed by Lena Wertmuller. The film will be shown on Nov. 30.

Newsweek's reviewer says of "Seven Beauties:" "Pasqualino (played by Giancarlo Giannini) is a great loser, an imitation bandit, breadwinner, lover, soldier, whose only grip on selfhood is his macho code, itself a grotesque imitation of the codes of civilization. But Pasqualino has real feeling, especially for women, and Wertmuller uses this to achieve some of the most astonishing and profound comedy since the blackest absurdities in Dostoevski....Wertmuller takes the kind of risks that major artists take and puts things together that have never been put together before."

Gene Shalit called the film "an indelible film, unlike any other I have ever seen. The script, photography, direction and performances are practically incomparable."

### The Movie Schedule

- |                                     |                              |
|-------------------------------------|------------------------------|
| Sept. 28 "Black and White in Color" | Nov. 2 "The Passenger"       |
| Oct. 5 "Ramparts of Clay"           | Nov. 9 "The Goat Horn"       |
| Oct. 12 "Firemen's Ball"            | Nov. 16 "Cries and Whispers" |
| Oct. 19 "Nashville"                 | Nov. 23 "Morgan"             |
| Oct. 26 "Amarcord"                  | Nov. 30 "Seven Beauties"     |

# Playhouse Roundup

## Patrons Helped Put New Fort Bragg Season Together

Michael Best - "South Pacific?"

Dana Andrews will open a diverse season sparked by other guest artists, Best, Miller and Townsend.

Glenn Townsend - guest artist

Dana Andrews, "A Man For All Seasons"

Joan Stoltz Miller - Nellie Forbush?

By EVE OAKLEY  
Staff Writer

They're calling it the "Something For Everyone Season" at the Fort Bragg Playhouse, the new eight-play series beginning in October and ending in June.

Theater goers were the major influence in the selection of the potpourri of entertainment for the new season. Also, their enthusiastic support of Bragg's Summer Theater Festival has helped make possible a second season of summer stock - repertory theater again next year at the playhouse, says director Lee Yopp.

Responding to a written Fort Bragg Playhouse survey in August, 120 playgoers (of 513 subscribers) chose their favorites from a wide selection of possible future plays. So their sometimes surprising preferences were instrumental in the design of the new theater year.

• "A Man For All Seasons", Robert Bolt's award-winning drama, opens the season. It will guest-star Dana Andrews as Sir Thomas More and Andrews' wife Mary Todd in a featured role.

It plays Oct. 26 to Nov. 4.

• "One Flew Over The Cuckoo's Nest" is Dale Wasserman's comedy-drama that will bring Glenn Townsend, winner of the Fayetteville Little Theater's Donald Yopp Memorial Scholarship, back to the playhouse in a featured role. It's set for Nov. 29-Dec. 16.

• "South Pacific," one of Rodgers and Hammerstein's most popular musicals, may star former visiting artists Joan Miller and Michael Best, if director Lee Yopp's negotiations with them are successful. It will have a nine-day run starting Feb. 7.

• "Equus," termed a psychological whodunit by director Yopp, is the adult drama scheduled for March 27-April 6.

• "Gypsy," the family musical Ethel Merman starred in on Broadway, will play May 22-June 1.

And in between, the Fort Bragg Playhouse will slip in two cafe or dinner theater plays and a special holiday Children's Musical Theater production.

• "The Last Of The Red Hot Lovers" is the Neil Simon comedy that led Bragg's survey; it will open the "cafe theater," running from Nov. 8 to Nov. 18.

• "The Drunkard," an old fashioned "hiss the villain" melodrama written by Barry Manilow, will be the second "cafe theater" presentation later on in the season.

• "The Emperor's New Clothes," another delightful romp by Jim Eller and Jeanne Barger (of "Cinderella" and "Jack In The Beanstalk" fame) will be the Children's Musical Theater offering, six performances scheduled just before Christmas, Dec. 15-22.

And there's more. Those people who responded to the playhouse's survey expressed particular interest in Tennessee Williams' "Streetcar Named Desire" and the world premiere here of a new brand new play. Both will be part and parcel of Bragg's summer stock season next year, if everything goes according to plan.

That survey, so important to the season, was full of surprises Lee Yopp said during a recent interview at the playhouse. "The Boys In The Band," certainly the most controversial show of the summer festival, emerged as the most popular play. "Shadowbox" and "Vanities" ran a close second, with Texas Trilogy (Preston Jones) placing last.

Of the many plays listed as future possibili-

ties, the most popular comedy was "The Last Of The Red Hot Lovers." Most favored as a serious play was "Streetcar..." Chosen as the second most preferred future drama was "Equus," which the director assures us bears no resemblance to the macabre movie drawn from the drama.

"Gypsy" was the most popular musical on the survey and placing fifth as a most desired future production was the new play Yopp is now trying to secure through theatrical literary agent Audrey Wood.

He pointed out that the season encompasses three separate projects. The first five offerings of the season will be handled as a subscription series, much as the Fayetteville Little Theater's season. The cafe or dinner theater will be done in a smaller setting, with bar and refreshments, at the playhouse or in another setting, not yet chosen. The children's musical is an annual project. And of course, the new summer stock season will follow these with "Streetcar..." and a new play augmented by two more "good plays," Yopp said.

Norman Marcus, Fort Bragg's Recreation Service officer, said, "We have a second season of summer stock based on the success of this year's summer season."

Yopp added that Marcus "was the one who was daring enough to make it possible...that is the truth of the matter."

The appearance of film star Dana Andrews and his wife in "A Man For All Seasons" will probably spark a lot of interest in the play. In fact the Fort Bragg Officers' Wives Club is sponsoring a military preview of the play, by invitation only, on Oct. 25, said Yopp.

"Cuckoo's Nest" has been done before at the playhouse, but it was a short run in a dinner theater setting, and Yopp thinks audiences will enjoy seeing it done full-scale at the playhouse, with talented actor Glenn Townsend featured. He is literally a soldier coming back to Fort Bragg as visiting artist.

They're reviving "South Pacific" on Broadway, and Yopp believes the beloved musical will do well here. It replaces the musical version the playhouse had planned to do of "Cyrano de Bergerac", for which rights could not be obtained. Yopp is especially hopeful that Joan Miller and Michael Best, both former Fayetteville Technical Institute visiting artists, will be able to make room for it in their busy schedules.

The director is excited about "Equus," which, he predicts, "will be so gripping, you will want to come back and see it a second time. It's a psychological melodrama and brilliant whodunit, which is why we have selected this as our adult drama. And, he emphasized again, the play has nothing to do with the movie.

He described "Gypsy" as the perfect family musical and said the major children's show for the holiday season, "The Emperor's New Clothes," should delight youngsters as much as its forerunners.

The playhouse has a standing invitation from Charleston's Spoleto Festival and this spring it will offer its designers "Equus," "The Emperor's New Clothes" and "Gypsy." They will probably select two of those or accept all three in repertory, he said.

Meantime, Yopp is busy with preparations for the season opener "A Man For All Seasons" while he juggles discussion with Audrey Wood about a possible vehicle for the playhouse's world premiere play here next summer.

The "Something For Everyone Season" is off and running for the winners' circle.

Hold - Put loose in back of scrap book

Marilyn Keiser, Asheville, an organist will conclude the concert season next April.

Jeffrey Meade will open concert series Sept. 23

## Concert Series Debuts Next Sunday

By EVE OAKLEY  
Staff Writer

Five performing artists will headline the Haymount Concert Series this fall and spring 1980 on Sunday afternoons at Haymount United Methodist Church.

Jeffrey B. Meade, guitarist-singer-composer, will appear in concert at 3:30 p.m. on Sept. 23. Fayetteville Technical Institute's Visiting Artist in Residence, pianist Steve Hunter, will perform Oct. 14 at 3:30.

Organist Richard Apperson of Elon College is to be featured in the Nov. 18 concert at 3:30. On March 2, 1980, Duke University's Ciompi String Quartet will perform. Dr. Marilyn Keiser, Asheville organist, will conclude the concert series with her performance on April 20, 1980.

The idea for the concert series, which is open to the public free of charge, came from Tony Argo, choirmaster at Haymount Methodist Church. Feeling that more free cultural activities were needed in the city, he contacted several artists, found they were available, and the series began taking form.

The project is funded by the Grassroots Arts Program of the North Carolina Arts Council, a State agency, and administered by the Arts Council of Fayetteville/Cumberland County.

The artists selected for the concerts have diverse backgrounds, and each is uniquely qualified as a musician-performer. Jeffrey Meade, a native of East Aurora, New York, combines artistic and

business careers. Seven years a trumpet player, fifteen a guitarist-singer, Meade has written more than 150 songs and a full-length Christmas Cantata for guitar and four voices. He was featured as a singer and guitarist with a touring Folk/Classical group of entertainers for two seasons in California, performs locally for clubs, social and religious groups, and has taught guitar for a year and a half.

In addition, he is a project expeditor and draftsman for D.R. Allen and Son, Inc.

Stephen Hunter is a native North Carolinian who has made frequent appearances in this area during his residency at FTI. He began his musical studies at the age of six and he has taught piano and music theory at the University of North Carolina at Greensboro. Among the honors he has received was the Outstanding Young man of America Award from the National Jaycees; he was also inducted into Phi Kappa Lambda, the national music honor society. Currently working toward his doctorate at North Texas State University, Hunter has given recitals in Newport and Providence, R.I., at Lincoln Center, and he has performed for the Sir Walter Cabinet and Governor and Mrs. James Hunt.

Organist Richard Apperson was assistant organist-choirmaster at New York's St. James Episcopal Church on Madison Avenue and he has appeared as a soloist with the North Carolina Symphony. Now organ professor at Elon College, professor Apperson graduated from the school and earned his Master of Sacred Music degree from

the School of Sacred Music at Union Theological Seminary, New York City. Eight years ago, he presented an organ recital in London's Westminster Abbey at that institution's invitation.

The Ciompi Quartet of Duke University, headed by violinist Giorgio Ciompi, has played for audiences worldwide, from Durham to New York, London, Sydney, Caracas and Naples. The group has received rave reviews from the London Daily Telegraph and the Washington Evening Star. In addition to Ciompi, the group includes violinists Claudia Erdberg and George Taylor and cellist Frederic Raimi. All, with the exception of Taylor, are on the Duke faculty. Taylor, a graduate of the Manhattan School of Music, was concertmaster for the Manhattan Orchestra and Aspen Philharmonic.

Marilyn Keiser, organist-choirmaster at All Souls Parish in Asheville, is music consultant for the Episcopal Diocese of North Carolina. She has premiered a number of new works by American composers and appears in concert throughout the United States and Canada seasonally.

A native of Springfield, Ill., Dr. Keiser was the associate organist and choirmaster at the Cathedral of St. John the Divine in New York from 1966 to 1970.

More information about the Haymount Concert Series is available from Tony Argo, 484-0181.

Concerts will be held in the Haymount United Methodist Church's spacious sanctuary and plenty of free parking space will be available to concert goers.

Ciompi String Quartet will perform next March

Richard Apperson, at left, of Elon College is to be featured in a Nov. 18 concert.

Stephen Hunter, at right, a pianist, will perform Oct. 14 as part of the Haymount concert series.

The News And Observer  
Raleigh, North Carolina  
Monday, September 24, 1979

## Bright, promising musician gives delightful piano concert

The North Carolina Museum of Art, drawing huge crowds for the showing of Bob Timberlake's paintings, was the setting in the Kress Gallery Sunday afternoon for a delightfully informal piano concert by another North Carolinian, Stephen Hunter, a native of Pilot Mountain.

Currently Artist in Residence at Fayetteville Technical Institute, Hunter holds a Master's degree from the University of North Carolina at Greensboro and has studied in Norway and Sweden. He will spend next year in Hannover, Germany, on a Rotary International Fellowship.

His program was titled "From Bach to Boogie, or from Chopin to Schmalz." — take your pick.

### Music review

There was only one Bach number, a Myra Hess transcription of "Jesu, Joy of Man's Desiring." After "Arabesque" by Debussy, the young pianist swung into a whirlwind of Chopin compositions with running commentaries about the popular tunes derived from them.

There were several "Etudes," including the powerful "Revolutionary Etude," "Preludes," the "Fantasy Impromptu" and finally stunning presentations of Chopin's "Ballade" in A flat and the fiery "Polonaise," also in A flat. His encore was appropriately chosen

from Moussorgsky's "Pictures at an Exhibition," a sparkling tone picture titled "Ballet of the Unhatched Chicks."

Stephen Hunter strongly resembles Chopin, has the aplomb and showmanship of a Liberace, and is backed by sound musicianship and facile technique. Watch for him. Here is an artist with a bright future.

— PEGGY HOFFMANN

## Haymount Concert Series Announces October Presentation

City Forum Sept. 27-29

Stephen Hunter, pianist, Fayetteville Technical Institute's Visiting Artist in Residence will be featured in concert on Sunday, October 14, at 3:30 p.m. at Haymount United Methodist Church. Hunter is a native of North Carolina and received his Masters in Music at the University of North Carolina, Greensboro. Currently he is working toward his doctorate at North Texas State University. Steve has performed widely throughout North Carolina and has given recitals in Newport and Providence, Rhode Island and Lincoln Center, New York. He received the Outstanding Young Man of America Award from the National Jaycees and was inducted into Phi Kappa Lambda National music honor society. Mr. Hunter has just been selected Rotary International Scholar for 1980 and will be studying at the Staatliche Hochschule in Hannover, Germany.

The Haymount Concert Series, co-sponsored by the Haymount United Methodist Church and the Cumberland County Grassroots Arts Fund is a new effort enabling the public to enjoy the diversified talents of accomplished musicians free of charge.

This project is supported by the Grassroots Arts Program of the North Carolina Arts Council, a State Agency. The Cumberland County Grassroots Arts Fund is administered by the Arts Council of Fayetteville/Cumberland County.

# Too Much Bad Publicity For FSU

To the Editor:  
Why is it that every time an audit report is done on Fayetteville State University, it makes front page headlines and is publicized excessively, complete with a picture of the head of the institution who is not the fiscal affairs person at the school? On the other hand, there is Fayetteville Technical Institute, which spends millions of state tax dollars each year teaching belly dancing and cake decorating. Even the state is questioning the expenditure of funds for these purposes. In addition, there is their bad audit report, covered in the May 22 edition of The Fayetteville Observer on page 6 of Section B, with no picture of the head of that school. In fact, with all of the publicity that FTI received over its duplication of courses with tax dollars, I have yet to know what the president looks like because his picture never gets in the paper.

I further question the newspaper's failure to do any serious investigative reporting on these matters. For example, why has no mention been made of the \$40 million agreed upon in the controversy with HEW? These funds have effectively been given to the white institutions, with the black institutions not receiving any increase in funds from the agreement. The fact that one of your editors recently alluded to funds forthcoming to the black institutions shows that your newspaper is not seriously interested in finding and reporting the truth.

# Education Study

The fact that only a few dozen students at Fayetteville Technical Institute ever transfer into formal higher education is good reason for FTI to decline the proposal for "farming out" so-called "general education" (English, history, other humanities) courses to higher educational campuses in Cumberland County.

Instead, FTI and such institutions as Methodist College and Fayetteville State University should undertake a cooperative attempt to find out why so many of the several thousand students at FTI end their educational careers on the technical institute campus and do not seek formal degrees.

That study might also discover further cooperative steps for encouraging more transfers from the technical institute setting to the degree-granting setting. In turn, that could provide expanded student bodies for the Methodist and FSU campuses and produce more degree-holding citizens for the Cape Fear Region, an area where such trained human resources are in short supply.

Such a cooperative study of the career goals and higher educational plans of thousands of Cumberland County people could provide information immensely useful to educational systems at all levels, helping the public schools, the technical institute, and public and private degree-granting campuses to better plan for their future service and make best use of the educational resources of the area.

Higher education in the Urban Fayetteville area needs particularly to be geared to the goals of its people and capable of fashioning its programs to attract as many of them as possible.

FTI's burgeoning enrollment indicates that it has found the combination to attract thousands who apparently have no further educational plans once they have taken advantage of the institute's low costs and ease of entry.

FSU and Methodist, however, must continually seek a deeper understanding of the needs of people for higher education and must seek to fashion the programs that can be most attractive for them.

A cooperative study of the reason why so many thousands end their careers after the FTI experience would help all three institutions be of better service.

# FTI Board To Debate 'Farming Out' Courses

By ROSE ANN FROBERG  
Of The Times Staff

Fayetteville Technical Institute trustees are scheduled to meet Monday to consider whether they will contract general education courses to Fayetteville State University and Methodist College.

FTI curriculum committee members of the board of trustees are not sold on the concept. Bobby Anderson, director of college transfer for the community college system, outlined Tuesday for the FTI committee the procedure for contracting out courses with four-year institutions.

After the presentation and discussion, the committee did not decide whether to recommend that FTI contract out its general education courses.

Instead, the committee will present the board with a summary of the presentation on Monday. William C. Beard Jr., committee chairman, said his impression from the discussion was that the committee had not been convinced the idea was a good one.

The FTI trustees had directed the administration to look into the possibility after FSU and Methodist objected last spring to FTI offering general education courses at its nine Fayetteville area Adult Education Centers.

FTI later withdrew the courses, and FSU and Methodist then offered to teach the courses for FTI as a way to resolve the controversy.

The two schools contended that offering the general education courses off the FTI campus was duplication of courses they offered.

During the presentation, Anderson said smaller schools normally contract to increase program offerings without having to spend large amounts of money for additional facul-

ty. But, he said, there is not much advantage for a large school like FTI to do so.

Usually larger schools have large enough programs from which courses can be tailored to fit the general education course requirements, and the faculty to staff them, he said.

FTI already offers a general education program which leads to an associate degree in general education, AGE, on campus.

Students taking the general education program take a wide range of liberal arts and technical courses, but the program is not designed for transfer to a four-year institution.

Some students taking the general education program do transfer, however, and have had difficulty getting their credits accepted at four-year schools.

Bruce Pulliam, committee member, said by contracting out the courses the transferability would be assured, at least to other University of North Carolina schools.

Beard said the transferability aspect was the only plus he could see.

FTI President Howard E. Boudreau said FTI's main purpose is not for its courses to be transferable, but to offer programs within its charter as a technical institute.

If FTI wanted to insure transferability then it should seek community college status, but it doesn't, it's not our purpose, he said.

Boudreau also said it would cost the taxpayer to contract the courses, and it is unnecessary because the FTI faculty is capable of teaching the courses.

Technical institutes that contract courses charge students the same \$4.25 per credit hour as for non-contracted courses, and the state then pays the difference to the contracting school.

The range usually charged by four-year schools is between \$40 and \$600 per course, Anderson said.

# FTI's Trustees Reject FSU Aid

The Fayetteville Technical Institute trustees this week decided not to contract to have Fayetteville State University teach courses for FTI.

The FTI trustees followed a recommendation from their curriculum committee that the board not consider contracting out courses.

FSU had offered to teach some liberal arts courses for FTI as a way of solving a dispute. The disputed courses to be taught off-campus were in the evening, as part of an expansion that also includes technical courses. All the new courses are for credit.

Because of the dispute, FTI is offering a scaled-down version of the off-campus curriculum now, without the liberal arts courses.

FSU had objected to FTI's offering liberal arts courses off-campus during the evening for college credit, because it said the courses would compete unfairly. The FTI courses are much cheaper than FSU's courses.

The FTI trustees have not yet decided whether to expand the off-campus curriculum to its originally planned size, including the liberal arts courses.

O - 10-10-77

# FTI Committee Rejects Offer

By PHYLLIS GAUGER  
Staff Writer

Fayetteville State University's offer to contract to teach general education courses for Fayetteville Technical Institute got the thumbs-down signal Tuesday from a key FTI committee.

The FTI trustees' Curriculum Committee informally agreed the proposal would not be the best course of action. The committee will report to a meeting of the FTI trustees Monday.

FSU had suggested that it could teach liberal arts courses for FTI, during a dispute this summer over FTI's expansion of college-credit courses into locations around the city during the evening.

FSU trustees had objected to the expansion, saying FTI was proposing to offer the same courses that FSU offers, only a mile or two away, and at a fraction of the cost.

They had said the "duplication" would be frowned on by the U. S. Department of Health, Education and Welfare, which discourages course duplications founded in a racially dual higher education system in North Carolina.

FSU is predominantly black. But the FSU trustees had offered to have FSU teach the disputed liberal arts courses, as a compromise.

At the meeting, Bobby L. Anderson, director of college transfers at the state Department of Community Colleges, reported on state laws and state Board of Education guidelines for situations in which technical institutes or community colleges contract with a four-year institution to have it teach courses.

Anderson said a "need" for seeking the instructional services would have to be demonstrated, according to state Board of Education guidelines.

Normally institutions contracting for such services are small ones, he said, without a large faculty.

But FTI has a large faculty capable of offering all the liberal arts courses, argued Howard Boudreau, FTI president.

Anderson said FTI would collect its regular fees and state reimbursements for the classes, and then would pay FSU a negotiated sum for the use of its professors, based on a "break-even point."

Boudreau said he fears this could be costly for FTI, because FSU professors are paid more than FTI faculty, while the normal FTI fees would have to be levied for the courses.

But committee member Bruce Pulliam pushed for the contract with FSU on the grounds that it would help students who transfer to four-year institutions.

Anderson said students who take the contracted courses would get credit on FSU books as having taken an FSU course, while at the same time would be recorded on FTI books as having taken an FTI course.

FTI is accredited as a technical institute, and its courses reportedly do not transfer as readily to four-year institutions as do those from an accredited four-year university like FSU.

"I see one advantage (to the proposal for contracting courses to FSU)," said committee Chairman William C. Beard Jr.

"It's an advantage as far as a few students are concerned, and it's not an advantage as far as what I feel our institution is, a technical institute.

"If a student has an inkling to go on to a four-year college, he should go there (to FSU) and take the courses there under their professors," he said.

# 'Farming Out' Courses Turned Down By FTI

By TIM SMITH  
Of The Times Staff

Fayetteville Technical Institute trustees rejected consideration Monday of a plan to contract general education courses to Fayetteville State University and Methodist College.

The trustees curriculum committee recommended Monday that the board not consider contracting out courses.

"I've looked at this thing for two months now," said Howard E. Boudreau, president of FTI. "I can't see anyone winning from it."

Under such a contract, FTI students could take courses taught by FTI instructors at FSU and Methodist.

Bruce Pulliam, a member of the committee, said students who look part in contracting would gain the benefit of transferable credits, since general education students at FTI now

have trouble getting their credits accepted at most four-year colleges.

But trustees William Beard and Steve Satsky, both members of the committee, said there was no present need for contracting and to do so would make FTI more of a community college.

"When you are talking about transferring general education courses you're not talking about a technical institute," Satsky said. "I don't think the citizens of this county want to be a community college."

The trustees had asked for a study of contracting courses after FSU and Methodist objected last spring to FTI offering general education courses at nine area adult education centers.

FTI eventually withdrew the courses, and See FTI, Page 8-B

# Henley To Head Education Unit

RALEIGH (AP) — Sen. John T. Henley, D-Cumberland, has been chosen president of the N.C. Association of Independent Colleges and Universities.

Duke University President Terry Sanford is expected to make the announcement Sunday, a Raleigh newspaper reported Saturday.

Sanford is chairman of the association, which represents 38 private colleges and universities before the Legislature and the University of North Carolina Board of Governors, which reviews requests for state aid increases before they are sent to the Legislature.

James Oliver of the association's staff has been handling the president's duties since Cameron P. West resigned the full-time position in June 1978. West resigned to become president of Pfeiffer College in Misenheimer.

More than 30 candidates were considered for the job. Henley is expected to assume the position next month but, according to sources, he has not decided when he will step down from the state Senate where he has served since 1967.

SEN. JOHN HENLEY

HOWARD BOUDREAU  
President Of FTI

FTI From Page 1-B

FSU and Methodist offered to teach FTI students. The two schools contend that the teaching of such courses by FTI is duplication.

Board reported that although many small technical institutes in the state contract with other schools, no schools with the enrollment size of FTI (5,320) use such a system.

FTI does contract the teaching of cosmetology courses but Boudreau said that was because the facilities are not available at the school.

Boudreau said if the school does have another need that cannot be fulfilled within its faculty, contracting with FSU or Methodist may be considered.

In other business, Boudreau reported that FTI's fall enrollment increased 9.2 percent over last year's figures. He said more than 93 percent of the students are enrolled in vocational or technical curriculums.

# Community-Colleges President Asks Funds For New Programs

GREENSBORO (AP) — The state should spend \$30 million to \$50 million for equipment so community colleges can train skilled workers for new industries, the president of the community-college system says.

Dr. Larry Blake, president of the community colleges since last July, said the 38 institutions have done a good job of bringing educational and job-training opportunities to North Carolinians in the past.

However, Blake told persons attending a meeting of the Piedmont Triad Council of Governments on Wednesday that the community colleges should shift their attention to skilled and "high-skilled" workers.

Industries have been told in the past that community colleges would begin educating and training local people to fill jobs once

ground had been broken on a new plant. He said that is no longer adequate because of the length of time it takes to train highly skilled workers.

Blake said North Carolina's community-college system has long been recognized as one of the top three in the nation but that it is falling behind.

The community-college department will document its needs before asking the General Assembly for funds, Blake said. He said the costs will be from \$30 million to \$50 million over the next several years.

He said it will require close cooperation between the community-college system and the state Department of Commerce, which recruits new industry, to turn out workers with the types of skills that will be required.

# Local Industries Questioned About Changing FTI Courses

Fayetteville Technical Institute is ready to do a little housecleaning in its curriculum if business and industry leaders call for it.

Local businesses and industries will receive a questionnaire this month from FTI, asking for suggestions on improving its course offerings.

The questionnaire will ask the businesses and industries which programs they find useful, and what they would suggest in the way of new programs.

FTI President Howard Boudreau said the curriculum is pruned and added to now and then, in an effort to keep up with the needs of employers. For example, television repair was dropped when it became apparent that the old-fashioned repairing was no longer used, said Boudreau. Instead, TV repairmen these days replace "modules" of circuits.

And if FTI finds a big enough need for something it does not offer, it will design a new course, he said.

"This is what the community college system is all about, designing a program to meet the needs of industry and business," he said.

This is the second time FTI has sent out a questionnaire, he said. The first time was five or six years ago.

The results of the questionnaire, he said, should be ready early next year.

The questionnaire asks how many FTI graduates the company employs, what programs they graduated from, and what job skills are needed that are not met by FTI programs.

It also asks whether the businesses think FTI should continue to offer "general education" liberal arts courses.

# Separate Board For Community Colleges Is Urged

RALEIGH (UPI) — Some State Board of Education members have told chairman Dr. H. David Bruton the creation of a separate governing board for the state's community colleges should be reconsidered.

Earlier this year the General Assembly voted to remove the 58-campus community college system from the control of the State Board of Education.

During an informal discussion at the board's monthly session Thursday, Dr. John Tart, president of Johnston Technical Institute, said keeping the community college system under the State Board of Education would save the

state at least \$200,000 to \$300,000 a year. Cooperation would be better in developing programs between high schools and community colleges, he added, and there would be a better opportunity to develop high skill technical labor.

"We feel there would be a breakdown in the cooperation of the two systems," Tart said. "Several of the members feel different goals would be developed and they would go in different directions."

Bruton said he would inform Gov. James B. Hunt Jr. of the members' feelings. "I anticipated difficulties in separating the physical management of the two systems," Bruton said. "It doesn't surprise me."

"With the limited dollars we have available, we have to create imaginative ways to share students, faculty and equipment. It's those kinds of coordination that are superlatively thought to be easier by one coordinating body. The educational needs of an individual might best be served with the high schools and community colleges governed by one board, Bruton said, but I feel the decision (to create a separate board) was an appropriate decision."

## Important Possibilities

11-10-79

If you are planning your calendar for the weekend or next week, consider several programs or events reflecting the impulse toward enhancing the Cape Fear Region's cultural resources and hence the quality of life for us all:

- In Southern Pines today and Sunday, the Friends of Weymouth Center for the Arts and Humanities is sponsoring a display and auction of cultural artifacts, antiques and art objects, to raise money for this fine place dedicated to celebrating man's intellectual and moral achievements. The center will be a place where artists, writers, students, and the general public can find the nurture and the practical means to both create and appreciate art. Looking at interesting "things," and buying them, is a way to make this possible.
- At the Arsenal House in Fayetteville, a stunning art display by the schoolteachers

of the community, entitled "Teachers Are Artists Too," will prove to you that y'r children are in good hands, talented hands, and that public education ain't all report cards and football games.

- Tuesday night in Fayetteville, a fine series of lectures on deepening appreciation and honing technical skills in historic preservation will continue at Frances Brook Stein Library downtown with a lecture on old-structure preservation by Davyd Hood, at 8 p.m. A project of the Cumberland County Public Library.
- Yet another library-sponsored series, this one on the vital modern issue of the impact of technology, at 8 p.m. on Thursday at Cumberland Hall at Fayetteville Technical Institute will present two experts from Research Triangle medical schools speaking on "Biomedical Engineering: Research at the Outer Limits?"

Larry J. Blake  
... would cut 50 jobs

## Colleges reorganization plan unveiled

By ROB CHRISTENSEN  
Staff Writer

Larry J. Blake, president of the State Department of Community Colleges, announced plans Wednesday for a departmental reorganization in which 50 of the department's 205 employees would lose their jobs.

Blake said the purpose of the reorganization was to streamline the department and to

scrap several department functions that are no longer needed.

The plans were disclosed at a meeting in Raleigh of the State Board of Education's Community College Committee. The committee unanimously endorsed the move, but the board postponed final approval of the reorganization until later this month at the request of board member Lt. Gov. James C. Green, who is in Japan on a trade mission.

"I can't conceive of the lieutenant governor, with his statements about waste and frugality in government, not being in favor of it," Chairman H. David Bruton said. "I find the reorganization plan rational, humane and appropriate," Bruton added. "I realize it is tough, tough when you start reducing the size of any governmental agency."

See PANEL, page 16

16

The News and Observer, Raleigh, N. C.  
Thursday, November 1, 1979

## Panel backs reorganization of department

Continued from page one

The shakeup had been expected for months, although some department staffers were clearly surprised by the size of the cutbacks.

When Blake was hired in July, he was instructed by the board to revitalize and modernize the department, which critics said had become overstaffed and lethargic.

The reorganization would result in elimination of 50 positions in the department by June 1980, Blake said. Those employees will be given three months notice, and efforts will be made to place them in jobs in other state agencies or with the 58 community college campuses, Blake said.

"I hope you would find two things to say about it," Blake told the board. "I hope you will say it has been rationally done and I hope you will say it has been humanely done."

Blake said he would not identify persons affected by the changes until the board formally approved his plan. As part of the reorganization, vice presidents J. Reid Parrot and Hugh E. Battle Jr. would be replaced, Blake said, but it was not clear whether they would remain in the department.

A third vice president, Charles R. Holloman, said last spring that he intended to retire next year.

Blake said the reorganization was the result of a three-month evaluation of the department he conducted after taking over as president in July. Blake was formerly president of Fraser Valley College in British Columbia.

"The new organization has been developed to reflect the current and future roles of the department in support of the governing role of the State Board of Education and in providing necessary services to the 58 institutions of the system," Blake said.

The reorganization plan would:  
Eliminate a level of management, with seven associate vice president positions cut.

Cut half of the area coordinator program, eliminating 25 jobs. This program, which has been criticized by legislators, sets up regional courses in such fields as seafood and hotel and restaurant management.

Abolish the education resources section, with its six employees, and eliminate the department's campus accreditation program, which has two employees.

Reduce the Public Information Services section, with its function shifted to a new assistant to the president for public affairs.

Blake expressed confidence that state or community college jobs could be found for the 50 employees, despite the partial job freeze imposed last month by Gov. James B. Hunt Jr.

"I really, fully believe that any person who is competent will continue in employment" with another agency, Blake said.

The chief criticism of the reorganization was made by Ben Battle, a board member, who suggested that the cutbacks could be made by attrition over two years. Battle is the brother of Hugh Battle, one of the vice presidents who would lose his job.

"I just don't believe in suddenly, just firing 50 people like this, because I believe attrition will take care of this," Battle said. "We have a group of people who have served the state of North Carolina well."

Battle also said Blake was acting hastily in eliminating the area coordinator program.

"Before you just start lopping them off — I don't believe you have really had time to study it," he said.

Emmett W. Burden, executive director of the N.C. State Employees Association, arriving near the end of the meeting, told reporters his organization would look into the action.

"You get me a copy of every damn thing that you have," Burden said when a department staffer offered him a copy of a press release on the reorganization.

Blake told the board he had been under no political pressure to make the changes.

"I would have resisted any such effort because I felt, coming in here from the outside, you wanted a professional that would run the department in a professional way and not a political way," Blake said.

Bruton said he expected the delay would allow opponents of the reorganization to mount a campaign to defeat it.

"I think the board should be aware that it will be bombarded with pressure," Bruton told the committee. "But that doesn't bother me because I know the board has a backbone."

## College Post Accepted By Senator John Henley

By ELIZABETH GEIMER  
Staff Writer

JOHN HENLEY

State Sen. John Henley of Hope Mills said Sunday he has accepted the post of president of the N. C. Association of Independent Colleges and Universities and will resign his Senate seat sometime this month.

Henley said in an interview Sunday night that he wants to talk with Gov. Jim Hunt, Lt. Gov. Jimmy Green and state Senate leaders before officially resigning the Senate seat he has held for 12 years.

"I think ethically, I should resign my Senate seat, although there are people up there with more complicated (conflict-of-interest) issues than I would have," Henley said with a laugh.

He said he will make no recommendation as to whom the Cumberland County Democratic Party Executive Committee should name as his successor for the remaining one year of his term. Four persons now expected to contend for his vacant Senate seat are Rep. Lura Tally; Hector Ray, a former county commissioner and state representative; County Commissioners Chairman E. J. Edge Jr.; and Glenn Jernigan, a former state senator.

(Continued from Page 1A)

Henley says his work with private colleges dates back to the early 1970s when he was chairman of the Senate Appropriations Committee when it made the first appropriation for students attending private colleges.

Now, the state subsidizes state students attending public colleges to the tune of \$2,350 a year and students attending private colleges \$750 a year, according to Henley's figures.

"I think the state has a responsibility to give an alternative," said Henley. "I believe we should help those qualified private colleges and universities that want to serve students."

Henley said he will also stress maintaining

Henley expects to spend his first day at his new office in Raleigh on Tuesday.

His years of experience in the state General Assembly will be put to use lobbying for the private colleges in his new role as president of the association which represents 38 private colleges and universities sprinkled across the state. In the Fayetteville area, Methodist College, Campbell University and St. Andrews College are all members of the association.

Henley said his duties will also include administrative work and coordination not only among the private colleges but between the public and private institutions in the state.

"I want to visit all 38 institutions across the state," said Henley. "I want to meet with their board of trustees, understand their problems and coordinate their programs to see there is no duplication and to work with the public and private sector," summed up Henley.

"I think the major challenge will be attracting and letting potential students know what is offered by colleges in the private sector," Henley continued.

(See HENLEY, Page 2A)

high academic standards for the private schools.

"I think this job will be a challenge," said Henley. "I want to do the best I can to bring together the public and private sectors. That will be my main effort."

Henley replaces Dr. Cameron West as president of the association. West resigned to become president of Pfeiffer College in Misenheimer.

The announcement of his new job was made by Duke University President Terry Sanford who serves as chairman of the association of independent colleges and universities.

## College Post Is Taken By Henley

## Henley Resigns Senate Position

By ELIZABETH GEIMER  
Staff Writer

JOHN HENLEY

Only three candidates — all popular political figures in Cumberland County — will vie for the county Democratic Party Executive Committee's nomination to the N. C. Senate seat which Senator John Henley has formally resigned.

Rep. Lura Tally, who had been considered a possible candidate, announced this morning she will not seek the state Senate seat at this time.

Her withdrawal leaves a three-man race among Hector Ray, a former county commissioner and state representative; Glenn Jernigan, a former state senator; and E. J. Edge Jr., chairman of the Cumberland County Board of Commissioners.

Henley announced Wednesday in a letter to Lt. Gov. Jimmy Green that he will resign his seat Nov. 1. He has taken a job as president of the N. C. Association of Independent Colleges and Universities.

The local executive committee is expected to meet within 10 days after Henley's resignation to nominate a successor to Henley" according to Tony Rand, chairman of the county Democratic Party.

However, party officials, faced with having to choose among three well-known, influential Democrats, could take an easy way out and postpone any decision until next spring and let local voters decide in a primary who should be the next state senator. Since the General Assembly does not convene until next June, this tactic would not leave Cumberland without a senator during a legislative session.

Edge, when contacted this morning confirmed he would be a candidate for Henley's seat and said he has already been politicking among precinct officials.

(See THREE, Page 11B)

## Three Seeking Seat

(Continued from Page 1B)

Ray also confirmed that he would "definitely" be in the race but has not yet prepared a formal announcement.

Jernigan could not be reached for comment. Rep. Tally, in her statement, thanked local people for their support and encouragement but said she had decided "I can best serve the people of Cumberland County and the state by continuing my work as a representative in the North Carolina House during this current session."

She mentioned her position as senior member of the county's five-person delegation, as chairman of the House Higher Education Committee and as a member of the Legislative Research Commission as reasons for remaining in the House.

"These groups are currently preparing much-needed legislation to be acted on during the 1980 session. I consider these duties very important to our county and the state. For this reason, I am asking at this time that my name not be considered for the recently vacated Senate seat," said Rep. Tally, in a telephone interview today.

However, Rep. Tally said she would not "close the door on running" for the Senate seat at a later time, possibly even during next spring's primary.

Henley, in his letter of resignation Wednesday, thanked the people of Cumberland County for electing him to 11 terms in the General Assembly. He was chairman of the Senate Banking Committee and vice chairman of the Ways and Means Committee.

## 'Cries And Whispers' Is The Friday Film

"Cries and Whispers," a 1972 Swedish film, is the Friday Film Connection offering to be shown at 8 p.m. today at Fayetteville Technical Institute's Cumberland Hall. Admission is free.

The Friday Film Connection series is sponsored by Cumberland County Public Library and FTL Peter Valenti, a member of the English department of Fayetteville State University, offers the following about today's film:

"'Cries and Whispers,' directed by Ingmar Bergman, is a film with a slight narrative line, but it is a film of almost incredible power. Liv Ullmann stars.

"Bergman has succeeded in showing how affecting the life of an individual can be made through film. A viewer would have to be made of stone to remain indifferent to the film.

"Most people who view 'Cries and Whispers' are unable to say much about it. The experience leaves a profound effect which we evidently have to deal with, each in our own way.

"The film presents two sisters who care for a third sister, who is slowly dying. The dying sister is also aided by a devoted maid. The relationships among these women provide the film's plot developments through stunning visual detail and beautiful color photography. It may be the director's most accomplished work.

## Cumberland Chorale

SUNDAY — The Cumberland Chorale opens its 13th season in Fayetteville on Sunday at 3 p.m. with a concert of sacred music at Fayetteville Technical Institute's Cumberland Hall. Included in the program are works by Bach, Haydn and Mendelssohn. Admission is \$3.50 for adults, \$2 for students and children. Season tickets will also be available at the door for the year's complete three-concert series by the chorale.

# Art: The Down-Home Brand

By MARICA ELLIOTT  
Sunday Staff Writer

CAMERON — Art lives in the feelings of real, everyday people and finds expression in such activities as an over-the-fence chat with a neighbor.

At its primal point, art is instinctive, flowing from the lips of creative men and women who live simply and modestly, who may never have been to a concert, a ballet, or an art museum.

Art without the trappings is the basis for a unique program budding at a 100-year-old general store in Cameron. The old store, which is said to have been the largest one between Washington, D.C., and Atlanta and Charlotte and Richmond at one time, has had its uses as a hosiery mill, an off-brand bottling company, a warehouse for storage of fertilizer, and soon will be used as an arts center.

For Pamolu Oldham, an English instructor at Fayetteville Technical Institute, and Lisa Morphew, a photographer and instructor at Central Carolina Technical College in Sanford, the right time and place have come together for what they call "their big dream." After undergraduate study at Sweet Briar College in Virginia and graduate study at Columbia University in New York and studies at Radcliffe, where she was editor of the literary magazine, Ms. Oldham returned home to Cameron, to a place she calls "humane" with "characters" around.

Ms. Morphew is a graduate of Wayne State University in Detroit and Arts and Crafts in Detroit. She studied at the Rhode Island School of Design and has shown her work nationally and in Paris. Her family is from Detroit; her grandfather helped invent the automatic transmission and hand-designed and built the stamping machines that stamped out the body parts for the Packard and Hudson Hornet in the old Detroit plant.

The two women are putting "sweat equity" into the 100-year-old red brick building on the main street of Cameron that they purchased. They hope to open it in a month or two as an arts center for real people, for those who are academically skilled as well as for those who react to art instinctively.

The center will be for such people as senior citizen poets who can create art but need a channel to voice it. A book of area poetry by senior citizens, "Old Age Ain't For Sissies," was placed in local bookstores this week. The book was published last week by Crane's Creek Press, the publishing house established by Ms. Oldham and Ms. Morphew. The press offices will be located in the arts center. There are already plans for a second book, utilizing more material from the senior citizens.

Funding for the book, which contains the works of 30 poets, was provided by Coca-Cola Bottling Co. of Fayetteville, the Arts Council of Fayetteville/Cumberland County, the North Carolina Arts Council and the National Endowment for the Arts.

When the poet Julia Alvarez came last year to conduct poetry workshops for area senior citizens, she stayed at the Oldham home, and Ms. Oldham became interested in the program. "It seemed that the poetry should have a home in more than just a booklet," she said. Poetry for Older People was a program sponsored by Fayetteville Arts Council in the spring of 1978.

Of these poets, Ms. Alvarez wrote, "They had buried husbands, mothers and fathers, and had learned and earned perspective; they could look at their lives with both precision and affection. Their poems came out of experience and passion, not invention and cleverness. They were moved to talk about what

Observer-Times photos by BILL SHAW

The old general store in Cameron is scheduled for a new use as an arts center. Sprucing up the old structure are the new owners, Lisa Morphew (upper left) and Pamolu Oldham, who hope to open a portion of it in November.

they had lived more than what they could imagine..."

Joy, humor and regret are among the timeless themes of the poetry. The voice is a very old voice, a voice which has not been heard from in a long time; so it seems new, according to Ms. Oldham. The voice utters themes that are old and very true. While the poetry is regional and the poems specific, they contain universal truths, said Ms. Oldham. "The poetry is very concrete. The rhythms are very true; the alliteration, the consonants, the images, the repetition — things we look for in our best poets are there. They are very strong poems."

The center is an outgrowth of the same idea spurred by the Poetry For Older People program.

Clad in work clothes that have seen better days, the women share their philosophies on art and what it should be. "Hannah Arendt says art is art when it's cordoned off. We believe the opposite of that," said Ms. Oldham. Arendt is a political scientist and author of a number of books, among them, "On Revolution" and "Crises of the Republic."

"To me, the building is a place to bring people together and remove the imaginary separations," said Ms. Morphew.

"Let people grow and see their words and react to art and make art," said Ms. Oldham.

While they expound on art they have a vision of a wall-to-wall reality.

In the making is an office for the new publishing house, a photographer's studio and darkroom facili-

ty, a place where intensive three-day workshops can be held, a small living space and a kitchen facility. Some of the center programs are scheduled to open in November.

The arts facility will include a media center which will offer services which may not be offered in other parts of the state, according to Ms. Morphew.

In addition, they hope to bring writers from throughout the state to the center and artisans from throughout the country.

There will be a gallery in the downstairs portion of the three-story building where art objects can be exhibited and touched.

They paint an ambitious picture for a building overgrown with weeds, heart pine boards missing from the floor, window sashes waiting to be installed and plumbing and electrical wiring needing to be repaired. A structural engineer has declared the building sound, and it isn't in as bad shape as it looks, according to Ms. Oldham. Both the students have offered to pitch in and help in the clean-up. The sprucing will take place in the next two months. When the sprucing is completed, the building will retain much of its worn appearance for the sake of authenticity right down to the graffiti on the walls, some of which dates back to the 1920's.

There is little reason to doubt that this forlorn structure of by-gone days will be everything the visionaries say it will be. Both are experienced in remodeling old structures. Ms. Oldham remodeled the 175-year-old log cabin where she lives. Ms. Morphew has worked on restoration of old houses and barns and in converting structures to other uses.

Just as "Old Age Ain't For Sissies" grew into a book, maybe, just maybe the general store in Cameron can grow into an arts center.

## More Adults Going Back To School

By MARICA ELLIOTT  
Sunday Staff Writer

Area campuses haven't turned gray yet, but more and more adults are returning to these schools to either begin their education or to continue their education. Some hope to obtain degrees and meet specific goals; others are lifelong learners who are studying for the fun of it.

One-third of all college students are now older than the traditional 18-to-22-year-olds, and with the number of financial aid plans available, it seems that a college education is really available to anyone who wants it.

Many adult students find the second go-round is the surer round. Most know exactly what kind of training they want in order to get where they want to go—whether it's to a higher paying job, a change in careers or a different job in the same field.

After she graduated from high school, Kathy Southerland found a job as a secretary. She worked for seven years and then decided to go back to school. "All I wanted to do was to get out of school and get a job. Unless you have that degree you have no opportunity for advancement at all," she said. A full-time student at Methodist College, she lives in the dormitory and works part time. She was able to obtain financial assistance for her education. "You just don't know about these things until you get started and you see it's a lot easier to go to school than what you thought."

Mike Stickler, an adult student, who attends night school at FSU, says, "I think everybody ought to do something for about two years after they finish high school. They are more able to direct their lives then. They know where they are going. They have been out in the world a little while." He is working on a master's degree so that one day he can teach on the college level.

Jonita Williams switched fields from physical education to special education. She is one of many commuters who travel long distances weekly in order to complete their education. "I had been thinking about changing for the past three years. I was trying to get a job closer to home, and I had to change fields to do it." She taught physical education in Clinton, got a new job in Chadbourne and commutes from Chadbourne each week to attend classes at Fayetteville State University. "My husband and baby travel with me. They are riding around Fayetteville somewhere," she said.

Martha Hair, another adult student, considers herself a lifelong learner. "I've been going to school all of my life. I enjoy it."

Anne Newman and Gene Hart, who work at the central office for Sampson County Schools, ear pool to campus. "I take at least one course every semester because I feel I need it for my profession. Since I take one each semester, I decided I might as well work toward another degree."

Ms. Newman's ultimate goal is a doctorate degree. Night school, she says, does have its disadvantages. "There is only so much energy to get through the day. We are working in 19 different schools, and that is an energy drain before 4:30. When we come to class, it's as if we are beginning a new day."

Carol Pagan, a special education teacher for the severely and profoundly handicapped in Hoke County, says she couldn't make it through work and then through school without the help of her husband. "We've got two kids. He takes care of them. He helps me out tremendously."

Because of the demand more programs are being established to meet the needs of the adult student.

"In recent years, they've come up with the CLEP, the College Level Placement Exam," said Dr. James Carson, dean of the continuing education division at Fayetteville State University. "It is geared to give those adults who have gained experiences a chance to take an exam and obtain credit for them." He said that it is conceivable for an adult to begin as a freshman and pick up six hours. Those would be deleted from his curriculum and added to his hours as completed courses based on his scores.

Through an exam, those with military training

may also be able to gain course credit for their experiences.

The learning opportunities for both credit and non-credit education are numerous.

In addition to regular day programs at area trade schools, business schools, technical schools, colleges and universities, a number of special programs have been set up to meet the needs of the working adult who may have to continue his education at night or on weekends.

Fayetteville State University and Methodist College offer a weekend college, where students can come to class on Friday evening and Saturdays to work toward college credit. In addition, a number of schools offer night courses.

For instance, at Methodist College, it would be possible for a student to complete a major in business, history, sociology or psychology just in the evening program.

"We have a great deal of housewives who are coming back to school to finish their degrees or even to start," said Nell Thompson, director of continuing education at Methodist. "It has happened to me a number of times that the mothers bring their daughters to enroll and they end up signing up too."

Fayetteville Technical Institute offers a variety of courses in the evenings ranging from the academic to the occupational and from the industrial to the emergency services.

"Our program in adult continuing education has quadrupled in the last four years," said Thad Sexton, dean of adult continuing education at FTI. "We have offered as many as 750 courses in an 11-week quarter. These courses have been attended by as many as 17,000 students. The normal range is 500 courses in a quarter with 10,000 students."

He said that the school will offer any course, anywhere, any time, "as long as we can find 15 students who are interested in the same subject and a qualified instructor to teach it and a place to hold the class."

Other educational opportunities are available through such places as the YMCA, the Fayetteville Museum of Art, the Cumberland County Library System, and the Fayetteville Parks and Recreation Department.

In recent years, more and more graduate study programs have become available locally. For instance, through the Fayetteville Graduate Center of the University of North Carolina, located at Fayetteville State University, such programs as the following are available.

ECU: master's in reading education, education administration, elementary education and education supervision. Also available are degrees in education specialist in administration and education specialist in supervision.

The University of North Carolina at Chapel Hill offers a program in special education.

Art by Melissa Clement

Through the Army Education Center at Fort Bragg, such programs as the following are available:

East Carolina University: graduate programs in public administration, political science and counselor education.

Emory-Riddle, Aeronautical University: a master's program in aircraft management.

Piedmont Aviation: undergraduate studies.

North Carolina State University: graduate program in adult and community college education.

Fayetteville State University: associate and bachelor degree programs in a variety of fields.

Campbell College: master's programs in business administration and in education.

At Pembroke State University graduate studies are available. Among the programs are those in early childhood education, intermediate education, education administration and educational supervision.

A number of courses are offered locally for certificate and license renewal for professionals.

Many of the graduate courses are designed to upgrade the skills of educational personnel. "That's our task and role—to meet the needs of education. What we're dealing with is the improvement of educational personnel—teachers, supervisors, principals and central office administration," said Dr. Charlie Coffman, associate director of the graduate center at FSU. "Then beyond that we're talking about certification and about having to go back to school periodically to keep the certificate valid."

Some courses are available through the mail. Home or correspondence study is available through 60 colleges and universities in the nation as well as by some private schools. If a degree is the goal, check to make sure that the college or university will accept the selected correspondence courses toward a degree.

If you want to go back to school and are having trouble deciding on a subject to study, the library can be a good resource. The U.S. Department of Labor publishes the "Occupational Outlook Handbook," which provides information on employment trends.

Counselors are also available at most schools to help in planning educational goals. If you aren't qualified to enter a particular course at a school, counselors can also suggest which preparatory courses to take.

Many of the seminars and courses in a number of locations are free, but some will cost. Financial help is available for adult education. Among the possibilities are a Basic Educational Opportunity Grant, which is not available for work toward a graduate degree, a National Direct Student Loan, available through the college you attend at three percent interest with no repayments until you've finished

school; and a Guaranteed Student Loan, at a seven percent interest rate and a deferred repayment plan.

An education loan may be worth it in the long run, but it is an investment which should be given consideration before borrowing.

Among other financial options are using employee benefits for education. An estimated \$10 billion is available nationally, and only a fraction of employees ever use the money.

Counselors at the school you plan to attend can help advise on a financial aid plan. Two pamphlets published by the College Board, "Meeting College Costs" and the "Self-Supporting Student," provide information on what a student would pay even when some financial assistance is awarded.

In order to obtain help, you'll need to file a Financial Aid Form with the College Scholarship Service of the College Board or a Family Financial Statement with the American College Testing Program. The college selected will be able to advise on which form to use.

The learning opportunities available for adults are so numerous that there is one for every need, tailored to fit like a glove on the hand. For those who choose to go back to school, the second education is often the more valuable one.

"My husband and baby travel with me. They are riding around Fayetteville somewhere." --

Jonita Williams

"I think everybody ought to do something for about two years after they finish high school. They are more able to direct their lives then." --

Mike Stickler

## FTI Ordered To Stop Race Discrimination

**From Staff Reports**

Fayetteville Technical Institute, according to a 1977 U.S. Department of Health, Education and Welfare study, discriminated on the basis of race in remedial programs and admissions.

In a recent report, the HEW Office of Civil Rights outlines findings of an investigation conducted in 1976 and 1977 and directs FTI to make changes in its remedial program and admissions.

The report says that FTI's Developmental Studies Program, a remedial program, contained a disproportionate number of black students and faculty.

It also criticizes a test that FTI uses for applicants in order to help determine what their field of interest is.

But FTI President Howard Boudreau said the remedial program has been changed since 1977. He also defended the school's use of the tests which HEW criticized.

He said FTI is drawing up a detailed response to the HEW report.

The HEW investigation came as a response to complaints of alleged racial discrimination made against FTI by the Fayetteville-Cumberland County Citizens Association.

The association's 1976 charges also alleged that FTI was discriminating in hiring practices.

HEW's investigation of the hiring practices complaints found no basis for the hiring discrimination charges.

Concerning the current report, Boudreau said the remedial program "has changed. I think more emphasis is put on preparing students to enter the main stream."

HEW's report says that black students were over represented in the remedial program between 1972 and 1976.

It also found that 50 percent of the staff was black in the remedial program. No other FTI department at the time approached that percentage of black members, according to the report.

But Boudreau said the figures are inaccurate. He said the 50 percent figure "is not true and never has been."

The investigators, he said, looked only at the English instructors in the remedial program. The remedial program also contains instructors in math, science and other disciplines, he said.

(See DISCRIMINATION, Page 2B)

## Discrimination

(Continued from Page 1B)

The report also said that students in the remedial program did not improve test scores after being in the program, which is required for admission to regular programs for some students.

"Participation in Developmental Studies should enhance the likelihood of success for students. Instead it was found to decrease their chances for completing courses and to result in little or no improvement on the tests used to gain admission to regular programs," said the HEW report.

Boudreau said he thinks students are not handicapped by the remedial program. "Once the students get through Developmental Studies, I think they do just as well (as regular students)," Boudreau said.

Concerning admissions, HEW's report claims that FTI's admission methods discriminate on the basis of race because of a testing procedure which channels students into various programs.

Boudreau said FTI does not discriminate. It admits anyone who has a high school degree and is 18 years old, he said.

FTI, according to HEW, uses a series of tests in admitting students which are not being administered correctly. FTI uses only four of a battery of eight tests, while all eight are supposed to be used, according to HEW.

In addition, FTI fails to use different test score norms for males and females as suggested by the publisher.

Boudreau said the tests are not used as admission requirements, but are used to help indicate what a student will study.

## FTI Revises Proposal On Affirmative Action

The Fayetteville Technical Institute Board of Trustees Monday approved revisions to its 1977 affirmative action plan which call for adding about six black persons to the faculty each year for the next four years.

The revisions were made at the request of the U. S. Department of Health, Education and Welfare, said Howard Boudreau, FTI president. He said the guidelines had to be updated to conform with HEW rules.

The rules call for specific goals for employing minority faculty and administrators.

John McDaniels, FTI personnel director, told the board that FTI must demonstrate that its employment practices

are similar to the population in the area it serves.

The FTI service area is about 23 to 28 percent minority groups and women, and about 25 percent of FTI's work force is made up of minorities and women, he said. But only 8 percent of the faculty is black or women, he said.

McDaniels said FTI has been making progress in hiring women and minorities, but the turnover rate has been slow.

The faculty has had about a four percent turnover rate, he said, and there has not been an administrative position open in 12 years.

The trustees Monday set a hiring goal for administrators which says that 25 percent of the administration should be blacks over the next three years. Efforts are to be made to fill vacant positions with blacks.

In other action, a new board member, state Rep. Lura Tally, was sworn in.

The winter enrollments, said Boudreau, are down from the fall quarter but still above those for the winter quarter last year.

He also reported that 171 responses from a questionnaire sent out to 300 local businesses had been received. The survey asks how FTI could better align its curriculum with needs of local business and industry.

**DECORATIONS:** A 12-week course in seasonal decorations begins Wednesday at Bordeaux Library. Class meets from 7-9 p.m. Fee of \$5. More information: 485-1425. Sponsored by FTI and Cumberland County Public Library.

**FIRST AID:** A 12-week course in emergency first aid begins Thursday at Bordeaux Library. Class meets from 9:30 a.m. to noon. Fee of \$5. More information: 485-1425. Sponsored by FTI and Cumberland County Public Library.

## HEW Report Charges Racial Bias By FTI

By ROSE ANN FROBERG  
Of The Times Staff

A 1977 investigation at Fayetteville Technical Institute has found discrimination in the school's methods of admitting students and in the operation of its remedial program.

The U.S. Department of Health, Education and Welfare, Office of Civil Rights, has directed FTI to immediately develop admission criteria that does not discriminate on the basis of race.

The school has also been directed to tailor its Developmental Studies program to specific remedial needs of students so that students will

be assisted in particular trade and vocational areas.

The investigation was conducted in 1977 after allegations of racial discrimination were made against FTI by the Fayetteville-Cumberland County Citizens Association.

The citizens association made the charges in 1976 and at that time also alleged that FTI was discriminating in its hiring practices.

HEW, however, found no basis for the allegations of discrimination in FTI recruitment and hiring practices.

Results of the investigation were released recently and FTI President Howard E. Boudreau said the school will

See FTI, Page 5-A

## FTI

From Page 1-A

submit a reply to HEW in about two weeks.

The Developmental Studies program has changed and expanded since the 1977 investigation and the picture has changed a great deal since then, Boudreau said.

He said he was surprised when he received the report because he thought the whole matter had been settled when FTI officials visited HEW offices in Atlanta in 1976.

"We will be documenting what has been done since 1977 and show how the Developmental Studies program has changed," Boudreau said.

The Developmental Studies program is a remedial program for students not academically qualified to enter the regular technical and vocational curriculum at the school.

The HEW report stated that because of the way the program was operated there were a disproportionate number of blacks enrolled.

Robert Beatty, coordinator for the Citizens Association, said his organization would like to work with the students and administration to get the problem solved.

He said the report will be discussed at a Feb. 3 membership meeting and that the organization intends to pursue the matter to see what can be done.

The report, covering fall 1972 to fall 1976 academic quarters, found that blacks were overrepresented in the remedial program for nine of the 17 quarters.

Thirty-nine percent of all black students enrolled at FTI were in the remedial program, while only 16 percent of the non-black students were in the same program.

During the 1977 on-site inspection, federal officials found that 28 percent of the total enrollment was black, but that 54 percent of the Developmental Studies students were black.

It was also found that 50 percent of the program's staff was black and that it was the

only department to be headed by a black.

No other FTI department at that time approached that percentage of black staff members, according to the report.

Boudreau and John McDaniels, FTI personnel director, took particular exception with that segment of the HEW report saying the department was never 50 percent black and is not now.

"This never was true," Boudreau said. He also said that the head of the remedial department was chosen because he was best qualified for the position, not because he was black.

The report stated that "this staffing pattern reinforces racial identifiability of the Developmental Studies program."

"The effect of the disproportionate representation of black students...is to limit their participation in those programs...which prepare students to participate more fully in the world of work."

There was also no indication that the program had any educational benefit. Tests given to students just prior to completing the remedial course showed no improvement over initial testing.

Also, none of the students sampled were able to exceed or meet test scores required for their chosen technical or vocational area.

In addition, other information showed that students in regular curricula were more likely to successfully complete a course than a student in the remedial program.

Boudreau said that although data was still being collected he was certain this was not the case.

"There is a misconception of what's going on" in the program, he said.

"Our whole purpose is to keep students until they successfully complete their course work," Boudreau said.

He also refuted HEW's mandate to tailor the remedial program to specific needs of students for particular

**WOMEN IN MANAGEMENT:** Fayetteville Technical Institute Society for the Advancement of Management offers a "Women in Management" seminar at 3 p.m. Wednesday in the FTI auditorium. Six Fayetteville businesswomen conduct panel discussion. Free to public.

**FRIDAY FILM CONNECTION:** "Love on the Run," a 1979 color film directed by Francois Truffaut, opens the spring Friday Film Connection series at 8 p.m. Friday, in Fayetteville Technical Institute's Cumberland Hall auditorium. The film is about Antoine Doinel, a 30-year-old novelist who is experiencing a mid-life crisis. Free. Sponsored by the Cumberland County Public Library and FTI.

**ART ANGLES:** Art Angles, a series of courses in applied art, art appreciation and crafts, begin this week at Fayetteville Technical Institute. Sponsored by FTI, the Fayetteville Museum of Art and Fayetteville Recreation Department. Information: 485-1395.

**FRIDAY FILM CONNECTION:** "8 1/2," a 1963 Academy Award winner for Best Foreign Film, is the Friday Film Connection at 8 p.m. Friday, Cumberland Hall Auditorium at Fayetteville Technical Institute. The black and white film is considered an autobiographical sketch of its director, Federico Fellini. Free. Sponsored by FTI and Cumberland County Public Library.

**ARTS AND CRAFTS:** Interior decorating, seasonal decorations, silk flowers and wall paper hanging are among a variety of arts and craft classes to be offered by the Fayetteville Recreation Department and Fayetteville Technical Institute, beginning next week.

**ADULT LIBRARY PROGRAMS:** Bordeaux Branch Library begins a course in applique and quilting from 9:30 a.m. to noon Monday; a class on seasonal decorations from 7 to 9 p.m. Wednesday; and a course on emergency first aid from 9:30 a.m. to noon Thursday. Courses taught through Fayetteville Technical Institute. Fee of \$5 for each. Information: 483-1425.

The beauty of stained glass in free form is shown in this work by Tom Benedict

Observer-Times Photos By Steve Aldridge

## Artist In A Wonderful World Of Color

By FRANCES HASTY  
Sunday Staff Writer

If you've seen baseball great Henry Aaron's first commercial for O'Henry candy, you've seen a sample of the work of Tom Benedict, film maker.

If you've seen the stained-glass dome in the Canton Station restaurant in the Durham area, you've seen a sample of the work of Tom Benedict, stained-glass artist.

Benedict can drop the names of Burt Reynolds, John Voight and Jim Mitchum as working acquaintances in the world of films or Dan Fenton of San Francisco, a distinguished stained-glass artist.

Benedict has just opened his own stained-glass studio in Fayetteville, East of Eden, in a unique partnership with his mother, Libby Benedict. She handles the supplies and tends to office details; he is the artist.

Before he got into stained glass, the young artist enjoyed a career in film making as cameraman and producer for "all kinds of films."

"Life was too fast, it wasn't art," he said. "I began just wanting to write for films, and I looked for something that would let me work at home and get into stained glass."

He worked with Reynolds, Voight, and Mitchum and did Hank Aaron's first commercial for O'Henry. "It was easy money," he said of the life, "but the

hours were ridiculous, and the politics were ridiculous. It was very political. I became very disillusioned. It was not an art form, it was a business."

Benedict began working with stained glass with George Goodyear in Atlanta, who at that time did not want apprentices. Benedict had to pay Goodyear in order to work with him; soon Goodyear was paying Benedict.

He continued studying at various studios to get experience. He just finished a master course with Dan Fenton of San Francisco. "Fenton is about as big as you can get in glass," Benedict said.

"He did change my life in a way. I thought stained glass was limited. He taught me there are no limitations. He showed me how to take stained glass and use it for anything I choose, to change texture and color if I want to. He showed me impossible cuts that only the old masters in Europe can do."

To obtain master status which he enjoys, "you work your way up," he said. "You have to be able to do certain pieces to prove yourself."

He is to the point that he has two apprentices working with him.

He is anxious to build a reputation as an artist and be collected by museums. "I want to do fine art, one-of-a-kind types of things. What makes it exciting is that it will go on several hundreds of years after my death. If it comes out on the market, people will be vying for it."

This oval scene will be the top of a coffee table

He does no work out of speculation, only on commission. With his work he gives a statement to authenticate his work, and he gets first right of refusal on his work if it should go on the market later. He also has first choice at repairing his work if it should get broken.

Stained glass, said Tom, is always worth more than the purchase price if it's done well. He offered some advice for anyone who may be in the market for stained glass. The bigger the pieces, the less artsy it is, he said. Collectors look for smaller pieces, intricacy of design, difficult and impossible cuts. A spiral, which Tom learned with Fenton, is one of the most difficult cuts.

Stained-glass work, contrary to belief, is fragile only if it's made by an inexperienced person, Benedict said. "Under normal conditions, there is no problem, only if it's severely abused."

He said that unlike some American artists, he plans the re-enforcement to disappear into the work.

The stained-glass artist works from a pattern made from a design which can take twice as much time as the actual work. Stained glass is a slow art form, he said. "The best part of creative ability is a short span. In creating a work of art, it may take six months to come up with a masterpiece."

The Canton Station dome, which has 1500 pieces and is 12 feet across, is the result of two months of straight work.

Although stained glass is probably best known in windows, it can be used for a wide range of items. "I can do anything in glass you can imagine—tissue boxes, jewelry boxes, bird cages," Tom said.

He puts it into table tops, teaming with a carpenter who carves the wood.

He has had some unusual requests. He has made a scene featuring an RCA "voice of the master" for a woman who collects that bit of nostalgia. The strangest was an order for a stained-glass casket. It

was not an impossible task, the artist said, but it would have been a costly project and the buyer changed his mind.

It's not restricted to traditional designs, either. Glistening in the morning sun was a jewel-like free form design of hundreds of dazzling bits of glass, showing the limitless imagination of the artist. In the design were not just pieces of precious glass but the delightful forms of cast-offs, even fragments from broken bottles.

It was in contrast to the oval scene nearby—a hummingbird hovering over a flower against a plush green background. This particular piece is awaiting installation as the top of a cocktail table.

Benedict will be teaching a basic beginner's course for hobbyists at Fayetteville Technical Institute beginning in January. Almost anyone can learn to do a little, he said.

It's an art that has its hazards, he cautions. It literally can be said that a stained-glass artist puts a little of his own blood into each project. He has the scars to prove it, and so does his mother who cut her hand severely enough to require stitches just in handling the stock.

It was of some small comfort to know that it was a very beautiful, unusual piece of glass that was the culprit. The Benedicts believe they have an unusual inventory of glass from well-known companies in Germany, France and England, which they were able to purchase in New York, thanks to contacts that Tom has established.

Tom Benedict has not given up his goal of writing for films. He will be pursuing that art form along with the stained glass.

"I want to write good movies, G-rated movies. The market is there, and they are always good money makers."

Remember the name. Chances are you'll be seeing it pop up in the movie theater or a museum some day. Maybe both.

Benedict and mother-partner, Libby Benedict

# FAYETTEVILLE TECHNICAL INSTITUTE'S On-Campus/Off-Campus/Fort Bragg/Winter Evening Curriculum Courses

Registration: Wednesday, Nov. 14, 1979 10 a.m. to 8 p.m. FTI CAMPUS, HORACE SISK GYM

**Cost:** In-state residents, \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$198.50). Payment of tuition and fees may be made by cash or personal check (in-state bank only). All fees must be paid at time of registration.

### REMINDER

Adult continuing Education Classes in High School Diploma, Adult Basic Education, Public Safety, General, Shop, Art & Crafts, Home Economics, will register from 6:00 - 8:00 p.m. on January 8, 1980 and January 9, 1980 at the following locations:

TUESDAY, JANUARY 8, 1980

DOUGLAS BYRD JR. HIGH  
HOPE MILLS JR. HIGH  
REID ROSS SR. HIGH  
WESTOVER JR. HIGH

WEDNESDAY, JANUARY 9, 1980

ARMSTRONG JR. HIGH  
DOUGLAS BYRD SR. HIGH  
E. E. SMITH SR. HIGH  
SPRING LAKE JR. HIGH  
WESTOVER SR. HIGH

**Transferability of Credits:** Programs and courses offered at FTI are designed to meet the immediate personal or career needs of the student concerned. All credits earned in off-campus programs of FTI are fully transferable into applicable on-campus Associate Degree or Diploma programs. Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution. **Service:** FTI is a Servicemen's Opportunity College (SOC). Army/Air Force tuition assistance is available to all qualified service personnel. Inquiries should be referred to appropriate military education center. Off-campus programs are not currently approved for VA benefits.

## FTI Trustee Questions Admission Policies

By PHYLLIS GAUGER  
Staff Writer

Fayetteville Technical Institute's policies for admitting students to its programs, criticized as discriminatory by the U. S. Department of Health, Education and Welfare, were questioned Monday by an FTI trustee.

Thomas Council, after hearing explanations from FTI President Howard Boudreau at a meeting of the FTI trustees, commented, "The point was whether all the black students were getting pushed into the (remedial) program. 'I don't think the program has the best image now. We need to tell people why it's needed.'"

The HEW Office of Civil Rights in a recent report contends that the percentage of black students in the remedial Developmental Studies program is higher than in the school as a whole.

percent of FTI's graduates have gone through the Developmental Studies program, which normally means going to school an extra year.

"Many of those would not have graduated, and many would not have been able to attend this institution," said Boudreau.

Under questioning from Council, Boudreau said a verbal and mathematical skills test is used to determine who goes into the remedial program. There is a cut-off score, said Boudreau.

Council said that "non-verbal skills" may allow a student to succeed in a vocational curriculum.

But Boudreau contended that trade skills, like brick-laying, require an ability to read plans and compute.

Council also asked why it seems that there are more black students in the remedial program than in other programs.

The proportion of black students in the remedial program fluctuates, answered Boudreau. In the school as a

whole, about 30 percent of the students are black, he said. But during the quarter scrutinized by HEW in 1977, 54 percent of the students in the remedial program were black.

"They come through our testing program, and this is how it shakes out," said Boudreau. "We don't care what color they are. If they come to the institution and want an education, we do the best we can."

Boudreau also refuted the HEW contention that half the faculty in the Developmental Studies program is black, which HEW said made the program "racially identifiable."

HEW, he said, had looked only at the English faculty. Of all the remedial program faculty, including math, science, and humanities, he said, 8.17 percent were black during a two-year period.

Michelle Busch Smith, the student trustee, said she had spent a school year in Developmental Studies and found it helped her brush up.

But, she said, "Some stu-

dents feel they are taking subjects they don't need. They feel they've got to take them to get into the course they want."

In a related matter, the trustees considered a proposed policy which would require students leaving high school with a certificate of completion to take Developmental Studies.

The students get certificates rather than diplomas if they fail to pass the state competency test.

The proposed policy says that the certificate students would not be allowed to enter a degree-level program at FTI before passing the competency test and getting a high school diploma.

Council and another trustee, Jimmy Harvey, questioned whether a student really needs to master the "basic skills" on the competency test before learning a trade like brick-laying or auto mechanics.

Both Boudreau argued that both those trades need advanced understanding of

manuals, plans and machinery.

If a person simply wants to learn the skill of bricklaying, he said, he can take one or two courses and learn the skill. But he cannot get an FTI diploma or degree without further study in other subjects, including humanities, and without having a high school diploma, Boudreau said.

The trustees tabled the policy on the certificate students for further comment.

### Snowball Fight Blamed in Death

HILLSBOROUGH (UPI) — An argument over the throwing of a snowball may have led to the killing of a University of North Carolina student who was shot to death on a downtown Chapel Hill street, a defense lawyer said Monday.

Attorney Mark Galloway, in a preliminary hearing for the man charged in the slaying, told a judge his client intended to frighten Jerry Keith Hodge, 24, of Waynesville, and not to kill him.

Chorale's Musical Sunday

SUNDAY - The Cumberland Chorale has chosen a program of sacred music, including excerpts from Dave Brubeck's "The Light In The Wilderness," for its second concert of the season Sunday at 3 p.m. at Fayetteville Technical Institute auditorium. Harlan Duenow directs and strings and woodwinds from the Fayetteville Symphony are accompanists. Use season membership tickets or purchase tickets at the door, \$3.50 for adults or \$2 for students and children.

7-2-14-80

**THE CUMBERLAND CHORALE**, accompanied by members of the Fayetteville Symphony Orchestra, performs in concert at 3 p.m. Sunday at Cumberland Hall Auditorium on the campus of Fayetteville Technical Institute. The program includes "The Light in the Wilderness" by Dave Brubeck and "Vesperae Solemnes de Confessore" by Mozart. Admission at the door is \$3.50 for adults, \$2 for students and children. For information: 485-6727 or 864-3907.

7-2-14-80

**SACRED MUSIC:** The Cumberland Chorale, accompanied by members of the Fayetteville Symphony Orchestra, perform in concert at 3 p.m. Sunday at Cumberland Hall Auditorium, campus of Fayetteville Technical Institute. Program includes "The Light in the Wilderness" by Dave Brubeck and "Vesperae Solemnes de Confessore" by Mozart. Admission at the door is \$3.50 for adults, \$2 for students and children. Information: 485-6727 or 864-3907.

By SPEC. 5 DENISE  
DUDLEY

FOOD SERVICE - Fayetteville Technical Institute (FTI) will be conducting registration for the spring quarter food service classes today and tomorrow from 8:30 to 11:30 a.m. and 1 to 4 p.m. at the FTI/Fort Bragg office, located in building 42, VOC-TECH area on Varsity Road off Butler Road. Army tuition assistance forms may be obtained at the FTI/Fort Bragg office. For more information call 497-1112.

**SACRED MUSIC:** The Cumberland Chorale, accompanied by members of the Fayetteville Symphony Orchestra, perform in concert at 3 p.m. Sunday at Cumberland Hall Auditorium, campus of Fayetteville Technical Institute. Program includes "The Light in the Wilderness" by Dave Brubeck and "Vesperae Solemnes de Confessore" by Mozart. Admission at the door is \$3.50 for adults, \$2 for students and children. Information: 485-6727 or 864-3907.

PERSONS interested in energy conservation are invited to attend a meeting of the Solar Energy Association today at 7:30 p.m. in room 214 at Fayetteville Technical Institute.  
0-2/8/80

**FRIDAY FILM CONNECTION:** "8 1/2," a 1963 Academy Award winner for Best Foreign Film, is the Friday Film Connection at 8 p.m. today, Cumberland Hall Auditorium at Fayetteville Technical Institute. The black and white film is considered an autobiographical sketch of its director, Federico Fellini. Free. Sponsored by FTI and Cumberland County Public Library.  
7-2/1/80

Auditorium on the campus of Fayetteville Technical Institute. The program includes "The Light in the Wilderness" by Dave Brubeck and "Vesperae Solemnes de Confessore" by Mozart. Admission at the door is \$3.50 for adults, \$2 for students and children. For information: 485-6727 or 864-3907.  
7-2/15/80

**FRIDAY FILM CONNECTION:** "Medium Cool," a color film directed by Haskell Wexler, is the Friday Film Connection at 8 p.m. Friday, Cumberland Hall Auditorium, Fayetteville Technical Institute campus. The film is a romantic documentary about a callous TV news cameraman and young Appalachian mother in 1969. Sponsored by FTI and Friends of the Cumberland County Public Library. Free.  
7-2-12-80

**BASKETBALL CONTEST:** A basketball contest for boys and girls, ages 9 to 18, begins at 1 p.m. Saturday at Fayetteville Technical Institute's gym. Co-sponsored by the Fayetteville Recreation and Parks Department and the Pepsi-Cola Bottling Co. Information: 484-5174 between 1 and 5 p.m.  
7-2/20/80

FRIENDS OF THE LIBRARY  
FAYETTEVILLE TECHNICAL INSTITUTE

**8 p.m - F.T.I. Auditorium**

January 18  
**LOVE ON THE RUN**  
Antoine Doinel (Jean-Pierre L aud), a familiar protagonist in Truffaut films, is now in his thirties and writing his second novel. His no-fault divorce has just become final, and he is having a new affair. Claimed to be the last in the Doinel cycle, the film is a retrospective largely comprised of clips from 400 Blows (1959), ANTOINETTE AND COLETTE (1962), STOLEN KISSES (1968), and BED AND BOARD (1970).  
1979 Color 93 min. French Directed by Francois Truffaut

February 1  
**8 1/2**  
About this Academy Award winning Best Foreign Film, Fellini said, "I began with the idea of a man retreating from reality, and I wound up with a picture about a man confronting half a dozen different problems at once...I didn't expect to be quite so autobiographical...I said, 'Let's make the hero a movie director, like me,' and everything fell into place. Never have I had so easy a time with a picture...this picture has set me free."  
1963 B & W 135 min. Italian Directed by Federico Fellini

February 15  
**MEDIUM COOL**  
Wexler, one of Hollywood's most talented cameramen, wanted this film to be a wedding between a romantic feature and cinema verite. His screenplay--a romance between a callous TV news cameraman and a young Appalachian mother--utilizes actual events from the spring and summer of 1968. "An angry, technically brilliant movie of tremendous visual impact--a picture of America exploding into fragmented bits of hostility, suspicion, fear and violence." --N.Y. Times  
1969 Color 110 min. English Directed by Haskell Wexler

February 29  
**SPIRIT OF THE BEEHIVE**  
This beautifully filmed award-winner--Eric's first feature--stars tiny Ana Torrent, quite possibly the most striking child ever on film. A portrait of the isolation of the individual within the family, this film is a memorable one. "Not since Rene Clement's FORBIDDEN GAMES has a film so piercingly described a child's fierce, fragile hold on survival through the exercise of her imagination." --Newsweek  
1974 Color 96 min. Spanish Directed by Victor Erice

March 14  
**MOTHER KUSTERS GOES TO HEAVEN**  
A factory worker goes berserk one day, killing the boss' son and then himself. His widow tries to make sense out of her husband's seemingly pointless act, but her quest leads her on a fruitless journey through some of the more ludicrous arenas of yellow journalism and left-wing politics. The film describes movingly one woman's achievement of grace in a world where the line between journalism, show biz, crime and politics has become blurred.  
1978 Color 108 min. German Directed by Rainer Fassbinder

Sponsored by the Friends of the Cumberland County Public Library and Fayetteville Technical Institute. This project is supported by the Grassroots Arts Program of the North Carolina Arts Council, a state agency. The Cumberland County Grassroots Arts Fund is administered by the Arts Council of Fayetteville.

January 15, 1980

Dear Fellow Educator:

Fayetteville Technical Institute is continuing its effort to make available Drug Awareness Education classes to all employees of the Fayetteville and Cumberland County School Systems and to interested and concerned individuals in the Greater Fayetteville Area.

I am pleased to announce that we have again scheduled this very unique class for the Winter Quarter, and would like to take this opportunity to invite you to participate with us.

You should note that this class will meet on Mondays and Wednesdays, February 4, 6, 11, and 13, from 7:00 p.m. to 9:30 p.m. in the Fayetteville Technical Institute Auditorium.

To register, simply complete the attached registration form and return it to me, with a \$5.00 in-state check or money order made payable to Fayetteville Technical Institute. Due to the extreme popularity of this course, class size may be limited. Therefore, it is requested that you return this registration form to me no later than January 25, 1980.

Sincerely,  
*Charles Koonce*

## A Lesson In Living Life

By GRANT VOSBURGH

The dull rumble reverberates against the walls of the concrete-block building. It is mid-morning. The All-American bowling lanes are quiet.

All except Lane 1. There, Sandy Washington and her coach and confidant, Willie Edwards, carefully study the roll of the bowling ball as it moves down the alley.

"That's it," Miss Washington whispers anxiously. "Uh-huh. That's the one."  
"Looking good!" cries Edwards, standing just over her shoulder. "C'mon baby, roll!"

The ball slides to the right and enters between Pins 1 and 3. Thud. The 3 falls back into the 8 and 9, while the 1 leans toward the other side, striking the 2, 4 and 5. More thuds.

The domino theory comes to a stop. Only the 10th pin remains. It wobbles and teeters, but rights itself at the last moment.

"Ah, man!" Edwards moans. "That one pin is haunting you today."  
Miss Washington sets her jaw firm. "I'll pick up the spare," she vows.

Sandy Washington, not unlike anybody else, has lost a few battles during her 19 years — the most significant occurring while she was still in the womb. She was left severely deformed at birth. Today, her right leg is artificial from the thigh down. She has no arms. Nearly two decades later, doctors are still looking for the cause. "It's possible that it was thalidomide," her father, George, says.

"That's a possibility, but they're just not sure." So, yes, Miss Washington has lost a battle or two. She'll admit that. But she's won the overall fight — overwhelmingly.

A fight to better the odds.  
A fight to be accepted by her peers.  
A fight to enjoy life.  
"I realized from friends and family," she says, "that I could do anything I wanted to do."

The bowler's been sitting on the floor during the first few frames. Now she takes a seat in a chair stationed at the end line.

Edwards brings her a ball and places it at her feet.

The rubber-soled shoe on her right foot lines up the shot, like a scope on a rifle. She aims slightly to the left of the alley.

"I play for a hook to the right," she explains, beaming.

Her eyes are fixed on the pins. The smile vanishes and a stern look of concentration takes its place. She is ready.

She places her left foot — she's discarded her shoe and a white athletic sock serves as her glove — behind the ball and pushes. As the ball creeps along the boards, Miss Washington's eyes dance and, like any good bowler, she leans this way and that to add body English.

But this ball is gutter-bound.  
"I'm not concentrating," she says.  
"That's the most important thing. I once bowled 86. But I won't do that today. I'm not concentrating."

Sandy Washington's watching a new

portable color TV these days. She won it after competing in the 1979 Cystic Fibrosis Bowl For Breath, held two weeks ago at the All-American Lanes. Her three-game score of 136 wasn't the highest, but she had solicited the most sponsors — 136. Each pledged a penny for every pin the bowler knocked down.

Miss Washington raised \$185 for Cystic Fibrosis.

"I wanted to help," she says. "I'm lucky. I can breathe just fine."

Sandy Washington's like that. She's a helper.

As a volunteer Candy Striper at Womack Hospital. As athletic team manager during her high school days at Westover. As a teacher's aide for elementary classes during summer sessions.

She's now enrolled at Fayetteville Tech. There, she plans to study psychology and sociology.

"I want to be a social worker," she says. "I want to work with children."

The rumbling resumes.

"I don't know about that one."  
Sandy Washington hardly moves her lips as she watches that all-important second ball roll toward the one remaining pin.

"I need this spare," she pleads.  
But the ball slides past, inches away from its destination.

"Oh well," says Edwards, "you can't win them all."

True. But Sandy Washington comes close.

Sandy Washington Carefully Watches The Path Of The Bowling Ball

A Near Strike Sends Edwards And Miss Washington Into A Frenzy

# 'Infamous Love': Innovative, Appealing

A Review

By TOM LASSITER  
Times People Editor

A standing-room-only audience that braved a cold, dreary night was treated to a rich experience in words and music Friday at Fayetteville Technical Institute's Cumberland Hall.

The event was the world premiere of "Infamous Love," a dramatic capsule history of the affair between composer Frederic Chopin and novelist George Sand.

"Infamous Love" was conceived and produced by Fayetteville residents Rita Mitchell and Joann MacMillan, owners of the talent agency ACCLAIM!. The events and dialogue are grounded in the journals and biographies of the characters, and the music is, of course, Chopin's.

Starring as the prolific Polish composer was Fayetteville Tech's Visiting Artist Stephen Hunter. Actress Bo Thorp starred as Sand, the brilliant and rebellious French woman who stooped to taking a man's pen name to achieve acceptance for her work. Lee Yopp of the Ft. Bragg Playhouse directed.

Described in program notes as a "work in progress," the billing of "Infamous Love" as a world premiere was by no means pretentious. "Infamous Love" possesses qualities of sophistication and appeal that should assure its eventual production wherever insightfully, innovative musical theater is enjoyed.

"Infamous Love" is structured in six

parts performed like symphonic movements. Part One is an introduction, with the following segments building upon the first until the story is told. Through it all is Chopin's music, at times providing a background for Sand's words, and at other times providing the dramatic focus.

Part One outlines Sand's views on women's equality in all facets of life, including sex, which scandalized Europe of the middle 1800s. In turn, Sand's affair with Chopin, six years her junior, was indeed a relationship of passion. Yet beneath the passion was a true love for the genius composer.

"Infamous Love" explores both sides of Sand's affair with Chopin, with mood shifts occurring between each part.

At times Sand's speeches are steamy with lust, only to segue into a comedic part where Ms. Thorp plays Sand with the giddiness of a young girl experiencing first love.

One part paints musical portraits of the Parisian society where Chopin held court for lovely women, and another explores a sad, sickly period in the composer's life when he and Sand wintered on the island of Majorca.

The mood turns somber when Chopin is portrayed brooding about his mortality. Sand's well-chosen speeches show deep concern for her love, who plays only the brooding "Funeral March."

Emotion peaks in the final part in which Chopin's frail health can take no more. Hunter's playing is most sensitive as he interprets the passion the composer

felt for his Polish homeland, his music and his lover.

And Ms. Thorp's portrayal of Sand is most moving in the final segment, in which she manages the difficult task of displaying anguish in losing Chopin to death, and joy in having loved him.

"Infamous Love" is a well-conceived and well-executed piece of theater. The collaborators wisely selected words that mate perfectly with the moods of

Chopin's expressive music. Or did they match music to words?

No matter. "Infamous Love" as seen Friday night is a "work in progress" that should progress far beyond Fayetteville. And it cannot be produced again here too soon.

"Infamous Love" was presented at no charge to the audience, with expenses underwritten by a grant from Kentucky Fried Chicken of Fayetteville.

Stephen Hunter (left) portrays composer Frederic Chopin and Bo Thorp is novelist George Sand in "Infamous Love."

#### DERSU UZALA

Filed entirely on location, this winner of the 1975 Academy Award for Best Foreign Film portrays the efforts of Russian soldiers to chart the vast wilderness of Siberia. During their expedition, the soldiers meet Dersu Uzala; he becomes their guide and through his knowledge of the wilderness and his communication with nature saves the men from destruction. "An awesome portrait of man and nature." --Newsweek 1975 Color 127 min. Japanese/Russian Directed by Akira Kurosawa

April 11

#### STAVISKY

Resnais and screenwriter Jorge Semprun (2 and LA GUERRE EST FINIE) once again combine their talents. "An exquisite recounting of the climactic days in 1933 of the career of the con man turned international financier whose ruin resulted in political scandal and in his own mysterious death." --N.Y. Times 1974 Color 117 min. French Directed by Alain Resnais

April 25

#### MANHATTAN

Woody Allen focuses on the hang-ups of the upper-middle-class in New York City. Diane Keaton, Muriel Hemingway and Meryl Streep co-star. "Allen proceeds by giant strides; this film is even funnier than ANNIE HALL, even more serious in its comedy than INVERTED ORS." --New Yorker 1979 B & W 98 min. American Directed by Woody Allen

May 9

#### CLOSELY WATCHED TRAINS

Set in a small Czechoslovakian town during World War II, the story revolves around a young man coping with his growing sexuality. An accomplished film--the first by Menzel, the youngest of the Czech New Wave--distinguished by its wry sense of irony and its ability to switch from a comic framework into tragedy. Winner of the 1966 Academy Award for Best Foreign Film. 1966 B & W 80 min. Czech Directed by Jiri Menzel

May 23

#### THE PAWNBROKER

Mad Stalger gives one of the screen's great acting performances as pawnbroker Sol Nazerman, a man so embittered by his past experiences in a German concentration camp where his wife and children died that he has been left devoid of all human emotion. Punctuated by Resnais-styled flashbacks, the film is a powerful, frequently harrowing experience and among the major works of the contemporary American cinema. Directed by Sidney Lumet 1964 B & W 114 min. American

Sponsored by the Friends of the Cumberland County Public Library and Fayetteville Technical Institute. This project is supported by the Charlotte Arts Program of the North Carolina Arts Council, a state agency. The Cumberland County Charlotte Arts Fund is administered by the Arts Council of Fayetteville.

## Education Forum Slated

The heads of Fayetteville's colleges and university will

participate in the Committee of 100's forum on higher education Tuesday at 7:30 p.m. in the Fayetteville Technical Institute auditorium.

Dr. Charles Lyons Jr., chancellor of Fayetteville State University, Dr. Richard Pearce, president of Methodist College, Howard Boudreau, president of FTI, and Dr. William A. Edmundson, director of education for Fort Bragg, will participate on the education panel to discuss the needs and offerings of higher education in the community.

Earlier forums before the Committee of 100 have mentioned the role of higher ed-

ucation in revitalizing Fayetteville and improving the local community.

Upgrading Fayetteville State into a major regional university was cited by Dean Henry Kamphoefner in the Committee of 100's last forum as the "number one issue" facing the Fayetteville community.

Kamphoefner helped launch the Committee of 100 when he was visiting and lecturing here in 1977 as Fayetteville's first humanist in residence.

The public is invited to participate in the forum's discussion of higher education in the community.

## Musical Notes

### Cumberland Choral In Concert

Director Harlan Duenow has chosen a program of sacred music for a concert Sunday by the Cumberland Choral at Fayetteville Technical Institute Auditorium at 3 p.m. The choral will be accompanied by members of the Fayetteville Symphony.

Program selections will include "The Sermon On The Mount" from the oratorio "The Light In The Wilderness" by Dave Brubeck and Mozart's "Vesperae Solemnnes de Confessore." Brubeck's "Forty Days" as well as "Awake The Trumpet's Lofty Sound" by Handel, McAfee's "A Canticle Of Praise" and Franz Shuetky's "Send Forth Thy Spirit" will round out the concert.

Admission cost at the door is \$3.50 for adults, \$2 for students and children. More information can be obtained by calling 485-6727 or 864-3907.

Members of the Cumberland Choral are:

•Sopranos: Marilyn Morris, Sharon McNair, Lois Anne Adams, Ruby McLeod, Marjie Himon, Joan Cook, Geneva Williford, and Jan Housley.

•Tenors: Charles Stevens, George Meleleu, Pat O'Brian, Neil Davis, and David Rochelle.

•Altos: Pattie Hasty, Gerleta Vestal, Helen Leggett, Jane Sutherland, Susan Stevens, Kay Sibley, Nannie Smith, and Joyce Lipe.

•Basses: Frank Horton, Bryan Miller, Bill Wright, Ken Koonce, Jim Brown, Dwight Housley, and H.B. Hight.

## films

USO: "Hell Is For Heroes," starring Steve McQueen, shows at 7 p.m. Saturday and Sunday at the USO, 333 Ray Avenue. Free to military, dependents and guests.

FRIDAY FILM CONNECTION: "Spirit Of The Beehive," a 1974 film by Spanish director Victor Erice, is the Friday Film Connection at 8 p.m. Friday, Cumberland Hall at Fayetteville Technical Institute. The play gives a piercing look at a child's fight for survival through imagination. Free. Sponsored by the Cumberland County Public Library and FTI.

## Dental Health Week begins Sunday

A national proclamation was signed recently designating Feb. 3-9 National Children's Dental Health Week. Locally, Col. Tom Boe, 317th Combat Support Group commander, signed a similar document Jan. 8 to declare dental health week here.

During the week, students from Pope's elementary school will learn techniques of dental care from members of the base dental clinic.

The first day, the dental clinic will make a presentation to the third grade classes. The skit is entitled "If I Had My Own Teeth."

Wednesday, the children will be briefed on how to prevent dental diseases, know what they are and become more familiar with dental hygiene. After the instruction period, the children

will be given a test on what they learned. This test consists of giving each child a disclosing tablet, which stains the teeth red in those areas where plaque is present. The child can brush until the red is gone, thus removing the plaque.

This session will be taught by senior dental hygiene students from Fayetteville Technical Institute. Each child completing the test will receive a certificate and a card from "Ronald McDonald" authorizing them a free hamburger.

Children in the child care center will receive information on the importance of brushing and flossing their teeth Thursday. The dental clinic will instruct this class also.

The week will end with a visit from "Ronald McDonald." Ronald is scheduled to perform numerous magic tricks before the elementary school students. Afterwards, they can ask the dental staff questions concerning their teeth.

### Rose Pruning Clinic Saturday

The Fayetteville Rose Society will conduct a rose pruning clinic at 9:30 a.m. Saturday at the Fayetteville Rose Garden on the campus of Fayetteville Technical Institute. The proper way to plant a rose bush will also be demonstrated. Mrs. Elliot Harris, chairman of the Rose Society's rose garden committee, will lead the workshop.

The society annually takes on the task of pruning the 840 rose bushes in the Fayetteville Rose Garden.

In case of rain, the clinic will be conducted on Saturday, March 1.

Staff Photo — DICK BLOUNT

Doris Harris will lead a rose pruning class at FTI next Saturday

### Letter To The Editor

## Defending FTI's Remedial Program

To the Editor:

I would like to defend the position taken by Fayetteville Technical Institute and President Howard Boudreau on the questionable issue of discrimination against black students in the Developmental Studies program.

Your article of Feb. 5th did not go far enough to afford us readers an opportunity to draw a reasonable conclusion on this issue. It does not address the success of the program at any length since it was instituted in the fall of 1966. Why did your staff writer not research FTI records for additional information? She would have found that there are a number of us, who are the products of the program, feel quite different than do some of the critics. We who were deficient in basic education skills, thanks to our own public education system, can appreciate what FTI is doing to help those who want to help themselves educationally. I would say to those students who are now in the program, "take every advantage of all opportunities for a better education." Without that opportunity given me by Fayetteville Tech, I would not be graduating from N.C. State University in May with a Masters Degree in Education.

I would also ask those who are critical of

Library at Fayetteville Technical Institute

the program to take a close look at what it has done to help so many become educationally successful. The Developmental Studies program at FTI has permitted initially academically unprepared students to achieve successful roles in our society that could not have been possible otherwise. Graduates of the program have gone on to graduate from two and four-year educational institutions, some have been successful in graduate work as well. Some developmental graduates have gone on to become teachers, administrators, and managers of educational and business institutions.

The one aspect of this article that alienates me most is the charge of color discrimination. Education has no prerequisites of color. The color of our skin does not keep us from

learning. It has been my observation that if HEW cannot explain a sociological phenomenon they have a tendency to label it discrimination. Why must our governmental agencies continue to exploit our own black citizen situation to justify their own existence?

It would be interesting to know how many readers agree that the article itself is taking advantage of the color issue. It appears to me that had your staff writer spent a little time researching all the facts of this issue, the readers could judge the merits of the Developmental Studies program for themselves. I also feel that literature skills encompasses more than just printing the opinions of and statements by people remotely knowledgeable of an issue or event.

CHARLIE MARTIN

## FSU Associates Feel Questionnaire Unfair

By PHYLLIS GAUGER  
Staff Writer

Persons associated with Fayetteville State University said Tuesday they were upset with a Committee of 100 questionnaire that they felt might elicit information critical of FSU.

The questionnaire was distributed to those who came to a forum on the role of higher education in Cumberland County, sponsored by the Committee of 100. The committee is a loosely structured citizens' group that seeks to air various issues.

The questionnaire asks respondents to grade local education institutions on their relationship with the local community, service to the local community, attempts to desegregate and quality of programs.

But those who put the questionnaire together said they had had no intention of gathering data to hurt the image of any one institution.

The intent, said Bill Pollitt, chairman of the Committee of 100, was to gather information to allow the committee to decide on topics for future forums on higher education.

The discussion of the questionnaire erupted at the end of the forum, at which the heads of FSU, Methodist College, Fayetteville Technical Institute and the Army Education Center at Fort Bragg had been talking about issues affecting higher education such as declining enrollments.

At the forum, no direct mention was made of the most recent Committee of 100 meeting at which Henry Kampfoefner, Fayetteville's former humanist-in-residence and originator of the Committee of 100, strongly criticized Fayetteville State University.

Many of the several hundred persons attending Tuesday's forum were Fayetteville State employees or supporters.

William T. Brown, an FSU trustee, was the first to complain about the questionnaire. He said that respondents should not be expected to grade institutions on things like desegregation and quality of programs if the respondent had not had an opportunity to observe the institution.

Low ratings based on something "not observed," he said, "could further damage the image of Fayetteville State University."

Jeanette Council, a member of the Friends of FSU, a booster group, pointed out that a Methodist College professor, Dr. John Sill, was on the committee that drew up the questionnaire.

"I wonder if this could not be perceived to be

a disservice to the other institutions here (beside Methodist College)," she said.

She suggested that the questionnaire be abandoned. "I think it will do more harm than good. If you don't know about it (a local institution), maybe you can't feel good about it," she said.

Denny Shaffer, of the Committee of 100, chastised the group. He referred to an earlier discussion in which Dr. Charles Lyons Jr., chancellor of FSU, had called on the community to "dream great dreams" to help pull the future of FSU as a regional university into focus.

"It is impossible to dream great dreams while you're paranoid," said Shaffer. "It's a contradiction of ideas. If anybody leaves here feeling there is some sort of plot afoot, that's the worst possible ending."

Those who organized the forum suggested that respondents not fill out the questionnaire, but instead submit suggestions for future forum topics.

In the main body of the forum, the heads of the institutions identified need for more money as one of their most critical problems.

Howard Boudreau, president of FTI, said the technical institute needs to replace aging 18-year-old equipment to keep up with equipment business and industry are now using.

Richard Pearce, president of Methodist College, said Methodist has been forced to raise tuition to meet rising costs.

Lyons cited shortages in personnel, equipment, and up-to-date facilities at FSU.

Pearce also said that Methodist College would like to set up a nursing degree program, and would do so if its offer to give land to build a hospital next to the college were accepted.

Community leaders are now discussing a possible downtown location for a proposed replacement for Highsmith-Rainey Memorial Hospital.

Lyons, who said that "this kind of forum and interaction will provide some of the impetus" for FSU to plan for broadening its services into things like doctoral programs, invited the Committee of 100 to hold its next higher education forum on the campus of FSU.

"This is an opportunity to dream great dreams," said Shaffer. "Let me propose that a great dream would be to have Fayetteville State University be the star of the consolidated

(See QUESTIONNAIRE, Page 2B)

(Continued from Page 1B)

(University of North Carolina) system, known throughout the country."

Lyons responded, "Once we have all caught the spirit of the dream, we can get involved in it, planning together. We can put together the mechanisms. But the first thing is, let's dream the dream."

## Firms Basically Laud FTI Efforts

By PHYLLIS GAUGER  
Staff Writer

Local businesses, industries and institutions seem happy with the training their employees get at Fayetteville Technical Institute. But they have some suggestions for more programs.

A survey of 300 local businesses, industries and institutions yielded that information, reported Dr. Linwood Powell, associate dean of instruction, to the FTI trustees this week.

The trustees appeared satisfied with the results. David Wilson, a trustee who had ur-

ged that the study be made, commented, "One of my concerns was the large amount of time this board has spent discussing what the real role of this school is."

"This survey indicates that what we are doing is not at all at odds with what the community thinks we should be doing."

"There were no adverse comments in any survey form," said Powell. "The concerns were about additional programs."

As a result of the suggestions for additional programs, some are being considered,

particularly one for training secretaries for medical offices, said Powell.

This is the second time FTI has surveyed local businesses about their manpower needs. The first time was in 1969 when less than 800 students were enrolled in curriculum programs.

Now FTI has more than 4,000 students in curriculum programs, according to the survey report.

One survey question addressed a topic which has been under discussion lately: whether the proper role of a technical institute is to offer "general education" courses which in some cases might compete with humanities courses offered by other higher education institutions in the area.

Ninety-one percent of those surveyed said they feel FTI should continue to offer general education courses.

One hundred percent said they thought FTI should continue to offer vocational and technical training.

Powell told the trustees that 56 percent of the surveys had been returned, a rate he considers quite high "for this type of survey."

The employers who responded employ about 18 percent of the civilian labor force in Cumberland County, Powell said. "It's a pretty good representation of business and industry in Cumberland County," he said.

Of those 12,187 employees, 993 were trained at FTI, said Powell. The employers also indicated that they would need 821 more FTI graduates in the next five years. Of those, 249 would be in health care fields.

Powell listed several of the programs that the respondents had suggested for adding to the curriculum. Many of them, he said, were offered in other parts of the state community college system.

These included operating heavy equipment, facilities engineering, equipment mechanics, electromechanics and medical office assistant.

Others that are not offered which were suggested are well-drilling, theological training and social work, said Powell.

Powell said the staff believes the medical office assistant program is one which is needed here, and is investigating the matter further.

"The high rate of return seems to mean a very positive attitude that people have toward the institution," Powell said.

## Attend This Public Forum

At least some of the faculty of Fayetteville State University have complained to reporters about the administration of that institution. More than two-thirds of the staff have rallied to support that administration to the extent of signing their names to advertisements to that effect. If you want to find out something for yourself about the state of higher education in Urban Fayetteville, not only at FSU but on other campuses, turn out Tuesday, February 19, at 7:30 p.m. in the auditorium of Fayetteville Technical Institute on Hull Road. The

"Committee of 100," a citizens action group, is sponsoring a most useful public forum featuring the top officials of FSU, of Methodist College, and of FTI. No holds barred, and the topic is broad, "The Role and Status of Higher Education in Fayetteville and Cumberland County." There is no more important public issue than the use, enhancement, needs, problems, and opportunities of the area's higher educational resources. The public forum is a lively, open, and effective way to learn, to plan, to make progress. Try it. You'll like it.

## FTI Remedial Class Gave Me Chance

EDITOR:

I feel compelled to reply to the article by Ms. Froberg which details the charges of racial bias issued against FTI and its Developmental Studies Program made by HEW.

My opinions are based upon nine months of exposure to the program and not the two days allocated by investigators of HEW's Office of Civil Rights. Further, I would hope your readership caught the time intervals involved in this study. Two days to investigate in 1977, two years to issue a report in late 1979! So little research and so much bureaucracy!

As for the specific charges made by HEW, I can sincerely state they are unfounded.

The admission tests were fairly administered to all of us who sought admission to FTI in 1978.

Students are assigned to the Developmental Studies Program based upon their test scores.

These scores do not reflect race, sex or

religion, only the ability to gather, understand and distribute information.

Whether we like it or not, the language of this county, state and country is predominantly English. If a student is unable to communicate, how can he or she be expected to learn and, more importantly, how can the faculty be expected to teach?

I feel the key to the problem is not the fact that FTI has a remedial program for substandard students, but rather that some students lack the necessary motivation to rise above mediocrity.

Their first 12 years of education were filled with "social promotions" and marginal effort. Whether it was their parents, teachers, school administrators or themselves, the fact still remains that they graduated with substandard skills.

Then, for the first time, faced with some semblance of educational standards through admission testing — and found to be deficient — these students are forced to either learn reasonable skills or seek education elsewhere.

Unfortunately, there are apparently

some students who would elect a third option and claim racial bias despite the fact that all entering students must take the admission test, regardless of race, sex or religion.

As stated, I am not a casual observer in this issue. I arrived at FTI ill-prepared to pursue a course of higher education. I was fairly tested and determined to be deficient in English, Reading and Mathematics.

As a result, I spent nine months in the Developmental Studies program.

More importantly, I am now a graduating student who, in 1980, has been on the President's List for six consecutive quarters with an average of 3.6 or better. For two quarters after the remedial program, my average was "straight A" or 4.0!

I wanted to succeed and FTI's Developmental Studies Program gave me that chance.

ROBERT C. HORVATH, II  
Fayetteville

7/0 2-24-80

## FTI Audit Problems Unresolved

By ROSE ANN FROBERG  
Sunday Staff Writer

Fayetteville Technical Institute's 1978-79 state audit recommends it come to some agreement with Fayetteville City Schools about FTI's 1977 purchase of the Horace Sisk Building from the school system.

The state auditors also suggested the school discuss where a salary for a facilities engineer should come from with the Department of Community Colleges.

FTI is paying the engineer from state funds, however the auditors said his duties directly relate to plant construction therefore his salary should come from Cumberland County.

FTI finance officer William Standley said the matter is being discussed but no decision has been reached by the Department of Community Colleges.

The problem of payment for the Sisk Building has been going on since 1977 when the city schools sold it to FTI.

A \$3,169,897 payment was made by the Cumberland County Manager's Office by transferring funds from the FTI bond funds to the city schools account — a payment which FTI says was \$34,547 too much.

FTI attorney Stacey Weaver said Friday that FTI

(See FTI AUDIT, Page 3B)

## FTI Audit

(Continued from Page 1B)

made a \$3,135,350 offer which the school assumed was accepted, but when funds were transferred the price increased by \$34,547 to the \$3,169,897 figure.

The price discrepancy developed because of the amount of land FTI thought it was buying versus the amount of land the city schools thought they were selling, Weaver said.

FTI's offer was only for the building and the useable land, excluding the streets which are rights of way for public use, he said.

However, the county value on the building and land included the streets and that's where the \$34,547 difference came in, Weaver said.

He said he instructed the county to deduct that amount when the funds were transferred but they never were.

FTI has requested the error be corrected and county attorney Heman Clark said he

wants it resolved before the next budget year.

Clark said the problem has also been cited by auditors in the county budget.

The problem is twofold, he said. First, the budgets have been so tight that the county has not been able to make the adjustment, and second, both the FTI attorney and the city schools attorney, James R. Nance Jr., are adamant in their positions.

The school system thought the street acreage was included, which was the higher figure, Clark said.

"There was a difference in understanding on both sides and it resulted in the payment of the higher figure," Clark said.

He said he wants to get both attorneys together to see if something can be worked out otherwise it may have to be taken to court for a judicial decision.

Nance was out of town and could not be reached for comment about the city schools position on the matter.

**WOMEN'S CONFERENCE:** The Governor's Conference on Leadership Development for Women is set for Saturday at Fayetteville Technical Institute. Registration is from 8:30 to 9 a.m. in the auditorium. Conference to include 11 workshops on subjects ranging from assertiveness training to dressing for success. Fee of \$8. Information: Phyllis Melton, 2025 Raeford Road, Fayetteville, N.C. 28303 7/3/80

**FOLK MUSIC:** Michael Thompson, visiting artist at Wilson Technical Institute, Wilson, performs at 8 p.m. Friday at the Small House in Clinton. Free to public. Thompson plays guitar, banjo and dobro. 7/3/80

Spectators At The Committee Of 100 Meeting Listen To Presentation

## Decline In Enrollments Facing Colleges In Area, Forum Is Told

By BILL HANCOCK  
Of The Times Staff

Leaders of four Fayetteville-area college-level institutions said Tuesday night the end of the post-war "baby boom" in America could mean fewer students will be attending area colleges in the 1980s.

"The declining pool of students is a reality," said Richard Pearce, president of Methodist College.

Pearce was part of a four-member panel of educators participating in a forum on higher education at Fayetteville Technical Institute.

Others on the panel included Charles Lyons, chancellor at Fayetteville State University; Howard Boudreau, president of Fayetteville Technical Institute, and William Edmundson, director of the Army Education Center at Ft. Bragg.

About 100 people attended the forum, which was sponsored by the Fayetteville Committee of 100, an organization of local residents which provides a community forum for current issues in the city.

Pearce said the declining pool of students was "a serious problem...But the real question is not how many students

start the first grade, but how many go through college."

The Methodist College president said one out of every three students drop out of high school.

"There's a great future for us if we can eliminate the dropout rate," said Pearce.

Lyons said the declining pool of students "will sort of stabilize and level off around 1985."

Lyons said even the nation's most prestigious institutions "are beginning to

See FORUM, Page 7-B

## Forum

From Page 1-B

take a new look at older citizens" as students.

However, Boudreau said FTI does not foresee a drop in its student enrollment in the years ahead.

"The community colleges are the only institutions with projected growths over the next 10 years or so," he said. FTI is one of 58 community colleges in the state.

The four administrators spent more

than two hours discussing the problems and needs of Fayetteville's institutions of higher learning.

Inflation and a need for money are the major problems facing both Methodist College and FSU, their administrators said.

Boudreau told the audience that FTI has an urgent need to upgrade some of its equipment, of which many items are 18 years old or more.

## 'Infamous Love' To Be Staged Again

The Rita Mitchell-Joann McMillan original play, "Infamous Love" will be presented Saturday from 2 p.m. to 3 p.m. during the Governor's Conference on Leadership Development For Women at Fayetteville Technical Institute.

The musical drama will also be staged March 21 at Thalian Hall in Wilmington, sponsored by WECT-TV, The Oleander Co. and North Carolina Natural Gas Corporation. Admission is free and curtain time is 8 p.m.

The play by the two Fayetteville women centers on the love affair between female novelist George Sand and composer Frederic Chopin and features music by Chopin. Its debut in Fayetteville took place earlier this year at Fayetteville Technical Institute. 7/3/80

FAYETTEVILLE TECHNICAL INSTITUTE will offer new insurance courses this spring which are part of a pilot state program. Those passing the required classroom work will be exempted from state examinations, under a program in which four higher learning institutions will offer the courses.

Those seeking more information about the "Insurance Licensing Institute" are asked to contact Tom Hall, chartered life underwriter, at 323-1961, ext. 343. Deadline for registration is March 5.

Staff Photo—JOHNNY HORNE

FTI's Charles Koonce helped design innovative classes about cancer

# CANCER EDUCATION

## Aim of Program: Combat Fear With Knowledge

By EVE OAKLEY  
Staff Writer

One of the most satisfying aspects of Charles Koonce's job, as he sees it, is that "There are almost no boundaries on the types of programs Fayetteville Technical Institute can provide."

So that when FTI's Dean Sexton suggested to Koonce, director of occupational extension education there, that he see what he could come up with on a cancer education series for adults, Koonce was in an enviable position.

Together with Therrell Brown of FAHEC (Fayetteville Area Health Education Center) and the cooperation of Duke University's Cancer Center, a participant in FAHEC programs, he was able to assemble for the public FTI's innovative six weeks program, "Cancer Education For Adults."

As Koonce says, it was a gratifying challenge to help design a program needed for the general public, one that would educate them to the hopeful side of the

preventive approach to cancer without minimizing the critical aspect.

"Just the word 'cancer' arouses so much fear in the average individual," he explains. "There's a void of knowledge this program can help fill."

Thanks to Koonce, Brown and the interested people at Duke, the program is also an impressive one due primarily to the medical experts conducting the classes last week and over the next five weeks. Last Thursday Dr. Sheldon Pollack presented a general overview of the various kinds of cancer with the second part of his class devoted to symptoms, treatment and prognosis for various types of skin cancer.

Seventy-two interested adults, the majority of them nurses but some laymen, attended that first class. But the five remaining cancer classes in the series are still open to all interested comers and cost for registration, covering all five remaining meetings, is only \$5. You can register at FTI or at 7:30 at the door

Thursday evening, Feb. 14, when Dr. Peter Tallos discusses breast cancer.

Each class is conducted by one of the doctors from Duke University's Comprehensive Cancer Center with the exception of the session on uterine and cervical cancer Feb. 21 by local gynecologist-obstetrician Dr. Stephen Scott. On Feb. 28, Dr. David Paulson will talk about prostate cancer. On March 6, Dr. Helen Wang will speak on occupational health and life style and Dr. John Falletta will discuss pediatric cancer in the final meeting on March 13.

And what can you learn that could benefit you during these adult education sessions? According to Charles Koonce, you can "replace that void of fear" cancer stirs in you with factual information. You will find that early detection of cancer can lead to early treatment and often save lives. You can ask questions and this is the place to get answers.

Cancer is not always a killer, Koonce said, emphasizing that knowledge is a powerful weapon in reducing fear.

Through these classes you will discover how much progress has been made in the treatment of cancer through research and study. And you will also learn that the attitudes of people, young or old, regarding cancer are essential elements in dealing with the disease.

Koonce illustrates with an example of information gleaned from the first cancer education class conducted by Dr. Pollack. "He said there are lots of people walking the streets with visible signs of (skin) cancer. Had they known six months or a year ago, just enough to spot it for what it was, (and thus seek early treatment) they could have saved themselves a lot of trouble and pain...or even saved their lives."

Yet, ironically, Koonce points out, skin cancer is generally the type less likely to be fatal.

The remaining classes meet for the next five Thursdays, Feb. 14, 21 and 28, and March 6 and 13, at the FTI auditorium from 7:30 to 9:30 p.m. A \$5 registration fee is the only cost. Registered and practical nurses are eligible to receive 12 CERP credits for the course.

## Special Courses, Film Offered By Library

Included in adult programming for April through the Cumberland County Public Library will be the Friday Film Connection, and three special courses at Bordeaux Branch Library on interior decorating, crime prevention and home safety, and flower arranging, respectively.

The Friday Film Connection will feature Alain Resnais' 1974 French film "Stavisky" on April 11 at 8 p.m. at Fayetteville Technical Institute. Woody Allen's "Manhattan" is the free film at FTI on April 25.

For information about other adult programs, call the library at 483-1580.

## EVENING CURRICULUM COURSES

Registration: 10 a.m. to 7:30 p.m., THURSDAY, FEB. 21, HORACE SISK GYM, FTI CAMPUS.

### SPRING TERM: MARCH 6-MAY 23, 1980

Who may attend: Persons who have completed high school or have attained the N.C. High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

Cost: In-state resident, \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$198.50).

Payment: Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or Master Charge. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

Accreditation: FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits, and is recognized as a Servicemen's Opportunity College (SOC). Transferability of credit earned at FTI to other schools or institutions rests solely with the gaining school or institution.

Servicemen and Veterans: Army/Air Force tuition assistance is available to qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans' Services or Student Affairs for information on V.A. requirements.

Availability of Classes: All classes are filled on a first come, first served basis. FTI reserves the right to cancel courses due to insufficient enrollment or lack of qualified instructors.

Course Notes: Course titles followed by II or III are sequence courses and are normally taken in order. Course numbers ending in B or C are continuation courses and must be taken in order.

Note (1) RLS-286 — Preparation for N. C. State Exam.

Note (2) RLS-202 — Recommended for those Real Estate students requiring Math refresher. May be taken during same quarter as RLS-286 Real Estate Principles.

# Nostalgia Central Theme Of Works In Art Guild Show

By MELISSA CLEMENT  
Staff Writer

Nostalgic realism is the emphasis in a show featuring works by the Fayetteville Art Guild and sponsored by the Arts Council of Fayetteville/Cumberland County.

The opening reception for this third annual show at the Arsenal House was Sunday after being postponed last week because of snowy weather.

Woodland landscapes in purple hues, old barns, fruit and flowers, still lifes, and wild birds prevailed as 20 local artists showed one to three pieces of work each. The works, which included a few prints were mostly acrylics, oils and watercolors.

Many of the paintings portrayed local landmarks such as the McPherson Church and the Market House. A well executed view of the Market House was done in watercolor by Fayetteville Technical Institute art teacher Carol MacDonald.

Another art teacher, Isabelle Kelly, added interest to realism by showing a unique view of the top story of Dr. Dan Currie's office on Bradford Avenue, silhouetting the

red brick building against the clean blue sky with emphasis on architectural details.

Joanne Roberts took photographs of the old Cottonade Grist Mill before she painted it in oil. "But I left out the rusty tin cans and the garbage," she said at the reception. She also painted lavender wild iris against a decaying frame building and called it "Grandma's Garden."

Also using photographs for inspiration was James Melvin who simplified tobacco barns into geometric forms using earth tones against an intensely blue sky.

Jewel-like miniature landscapes done by Leona MacFadyen depict sentimental snowy winter landscapes and soft ocean scenes.

Moving away from nostalgia was Saul Sorkin who depicts two handless work gloves which grasp for each other over a mystic background in an enigmatic oil.

"Abandon Playthings," by Bobbie Bennett portrays old dolls, worn out hats and random items which float over the canvas. A book about the empty nest syndrome inspired this painting, she said.

The show at the Arsenal House will continue through April 8.

## HEW Eyes Response To FTI Situation

Fayetteville Technical Institute's argument with the U. S. Department of Health, Education and Welfare over alleged racial discrimination in remedial courses is far from over.

HEW's Office of Civil Rights is gearing up to respond to FTI's arguments, mailed last month, in which FTI says it feels its courses are open to anyone.

W. Lamar Clements, an HEW official in Atlanta, said he expects to write FTI late this week, and expects a response.

Clements declined to comment on what his letter to FTI will say.

But, he said, "if it's not resolved with the final round of letters, we'll move toward enforcement."

HEW, he said, can move to cut off federal funding to FTI if it thinks FTI is still discriminating in its remedial program.

But in such situations negotiations often produce a settlement that is acceptable to both sides, he said.

If HEW seeks to cut off funds, the case

will have to go to an administrative law judge at a hearing, he said. The judge's opinion could be appealed, said Clements.

The case began about four years ago when the Fayetteville-Cumberland County Citizens Association asked HEW for an investigation of alleged racial discrimination at FTI.

During 1976 and 1977, HEW gathered data. But it was not until Dec. 19, 1979, that it issued a report.

In the report HEW said it found "discrimination on the basis of race in the methods used to admit students to programs in violation of Title VI of the Civil Rights Act of 1964."

In a lengthy response mailed Feb. 5 to HEW, FTI disagreed.

The letter that Clements expects to write this week will be a response to FTI's Feb. 5 letter.

HEW had contended that FTI's Developmental Studies Program, a remedial program, contained a disproportionate number of black students and faculty.

FTI, in its response, said that the number of black students in the program

varies, depending on the applicants, and says its admission policy is open.

"There can be no assurance in any quarter that students in any given program or course of study will be equally distributed by number, race, age or sex," says the FTI letter. "without violating... the Civil Rights Act of 1964."

During a two-year period, FTI also found that 19 percent of the instruction in the Developmental Studies program was by black instructors. Of 42 persons teaching Developmental Studies, 8 percent were black, FTI argued.

This contrasts with HEW's finding that 50 percent of the faculty in Developmental Studies were black.

The program "cannot be accurately considered 'racially identifiable,'" FTI argued.

HEW had also said that there is no uniform way for students to leave Developmental Studies for the regular curriculum.

FTI takes exception, saying that the student handbook outlines procedures for having a committee evaluate a student's work to see whether it merits moving the student into curriculum courses.

## FTI Community Law Day

To the Editor:

Since 1974 the graduating class of the Law Enforcement Criminal Justice curriculum at Fayetteville Technical Institute has each year sponsored a police community relations day. This year the "6th Annual Community Law Day Festival" will be held at the FTI campus on May 11th, from 1:00 until 5:00 P.M.

The purpose of this day is to provide an opportunity for the community and various police agencies in the area to meet informally and become better acquainted. It is hoped that the casual atmosphere of the event will foster mutual respect and cooperation between local law enforcement agencies and local citizens.

Under the guidance of their instructor, Dave Brumble; Joseph Grebner, LCJ departmental chairman; and student project chairman, Bradley Smith, the class has been broken down into working committees, which have been assigned specific tasks in the planning process.

To ensure that people of all ages and interest groups have a good time, committee members have done extensive planning to provide an exciting afternoon for all. For example, those attending will have the opportunity to view local high school drill teams, square dancing, performing clowns, karate demonstrations, sport parachute jumps and police dog team demonstrations. The Cape Fear Stage Band will furnish musical entertainment.

Games such as sit on the balloon, sack races, 3-legged races, and pie eating contest will be conducted throughout the day. Numerous prizes have been donated by supportive merchants and friends of the students to reward the winners of the games and contests. There will also be a drawing every fifteen minutes to give away various other prizes ranging from free chicken to watches and scanners.

Local public service agencies which include municipal, state and military agencies will display various equipment. This should

provide an informative and educational experience for local citizens.

James New, an instructor in the LCJ Curriculum and resident polygraph and fingerprint expert, will demonstrate his "art" to interested citizens. An informative drug display staffed by an expert in the area of drug abuse prevention will also round out the display portion.

In recent weeks, area law enforcement and government leaders have overwhelmingly endorsed the annual police-community projects. In addition, numerous officials and dignitaries have been invited to attend this activity at the FTI campus on May 11th.

Nothing would be a greater reward for the hard-working students than to welcome an overflow crowd having the time of their life. A cordial invitation is extended to all citizens and visitors of Cumberland County and surrounding areas to spend an informative, fun-filled, and inexpensive afternoon on the Fayetteville Technical Institute campus.

BRADLEY SMITH

## Libraries Are A Valuable Asset

5-6-80

To the Editor:

I endorse and applaud the topical and incisive letter of Donald Seibert's (The Fayetteville Observer, May 1) apropos the necessity for establishing a central library, and trust that the community at large will accord the valid points so ably stated their deserved approbation and support. To further belabor his position would be supererogatory.

Those among you who, possibly through timorous or short-sighted economy-mindedness, are unresponsive to making a reality of a central library should consider the real and positive contributions and services a public library provides:

■ A place simply to relax and enjoy the daily newspaper or a popular periodical such as Life, Newsweek or Time.

■ A place to pursue research, or supplement same, on a higher education level, graduate or post-graduate. (In my own case I used any and all facilities at Fort Bragg, Fayetteville State University, Fayetteville Technical Institute, Methodist College and the Cumberland County system.)

■ A place for older, perhaps lonely, citizens to have a pleasant, hospitable site to be welcomed and to spend some time, and to read. I am not promoting a place to "flop" for the professionally and chronically indigent and jobless, nor a place of assignation by any means.

■ A place for a person to secure books for the simple joy of reading for recreation and for the esthetic pleasure derived from literature. "Ex Libris."

I will not dwell on the enormous, invaluable service provided by the bookmobile, although it is certainly an operation administered by the central library.

Most important of all, probably, and tax-paying parents please take note—a place for school-age children to use in order to receive guidance and to take advantage of reference material to complete assignments and projects. The wealth of reference material is surely not available in the schools, not to mention the expert guidance and counseling rendered. Also consider the extended hours of operation, when schools necessarily are closed. These resources make a definite contribution to your child's progress. Can you place a dollar evaluation on educational development?

Lest we forget: A free and adequate public library system has been an American tradition (and right) and North Carolina historically has been a leader and pioneer. Our unique system has excited the envy and wonderment of the world. Foreigners truly appreciate the treasures shelved in your library available to all.

It should be a matter of municipal pride to

Pete Sessoms at the Anderson Street library in Fayetteville

possess a library system of excellence. An institution to sustain and nurture cultural and intellectual growth.

And, incidentally, this goal is not incongruent with the city's leaders' avowed intent to revitalize, to enhance our image, to provide a better quality of life. This could be square one. It's your move.

In a pragmatic sense, if I were considering settling in a certain area (or if I were scouting for a plant location for an expansion-minded firm from out of state), I would certainly assess not only the schools, churches, recreational and social facilities but certainly also the library system.

To "the procrastination and indecision of the county commissioners..." I trust we will not be forced to add the pejorative epithet, "pusillanimity."

Foreign Film of 1966, is the Friday Film Connection, 8 p.m. Friday at FTI's Cumberland Hall. The Czech film concerns a teen-ager's dealing with his growing sexuality while working in a train station. Free.

### music

CLASSICAL GUITAR: Roger Bogda, classical guitarist and visiting artist at Sampson Technical Institute, performs in concert at 8 p.m. Friday at the Fayetteville Museum of Art, behind Eutaw Shopping Center. Free.

## FTI Board Officers Re-Elected

By JOHN MINTER  
Of The Times Staff

The Fayetteville Technical Institute Board of Trustees re-elected its officers Wednesday by acclamation.

Board Chairman Harry F. Shaw, Vice Chairman Thomas Council and Secretary Howard L. Hall got the show of support at the board's year end meeting.

FTI President Howard E. Boudreau told the board the institution achieved "good healthy" growth this year.

Enrollment was up more than 9 percent to 5,318 students, Boudreau said.

He said, however, that he expected enrollment growth to level off at 5 percent. Enrollment for the spring quarter was down to 4,470 students. Boudreau said the spring decline was normal.

He said he did not see any enrollment decline in the future, noting that the average age of FTI students was 28.

He said projected enrollments for the fall quarter was 5,500.

Boudreau said 517 students are expected to graduate during exercise May 27.

Asked after the board meeting whether the school had

any problems placing graduates in jobs, Boudreau said, "Placement remains strong."

"We are experiencing a little more difficulty than we have before," he added.

He attributed the placement problems to the economic recession.

"Company's are cutting back," Boudreau said.

In other action Wednesday: The board passed a resolution opposing a bill removing some fiscal control from the board of trustees of community colleges.

The measure, already passed by the state senate, puts

more fiscal responsibility in the hands of county commissions.

The board received copies of the FTI preliminary self-study report.

Boudreau said the final report would be forwarded to the Southern Association of Colleges and Schools.

Boudreau said the final report would be forwarded to the Southern Association of Colleges and Schools.

TO REGISTER: Come to the school of your choice on the night your class is scheduled, April 14th, 15th, 16th or 17th

COST: \$5.00 registration fee.

ADMISSION: Anyone 18 years of age or older.

REFUNDS: No refunds will be made unless the class is cancelled.

TERM LENGTH: All classes meet for 11 weeks, except public safety.

SCHOOL HOURS: All center classes meet in the evenings, with most classes meeting from 7:00-9:30 p.m.

Fayetteville Technical Institute reserves the right to cancel any class due to insufficient enrollment, inadequate facilities or if qualified teachers are not available.

FOR ADDITIONAL INFORMATION, Phone Fayetteville Technical Institute, Office of Adult Continuing Education at 323-1961.

To Register for classes at Spring Lake Jr. High and Erwin Jr. High School, call 497-5217.

# FAYETTEVILLE TECHNICAL INSTITUTE

## EVENING CURRICULUM COURSES

Registration: 12 Noon to 7:30 p.m., THURSDAY, MAY 15, HORACE SISK GYM, FTI CAMPUS

### SUMMER TERM: MAY 29 - AUGUST 14, 1980

**Who may attend:** Persons who have completed high school or have attained the N.C. High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

**Cost:** In-state resident, \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$156.50).

**Payment:** Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or MasterCard. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

**Accreditation:** FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits and is recognized as a Servicemen's Opportunity College (SOC). Transferability of credit is granted at FTI to other schools or institutions rests solely with the granting school or institution.

**Servicemen and Veterans:** Army/Air Force tuition assistance is available to qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans' Services or Student Affairs for information on V.A. requirements.

**Availability of Classes:** All classes are filled on a first come, first served basis. FTI reserves the right to cancel courses due to insufficient enrollment or lack of qualified instructors.

#### COURSE NOTES:

Course titles followed by II or III are sequence courses and are normally required to be taken in order. Course numbers ending in A, B, or C are continuation courses, and must be taken in order.

- (1) BMS 1135 - Review of NC Electrical Code Law.
- (2) RLS 286 - Prep. for NC State Real Estate Exam.
- (3) RLS 202 - Rec. for stu. who req. Math refresher. (May be taken in conjunction with RLS 286).
- (4) FSO 114 - Course begins May 29, ends July 2.
- (5) AGR 201 - Course begins May 29, ends July 2.
- (6) AGR 155 - Course begins May 29, ends July 2.
- (7) HOR 201 - Course begins July 14, ends August 14.
- (8) AGR 138 - Course begins July 14, ends August 14.
- (9) EDP-216 - Must have approval of Department Chairperson.

# SUMMER

## FAYETTEVILLE TECHNICAL INSTITUTE EVENING COURSES

### GENERAL POLICIES

- Who may attend:** Persons who have completed high school or have attained the North Carolina High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.
- Cost:** In-state resident, \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$198.50). Students may be charged a small activity fee.
- Payment:** Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or MasterCard. Personal checks drawn on out-of-state banks, second-party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.
- Class Cancellation:** FTI reserves the right to cancel classes due to insufficient enrollment or funding, inadequate facilities, or unavailability of qualified instructors. In the event of a cancelled class, enrolled students may transfer into other classes as space permits or may request full tuition refund.
- Refunds:** Tuition refunds for students shall not be made unless the student is, in the judgment of the institution, compelled to withdraw for unavoidable reasons. In such cases, two-thirds (2/3) of the student's tuition may be refunded if the student withdraws within ten (10) calendar days from the first day of classes. Tuition refunds will not be considered after that time nor will tuition refunds of \$5.00 or less be considered, except if a course is cancelled.
- Servicemen and Veterans:** FTI is a Servicemen's Opportunity College (SOC). Army/Air Force tuition assistance is available to all qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans' Services or Student Affairs for complete information on VA requirements.
- Transferability of Credits:** Programs and courses offered at FTI are designed to meet the immediate personal or career needs of the student concerned. Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution.
- Accreditation:** FTI is fully accredited by the Southern Association of Colleges and Schools.

## FAYETTEVILLE TECHNICAL INSTITUTE OFF-CAMPUS ADULT CLASSES

### SPRING TERM

CLASSES BEGIN APRIL 14, 1980

AT

ARMSTRONG JR. HIGH SCHOOL  
DOUGLAS BYRD JR. HIGH SCHOOL  
DOUGLAS BYRD SR. HIGH SCHOOL  
HOPE MILLS JR. HIGH SCHOOL  
REID ROSS SR. HIGH SCHOOL

### Adult Programming

Friday, May 9 — 8:00 p.m. — The Friday Film Connection presents the Academy Award-winning Czech film "Closely Watched Trains" in the F.T.I. Cumberland Hall Auditorium. Admission is free and the film series is sponsored by the Friends of the Cumberland County Public Library and F.T.I.

Monday, May 12 — 7:30-9:00 p.m. — The Bordeaux Branch Library invites you to EXPLORE THE UNIVERSE with Jan Dabrowski, F.S.U. professor. Free. Call the Bordeaux Branch at 485-1425 for info.

Friday, May 23 — 8:00 p.m. — The Friday Film Connection presents its final film for the Spring film series — "The Pawnbroker," starring Rod Steiger. Admission is free and the film will be shown in the Cumberland Hall Auditorium at F.T.I. The film series is sponsored by the Friends of the Cumberland County Public Library and F.T.I.

Thursday, May 29 — 7:00 p.m. — The Spring Lake Branch Library will show the movie "Farewell to Arms" for its Family Film Night presentation. Admission is free.

### Library Seeks Fund Cuts

By PAT RIVIERE

Cumberland County library trustees next week must come up with a way to trim the library budget amid mounting opposition to the library director's suggestion to close the Gillespie Street Library.

Jerry Thrasher, library system director, has suggested closing the Gillespie Street branch, the only branch where circulation is down this year.

But Thrasher's suggestion has met with opposition from the black community, most recently the Fayetteville Human Services Department.

"The library is used mostly by one segment of our community, and serves as a historic landmark for these people," wrote Elmer Floyd, director of the city human services department.

In a letter to Thrasher, Floyd urged the library trustees to "look within your budget for other areas that can be cut."

H.D. "Cobby" Reaves, library trustee chairman, has said that closing the Gillespie Street library is only one option the trustees will consider when they meet next week.

The trustees have proposed a \$1,167,881 budget and the county manager has recommended a \$1,011,598 library budget. The library last year had a \$911,711 budget.

County Manager Carter Twine has requested all departments, except the two school systems, Fayetteville Technical Institute and Sheriff's Department to trim their budgets by the Cumberland County 12 percent.

The Gillespie Street library was originally given to the library system as a library for blacks but has since been integrated.

06-6-80

## She Lived 22 Different Lives

By JADE D. JUREK  
Staff Writer

Chris Costner Sizemore has lived 22 different lives. For more than 40 years, Mrs. Sizemore experienced the neurosis she described as multiple personalities.

In this neurosis, three or more separate personalities coexist at one time in the same person. These personalities act as defense mechanisms to help the person cope with what he sees as an insolvable, stressful problem.

Mrs. Sizemore spoke to an audience of approximately 60 persons Friday afternoon at Fayetteville Technical Institute. The talk was sponsored by the Mental Health Association of Cumberland County to celebrate Mental Health Month. The book "The Three Faces of Eve" was based on her life. Mrs. Sizemore has

written a new book called "I'm Eve."

After many years of treatment by psychotherapy, Mrs. Sizemore was able to resolve her identity crises and integrate her different personalities in 1974. After her last extra personality, she spent the next six weeks absorbing the memories of the former personalities who had lived so much of her life for her. "It was as if those 22 women had used my body for all those years," Mrs. Sizemore said.

Apparently, the personality switches started when she was two, the 53-year-old Edgefield, S.C., native said. First she saw a man taken from a ditch after drowning. Two weeks later she saw a man cut in half at a sawmill. Then her mother cut her arm. "I remember putting my head under my feather pillow and watching as 'another' child

went to get my father," she said.

The personalities always appeared in groups of three, the wife/mother, the "party girl" and the normal one. It was not until 1952, when one of her personalities tried to choke her young daughter, that Mrs. Sizemore finally sought psychiatric help. "I really dreaded the thought I had to go see a psychiatrist, thinking it meant I was insane," she said.

Throughout the years, the personalities were quite varied. There were 10 poets, seven artists and one who taught tailoring. "I still paint, still write, but I can't sew," Mrs. Sizemore said.

Some of the personalities could drive a car; others couldn't. Mrs. Sizemore would go somewhere as a driver, have a change and a non-driver would come out. Many times she would have to call

home and get her husband to come pick her up, she said.

The last three personalities to exist were the Purple Lady, the Strawberry Girl and the Retrace Lady. Mrs. Sizemore was 46 years old at the time.

The Purple Lady thought she was 38 and sprayed her hair gray. Everything she wore was purple, and she decorated the house in purple.

The Strawberry Girl was only 21 and ate only strawberries. She wore long red wigs and red dresses.

The third personality in the final triad, and the last personality to exist, was the Retrace Lady. She wouldn't retrace her path wherever she went. "She thought that if she just didn't repeat anything, she wouldn't make the same mistakes she had in the past," Mrs. Sizemore said.

"Behind the scene, I was me. Subconsciously, I was

creating these personalities. I was the core from which those others came."

At different times each personality would "die." They would write wills, pack away their possessions and sometimes dress in shrouds. They would then lie down and become rigid and immobile. In a few days the personality would be gone, Mrs. Sizemore said.

Finally, under the care of her therapist, Dr. Tony Tisot, Mrs. Sizemore was able to become her own person. "He did nothing to reinforce my behavior. He insisted I accept responsibility for my own acts," she said.

"As surely as I created each of those individuals, I had to destroy them." She felt some grief and sadness as she let each one go, she said.

"I am free now. I'm free of (See DIFFERENT, Page 10A)

Chris Sizemore, FTI students Linda Smith, Scott Gardner

## Different Lives

(Continued from Page 3A)

a book of her own poems called "The Attic Child."

the neurosis, free of the fear it will return and free of the stigma mental illness can bring.

"I like to think I am more than the sum total of these personalities."

Mrs. Sizemore emphasized the need for support from family, friends and society for those who are plagued by mental illness. "Let us unify our efforts to help those who can't help themselves."

Mrs. Sizemore is working on

## Graduating Students Win Awards At FTI

Three graduating Fayetteville Technical Institute students were presented awards at Tuesday night graduation exercises at Cumberland County Memorial Auditorium.

The Troxel Poland Memorial Award, a check for \$100.00, is presented in memory of a former faculty member at Fayetteville Technical Institute, to a student judged on attributes and on contributions while attending F.T.I. This award was presented to Mrs. Joyce Moss White who graduated with a 3.6 quality point average.

The Citizenship Award for the student most active in the school and the community was presented to Mrs. Judy Lee Lytle, who graduated with a 3.1 quality point average.

The Outstanding Student Award for scholarship was awarded to Mrs. Terri A. Pelaez. Mrs. Pelaez was on the President's List each quarter while in the Electronic Engineering Technology Curriculum and was graduated with a 4.0 grade point average.

FAYETTEVILLE TECHNICAL INSTITUTE

# THERE'S STILL TIME LATE REGISTRATION

For SUMMER TERM

ON CAMPUS—FT. BRAGG

### DAY AND EVENING CURRICULUM COURSES

**REGISTRATION:** 10:00 A.M.-7:30 P.M. Wednesday, May 28, 1980

Students may register for On-Campus or Ft. Bragg, day or evening courses by coming to the F.T.I. campus (Horace Sisk Gym) on May 28, 1980.

**COST:** In-state: \$3.25 per quarter hour (11 credit hours or less) maximum \$39.00.  
Out-of-state: \$16.50 per quarter hour (11 credit hours or less) maximum \$198.50.  
Tuition and fees must be paid at time of registration.

Summer Quarter Classes Begin Thursday, May 29, 1980

"An Equal Opportunity Institution"

# 500 Finish At FTI

More than 500 students from the Cape Fear Region recently received associate degrees and diplomas from Fayetteville Technical Institute.

During graduation ceremonies Judy Lee Lytle received the Citizenship Award, Terri A. Pelaez was the recipient of the Outstanding Student Award and Joyce Moss White won the Troxel Poland Memorial Award.

Honor graduates were:

- Walter Francis Aiken, Deborah J. Bergamini, Clara P. Bryant, Susan Marcelas, John Robert West, John Westfield, Beverly M. Soren, Carol Candace Holmes Walker, Joyce Moss White, Sarah Beverly Mays, Willie James Barbee, Helga S. Conroy, Hugh P. Devlin, Bobby N. Houston, Sandra McHugh, Evelyn S. Whitmore, Barbara Lee Johnson, Vickie L. Kable, Lawrence Alford Hodges, Cynthia Lorraine, Thea Ba Le, Larry Wayne Turkin, Mai Tuyen T. Ngo, Terri Anita Pelaez, Pamela Ann Tucker, Diana Bennett Rice, J. Sandra L. Christensen, Patricia Hathaway, Troy Allen Daugherty, Susan Hamilton, Carl Robert Edward Williams, Martin Gale Sutherland, John Sanders, Robert C. Horvath, III, Janet Jones, Phyllis Watkins, Thomas Turner, Jacquelyn J. Van Meter, Pamela Leslie Whitman, Connie R. Briggs, Agnes Wilkes Conroy, Donna Dora, Anita Susan Gilbert, Gordon M. Childress, Nancy Eloghosa Osoadi, Anita Davila, Nancy Ann Jones, Wanda Kay Tyler, Miquel R. Ramirez, Jennifer L. Cavett, Mattie Guy Leno, Wiley A. Arnold, Elizabeth O'Donnell, Alering N. Hyman, Donald Edward Moore, Jr. & Brenda A. Baker, Sharon R. Brown, Barbara C. Caspe, Sheila Newby, Julie Lynn Phillips, Peggy Vlasak, Jeri Yeske, Alfred D. Hall, Mary Kay Raymond, Elizabeth Kozzo, Erika, Edna Ford, Jr., George F. Art, Holly Ann Karshner, Robert Buns, George Bernard Davis, Charles Ronald Gray, Alfred Edwin Johnson, Pamela Jean Bland, John Johnson, Oliver J. Davis, Teresa D. Carter, Barbara A. Cavallaro, Jean Emerson Brant.

Students receiving associate of applied science degrees were:

- Accounting — Walter Francis Aiken, Deborah J. Bergamini, Clara P. Bryant, Carol Anne Galtier, Val Brody, Gundera, Clifton A. Hall, Alan J. Kopp, Cynthia Susan Marcelas, Betty R. Parker, Pamela-Jean Tucker, Robert West, Lucia C. Welch, Steven Craig Williams.
- Administrative Business Technology — James Cameron Burton, Joseph Johnson.
- Associate Degree Nursing — Ma Kayna Villanueva-Alabanza, Daphne Helene Aka, Kathleen M. Baker, Kathleen L. # School Leaders Rap Budget Plan

By PAT RIVIERE  
Staff Writer

Cumberland County commissioners got discouraging answers Monday when they asked the county's two school systems if they could trim 12 percent from their proposed budgets — a cut County Manager Carter Twine has recommended for most other county departments.

Health department officials, echoing a desire expressed by other county departments last week that budget cuts be equitable, asked the commissioners to provide salaries for the department that would ensure no employees would be fired.

"When you tell them (employees) that you've lost your job because we're cutting the budget, it's one thing," said Dr. Charles Speagle, chairman of the board of health. "But to say you lost your job so others can get more is another."

Dr. Jack Britt, Cumberland County Schools superintendent, said a 12 percent cut in the proposed budget would jeopardize the system's accreditation.

"We worked for 75 years for Southern Association of Colleges and Secondary Schools accreditation and to take \$12 million out of the budget, there goes our enrichment teachers and our accreditation."

Dr. R. Max Abbott, Fayetteville City Schools superintendent, also said he did not feel the system could cut it's budget.

The commissioners have planned a series of budget hearings to review proposals and recommendations before adopting a budget late this month. State law requires the board to adopt a budget and set a tax rate by June 30.

Twine has recommended an 86-cent tax rate which will mean a 7-cent increase per \$100 valuation. The manager's budget recommenda-

tion includes a 10 percent cost of living raise for all employees but no merit raises, new employees, or reclassifications.

Most county department heads have said they feel it is unfair to exempt the schools from the budget cuts when increases in the school budgets are used to supplement state salaries and recommended cuts in other county departments will mean firing employees.

The two school systems presented budgets that propose approximately 10 percent increases each during the first hearing on the proposed county budget Monday, Fayetteville Technical Institute, which also receives salary money from the state, asked for a more than 33 percent increase in county money. A portion of that would be used to increase the local supplement paid teachers, administrators, and department heads.

In addition to the basic tax rate, county residents living outside the Fayetteville city limits are facing a 2-cent recreation tax and fire district taxes ranging from 5 to 10 cents.

Fayetteville residents are facing an additional 26-cent school tax recommended by the Fayetteville city school system and a 4-cent increase in city taxes recommended by William Thomas III, Fayetteville city manager.

Dr. Jesse Williams, health department director, asked the commissioners to provide what he called a "compromise" funding which would restore the department's salary budget to its current level, give merit raises to 57 of the department's 130 employees paid with county money and give everyone a 3 to 4 percent cost of living raise.

This year the department had a \$1,183,554 salary budget. Twine slashed the department's recommended \$1,341,632 salary budget to \$1,139,452.

(See BUDGET, Page 6B)

# Budget Proposal Rapped

(Continued from Page 1B)

The county manager has also recommended a \$1,611,049 total budget for the department as compared to the current \$1,609,058 total budget. The department had requested a \$1,906,540 budget.

In addition to the cuts in the basic budget, Twine has also recommended eliminating the entire county-funded mosquito control program administered by the health department.

E.J. Edge Jr., board chairman, asked Twine how he planned to carry out the mosquito control since the county last year purchased new equipment for the program.

"It's a small item, we can always put it back in," said Twine of the \$29,465 requested for mosquito control.

"The 12 percent is very difficult," Williams told the board. "We feel we have to at least maintain our present staff."

"If mandatory cuts are going to be made, we feel they should be made across the board. I just don't see where we can get 12 percent."

The Cumberland County school system has proposed a \$10,987,832 operating budget which reflects a 10 percent increase over the current year. The system has also proposed a \$871,068 capital outlay budget which brings the total county money requested to \$11,858,900 or a 13 percent total increase over the current budget.

like Haymont will be out of the question. Worry about concerns like the protection of rich farm lands from urban sprawl will fall by the board. In summary, the kind of careful planning necessary to give this county a good chance at livability in the future may not be possible.

Basic, human concern for people who cannot meet some of their own needs was lost as well. The Cumberland County Department of Social Services, whose proposed budget before it came under the knife was only 9 percent above last year's, may have been targeted for a cut of more than \$400,000. Since local money is used to match federal and state funding, the effect of such a loss would be multiplied. Its impact might reach \$1.6 million, according to E. C. Modlin, director of social services.

If no programs are actually eliminated, staff members will have to be. Since there is no excess, the result will be delay. Child abuse cases will have to go on a waiting list, for example. This county has the worst child abuse problem in North Carolina. Delay can mean death for some children.

The Mental Health Department was also cut more than \$200,000. Other departments were hurt too. Yet both school systems and Fayetteville Technical Institute were omitted because, according to County Manager Carter Twine, he has no authority over them. But the county commissioners do. They must ask some basic questions. Can the county afford to supplement salaries at FTI while emaciating library services? Then adults hungry for knowledge, but not formal education at FTI, are starved. And if we sacrifice good land use planning to the schools, will the result be a county our children will want to live in once we have educated them?

Fundamentally, the commissioners must decide whether it is better to hold the tax rate down or meet the need for public services. North Carolinians pay lower taxes than all but a few states in the union, according to the Tax Foundation. And the county tax base has been growing, as revaluation revealed. We can do far better than the proposed budget suggests. We can pay the price of meeting more of our own needs, if our elected leaders have the courage to move in that direction rather than backward.

With what results? The load of routine work will leave little time for such projects as rewriting zoning laws for downtown Fayetteville to permit higher densities and mixing of residential with commercial uses in the same building. Revitalization will suffer. Community planning to help preserve stable neighborhoods

Fayetteville Technical Institute has asked for \$1,323,354 from the county. A portion of this, \$183,046 would fund increases in personnel supplements, including salaries, insurance and fringe benefits.

Howard Boudreau, FTI president, said the local supplements are necessary, "to make the faculty, staff and administration feel like a part of the county."

Twine has not recommended any cuts in FTI's proposed budget.

The county manager has said the proposed tax increase is the result of the failure last year of the school bond issue which has meant the county has to spend \$3 million funding capital outlay needs for the schools this year and an approximate 14 percent inflation rate. After the bond issue failure, the county commissioners agreed to fund the schools building needs over a three-year period using county tax money.

# Sliding Downhill

Cumberland County government got another painful lesson this week on what it means to run a government too much "on the cheap."

The county's highly regarded finance officer, John Nalepa, quietly submitted a letter of resignation, and unless he can be persuaded to change his mind, he will be gone within two weeks.

Nobody—not the county manager, not the county commissioners, not even the fiercest of the anti-tax taxpayers—can really blame him.

Nalepa runs a finance department that administers a \$50 million budget in a county which, according to preliminary estimates, has outgrown Forsyth County in population. But Nalepa must try to carry out his responsibilities with 11 people, while his counterpart in Winston-Salem has 45.

Despite the handicap, Nalepa has, through skillful investment of county money, earned for the county and its taxpayers approximately \$4 million in interest during the past three fiscal years. Interest earned by county deposits amounted to the equivalent of 5.17 cents on the tax rate in fiscal '78, 6.63 cents in fiscal '79 and 8.07 cents in the current fiscal year.

In other words, he has earned what the county pays him—\$25,107 a year—158 times over in the last three years.

Despite this record, the first blow fell on Nalepa when the county manager directed an automatic 12 percent reduction in the budgets of most departments, and his own was included. That meant that of the nine people in his department who work directly in finance matters (two are keyplayers), two would have to be given the axe.

In a letter to the county commissioners explaining his predicament, Nalepa noted that more than 83 percent of his departmental budget goes into salaries, and a 12 percent slash would mean losing two employees. One of them, he added, is an accountant who is identi-

fying, tagging and recording the fixed assets of the county. (Some may recall that failure to do a good job at this kind of record-keeping became a matter of serious embarrassment to the administration of the city of Fayetteville not long ago.)

The next penny-wise, pound-foolish blow fell on the matter of Nalepa's salary. Observing that his salary is from \$5,000 to \$8,000 less than his peers in the two local school systems and Fayetteville Technical Institute, and that he also earns less than finance officers in the state's other urban counties, Nalepa asked the county commissioners for a raise to \$29,820—the same as his peers in less populous Durham and Orange counties, but still lower than the schools' finance officers.

If County Manager Carter Twine was very much to blame for the meat-axe approach taken to the county budget this year, he nonetheless deserves credit for trying to get salaries that are commensurate with the abilities of his key personnel. Twine asked the commissioners to raise Nalepa's salary to \$31,925, or almost as much as the salaries paid to the finance officers of FTI and the county school system.

The commissioners at first indicated that their answer would be no, but now they are "considering" a substantial raise for Nalepa and two or three other key people. With some good luck, the county won't be in the market for an expert finance officer who can be had on the cheap—a most difficult type to find these days.

Unfortunately, the story of the finance department and the penurious policy that threatened to ruin it is an old one in county government. A planning department whose planners earn less than their counterparts in Alamance and Rowan counties, an inadequate library system and an almost non-existent recreation program are all part of a common theme—a steadily deteriorating system of county government.

# New FTI Program Trains Pharmacy Technicians

By JOYCE EVANS  
Staff Writer

Area hospitals and drug stores will soon have "extra hands" now that Fayetteville Technical Institute is offering a two-year pharmacy technology program.

Seven students are currently enrolled in the program, which has been in progress for a year. The first class will graduate next spring.

After completion of the curriculum, students will receive an associate degree in applied science.

Students in the program are being introduced to all aspects of the pharmacy profession during their two years of study and upon graduation will become pharmacy technicians.

They may work in hospitals, nursing care centers, private and chain drug stores and drug manufacturing companies. However, pharmacy technicians must work with a registered pharmacist because the technician is not required to become licensed. A pharmacist is registered to practice in the state and has successfully passed the State Board examination.

The program is set up so that students can also enter pharmacy school and have credits transferred there, said Dr. Arthur Cavano, associate dean of instruction at FTI.

"A pharmacist can extend himself with three to five technicians, and he can get more work done," he said. Technicians may prepare

Pharmacy technology students train at FTI

and the Pharmacy Association. Mrs. Garcia said students are usually interested in how much money they can earn after entering the field. "I tell my students that they can make as much money as they're willing to sell themselves for," she said.

Salaries range from minimum wages up to \$14,000 a year for a hospital or medical center where the person has some supervisory type job, said Mrs. Garcia. Responsibility is really the key, she added.

During the second year, students will work 15 hours fall quarter and 20 hours spring quarter in a hospital or some other type setting in order to acquire Mrs. Garcia said no assignments have been made yet, but she has received requests from persons interested in having students work for them.

Because health profes-

sions and consumers alike are demanding improvement in the quality of health care, this program will generate much interest among sources who wish to cut costs, she said.

If a drugstore needs another pharmacist, a technician might be hired instead, which could be more practical, said Mrs. Garcia.

For further information, interested persons may call or visit the admissions at FTI.

# School Systems Trying To Cope With Local Budget Problems

By JOYCE EVANS  
Staff Writer

Fayetteville city schools are exhausting the \$350,000 unappropriated fund balance and eliminating 10 positions within the system to meet budget requests by the Cumberland County Board of Commissioners.

The Cumberland County schools won't be cutting any personnel or programs to meet its budget requests, said Dr. Jack Britt, superintendent of county schools.

County commissioners asked county schools to trim \$1.25 from its estimated \$3.6 million surplus fund balance, city schools to reduce the budget by \$322,000 and Fayetteville Technical Institute to cut \$107,000 from its proposed budget.

The unappropriated fund balance is surplus funds—an estimated amount that the city schools will not have spent in the 1979-80 fiscal year, said Dr. C. Fletcher Womble, newly appointed superintendent.

Womble said exhausting the surplus fund may have a real effect during the 1981-82 school year.

"We don't know what the county commissioners will appropriate for the 1981-82 (fiscal) year.

"Based on advice in the fiscal control act, the recommendation is that we have a fund balance or surplus at the end of the year to pay obligations for the first part of a new fiscal year while we're waiting for the county to collect tax money."

He said tax money doesn't usually start coming until November or December. "This keeps the school from having to go to the commissioners for additional money to meet obligations," said Womble.

"A real concern is what's going to happen in the 1981-82 school year with our not having any fund balance planned at this time," he said.

Womble said he will voice these concerns to the commissioners.

Although the city schools will be cutting 10 positions, they

may have to cut further programs to restore the fund balance, said Womble.

City schools will eliminate the following positions:

An administrative post (\$30,000); the public information and volunteer program (\$25,000) and four aides at the primary school level—kindergarten through third grade (\$20,000), Womble said.

He said this will result in a possible shifting of personnel and not filling any existing positions.

Three teachers (\$42,435) at the high school level will be cut

from the In-School Suspension program. This program was federally funded by a grant which has expired.

City schools had hoped to use county funds to operate the program. William T. Brown, assistant superintendent, said teachers hired for this program were instructed that employment would continue if funds were available.

Because of revenue adjustments, an additional \$117,435 adjustment had to be made, and the administrative post and nine positions eliminated will allow the \$117,435 budget reduction.

The total current expense recommended for city schools is

now \$2,433,740, a reduction of \$463,260 from the estimated \$2,897,000 city schools had proposed for the 1980-81 budget.

County schools will be reducing \$1.25 million in operating expenses from the estimated \$3.6 million fund balance, said Britt.

He said county schools will have just enough money to carry them through until they receive budget appropriations. However, included in that \$3.6 million estimated surplus is about \$2 million anticipated for impact aid fund, he said.

(See SCHOOLS, Page 13B) 6/27/80

(Continued from Page 1B)

County school surplus funds will maintain the proposed \$871,068 capital outlay budget. This includes \$105,000 to reimburse Spring Lake for recreational facilities at the Junior high school, \$467,068 for equipment, \$133,000 for buses, \$66,000 for service trucks and tractors and \$100,000 for renovations to the Walker School building.

Fayetteville Technical Institute will be cutting \$105,445 from its proposed budget, said William Stanley, dean of fiscal affairs.

"We don't have an unobligated balance like the county. We carry any extra funds to the next fiscal budget," said Stanley.

The reductions will be made in salary supplements (\$15,445), current contingency fund (\$15,000), capital outlay (\$25,000) and other items (\$50,000), said Stanley.

Although Fayetteville Technical will be exhausting its current contingency fund (for emergency expenses), Stanley said the budget cuts present no particular problems for the schools provided the county commissioners give due consideration to any emergency that may arise.

## Schools

## Religious Drama At A FTI

SATURDAY AND SUNDAY — Immanuel Baptist Church presents the religious drama, "Moses," on Saturday and Sunday at 7:30 p.m. at Fayetteville Technical Institute auditorium. Starring Mark Vick and featuring a cast of 50, the drama is free to the public.

## Adjusted Budget Approved By FTI

An adjusted \$1.26-million total budget was approved Monday by the Fayetteville Technical Institute Board of Trustees.

The \$1.26-million budget, funded solely by local property taxes, was reduced in June after cuts were requested by the Cumberland County Board of Commissioners.

The FTI trustees approved cutting \$13,371 in salary supplements, \$12,358 in employee benefits, \$15,000 from the current expense contingency fund, \$39,718 from the 1979-80 balance, and \$25,000 from the capital outlay contingency fund.

FTI will now receive \$1.24 million for current expense and \$17,451 for capital outlay from local property taxes.

FTI President Howard E. Boudreau also announced the school will receive \$3.54 million in state funds for 1980-81.

FTI got \$7.31 million during the 1979-80 fiscal year and the increase is due to higher student enrollment, he said.

Restaurant manager trains Maurice Grubb

Bank teller Joan Houston helps customer

Eli Anderson, Lynne McElderry help Marcia Lawrence with resume

# Job Training Stepping Out Of The Unemployment Line

basic mathematics and English skills.

"We tell them from the first day how to dress. We tell them an employer legally can't tell you to cut your hair or not to wear suits up your jeans but there is going to be a legal way to get around it. We can't leave any stone unturned in telling them things. We impress upon them not to be late or absent and if a student gives me a late excuse he'll give his employer that."

The majority of the students are women who would be entering the work force for the first time while about two percent of the total number of students enrolled in Operation Jobs are college graduates. Students must be between the ages of 18 and 45 to enter the program.

"Husbands don't make enough to support the wife and kids. The children are entering high school and it takes more money now so the wife has to go back to work," Anderson says.

"We have to limit the age too. We have enough difficulty finding a job for a 24-year-old lady; it's rough."

Not all the students, however, are on welfare when they start the program. Approximately 78 percent of the students receive some type of public assistance, according to Anderson.

Joan Houston, a teller at Southern National Bank and Maurice Grubb, a manager trainee at McDonald's fast food restaurant, both were unemployed for several years before they were hired for the jobs they now hold.

Ms. Houston, a 42-year-old woman, worked inside the home raising four children.

"It was time for me to venture out in the world and find a job. But I had given up on finding one and I figured my age didn't help any and I had a complex about it. Going through the cycle gave me the confidence to find a job."

"I taught me what to say in an interview and changed my attitude and that's the training that helped me. I was hired for this job before the cycle was over in November."

Thirty-six-year-old Grubb has been working for McDonald's for two months. Continued on 2F

# The Unemployment Line

(Continued from Page 1F)

Months. A musician by trade, Grubb was unemployed for the past three years before he was hired at the restaurant.

"I went about five weeks of the cycle and then found this job. It helped me with my lack of rapport with people and gave me confidence. I had no communication skills and I had to be oriented with the world of work. I had to learn how to communicate with people everyday."

Although most of the students do not have a high school diploma, course instructors encourage students to further their education to achieve higher-paying positions.

Every six-week cycle, Anderson receives some 60 applications for Operation Jobs so student selection also is somewhat competitive.

"The job market here can't sustain 60 people who apply each month," Anderson says. "We look for an individual who is employable. For example, most factories or plants hire their own or people from other plants. So we have to give them an individual who is employable."

Once a student is placed, there are three, six and 12-month followups.

"We have to be careful who we bring into the program and whether they do good or bad, they are under our program one year."

"On a three-month followup, if a person isn't working we are losing money. On a six-month followup, if he worked just three weeks and left his job for whatever reason, we are losing money. On a 12-month followup, if we can't find him, then we're in trouble."

The program began with an initial \$45,000 grant from the state. According to Anderson, the program supports itself on an earn-back index.

"Every time we get someone off welfare or off public assistance, our index goes up."

Anderson says a common problem between the students is poor language skills.

"Sometimes we'll have a young lady walk in here who will make a nice secretary but she needs to brush up on her English. In class, she'll say, 'I could have went to the mall,' instead of saying, 'I could have gone to the mall.' You'd be surprised at the number of students who didn't pick that up."

"We'll teach them how to write a resume and about submitting an application and we'll tell them when they get their paycheck there is federal, state, retirement and social security

that has to be taken out and most don't know that has to be taken out.

"They think if they make \$3.50 an hour they get \$3.50, then that's what they get home."

Jobs available to students usually are in secretarial, construction, factory work and fast food services.

"If someone walks in with a \$3.50 an hour job and wants something better, I tell them, baby, you better keep it. Occasionally, we have a \$4.50 an hour job. The only way we put our stamp of approval on a job under \$4.10 is if it's in a restaurant and they get tips."

"Once he's working he has to report to the public assistance agencies and they'll carry him over for a little while until he gets paid. But we have about 15 and 20 percent of the students who just can't make it. They'll either drop out of the course or tell us they're just not interested."

Anderson says one of the major problems he faces in the program is battling against the wrong public assistance who are in Operation Jobs don't want to work.

"It's naive to think it's not true in some cases but many people don't want to be in that situation. Most say they don't want to be on welfare and they want to work."

# FTI Sets Budget For Year

By JOYCE EVANS  
Staff Writer

The Fayetteville Technical Institute Board of Trustees Monday approved a \$1.26-million local budget for the 1980-81 year, after \$105,445 was trimmed from the school's original budget request by the Cumberland County Board of Commissioners.

The school's current expense fund was trimmed by \$80,445 with cuts in salary supplements of \$13,371; in employee benefits of \$12,356; in current expense contingency of \$15,000; and in unencumbered expense balance of \$38,718.

FTI's capital outlay expense fund was also reduced by \$25,000.

Due to an increase in enrollment, FTI will receive a \$1.7-million increase in its state budget allotment, according to budget projections. Howard Boudreau, president of FTI, announced a new state board will administer policies for the community college system.

The 1980 General Assembly passed a bill to create the board which will be separate from the State Board of Education. Before, the community college system was under the direction of the State Board of Education.

The new board is now in the process of being appointed by the governor, who will have 10 appointments, the lieutenant governor, who will appoint two ex-officio members, and the General Assembly. The General Assembly appointed its seven members before it adjourned its short session last month.

The new board will be sworn in this month and will serve as an interim board until taking full control of system as the new State Board of Community Colleges in 1981.

Boudreau told the FTI trustees that the school's top priority during the next General Assembly will be capital outlay funds to expand the local facilities.

Anticipated enrollment for the upcoming fall semester is 5,000, the maximum number of students the institution can accommodate, Boudreau said.

# Proposed County Travel Funds May Be Cut \$200,000

City Budget, Story, 1-B

By SHERRY REESE  
Of The Times Staff

Cumberland County commissioners Monday decided to cut travel expenses in the proposed 1980-81 budget by a third, and indicated they hope to slice one cent off the proposed 7-cent tax hike.

Commissioners are working to reduce the budget proposal to an 85-cent tax rate for 1980-81 by cutting schools and the sheriff's budget in addition to reducing travel expenses by about \$200,000.

After a budget workshop Tuesday, E.J. Edge Jr.,

Board of Commissioners chairman, said he expects commissioners to establish a uniform 18-cent per mile travel reimbursement, eliminating employee car allowances.

Edge expects travel cuts to total about \$200,000. A Fayetteville Times survey showed travel requests in the budget year beginning July 1 totaled \$750,000.

The proposed budget called for an 86-cent tax rate per \$100 value, an effective 7-cent increase because of increases in the tax base from revaluation.

The board also approved a cost-of-living increase policy Tuesday that would give 10 percent raises to employ-

ees making up to \$26,000, 7 percent through \$40,000 and 5 percent for those making more than \$40,000. Board members said the policy will save \$30,000 of \$74,000 now in the budget for 10 percent increases for all 1,300 county employees.

Tuesday commissioners asked city and county schools and Fayetteville Technical Institute to make cuts totaling \$1.65 million or more.

County schools were asked to reduce an expected \$3.25-million fund balance by \$1.25 million.

City schools officials said a \$22,000 cut in their expected \$650,000 fund balance will mean poorer programs.

Dr. Fletcher Womble, newly appointed superintendent, said the cut may mean school officials will ask to increase the 26-cent special city school tax.

FTI officials were asked to cut between \$79,000 and \$120,000 in contingencies, salary supplements and fringe benefits for 381 FTI workers.

School officials were asked to return with proposals Thursday. The board set another workshop for 1:30 p.m. today. Commissioners expect to adopt the budget by Friday night. State law requires adoption by June 30.

County Manager Carter Twine proposed the \$52.89-

See COUNTY, Page 1-A

# School Budget Cuts Sought

By PAT RIVIERE  
Staff Writer

Cumberland County Commissioners are asking the two school systems and Fayetteville Technical Institute to trim their budgets to make up \$1 million in anticipated revenue that will not be forthcoming and still bring the tax rate down 1 cent.

County Superintendent Jack Britt said this morning the system could make the \$1.25 million requested cut in its \$3.25-million fund balance. The cut, a requested \$322,000 from the Fayetteville school system, will be "disasterous," according to R. Max Abbot, superintendent. Abbot said making the cut in the anticipated \$650,000 fund balance would mean firing people and cutting back on programs.

The commissioners are also looking at a possible \$120,000 cut in Fayetteville Technical Institute's proposed budget. The cut would include \$40,000 in emergency contingency money, about \$18,700 in supplements and another \$62,000 in life insurance and disability that the county does not provide for any other county employees. The commissioners also talked about additional cuts in travel that the county funds.

Another \$100,000 in expenses will be trimmed from the sheriff's \$440,000 budget for automotive supplies, according to informal agreements this morning. Sheriff Otis Jones said he would not mind the cut as long as he could request additional money for gasoline if it is needed later in the year.

County Manager Carter Twine is recommending an 86-cent tax rate which essentially means a 7-cent tax increase because of revaluation. Twine had also included \$1,010,000 in landfill fees as county income for the 1980-81 year. The commissioners have not discussed charging the fees that would raise the money Twine has proposed.

Twine also this morning proposed cutting department's travel budgets by one third of the amount proposed.

Budget deliberations continued this afternoon after the commissioners cut their own travel allowance from \$180 per month to \$120 and \$150 for the chairman.

Commissioner Virginia Thompson proposed that the commissioners consider raises for department heads on an individual basis rather than give them the across the board 10 percent cost of living that Twine has recommended for all county employees.

The commissioners for the last two weeks have heard budget presentations from the various county departments. Departments presenting their budgets Monday night included:

## Legal Aid

Fayetteville attorney Charles Kirkman, chairman of the legal aid advisory committee, told the commissioners that county money will still be needed to fund the current legal aid program along with a \$281,502 federal grant for legal aid.

CHARLES KIRKMAN

Twine has recommended eliminating county funding for the legal aid program. The advisory committee has requested \$46,706 for the coming year.

The county is virtually assured of receiving the federal grant although the money will not be available before July 1, the start of the county's fiscal year.

At issue is who will administer the grant money. The regional Legal Services Corporation in Atlanta has recommended the grant go to Legal Services of North Carolina, the agency that provides legal services for the poor throughout the state. The Cumberland County Bar Association, which also submitted an application for the grant money, is fighting the recommendation in hopes of receiving the grant. Regardless of who receives the grant, the federally-funded program must follow LSC regulations.

"I do not think this (a county-funded program) would be duplicative of the LSC program," Kirkman told the board. "The primary objective of LSC is not the poor of Cumberland County. They're looking for an overall area project and I don't think it will ever take the place of the local service."

The county legal aid service has been criticized by citizens and members of the bar for failing to take domestic cases, relying on referring clients to private attorneys rather than having a staff of lawyers trained in poverty law and charging fees.

Kirkman asked that the commissioners at least fund the program at its current \$33,721 budget and then "take another look" once the grant award is made.

John Shaw, bar president, asked that the commissioners provide some money for the current program until the grant is awarded.

## Legal Department

Neil Yarborough, county staff attorney, asked the commissioners for \$20,879 more than Twine has recommended. Twine's recommendation would mean the legal department would lose a third of its staff, according to Yarborough.

Twine has recommended funding the department with \$99,026. The additional money Yarborough requested would include \$9,608 to continue a paralegal that is currently paid with federal funds; \$587 for a merit raise for another paralegal; \$10,022 to continue a part-time attorney; \$500 for training and \$162 for the Industrial Financing Authority.

"You're going to pay for it one way or another," said Heman Clark, county attorney. "It's better to pay for good legal services than suffer the consequences."

(See BUDGETS, Page 6B)

# County

From Page 1-A

million budget — including \$2.7-million federal revenue sharing — for 1980-81. That proposal, unless reduced slightly as expected, would require an 86-cent tax rate.

Commissioners are hoping to reduce costs and accommodate some departments that can't operate under 12 percent cuts requested by Twine.

The Sheriff's Department was asked to cut \$100,000 from gasoline allotments. Sheriff Otis Jones said his department may return to commissioners for more money because of gasoline price hikes.

Commissioners so far haven't restored \$127,000 to the sheriff's budget for 13 court bailiffs. Jones said the cut will mean half his patrol and civil officers would be required to assume those duties daily.

Twine also told commissioners \$1 million expected revenue from proposed landfill use fees must be dropped. He said the county attorney informed him charges to municipalities would be illegal.

The budget proposal included \$6.35 per ton fees for all municipalities and commercial haulers, but not individual dumpers. The fee would have applied to Fayetteville, Hope Mills and Spring Lake municipalities.

During page-by-page budget analysis, the board adopted \$150 monthly travel reimbursements for the chairman, and \$120 monthly for the four other members. Reimbursements are now \$180 per month for all commissioners. Commissioners also opted to drop their cost-of-living increase.

Commissioners also informally agreed to:

- Reinstate the legal aid services for the poor at a \$33,721 budget until receipt of a federal grant later this year. The department had been eliminated after commissioners endorsed a county Bar Association grant application.
- Eliminate merit increases for county employees.
- Put records indexing for the Register of Deeds on the county computer, eliminating an \$18,000 yearly outside contract.

Concerning travel reimbursements, most commissioners supported a flat 18-cent per mile payment, saying it would be more equitable than varying car allowances for employees. Twine said car allowances have continued out of "custom."

Commissioner Virginia Thompson said a uniform policy should be established for better controls over travel reimbursements.

# Quick Degree Work Possible

By JOYCE EVANS  
Sunday Staff Writer

You can meet the minimal educational standards of today without limitations on the time it takes to achieve those goals.

A person already at grade level four who enrolls in the GED program, high school equivalency, at Fayetteville Technical Institute can complete the program in about 11 weeks depending on motivation and ability.

Classes begin Monday at the FTI auditorium from 8 a.m. to 1 p.m. or 5 p.m. to 11 p.m. Monday through Thursday.

A \$5 registration fee is the only charge for the course. Counseling and placement tests, to determine the academic level of the student, are given at no extra charge.

The FTI approach to the GED is based upon completing a series of exams during the course. This minimizes the amount of time most people spend preparing for the actual GED test, said Charles Koonce, director of occupational extension education at FTI.

A student is required to spend one hour in each of the five subject areas — English, math, social studies, science and literature.

FTI gives a placement test to help the student decide which academic level he's on.

After an interview determining when he was last in school and what grade level he attended, a student is given an estimate of about how long it will take him to complete the course, Koonce said.

For example: A person placing at grade level four would probably be able to complete the course in one quarter or 11 weeks. But a person who places at levels one, two, or three wouldn't necessarily have to take four quarters to complete the course.

Many students who placed at levels one and two have taken the test and passed it without going on to levels three and four, said Koonce.

"Some people learn faster than others. It basically depends on the individual."

"Eighty percent of the people enrolling in the course are successful in passing regardless of the level they start on," he said.

This course accommodates students from high school ages to 60 years old and above and is open to veterans. It is approved for veterans benefits, and that is one of the things making the course attractive to this area, Koonce said.

The course allows a flexible student schedule for persons working shifts. FTI will make special arrangements to adjust classes to the student's working hours, he said.

Other benefits of the course are low cost and the environment which is an adult setting and not a return to high school, Koonce stated.

The GED is readily accepted to any college, university or company in lieu of a regular high school diploma.

The test is administered by the Army Education Center at Fort Bragg and costs \$5.

To pass, a person must score 45 points for each of the five subject areas, totaling 225 points.

North Carolina requirements are somewhat higher than some other states, Koonce said participants in GED programs at other states have attended FTI for a refresher course to meet this state's requirements.

If a person fails and he does not score within four or five points of the requirements, he can go back into the preparatory program. He will usually have to wait six months before taking it again unless he scores within a close designated four or five points range, Koonce said.

Koonce said FTI teachers take a person interest in the students and their achievements. He said teachers try to help them build up their confidence and overcome the fears of taking tests.

Teachers also help students decide when they've reached the point where they could pass the test and urge them to take the GED test, he said.

"A lot of students in the program have never felt the satisfaction of passing a math test, and teachers compliment them for good results."

Classes are small, and students receive individual attention. Their weaknesses and strengths are identified by the instructor, Koonce said.

He said he believes there is a large number of people in Cumberland County who still have not completed high school.

The school dropout rate, which is 6.9 percent, constitutes a high number, and that doesn't include persons who failed to complete their education years ago, he said.

# Budgets Questioned

(Continued from Page 1B)

## Rescue Squad

About 15 members of the Cumberland County Rescue Squad attended Monday's meeting in support of the request to restore \$2,500 for uniforms. Twine has recommended \$500 for uniforms.

Reese Faulkner said the money Twine has recommended would buy only about 24 uniforms of the approximately 70 men. "We didn't buy any (uniforms) last year," said Faulkner. "We needed the money for vehicle maintenance." The men are issued two uniforms each, he said.

## Veterans Service

Twine's recommended budget would mean reducing the hours for the four veterans service workers, according to Joyce B. Carter, department head.

The veterans service helps veterans file for benefits and was started after World War II when the Veterans Administration Hospital provided limited services in filing claims and was unable to handle the large number of claims, such as disability, survivors benefits and any other benefits.

Ms. Carter said the office handles as many as 2,500 cases a month. She said she does not know of any other agency that provides the services the county agency does.

She said she had talked with representatives of the recently opened Vet Center which is funded with federal money for a year.

"At that time they didn't know what they were doing themselves," she said of the new center. "They said they were a referral agency and were referring veterans to the unemployment office."

The county commissioners must adopt a budget and set a tax rate by June 30.

**MICHAEL BEST CONCERT:** Tenor Michael Best, former visiting artist at Fayetteville Technical Institute, will present a concert of classic and contemporary love songs with his wife, soprano Marsha Andrews, at 8 p.m. Sept. 17 at Rosenthal Recital Hall at Fayetteville State University. Free admission. Part of the FSU Lyceum series. 7-9-80

## Greek History

### Series Slated

"The Greek Moment," a six-part lecture series on Greek history sponsored by the Cumberland County Public Library and Fayetteville Technical Institute, begins Sept. 24.

Jeffrey Soles, professor of classical civilization at the University of North Carolina at Greensboro, will present a visual and narrative tour of ancient Athens at 8 p.m. Sept. 24 at Cumberland Hall on the FTI campus.

Six programs in the series will be held every other Wednesday evening at FTI, according to library officials. The following programs will examine Greek democracy, religious and civic celebrations, drama and philosophy.

The programs will feature such speakers as John Oates, chairman of classical studies at Duke University, and Ann Deagon, professor of classics at Guilford College and a North Carolina poet. Programs will also include panel discussions about the presentations.

"The Greek Moment" introduces a six-year "Measure of Man" lecture series planned by the library system, according to Director Jerry Thrasher.

## City Cracks Down On FTI Parking

Officer K.R. McDaniel Tickets Car In Front Of FTI

By JOHN MINTER

of The Times Staff  
Fayetteville Technical Institute students dashing to their cars Thursday morning must have resembled drivers at the start of the French Grand Prix race.

The dash was spurred by reports that the Fayetteville Police Department was towing cars illegally parked on Hull Street, which runs through the FTI campus.

Wreckers towed away 13 of more than 100 cars reportedly parked along the street before the remaining cars could be moved by their owners.

A Fayetteville Police Department spokesman said the cars were parked in areas marked "No Parking Anytime - Tow Away Zone."

The spokesman said a pa-

trolman began ticketing the cars and calling wreckers to tow away violators about 10:30 a.m., but only 13 were towed.

Officials said the towing is an annual process at the beginning of the school year.

"We have cited people before," the police department spokesman said. "And we have in the past towed people."

He said each individual whose car was towed received a \$5 illegal parking citation, but must also pay the wrecker's towing fee before getting their cars back.

The fee averages \$35, the spokesman said. He said any storage charges would also have to be paid by the car's owner.

Lt. Luther Brewer, head of

FTI's security force, said there was ample parking Thursday morning when the cars were parked illegally on Hull Road.

"There was enough for all of the cars," Brewer said. "One parking lot (No. 5) was only half full and others had spaces scattered about."

He said the students evidently parked on Hull Street because it was closer to classes.

"It's only a five to eight minute walk from any parking lot we have got," Brewer said.

He also had more bad news for the FTI students. Starting today, Brewer said, cars parked in parking lots on the FTI campus will be ticketed if they do not display parking permits.

T 9-19-80

**FLORAL ARRANGING:** An 11-week course on Floral Arranging will be held from 9:30 a.m. to noon at the Bordeaux Library beginning Thursday. The course is taught through FTI and a \$5 fee will be charged. Information: 485-1425. T 9-23-80

**GREEK MOMENT:** "The Greek Moment: Athens in the Fifth Century," a lecture series on ancient Athens, begins at 8 p.m. Wednesday in the FTI Auditorium with a lecture by Jeffrey Soles. The series is free and open to the public. T 9-23-80

### Youth Council Schedules Workshop On Leadership

Instructors from area colleges and executives of several agencies will speak at Saturday's annual Youth Leadership Workshop, sponsored by the Fayetteville Cumberland County Youth Council. The workshop will be held from 9 a.m. to 4 p.m. in Fayetteville Tech's Cumberland Hall. Registration, including lunch, is \$4.

Among those scheduled to speak are Dr. Charles Sills, professor of psychology at Methodist College; Joe Boone of the county Mental Health Center rehabilitation staff; and E.C. Modlin, director of the county Department of Social Services. T 9-30-80

### Rose Society Honors Clark

Charles Clark, a life member of the Fayetteville Rose Society, was recently presented a Rose Society Certificate of Outstanding Service on his 89th birthday.

Clark, a retired New York state employee, retired to Fayetteville five years ago and has been active in the care of the Fayetteville Technical Institute Rose Garden.

The presentation was made by rose society president Mrs. Frank Guydes.

**FAYETTEVILLE TECHNICAL INSTITUTE** along with the Cumberland County Coordinating Council on Older Adults will conduct a Home Health Care Adult course beginning Oct. 14.

The 64-hour course will cover basic first aid, cardiopulmonary resuscitation, vital signs, nutrition, home nursing, patient transfer and safety.

For more information contact Randy Holloway at 323-1961, ext. 309. T 10-2-80

## The FTI

### Honor Roll

The following students from the Cape Fear Region have been named to the President's List at Fayetteville Technical Institute for the summer quarter.

Named to the list are Sheila M. Autry, Betty J. Bobo, Mary K. Knowles and Donna S. Nunery, all from Autryville, Donna M. Pate and Archie L. Smith from Cameron, and Cynthia R. Hickok and Corbett Tarr from Dunn.

Debra K. Long, Lumber Bridge; Robert L. Bachand, Patricia A. Bullard, Lumberton; Olivia A. Jackson, Annie L. McCollum, Raeford; Julian M. Boyles, Red Springs; Stella C. Hair, Dudley D. Simpson, Roseboro.

Students from Cumberland County are: Mary K. Davis, Roberta R. Jones, David G. Miller, June A. Spain, Robert L. Stevenson, Henry L. Whitted, William L. Williams, Cheryl L. Marshall.

Also, Millard D. Alderman, Freddy J. Angeli, Juan J. Ansoategui, Sandra N. Askew, Harry J. Auten, Hilda D. Barnwell, Regis H. Bates, Edward Bator, Raymond E. Beaman, Judy C. Biggs, Gerald J. Blais, Victoria G. Blevis, Norman E. Elight, David O. Bolin, Sue B. Boyette, Barbara J. Brady, Virginia Brodzinski, James L. Bromfield, David O. Bunch, Brenda C. Burack, Carl E. Burr, Henry S. Burress, Larry E. Bush, Donna M. Butler, Paula K. Butler, Tonja K. Butler, Virginia L. Butler, Sharon D. Canady, Barbara R. Carrell, Owen L. Cherry, Kristy D. Chitwood, Cuong N. Chung, Joseph Cisco, Donald A. Clifton, Joel C. Cohen, Brenda L. Cole, Veronica M. Cook, William T. Corders, Lori L. Crane, Doris H. Daller, Andrew J. Davis, Ronald DeLoach, Harry D. Dewese, Jr., Lynn M. Durner, Marlene E. Erne, Carole E. Feeman, Douglas E. Fellows, Betty Finnie, Ted Y. Fisher, Larry C. Forte, Randall P. Fraley;

Also, Charles S. French, Lucretia D. Fuller, Kathy L. Fussnecker, John W. Garber, Teresa Garrison, Claude Gore, Patricia S. Gough, Linda M. Gravit, Regina C. Green, Stanley J. Grodzicki, Robert B. Haar, Julie O. Hall, Richard E. Hall, Elizabeth A. Harbour, Marian J. Hargis, Daniel N. Harrell, Harry K. Harris, Dale C. Hatfield, Debra C. Hayes, Mary D. Hill, Warren N. Hinson, Stuart Hite, Bobbie B. Holt, Everett Huff, Donna E. Hyatt, Abimbola Ilesanmi, Beverly J. Jackson, Eugene P. Jackson, Carlos Jaramillo, Jr., William R. Jenkins, Barbara A. Jones, Herbert L. Jones, Tamra L. Jones, Tammy J. Kall, Chong S. Kang, Rosie L. King, Charles R. Knight, Roswitha E. Knight, Stephen D. Koss, Louis W. Kozlowski, Gordon J. Lane, Isaac N. Laudenslager, Allan F. Loes, Trudy M. Lohsant, Richard D. Long, Richard H. Lucas, Sidney A. Lumpkin, Donna K. Lyon, Jose M. Macias, Earlene E. May, Gregory E. McCafferty;

Jessie L. McDaniel, John M. McGuire, Cletus R. McKeown, Yvonne J. McVally, John R. Mednis, Joseph W. Memory, Kevin E. Miller, Maria D. Miranda, Donald E. Moore, Susan C. Morrison, Barbara M. Murphy, Eileen Murray, John R. Myers, David M. Nance, Kathy Nichols, Melissa L. Nixon, Eleanor T. O'Farrell, Chibuzo A. Oghona, Viesturs Pampe, Robert C. Patrick, John M. Patton, Sheila A. ## Editor's Notebook

by Roy Parker Jr.

Chancellor Givens

The economy may be in the doldrums, but there is a growth industry in the Cape Fear Region this autumn.

The campuses of higher education in the 10-county area around Fayetteville are humming with new growth, record enrollments, and optimistic plans for the future.

The campuses are playing a larger and larger role in the economic and social life of the region. With operating budgets totaling over \$20 million and student populations of over 7,000, they are becoming more visible in their role as training grounds for vital human resources.

As students head for the college and university classrooms, they are finding more and more new programs, including new graduate-level opportunities.

In the offices of campus administrators, plans are being made for even more new opportunities in such fields as science, business, health, and fine arts.

And on the several campuses, new buildings are either under construction or in the blueprint stage to house new programs that either are under way or dreamed about.

Despite the general economic pinch, or partly because of it, record numbers of young people are heading for higher educational campuses this fall. Enrollments continue to rise.

The financial picture from the administration offices is somewhat mixed, however.

State-run institutions like Fayetteville State University and Pembroke State University are getting significant increases as the state seeks to overcome charges of long-term neglect of racially-identifiable campuses.

Even they, however, are looking for other sources of funds. Officials at both institutions are cranking up development drives seeking financial support from their communities.

Campbell University, Methodist College in Fayetteville, and St. Andrews Presbyterian College in Laurinburg face the continuing problem of finding adequate income in the face of constantly rising costs.

To attract new money, all three institutions are fashioning specific new goals, either for new programs or new structures, which they hope will convince donors to invest in private higher education.

Here is a brief campus-by-campus report on the ferment that marks this autumn at Cape Fear Region institutions:

• **Fayetteville State University.** This predominantly black institution takes over a new graduate program in public school education this fall, prepares proposals to add health care to its curriculum, and awaits the completion of a new science building complete with an astronomical observatory.

With an operating budget of over \$7.7 million annually, FSU seeks to involve more of its 140 faculty members in community affairs, and is readying plans for a major effort to create more community support and raise developmental dollars from the community.

• **Pembroke State University.** New Chancellor Paul Givens, beginning his second year at the helm of the "cornfield campus" in Robeson County, is presiding over new faculty-wide studies aimed at

broadening the curriculum. He is preparing a major community fund-raising effort, hiring an outside developmental consultant. Pembroke, with a healthy mixture of whites, Indians, and blacks in its student population, in recent years has been highly successful in attracting well-qualified faculty, with doctoral degree-holders nearly 100 percent in major fields, with credentials from such major institutions as Duke, Yale, and the University of North Carolina. A new graduate program in public education is in its second year, and Givens has asked for feasibility study of possible graduate opportunities in business administration.

• **Campbell University.** Eighty percent of this year's graduates from the new law school at Campbell passed the 1980 state bar examination on the first try, a figure only a few points below the record for such long-established schools as Duke and the University of North Carolina.

That was the latest measure of the vigorous expansion toward quality experienced in recent years by the Baptist institution in rural Harnett County under lawyer-administrator President Norman Wiggins.

Renamed "university" last year, Campbell is out to earn the designation with plans for expansion into modern-day graduate fields, with a \$25 million fund-raising drive,

Inside FSU Observatory

with a new fine arts building as a top priority, with establishment of the Campbell University Press, and with aggressive outreach into the surrounding area including a growing extension program at the Ft. Bragg higher educational complex.

• **Methodist College.** Better-than-usual local fund drives for the past two years have helped the Fayetteville institution improve its financial condition and attract new students through such innovations as weekend and evening programs.

President Richard Pearce has placed first priority on a multimillion-dollar expansion of athletic facilities, a gymnasium and swimming pool, to build on a sports program which is becoming a specialized attraction for students.

• **St. Andrews.** A fund-raising effort has been on for several years to give the Laurinburg institution a better position to compete for quality students with small-but-high-quality campuses like its older sister, Davidson College.

Now the summer site for a unit of the prestigious N.C. Governors' School, St. Andrews has attracted new quality faculty and new quality students to its well-balanced liberal arts curriculum.

In addition to the higher educational campuses, such community institutions as Fayetteville Technical Institute, (with 5,000 students, the second largest such campus in the state), Sandhills Community College in Southern Pines, and Sampson Technical Institute report increasing enrollments and a lively new season.

This is the sort of good news that will last beyond this season or this academic year. It promises a future of more abundant and better-trained human resources for a region where people are our most important treasure.

# FTI Crowded, President Says

By ROSE ANN FROBERG  
Of The Times Staff

Facilities at Fayetteville Technical Institute are "reaching a critical point" because of enrollment increases, according to FTI President Howard E. Boudreau.

Boudreau told the FTI Board of Trustees Monday that the final student count for this year is expected to reach 5,400 on the main campus, an 8.2 percent increase.

In 1979-80, enrollment jumped 9 percent which amounts to a 17 percent increase in two years. The increase has severely stretched the physical capacity of the buildings, he said.

"Somehow, somewhere, we're going to have to start vigorously pursuing some capital outlay mon-

"The school will either have to build or start limiting enrollment, and the latter is something we just don't want to do."

— Howard Boudreau

ey...we've just about reached our limit in space," Boudreau said.

The school will either have to build or start limiting enrollment, and the latter is something "we just don't want to do," he said.

The trustees building and grounds committee will meet soon to discuss future construction plans.

Classroom space is extremely limited, as well as the continuing education and business education fac-

viewing the dental hygienist and dental assistant's programs for re-creditation.

An in-house financial report for 1979-80 was also presented at the meeting.

The report, subject to an audit by the N.C. Department of the State Auditor, showed total income of \$10,891,822 and total expenses of \$10,824,911.

Of the \$10.89 million in income, \$7 million was state funds, \$1.2 million was local funds and \$2.6 million was special institutional funds.

The school has \$239,017 in assets that are either in checking or savings accounts or due from institutional funds.

## Library

WEDNESDAY — The second part of the six-program series, "The Greek Moment" will be in Cumberland Hall at F.T.I. This program is a visual and narrative tour of ancient Athens. Speakers include Jeffrey Soles, professor of Classical Civilization at U.N.C.-Greensboro, John Oates, the distinguished chairman of Classical Studies at Duke University and Ann Deagon, professor of Classics at Guilford College and honored North Carolina poet. The 8 p.m. program is sponsored jointly by the Cumberland County Public Library and Fayetteville Technical Institute and funded by a grant from the N.C. Humanities Committee.

THE ANNUAL Youth Leadership Workshop sponsored by the Fayetteville-Cumberland County Youth Council will be held Oct. 4.

The workshop will be held in Cumberland Hall at Fayetteville Technical Institute from 9 a.m. until 4 p.m.

At the workshop, local college professors will speak on different topics of leadership.

A registration fee, which includes lunch, will be required. More information can be obtained by calling 485-3233.

## Tutor Training Scheduled

Tutor training classes will be held Oct. 21, 23, 28 and 30 under the co-sponsorship of Fayetteville Urban Ministry and Fayetteville Technical Institute. Sessions will be from 6:45-10 p.m. each evening at Horace Sisk Building at FTI. For registration details, phone Urban Ministry, 483-5944.

## Industrial Decline

# Cumberland County Revitalization

(The author is an editorial writer for The Fayetteville Observer.)

By George Frink

When tires first rolled off the Kelly Springfield Tire Co. production line here in December, 1969, Cumberland was among the fastest growing counties in the South. Four years later the Arab oil embargo hit. It gave special force to the 1975 recession that followed, slowing growth everywhere. While other urban counties recovered, Cumberland did not. In June a consultant wrote of "the county's economic decline."

Between 1975 and 1979, while North Carolina rebounded from the recession to gain 12.1 percent more non-farm jobs, Cumberland County picked up a bleak four-tenths of one percent. The next worst big urban area moved ahead by 13.1 percent. The most dynamic hit 21.1 percent.

What went wrong? Consultants have already pointed to a lack of coordination between the lead local industry hunter, the Fayetteville Area Chamber of Commerce, and local government agencies. But in addition, have there been other changes in the community, a degeneration we can correct?

To answer that, we have to know why an industry like Kelly Springfield picked Fayetteville in the first place. Fortunately, that decision is a textbook example of how large, national firms choose new industrial sites. It is detailed in the book *Industrial Location and Community Development*. Written primarily by Dr. Barry M. Moriarty, professor of urban and economic geography, at the University of North Carolina in Chapel Hill, the book was published by UNC Press this year. Moriarty's account is based on a report to the board of directors of Goodyear Tire Corp., of which Kelly Springfield is a wholly-owned subsidiary.

The process began with Kelly Springfield striving for a more efficient operation, and better competitive position. In 1968 the firm made a geographical analysis of projected car and truck tire demand for 1973, and of its existing production capacity. This established the need for a new plant in the southeastern United States, and its proper size. Based on that analysis, which was quite detailed, a list of 26 communities was compiled.

"The need for plant personnel was the single most important aspect of the search," Moriarty wrote. There would be 1,900 employees when it reached an expected final capacity of 50,000 tires a day, Kelly Springfield officials projected. This produced two compelling location considerations.

First, the plant had to be far enough from existing tire plants so it did not have to compete with them for employees. That requirement produced a map, with vacant spots where the new plant might go. Second, it had to be in an urban community of no less than 25,000 persons, with a labor supply of 150,000 within 30 miles. A heavy demand for water and other basic requirements also went into the formula.

Inadequate water supply, site problems and other failings cut the original 26 to 16. After a team went into the field to study those, 11 more were eliminated because of combinations of such obstacles as comparatively high labor costs and unacceptable living conditions. Two more were dropped because of variable

costs. Fayetteville was left to compete with Johnson City, Tenn., and Greenville, Miss.

Those three were subject to comprehensive field analysis by a team whose members would eventually live and work in their final choice. They studied:

■ Industrial climate, which has to do with the diversity of existing local industry, wages, union experience and the like.

■ Labor climate, which includes concern for the size of population available for employment, how productive they will be, and what local training programs would be available. Fayetteville Technical Institute was favorably mentioned.

■ Transportation facilities. All had rail. Fayetteville was considered outstanding, with 11 truck terminals.

■ Economic costs, including freight rates, salaries and utilities. Together, they made Fayetteville the highest-cost site, as it had been since the earliest analysis.

■ And living conditions, where once again, Fayetteville excelled. Moriarty wrote:

"Fayetteville at 60,000 provided better services — recently built shopping centers and a new downtown area, air terminal and civic auditorium. Hospital and recreation facilities were adequate in all three communities, although Greenville did not fare as well as the others in recreation opportunities. Each...had sufficient housing, but Fayetteville had more attractive subdivisions."

All three offered some cost-reducing inducements. Ours was the usual water and sewer main extension offer, the standard state industrial access road construction promise, and the chamber managed to offer more land options to make the site larger. Greenville's ten-year, \$100,000-a-year tax moratorium did not prevail, or even push its total tax cost below Cumberland's. In the end a comparative ranking was done, based on numerical scores for each category of concern.

"In the final analysis, Fayetteville, which had the most first-place rankings, was chosen as the location for the new plant. It was the city most attractive to the key staff people who would be transferred from other plants, and it also met the near-term need for production at the earliest possible date. In addition, it met the long-range requirements for economical, large-scale production."

There has been decay since then.

Without doubt the city is less attractive to any "key staff people" who come through, usually with their wives, when we make the final cut. Downtown was not "new" when Kelly Springfield was looking us over, but it has degenerated, much of it into a notorious retail slum.

If a bond issue for expansion of the arena fails at the polls, state insurance and fire standards will force it down from deficiency to gross inadequacy. Our library system is an embarrassment. Until a new hospital is built, even medical facilities cannot be called adequate, as they were in 1968. There is even talk of overcrowding at FTI. Community services cannot be termed superior.

Even a brilliant reorganization of our industrial recruitment effort will not touch those problems, although reform is needed in that area. Most of these problems will require painstaking community commitment. Successful revitalization of downtown, which should include a new central library, will involve years of effort. Passage of the necessary bond issues means some community self-sacrifice. But we can bail ourselves out, if we will.

## Funeral Home Put On List By Mistake

The name of Royal-Hall Funeral Home in Clinton was erroneously placed on a list of funeral home directors who have been supplying bodies to Fayetteville Technical School's embalming service school, according to the school's attorney, L. Stacy Weaver.

Royal-Hall was listed in *The Observer-Times* last week with 36 other funeral homes that have supplied 537 bodies to the school since it opened in 1976.

The list, released by school president Howard Boudreau, credited Royal-Hall with having supplied one body during the four years.

Weaver says the name of the home was listed on a body FTI had picked up in Chapel Hill but a subsequent check shows the funeral was not handled by Royal-Hall.

The body of a migrant farm laborer had been taken to Royal-Hall because one of the funeral home's operators, Litwood Hall, was acting coroner at the time. Hall, at the request of the state medical examiner's office, sent the body to Chapel Hill.

"How Fayetteville Technical Institute got the body and/or what funeral home was in charge of the service, I don't know," Hall says. "I know we didn't handle the funeral."

## The Greek Moment

ATHENS IN THE 5TH CENTURY B.C.

THE MEASURE OF MAN

The Lectures:  
The Forms of the City. The Sophists, who offered pragmatic advice, and Socrates, who searched for ethical sincerity, found themselves on opposite sides of this issue. Democracy's Birth: The Citizen. In that unique atmosphere of Athens the concept of democracy was born. Different from our modern ideas, different from 18th century ideas, it was a belief that man found his deepest meaning only within society. The Ceremonies of Life. To the Greeks all life was a harmony. The public and private, the religious and secular merged. This harmony was expressed in many religious and civic celebrations, contests, plays and rituals. Socrates and the Sophists: A Question of Truth. The Greek experience was concerned with right living, what it was and how to achieve it. The Sophists, who offered pragmatic advice, and Socrates, who searched for ethical sincerity, found themselves on opposite sides of this issue.

The Muse's Prompting: The Birth of Tragedy. One special form of public ceremony was the Dionysian festivals held each March. Performances of dance and choral poetry shortly evolved into dramatic form and, in *Oedipus Rex*, reached a high point in tragic form unequalled until Shakespeare 2000 years later. The Love of Wisdom: Plato and Aristotle. These two great philosophers were the issue and legacy of the Golden Age of Athens. Their work was a distillation and summary of the period that has continued to speak to us through the ages.

All programs are scheduled for Wednesday evenings at 8 p.m. in the Cumberland Hall of F.T.I.

### Training In Embalming

## 37 Funeral Homes Sent Bodies To FTI

By PAT REESE  
Sunday Staff Writer

Thirty-seven funeral homes, most of them in eastern North Carolina, have provided 557 bodies to Fayetteville Technical Institute's embalming service school since classes first opened in September 1976.

Howard Boudreau, president of FTI, and the institute's attorney, Stacy Weaver, made the list available at the specific request of this reporter.

The embalming service school has been in the news recently as the result of a civil suit filed by Fayetteville attorney James R. Nance Sr. against Cromartie-Pearsall-Smith Funeral Home of Dunn on Sept. 11.

Nance, representing Mrs. Sonja Wade, widow of Marshall McCoy Wade Jr., charged in the suit that the funeral home gave her husband's body to the school without her permission for the purpose of allowing students to learn embalming.

Mrs. Wade contends that her husband's features were distorted and disfigured when his casket was opened for viewing by friends and members of the family.

Nance said Mrs. Wade was charged a \$125 embalming fee when, in fact, the embalming was done at the school at state expense.

This was the list released by Boudreau:

Brown-Wynne Funeral Home of Raleigh, 1 body; Butler Funeral Home of Roseboro, 3; Colvin Funeral Home of Fayetteville, 10; Commission of Anatomy, no address, 2; Cromartie-Pearsall-Smith Funeral Home of Dunn, 26; Crumpler Funeral Home of Raeford, 62; Doby Funeral Home of Raeford, 38; Edgerton Funeral Home of Wallace, 6; Erwin Funeral Home of Erwin, 7; Futrell Funeral Service, no address, 1; Forbes Funeral Home, no address, 1; Gilbert Funeral Home of Southport, 1; Hamilton-Porter Funeral Home of Hope Mills, 2; Hanes-Lineberry Funeral Home of Greensboro, 3; Holloway Funeral Home of Dublin, 14; Jackson Funeral Home of Laurinburg, 13; Knotts Funeral Home of Sanford, 55; Lambeth-Troxer Funeral Home of Greensboro, 1; Lee Funeral Home of Fayetteville (no longer in business), 23; Lester Shaw Sons Funeral Home of Whiteville, 43; McCoy-Green Funeral Home, no address, 2; Midway Funeral Home of St. Pauls, 26; Newton & Sons Funeral Home of Elizabethtown, 1; Parrish Funeral Home of Selma, 4; Payne Funeral Home of Fayetteville, 82; Pugh Funeral Home of Southern Pines, 57; Red Springs Funeral Home of Red Springs, 4; Reeves-Billa Funeral Home of Hope Mills, 50; Rogers Funeral Home of Sanford, 8; Royal-Hall Funeral Home of Clinton, 1; Smith Funeral Home of Whiteville, 1; Underwood Funeral Home of Smithfield, 4; Waters Funeral Home of Florence, S.C., 1; West Funeral

Home of Newton Grove, 2; Wilson-Harrington Funeral Home of Hamlet, 7; and Wiseman Mortuary of Fayetteville, 1.

The embalming service school at FTI is one of only a handful of embalming schools in southern America and the only one in North Carolina. The school is licensed by the state to embalm bodies.

Funeral home directors who have been working with FTI are concerned that public reaction to the Wade suit and subsequent publicity may injure the school.

Chief among them is Sam West, owner of West Funeral Home in Newton Grove.

West, who has been in the funeral service for about 28 years, was among the directors who campaigned strenuously for an embalming service school in North Carolina.

"It took a lot of hard work to establish the school," West said Saturday. "I believe we've got a good school at FTI."

"In fact, according to figures given to me, 37 out of 38 graduates who took the national funeral directors and embalming exams passed," he said.

West said one of the requirements for the state to open the embalming service school was the promised cooperation of a large number of funeral home directors.

"I would hate to see anything hurt the school or cause the cooperating directors to back off with their support," he said.

A number of area funeral home directors met in Fayetteville (See FIRMS, Page 2A)

## Publicity 'Hurts' Embalming At FTI

By ROSE ANN FROBERG  
Of The Times Staff

Wade's permission for the purpose of allowing students to learn embalming.

Recent publicity surrounding the embalming service at Fayetteville Technical Institute is hurting the program, according to FTI President Howard E. Boudreau.

Boudreau told the FTI Board of Trustees Monday the school's Department of Funeral Service Education has not received any bodies for embalming since a lawsuit was filed against operators of a Dunn funeral home and an FTI instructor.

The school does not have any contact with the families of those being embalmed and getting permission from the families to have the work done at FTI is strictly between the funeral homes and the families, he said.

The school has had a verbal agreement since the program began in 1974 with area funeral homes to supply the school with bodies so that students could receive clinical experience, Boudreau said.

In the past six years, 37 funeral homes, most located in the Cape Fear Region, have supplied 557 bodies to be embalmed.

The \$75,000 suit was filed by Sonya E. Wade against operators of Cromartie-Pearsall-Smith Funeral Home and FTI instructor William Bulla.

The suit filed in September alleges that the body of Mrs. Wade's husband was secretly taken to FTI without Mrs.

## Firms Sent Bodies To FTI

(Continued from Page 1A)

Saturday morning to discuss the matter and tentatively made plans to ask FTI to hold an "open house" at the school to allow citizens and the press to look at the facilities.

"No funeral home in North Carolina is as well equipped," West said.

Funeral home directors, as part of the agreement in establishing the school, provide the fluids used by the students. All embalmings are done under the supervision of licensed

embalmers employed by FTI, Boudreau said. "We do not have any contact with the families," he said. "Funeral homes notify us that a body is ready and we use a school vehicle to pick up the bodies at the funeral homes or hospital."

Boudreau says his own inquiry into the matter does not indicate there was any distortion of features caused by embalmings done at FTI.

"Disfigurement is usually the result of autopsies done at the hospital," he said.

## Motions Filed In Embalming Lawsuit

By PAT REESE  
Staff Writer

Two parties in the Sonja Wade suit against Cromartie-Pearsall-Smith Funeral Home of Dunn have filed a motion to dismiss the superior court action, claiming the suit fails to name a necessary party as co-defendant.

Mrs. Wade's attorney, James R. Nance Sr., has countered with his own motion to add the name to his suit.

The motion to dismiss was filed by Billy Pearsall and Nowell Smith, part-owners of the Dunn funeral home.

They contend the suit should be dismissed because Mrs. Wade did not name R. L. Cromartie Inc. as one of the defendants.

Nance's counter motion asks the court to add R. L. Cromartie Jr. Inc. to the suit, stating that funeral home is actually owned by R. L. Cromartie Jr. Inc.

Mrs. Wade is suing Pearsall, Smith, William Bulla of Hope Mills and Cromartie-Pearsall-Smith Funeral Home of Dunn for \$75,000, alleging that her husband's body was mutilated by em-

balming done at Fayetteville Technical Institute's embalming service school.

Nance states in his motion that Cromartie-Pearsall-Smith Funeral Home is owned by R.L. Cromartie Jr. Inc. under the amended name of Cromartie-Pearsall-Smith.

Nance contends the company charter has been suspended four times by the state, that the company failed to comply with "the mandatory provisions of the statutes, requiring a corporation engaged in any county other than under its corporate name, such

corporation must file in the office of the Register of Deeds of such county a certificate giving information such as the assumed name and the true corporate owners.

Nance's suit last month brought to light the fact that many funeral homes have been sending bodies to the FTI embalming school.

Howard Boudreau, in answer to an Observer question, reported last weekend that 37 funeral homes in North Carolina have furnished 557 bodies to the school since it opened in 1976.

### Nurses' Convention

Anna Kuba, left, executive director of the N.C. Board of Nursing, chats with Connie Wolf, president of the local district of the N.C. Nurses Association Sunday. Ms. Kuba made the keynote address at the state association's 1980 convention at the Bourdeaux Convention Center this weekend. (Staff photo—Ken Cooke)

### Adult Continuing Education Classes

LATE REGISTRATION AND CLASSES BEGIN  
TONIGHT and TOMORROW NIGHT

## FALL TERM CLASSES AND LATE REGISTRATION BEGIN

AT:

Douglas Byrd Sr. High and  
Westover Sr. High Schools on  
September 22, 1980

AND AT

Douglas Byrd Jr. High  
Reid Ross Sr. High  
Southview Sr. High and  
Westover Sr. High Schools  
on  
September 23, 1980

#### TO REGISTER:

Come to the school of your choice on the night your class is scheduled, Sept. 22, 23, 24, or 25th.

#### COST:

\$5.00 Registration Fee.  
Persons 65 years of age and older fee exempt.

#### ADMISSION:

Anyone 18 years of age or older.

#### REFUNDS:

No refunds will be made unless class is canceled.

#### SCHOOLS HOURS:

All center classes meet in the evenings, with most classes meeting from 7:00-9:30 p.m. Fayetteville Technical Institute reserves the right to cancel any class due to insufficient enrollment, inadequate facilities or if qualified teachers are not available.

## Fayetteville Technical Institute

An Equal Opportunity Institution

THE GREEK MOMENT: "The Greek Moment: Athens in the Fifth Century" continues by Helena DiBona at 8 p.m. Wednesday auditorium. Admission is free.

THE GREEK MOMENT: "The Greek Moment: Athens in the Fifth Century" continues Wednesday with a lecture by John Sullivan on Socrates. The lecture begins at 8 p.m. in the FTI Auditorium. Admission is free. T 11-4-80.

DECORATIONS: The Recreation and Parks Department and FTI sponsor classes in making Christmas decorations from 9 a.m. to noon beginning today at Honeycutt Recreation Center. Registration: 483-1762. T 11-4-80.

JOHN HOCKADAY OF SANFORD has been hired as the new recruiter and job placement coordinator at Fayetteville Technical Institute. He is a Campbell University graduate and a former golf pro.

SIX SURGICAL TECHNOLOGY GRADUATES at Fayetteville Technical Institute have passed the national certification examination and received certification. The students are Valeria E. Adams, Ada B. Medina, Teresa D. Waters and Lisa E. Weber, all of Fayetteville. Lilace M. Jorgensen of Buies Creek, and Richard S. Lockart of Raeford. T 11-27-80.

JOHN R. LIFSEY, Funeral Service Education Department chairman at Fayetteville Technical Institute, will be the guest speaker Sunday on WFBS-AM radio. Lifsey will discuss the funeral service program during the 9:15 a.m. program which will also be rebroadcast on Nov. 22 at 1 p.m. on WIDU-AM. T 11-13-80.

FAYETTEVILLE TECHNICAL INSTITUTE NOTES: Dr. Vijay S. Joshi, a FTI physics professor, recently presented two papers at the N.C. Science Teachers Association conference held in Raleigh. His topics were "B-3 Space Shuttle: NASA's Latest Adventure in Space" and "Using Home Computers in Teaching Physics, Chemistry and Biology."

Molly Holtet has been elected the first woman president of the N.C. Post-Secondary Agriculture Student Organization. Ms. Holtet is a recreation and horticulture business technology student at FTI. T 11-13-80.

THE GREEK MOMENT: "The Greek Moment: Athens in the Fifth Century" concludes with a lecture by John Sullivan at 8 p.m. Dec. 3 in the FTI Auditorium. Admission is free. T 11-28-80.

Bert Ayers, a FTI student from Rowland, has been presented the horticulture scholarship award from the Cross Creek Garden Club. T 11-13-80.

DON WHITEHEAD, a Fayetteville Technical Institute psychology instructor, will be the guest speaker tonight at the Parents Without Partners meeting. Whitehead will speak at 7:30 p.m. on "How To Compensate For Some Of The Negative Effects Of Divorce On Children." The meeting will be held in the First Citizens Bank basement. T 11-20-80.

Thursday, November 13, 1980 5B

Dr. Robert Senior  
... Junior League speaker

Robert Senior Talks To League  
"How To Live With Your Teenagers" and "The Temptations For Our Youth In The 1980s" were the topics for Dr. Robert Senior at the November meetings of the Fayetteville Junior League at the Fayetteville Technical Institute auditorium and Highland Presbyterian fellowship hall. Senior, founder and medical director of Genesis House, a rehabilitative farm for young North Carolina drug addicts during the drug epidemic of the early 1970s, has a private practice in pediatrics and adolescent medicine in Chapel Hill. He is a charter member of the Society for Adolescent Medicine.

Ray Woodward Sits At The Controls Of Engine No. 1 As It Chugs Around His Backyard Track

Staff Photo by CRAMER GALLIMORE

Tiny Valves, Gauges All Work

**'When you start something like this, you'd better make up your mind to finish it.'**

—Ray Woodward

## Rail Fun The BCS & E Chugs On Backyard Track

By SUSAN LADD  
Of The Times Staff

From the highway, it looks like any other house. Most people on their way through Fayetteville to Elizabethtown on N.C. 87 would pass it without a glance. The shop that stands nearby looks like any other garage or workshop. But a walk to the back is like entering another world.

Welcome, folks, to the Big Creek, Susquehanna and Erie Railway Terminal Yard. Four hundred feet of track run from the shop through the back yard, winding around trees and over small bridges. Signs along the way warn of close clearance between the trees, and there's even a stop beside a working water tower.

Ray Woodward is conductor, engineer and full-time passenger on the BCS & E. He spent six years pouring over train books and engineering magazines, consulting with other miniature train builders, and molding piece by piece, a 1/8-scale coal-burning steam engine.

Woodward's train will be one of the exhibits Saturday at the Cape Fear Fair, which begins today at the Jaycee Fairgrounds at the intersection of Gillespie St. and N.C. 87.

The detail is incredible. The wooden cab has two bench chairs inside, and a

step on the outside with a special, non-skid platform. Inside the cab is a brass plate that dedicates the train to the men and women who worked on the Erie Railroad from 1882-1930.

Woodward has also built three passenger cars and a big red caboose — the exact replica of the caboose on his father's freight train. Though the engine only boasts 6/10 horsepower, it can pull 1,300 pounds, or seven people.

The engine is fed on a combination of hard and soft coal. Woodward starts the fire with tiny sticks of wood soaked in kerosene. Then, with his specially built shovel, he adds coal to the 5-inch square firebox. All the while, he watches the steam gauge and the water column to make sure that steam builds up properly and the boiler doesn't get too hot.

Though the engine can run on 60 pounds of pressure, he usually gets it up to 80 pounds, a really considerable amount of power. A pressure cooker, for instance, uses 15 pounds of pressure. The top speed of the train is 10 miles per hour a pretty good clip for a 1/8-scale model of the real thing.

Though it is a miniature version, a ride on the BCS & E brings back memories of

at Douglas Byrd High School. He grew up around trains, and the BCS & E is, in part, a tribute to his relatives who worked on the rails.

"My father, uncle and aunt all worked on the Erie Railroad in Hornell, New York," says Woodward, dressed in conductor's cap and overalls. "My dad was a freight conductor on a run to Susquehanna, Pa. My wife lived near a place called Big Creek. So I sort of got them all in there."

Woodward began the project in 1970 and finished in 1976. In the building process, he read a six-foot stack of books and took machine shop courses at Fayetteville Tech.

"I felt like I wanted to do it, to see if I could," Woodward says with a smile. "When you start something like this, you'd better make up your mind to finish it."

The 300-lb. engine is made of sheet metal, wood and brass. Cast iron from California went into the wheels and two cylinders. Working with various tools and a lathe, Woodward built the engine, piece by piece. He also built many of his own tools.

The detail is incredible. The wooden cab has two bench chairs inside, and a

step on the outside with a special, non-skid platform. Inside the cab is a brass plate that dedicates the train to the men and women who worked on the Erie Railroad from 1882-1930.

This little Ukranian apple head doll is one of the stars of the crafts show now on exhibit at the Arsenal House.

## Variety Of Crafts On Display

By MELISSA CLEMENT  
Staff Writer

A wonderful yellow and green quilt gives sparkle to the craft show which opened at the Arts Council of Fayetteville/Cumberland County last weekend. The crafts were made by craftsmen from the Cumberland County members of the Southeastern North Carolina Craftsmen's Guild.

The quilt was made by Eva Dell Sessoms of Fayetteville with pieces of colorful gingham in a log cabin pattern which comes together to form crosses. It is hand quilted with minute stitches between the rows of flowered patterns.

All contributing members for this show have been judged master craftsmen by a seven-member panel of the guild and 30 craftsmen submitted one or more works.

A rich variety of crafts are on display from carved mahogany wooden horses by Ed White to china painting by Donna Farrell.

One of the most interesting is an apple head doll by Clara Hardwick called "Ukranian Marketwoman." She does careful research to assure that she dresses her apple head figures in authentic costumes.

Nita and Terry Petroski, a husband and wife team, also have work on display. She paints comic mountaineers and mouth watering watermelons on wood, while he carves in a

art form called country carving which is done on flat rustic board.

Mazine Zucchini shows a beautiful black tray with yellow pansies and buttercups pressed and decoupage into it. She gathers and presses the flowers in the spring for pictures, calendars, note cards and trays which she makes all year.

Gladys Chambo gathers her material in the fall—collecting seeds, pine cones and flower parts and putting them together in interesting arrangements like the one on the mantle piece at the show.

"I just prou around in the fall," she said. "I probably know every tree in town. I like to hunt and discover new things I can use in my arrangements."

On one wall is a blue and black baby crib coverlet designed and crocheted by Gerda Blaylock. Crocheted into it are designs of houses and churches. It had been hung with the wrong side out by mistake, according to Mrs. Blaylock, but was so meticulously done that it was hardly noticeable. She learned to crochet as a child in Germany, she said, but had little time to do it while her eight children were growing up. Now she teaches her skills at Fayetteville Technical Institute and designs and copyrights her own patterns. She is also president of the craft guild.

The craft show will continue through Oct. 26 at the Arsenal House.

### LATE REGISTRATION FOR G.E.D.

**WINTER QUARTER WILL BE HELD DEC. 2, 4**

Prepare for your high school equivalency examination on FTI's campus. Morning, afternoon and evening classes are available Monday through Thursday.

Placement tests and registration are conducted each Tuesday and Thursday afternoon in Room 2168. Call Charles Smith at 323-1961, ext. 230, for registration details.

## FTI Says 'Publicity' On Lawsuit Harmful To Embalmers

Although FTI was not named in the lawsuit, the publicity is hurting the program, he told the board of trustees.

Mrs. Senor E. Wade, widow of Earl H. Senor, died in 1977. Her husband was an embalmer and was employed by FTI. Mrs. Wade is requesting \$75,000 in actual and punitive damages. She charges that her husband's body was subjected to the "hazard exposure" before a large number of students and others at FTI.

Students in the program must explain about her bodies before taking the state and national examination for funeral service. Mrs. Wade says she was told that the bodies were not to be used for educational purposes.

Woodward told the board these allegations are not true, and that he is concerned about the students getting practical experience necessary to graduate and pass the exam.

"The security is tight at the embalming laboratory, and it isn't an arena type situation. Janitors don't even go in there," he said.

Students work in teams of four and are on a rotating weekend call along with an instructor who is a licensed embalmer.

"I think I can say that Fayetteville Technical has the best embalming laboratory in the whole state." The equipment is modern and cost \$100,000 when installed in 1977, he said.

FTI's program was started because bodies last year, and this fall's 50 students are usually embalming bodies by now, said Woodward.

The embalming setup at FTI is no different than any other schools offering funeral service programs, and Woodward cited several schools with similar programs or general funeral home training programs: Fort Valley State College in Georgia, Virginia Polytechnic Institute in Blacksburg, Va., and the University of Tennessee in Knoxville.

Said Woodward, FTI's attorney said the school has no control over what the bodies are used for. He said he has no arrangements with FTI.

There was a need for such a program in North Carolina, Woodward stated.

"If we can't get the bodies, we can't graduate the students," he said.

Students in the program may have to begin embalming bodies at funeral homes. If the situation does not change, he said.

Said Woodward, FTI's attorney said the school has no control over what the bodies are used for. He said he has no arrangements with FTI.

## Wedding Classes Unveiled At FTI

By MAUREEN WEST

Sunday Staff Writer

In politics we're used to hearing about mock elections or mock debates. And on occasion there are re-enactments or mock battles at some of our historic battlesites.

Well, here's what may be a first for the classroom. A Fayetteville Technical Institute class will soon be doing a mock wedding.

It's really quite appropriate considering the mock wedding will be taking place in a class called "Wedding Etiquette."

The class, sponsored by the continuing education department of FTI, will cover over several nights all the basic details of having a nice small or large wedding.

The class is geared toward training wedding directors, but certainly would be of interest to brides, bridegrooms, mothers of brides or anyone else planning a wedding, says JoAnn Wood, a continuing education coordinator who came up with the idea for the class.

It will be taught by Paul Schafer, a wedding director and co-owner of a local bridal shop, with assistance from other wedding experts around town.

Schafer will be discussing such things as

wedding photography, music, catering, invitations, flowers, tuxedos and gowns, but he won't be recommending one local bridal business over the others, says Mrs. Wood.

Schafer will also be covering how and where to cut costs in your wedding.

Mrs. Wood predicts that the class will eliminate a lot of time bridal shop owners have to take to explain to a couple the basics of a wedding. Not only that, she adds, but it will also inform the bride about what kinds of expenses she's up against.

The sessions will be on Tuesday and Thursday nights, Nov. 18-Dec. 16 at Snyder Memorial Church on Westmont Drive. The cost of the class is \$5 a person.

Many people who have heard of the class just by word of mouth have already signed up for it, says Mrs. Wood, who hopes "Wedding Etiquette" will be an ongoing part of the continuing education program.

She reports that since she announced the class she has had all sorts of reactions and comments.

"When one woman heard about it she asked when FTI was going to have a class on how to get a divorce," said Mrs. Wood with a laugh.

For more information about the wedding etiquette class call JoAnn Wood at 484-5841 or Paul Schafer at 485-7777.

Pam Thompson, in bridal gown, and a wedding etiquette instructor, Aileen Rhew

### Letters To The Editor

## Embaling In A Classroom Setting

To the Editor:

I have been reading with interest about the school at Fayetteville Technical Institute for embalmers. It was really a surprise to read the names of all the funeral homes in the Sunday, Sept. 28 edition of The Fayetteville Observer-Times that had provided bodies for the school.

The question should be asked: If one of these funeral home directors should have a death in his family, or if one of his employees died, would that body be sent to FTI?

Can you imagine the agony families must be going through that have lost loved ones? Especially if they used one of these funeral homes within the last six months. The loss of a loved one is hard on a family, at best. We lost a brother on July 31, 1980. He was a licensed embalmer with the state of North Carolina. He had been in the business for about 15 years.

In my opinion, there are a few things that are too personal and private to be done in a classroom. Embalming a body is one of those things. Everything can't be learned in a classroom; there has to be on-the-job experience.

I am not speaking against the school in general. These students have to learn to embalm a body to get their licenses and a job. Why not send the students to the funeral home for this part of their training? It would cost much less to transport two or three students to the funeral homes than to have the body transported to the school. This way the body wouldn't be exposed to a classroom setting.

When these students graduate, and get a job, at times they will be on call 24 hours a day. Why not let them be on call now to go to the funeral homes when needed. This way they will know what to expect in the future.

Some of the funeral homes that were listed in The Fayetteville Observer-Times article are over 50 miles from Fayetteville. All these homes have licensed embalmers as well as places to embalm. Why not use them? The Golden Rule would be good for the funeral home to practice as well as the rest of us.

MRS. EVELYN JOHNSON

## NEED TO FINISH HIGH SCHOOL? G.E.D. WINTER QUARTER BEGINS DECEMBER 2, 1980

Prepare for your high school equivalency examination on FTI's campus. Morning, afternoon and evening classes are available Monday through Thursday.

Placement tests and registration are conducted each Tuesday and Thursday afternoon in Room 216B. Registration for winter quarter will be held Nov. 20 and 25.

Call Charles Smith at 323-1961, ext. 230, for details. This program is approved for VA benefits.

## Season's Last Fling

Enjoying the last riotous show of color in the rose garden at Fayetteville Technical Institute, Lori Sandy of Fayetteville displays a smile that matches the brightness of the flowers. The roses, slow to bloom in midsummer heat, always seem to put on a burst in the last

weeks before frost. Just a few days from now, frost will stop the show dead. The rose canes will grow bare. But fat buds will keep forming to produce next spring's first show.

Observer-Times Photo by Ken Cooke

Dr. Vijay S. Joshi lectures about one of Jupiter's satellites, Io, which experiences volcanic activity

By JULIE FARNSWORTH  
Sunday Staff Writer

More than three centuries ago, Galileo Galilei with his own telescope, discovered four of the 14 satellites which revolve around Jupiter.

Less than three years ago, the National Aeronautics and Space Administration's unmanned Voyager I and Voyager II confirmed Galileo's discoveries and other theories scientists formulated concerning natural phenomena which occur on the planet.

Inquiries have been answered since the space probes left earth in 1977, and educators are spreading the word about NASA's investigations into the universe.

One such educator, Dr. Vijay S. Joshi of Fayetteville Technical Institute, offers lectures and slide presentations free to schools, clubs, churches and civic groups. He, along with 28 other educators from around the nation, attended the Smithsonian Institute National Air and Space Museum training seminar in July.

The purpose of the seminar was to prepare instructors to teach the public, in layman's terms, some of NASA's space explorations, discoveries and the history of aviation.

Joshi, selected because of his teaching background, was funded by the technical institute to attend the week-long program and already has delivered two lectures on the Voyagers mission to Jupiter. He says his work marks a resurgence of interest among the public in space exploration.

"Since movies like 'Star Wars,' and 'The Empire Strikes Back,' people now are interested in space.

"Everybody cannot visit Washington, D.C. or NASA," the

physics instructor says. "We're spreading the news to create an interest. I can give some programs to astronomy students and change it for those who are not."

But whether you're an astronomer with your own observatory or if you just like gazing at the stars from your backyard on a warm evening, Joshi's slide presentation offers a fascinating glimpse into the solar system.

Jupiter, which is 11 times the earth's diameter, has a surface and atmosphere mainly composed of hydrogen, helium and sulfide gases. In fact, no space probe could land on the planet since its surface is not solid.

"Jupiter is not solid," Joshi says. "It is dense. One student asked me why not land on Jupiter, but the surface is not solid."

The probes, equipped with electronic recording devices and cameras used for gathering information, send messages to earth by radio signals.

Scientists wanted the Voyagers to answer some basic questions about the planet, such as the composition of the atmosphere, differences in temperatures on the planet surface and the composition of the planet's core.

The Voyagers are considered to be the fastest man-made space probes. Traveling more than 30,000 mile per hour, it took two years for the probes to reach Jupiter. They are not equipped to return to earth, but to journey deeper into the solar system.

About 5.7 million miles from Jupiter, the Voyagers were able to amass scientific information concerning one of the most interesting marks on the surface of the planet, the Great Red Spot. Scientists estimate the mysterious Great Red Spot, called so because of its red-orange coloration, is between 100 and 300-years-old.

Voyager I and Voyager II determined the spot is about 20,000 miles wide and is composed of hydrogen, sulfide and helium gasses, the same as the rest of the planet surface, which fight with each other creating gaseous storms.

To comprehend the size of the Great Red Spot, imagine a somewhat oval outline three times as wide as the earth.

Since the Voyagers were first conceived, scientists wanted to know changes which occur on the surface of the planet. Voyager I and II gathered information and pictures on the same side of the planet surface some four months apart. It was then, scientists discovered, that besides the earth, the second closest satellite to Jupiter, Io, was the only other body to have volcanic activity.

"We found out Io had volcanoes, and we didn't know that before the Voyagers," Joshi says. "Io is the only body with volcanic activity besides earth."

It was Io, and three other satellites, Europa, Ganymede and Callisto, which Galileo observed through his telescope in the 17th century. It was from these observations he confirmed the planets revolve around the sun in the Copernican theory of the solar system, which conflicted with the church's belief the earth was the center of the universe.

Another question concerns the planet's capability of producing internal heat. Jupiter and Saturn both generate approximately 2.7 times as much energy as it absorbs from the sun. Some theories suggest this heat was produced some 4.6 billion years ago, when the solar system was being formed.

The Voyagers also discovered a ring around Jupiter, similar to the rings around Saturn and Uranus. The composition of the ring however, is not known. According to Joshi, the rings are composed of a frozen material. No one knows

"We found out Io had volcanoes and we didn't know that before the Voyagers . . . Io is the only body with volcanic activity besides earth"

## Don't Be Lost In Space

whether these rings are made of ice, frozen water, or another solid chemical.

"The rings are composed of ice, but not necessarily frozen water, but frozen chemicals. Maybe it's ammonia. It's not water as we know it," Joshi says. "The rings also may have solid rocks in them."

Without the two space probes, scientists could only hypothesize about the composition of Jupiter. Some facts already were known, but others, such as Jupiter's rings, were certainly a discovery.

"They gave us things we did not know. We can't take good pictures of Jupiter or other planets from earth because of the atmosphere. We must take them outside our atmosphere."

The future of the Voyagers is to continue gathering information about planets in the solar system. Voyager I and Voyager II have left Jupiter. Voyager I is nearing Saturn and it is estimated Voyager II will arrive in August 1981.

"They will go deep into space, as it's not like a man-controlled rocket. They are not coming back."

Joshi says one problem with the Voyagers engineers foresee is weak radio signals. The deeper the probes travel into space, the weaker the radio signals become.

"There are nine planets in the solar system, and it's not like taking a car and going into five different places."

Joshi, who was born and educated in India, says his primary goal is to educate the public about the Voyagers mission and other aspects of space exploration.

"I'm an educator and my interest is making the public aware. I don't get paid to do this. I do it for free. Clubs and schools can contact me and I'll be glad to go."

# FAYETTEVILLE TECHNICAL INSTITUTE

## EVENING CURRICULUM COURSES

REGISTRATION: 10:00 A.M. TO 7:30 P.M., WED., NOV. 12  
 HORACE SISK GYM, FTI CAMPUS  
 WINTER TERM: DECEMBER 2 — MARCH 4

Who may attend: Persons who have completed high school or have attained the N.C. High School Equivalency (GED) scores. A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

Cost: In-state resident \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$198.50).

Payment: Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or Master Charge. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

Accreditation: FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits and is recognized as a Servicemen's Opportunity College (SOC). Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution.

Servicemen and Veterans: Army/Air Force tuition assistance is available to qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans Service or Student Development for information on V.A. requirements.

Availability of classes: All classes are filled on a first come, first served basis. FTI reserves the right to cancel courses due to insufficient enrollment or lack of qualified instructors.

COURSE NOTES: Courses listed followed by II or III are sequence courses and are normally required to be taken in order. Course numbers ending in A, B or C are continuation courses, and must be taken in order.

- (1) AHR 1139 Must have 2 years work experience or training.
- (2) Must have prerequisite course.
- (3) ISC 255 Requires permission of Dept. Chairperson.
- (4) RLS 202 Real Estate Math Refresher
- (5) RLS 285 Meets minimum req. for N.C. Salesman Exam (66 hrs.)
- (6) RLS 286 Meets minimum req. for N.C. Broker Exam (99 hrs.)
- (7) BMS 1134 Plumbing Code/Law: Review N.C. Plumbing Codes/Laws.
- (8) BMS 1135 Elec Code Review: Review N.C. Electrical Codes/Laws.

## GENERAL EDUCATIONAL DEVELOPMENT

### WHAT IS GED?

The high school equivalency program prepares the adult to take the tests of General Educational Development (GED) to determine if he/she can score satisfactorily on English, arithmetic, social studies, and science. It is a program of social studies, science and literature.

Adults who achieve the necessary scores are awarded a High School Diploma Equivalency Certificate by the North Carolina State Board of Education, from the State GED Office in Raleigh.

### REQUIREMENTS

The prospective student must be 18 years old, have 10-17 credits, and be advised only with consent of parent or guardian and school officials.

### GED VS

**HIGH SCHOOL DIPLOMA**  
A good education is increasingly important, and for individuals who have not completed high school, the GED certificate has become one of the best methods of furthering education.

GED test scores are widely used by technical institutes, community colleges, and other institutions of higher education in lieu of a regular high school transcript.

In 1978, 19,164 North Carolinians successfully completed the GED Exam. Should you have been included? Winter quarter schedule begins December 2, 1980.

### COST

The costs are minimal, tuition and student fees are \$6.25/quarter, and books are approximately \$40.00 for the entire course.

### PLACEMENT TEST/DATES

The GED Placement Exam is given every Tuesday and Thursday at 2:30 p.m. in room 216B, F.T.I. Campus. No appointment necessary.

For further information, call 323-1961, ext. 230.

### VA BENEFITS

For more information concerning VA benefits, contact: Frank Poveroni at 323-1961, ext. 395.

### LOCATION SCHEDULE

F.T.I.

# FAYETTEVILLE TECHNICAL INSTITUTE

## Off-Campus

### Adult Continuing Education Classes

LATE REGISTRATION AND CLASSES BEGIN  
TONIGHT and TOMORROW NIGHT

## WINTER TERM CLASSES AND LATE REGISTRATION BEGIN

## New FTI Dean Approved

By ROSE ANN FROBERG  
Of The Times Staff

The appointment of Robert L. Carter as the new Dean of Fiscal Affairs was approved Monday by the Fayetteville Technical Institute Board of Trustees.

The board also approved spending about \$60,000 for three construction projects on the FTI campus.

Carter, a Cumberland County native, is replacing William Stanley who is retiring at the end of this month. Stanley has been fiscal affairs dean since joining the FTI staff in 1964.

A certified public accountant, Carter is currently the assistant to the dean of instruction and has been at FTI for 13 years.

He received his undergraduate degree in accounting and his master's of business administration, degrees from the University of North Carolina at Chapel Hill. He has also studied law at UNC-Chapel Hill.

The three construction projects include building eight temporary classrooms, renovation of the greenhouse for a display area, and a school sign for the corner of Hull Road and Devers Street.

The temporary classroom building will cost approximately \$35,000 and will be located behind the gymnasium.

FTI President Howard E. Boudreau said the additional classrooms are desperately needed due to increases in student enrollment.

Since the 9 percent enrollment increase during the 1980 fall semester, "space is at a premium," Boudreau said. The school is also anticipating an additional 7.9 percent increase in enrollment for the 1981-82 academic year.

FTI will request the Cumberland County Board of Commissioners release \$38,114 from the school's construction bond fund and \$3,909 from FTI's repair fund for the Horace Sisk Building.

The remainder of the cost will come from special fund accounts and FTI will ask the Department of Community Colleges for permission to use those monies.

## FTI Offering TV Courses

Students may earn college credits by watching television this winter when Fayetteville Technical Institute offers two courses on Channel 4, the University of North Carolina network.

Video-taped courses in psychology and data processing will combine television lessons with home study and on-campus seminars for a complete learning package.

The introductory course in psychology, "Understanding Human Behavior," will explore the fundamentals of human behavior and focus on the contributions of major figures in the field. The five-hour credit course will begin Feb. 3 at 6:30 p.m. Weekly lessons will be repeated on Saturdays from 10-11 a.m.

"Making It Count" is an introductory course

designed to provide students with an understanding of the principles of computers and to provide business managers and professionals with knowledge of data processing vocabulary, systems and applications. The five-hour credit course will be telecast on Mondays and Wednesdays at 6:30 p.m. beginning Feb. 2.

No prerequisites are required for either course. Instructors will be available via telephone for information and assistance. Videotapes of each program will also be available at FTI.

Registration is being conducted by mail, but students may also register at one of the three orientation sessions on Tuesday, Wednesday or Thursday next week. For more information, call 323-1961, ext. 204 or 323-0447.

## FTI Plans 2 Courses For TV

## Lancaster Moderates FTI Series

Dr. Talmadge Lancaster, Fayetteville native and superintendent of the Tehran American School in Iran from 1976-78, will moderate Fayetteville Technical Institute's Great Decisions lecture series, which begins Feb. 5.

Great Decisions, sponsored by the Foreign Policy Association, is in its 10th year at FTI. Top authorities in government, education and private industry discuss current news topics in the series.

Dr. Joseph P. Mastro, N.C. State University political scientist and an expert in Soviet politics and foreign policy, is the first Great Decisions speaker. His topic at 7:30 p.m. Feb. 5 is "The U.S. and the Soviet Union: Dilemmas of Power and Peace."

Participants may register from 6:30 to 7:30 p.m. Feb. 5 at FTI's auditorium. Costs include a \$5 registration fee and a \$5 textbook. The series has been approved for both continuing education units and teacher renewal credit.

The sponsoring Foreign Policy Association is a national educational organization founded in 1918. The textbook contains opinion ballads for each topic for participants to complete. Results are compiled by the sponsor for

presentation to foreign policy makers in Washington.

Other scheduled speakers for the series include Findley Burns, former U.S. ambassa-

tor to Ecuador; and Carthage attorney and humorist H.F. "Chub" Seawell, Jr. The series continues on Thursdays through March 26.

## 'Great Decisions' Program

The "Great Decisions" program has long been an inspired idea, launched years ago by the United Nations Association and other patriotic organizations to help Americans learn about and think about global issues which have consequences for every hearthside.

Cumberland County, where the presence of Ft. Bragg adds a special international element, has long had a lively Great Decisions program sponsored by Fayetteville Technical Institute.

And this year, the program has raised itself out of the routine by devising a particularly important series of issues to be discussed on Thursday nights during February and March, and by lining up notable speakers on the issues.

Tomorrow night, for instance, Dr. Talmadge Lancaster, a Cumberland native, will speak on "From Cairo To Kabul," or

**HYPNOTHERAPY:** Stop-smoking and weight control clinics will be conducted today at the Fayetteville Technical Institute auditorium by John Greer, hypnotic therapist, sponsored by the American Lung Association. The smoking clinic will be at 6:30 p.m. with a fee of \$30, and the weight control clinic will be at 8:30 p.m. with a fee of \$25. Information: 867-5567.

"Oil, Islam, Israel, and Instability." With prices rising at the pump and for heating oil, who cannot be interested in this subject? Dr. Lancaster is former superintendent of the Tehran American School in Iran. He is typical of the knowledgeable speakers who will be on Great Decisions programs, speaking on subjects ranging from the political situation in Central America to the overarching question of food for a hungry world (the speaker will be former U.S. Secretary of Agriculture Bob Bergland on March 6).

This is not just a sit-and-listen program. It, in fact, encourages audience participation and gives generous time for give-and-take. Every Thursday night through March 26 in the FTI auditorium beginning at 7:30. Registration is available for credit under CEU and teacher renewal.

**SEXUAL ASSAULT:** A class in the problems surrounding sexual assault will be held from 7-9:30 p.m. beginning today at Fayetteville Technical Institute in the auditorium. Fee is \$5 and the class is open to prospective counselors and the general public. Register at 7 p.m. Wednesday at the FTI auditorium. Information: 323-1961, ext. 230.

**FAYETTEVILLE** Technical Institute will host its first annual co-recreational activities day Tuesday from 10 a.m. until 3 p.m. at FTI. Everyone enrolled at FTI is invited to participate in a number of sports and games. More information is available by calling John Smith at 323-1961, extension 263.

### Fayetteville Beautiful Plans

The Fayetteville Rose Garden at Fayetteville Technical Institute has been approved for accreditation by the All-America Rose Selections Public Garden Committee, it was announced recently at the Fayetteville Beautiful meeting.

As a result of this selection, the Fayetteville Rose Garden will receive ten plants of the four 1982 award winning roses. Roses removed from the garden in order to make room for new plants will be used in city planting. The Fayetteville Rose Garden is sponsored by the local Rose Society, Fayetteville Technical Institute and Fayetteville Beautiful.

Feb. 28 is the tentative date set for the pruning of the garden. The public is invited to attend the workshop and to assist with the pruning. Steve Deaton, a landscape designer, has presented recommendations and estimates of the cost for replanting the four corners of the rose garden, an approved project of Fayetteville Beautiful.

During the meeting Mrs. J. Lee Warren reported that due to increased costs of Christmas decorations, garden clubs will be asked to support the Market House committee. In the past Fayetteville Beautiful has undertaken the task of providing traditional decorations for the downtown landmark.

**GREAT DECISIONS:** Dr. Talmadge Lancaster, former superintendent of the Tehran American school in Iran, will be guest lecturer for the Great Decisions lecture series at 7:30 p.m. Feb. 12 in the FTI auditorium. His topic will be "From Cairo to Kabul: Oil, Islam, Israel and Instability." Fee charged. Information: 323-1961, ext. 353.

**DEATH AND DYING PROGRAM:** A program featuring the videotape "Death is Easy, Dying is Hard," will be held at 7 p.m. Feb. 13 in Cumberland Hall at FTI. Information: 323-1961, ext. 353.

**CROCHETING:** The Recreation and Parks Department and FTI will co-sponsor a class in crocheting from 9 a.m. to noon beginning Wednesday. Information: 483-1762.

**GREAT DECISIONS:** Dr. Talmadge Lancaster, former superintendent of the Tehran American school in Iran, will be guest lecturer for the Great Decisions lecture series at 7:30 p.m. Thursday in the FTI auditorium. His topic will be "From Cairo to Kabul: Oil, Islam, Israel and Instability." Fee charged. Information: 323-1961, ext. 353.

**DEATH AND DYING PROGRAM:** A program featuring the videotape "Death is Easy, Dying is Hard," will be held at 7 p.m. Friday in Cumberland Hall at FTI. Information: 323-1961, ext. 353.

**CROCHETING:** The Recreation and Parks Department and FTI will co-sponsor a class in crocheting from 9 a.m. to noon beginning today. Information: 483-1762.

**DEATH AND DYING PROGRAM:** A program featuring the videotape "Death is Easy, Dying is Hard," will be held at 7 p.m. today in Cumberland Hall at FTI. Information: 323-1961, ext. 353.

## Library Board Member Picked

Fayetteville resident Mary H. Hall was appointed Monday by the Cumberland County Board of Commissioners to replace H.D. "Cobby" Reeves on the public library board of trustees.

Hall will serve the remainder of Reeves' term, which ends in December. Reeves, who chaired the board, resigned in January citing frustration with the county's inaction on a site for a new central library.

Commissioners also appointed Fayetteville City Councilman Wayne Williams to the board which oversees the Fayetteville Technical Institute. Williams replaces Roscoe L. Blue, a former county commission chairman who died Jan. 28.

In other appointments, the commissioners named local pharmacist James R. Hickmon to the county Board of Health; Ike O'Hanlon to the Nursing Home Advisory Committee; Chaplain Jon Hubbard to the Youth Services Advisory Board as a representative of Pope Air Force Base; and five people to the county's Council on the Status of Women, including Florence Cain, Lynn Green, Frances Simone, Jean Smith and Dr. Carolyn Bennett.

Commissioners also approved several lease agreements Monday including the lease of space in the new Health Department building to the Southeastern Speech and Hearing Service.

### FTI Registration Date Set

Spring quarter registration for Fayetteville Technical Institute's day, evening and Ft. Bragg classes will be held Feb. 18 from 10 a.m. until 7:30 p.m. in the Horace Sisk gym. The spring quarter runs from March 10 through May 27 for all technical, vocational and general education classes.

In addition, the high school

general equivalency degree program is currently offering placement tests and registration for spring quarter every Tuesday and Thursday through March 3 in room 216B.

Registration for two 11-week courses dealing with gifted and talented children will be held Feb. 18 from 10 a.m. until 7:30 p.m.

**GREAT DECISIONS:** Dr. Talmadge Lancaster, former superintendent of the Tehran American school in Iran, will be guest lecturer for the Great Decisions lecture series at 7:30 p.m. Thursday in the FTI auditorium. His topic will be "From Cairo to Kabul: Oil, Islam, Israel and Instability." Fee charged. Information: 323-1961, ext. 353.

**DEATH AND DYING PROGRAM:** A program featuring the videotape "Death is Easy, Dying is Hard," will be held at 7 p.m. Friday in Cumberland Hall at FTI. Information: 323-1961, ext. 353.

**DRUG AWARENESS EDUCATION** will be the subject of a four-part class at FTI. It will be held March 10, 12, 17 and 19 from 7 to 9:30 p.m. in room 379, Cumberland Hall. Registration is \$5 and class size is limited. Teacher renewal credit is offered. For more information, call 323-1961, ext. 210.

ogists are Ginger Butler, Crystal Warren, Bill Weldon, Donna Williams and Sigrun Williams.

2-19-81 \*\*\*  
FAYETTEVILLE TECHNICAL INSTITUTE practical nursing course graduates have recently passed the North Carolina State Board Examination.

The 18 program graduates who are now certified to practice in the state are Pauline H. Besteder, Judy C. Biggs, Betty J. Bobo, Sonja Council, Mary M. Ebron, Marlene H. Erne, Joann Franckowiak, Regina V. Green, Donna M. Johnson, Deborah G. Larosh, Maria D. Miranda, Shelby Mullis, Dorothy L. Munch, Barbara M. Murphy, Carolyn L. Xendine, Teresa J. Pickett, Esther H. Smith and June B. Spain.

Five graduates of the radiologic technology program at FTI have also received their certification after passing the national examination by the American Registry of Radiologic Technologists.

The new registered technologists are:

DONALD NORLAND  
Chad Ambassador

## Envoy Set For Talk At FTI

U.S. Ambassador to Chad Donald Norland will be the guest speaker Thursday for Great Decisions, the weekly foreign policy lecture at Fayetteville Technical Institute.

Norland's topic will be "South Africa: Can Race War Be Avoided?" His lecture will be held from 7:30 to 9:30 p.m. in the Cumberland Hall auditorium, with a \$5 late registration fee collected at the door.

Norland was appointed ambassador to Chad in 1979. Previously he served as ambassador to Botswana, Lesotho and Swaziland.

A native of Iowa, Norland was graduated from both bachelor's and master's programs at the University of Minnesota and served in the U.S. Navy before joining the Foreign Service.

## Pump In Savings With An Old Idea

Paul Sharpe explains the mechanics of a heat pump, such as this one used for classroom demonstrations

By JULIE FARNSWORTH  
Sunday Staff Writer

What used to be considered the black sheep among the methods of heating and cooling the home is making a comeback.

The heat pump is no longer being ignored by the public, or thought of as an extra or alternative source of heating and cooling.

Paul Sharpe, department chairman of the air conditioning and heating curriculum at Fayetteville Technical Institute, says the principles behind the operation of the heat pump are old ones which the public is beginning to accept.

"When it first came out on the market, the heat pump got a black eye because of the failures in the mechanism. But they've perfected that now," Sharpe says. "There was a tremendous incidence of failures about 15 to 20 years ago, and in recent years, it's made a 180-degree turn."

The heat pump is becoming more popular because of less costly heating bills, according to M.H. Cooper, energy conservation supervisor with the Public Works Commission.

When comparing the cost of heating bills the homeowner can save as much as 50 percent with the pump than he could with an all-electric source of heat.

Comparing a heat pump to electric heat, the cost to the homeowner, for strictly heating bills, would be half. That's the rule of thumb, Cooper says.

In many cases, a pump can save the homeowner more than 50 percent of his regular bill if the house is well insulated in the floors, walls and ceilings. He advises storm windows and doors, weather stripping and caulking also be included in a well-insulated home.

Cooper says the cost of heating a home with gas is about equal to that of a heat pump, although oil is more costly.

The heat pump also is called a reverse

cycle refrigeration unit, as it works the opposite of a refrigerator.

"Most people are familiar with standing in front of a refrigerator and you can feel the hot air on the feet. We utilize that heat to warm the room. In other words, the heat that is normally dissipated we can bring back inside. We're extracting heat from the outside and bringing it inside."

The principle of operation is fairly simple; what occurs during the summertime is reversed in the winter.

In the summer, the heat pump functions exactly like an air conditioner. A refrigerant is circulated through an evaporator and cold air is blown inside the home. In the wintertime, heat is picked up from the outside atmosphere and is blown inside the house.

During the winter and summer, a refrigerant is circulated throughout the pump. The refrigerant, similar to freon, does not have to be changed, Sharpe says.

"Theoretically, it doesn't wear out," Sharpe says. The refrigerant can be lost through a leak in the pump, but as long as the machine functions properly, the fluid can last for years.

But while the monthly heating bills may be 50 percent less than that of electricity, what can be costly is the installation charge.

And with any central heat and air conditioning system, heat pumps are purchased by the ton. According to various dealers in Fayetteville, the minimum cost of a heat pump per ton is about \$800.

But dealers also are quick to add the total cost of the heat pump, including installation, depends upon any extra work which must be done, such as rewiring the home and the number of ducts and pipes which must be inserted. Another important factor in installation is the number of windows, any outside overhangs, and the location of the

house. Each heat pump then is custom fitted to each home.

Dealers agree it's difficult to estimate the cost of installation. Fred Dew of Central Heating and Air Conditioning, estimates installing a heat pump in a home with 1,650 square feet, which requires no extra work such as rewiring, would cost about \$2,400. He says a heat pump cost one family with a 1,550 square foot home \$2,200 but \$1,200 was spent on rewiring.

The heat pump mentioned so far is strictly an air-to-air system, but there also is a water-to-air heat pump system which is worth considering. It works much the same as the air-to-air system, except, the pump extracts heat out of water instead of the atmosphere. A water-to-air heat pump requires a well from which it draws its water for circulating. Cooper says originally it was believed a well had to be dug specifically for operating a water-to-air heat pump.

He says anyone who already has a well in the back yard can use it for the water-to-air heat pump, and not be concerned with digging a second well or worry about the well water being contaminated by the heat pump. The water is returned to the well and can be used.

He doesn't advise anyone drawing water from a lake as lake water generally is too cold.

Cooper says there are not enough water-to-air heat pumps in this area for utility officials to cite figures on the efficiency and cost. He does estimate, however, the water-to-air system saves the homeowner some 60 percent of his heating bill as compared to 50 percent with the air-to-air heat pump.

When considering a heat pump, whether air-to-air or water-to-air, Cooper makes two recommendations.

First, he advises an outdoor thermostat be installed which will save the homeowner energy and money. The heat pump has two

mercury bulbs. One regulates the heat pump and the other regulates the auxiliary heat to make up the difference of any heat loss or if the heat pump should malfunction or break down.

"We recommend in winter to set the thermostat at 68 degrees. Now if the thermostat falls to 66 degrees, it's the auxiliary which raises the temperature back up to 68 degrees, so it's on just a short time."

"If you turn the thermostat down at night from 68 to 60 degrees, and in the morning you turn it from 60 degrees back up to 68 degrees, you have raised the temperature more than two degrees."

"This means the auxiliary will stay on until it gets to 68 degrees and the auxiliary and the heat pump both are on. You're using energy to run the heat pump and energy to run the auxiliary, and this is bad. We then recommend an outdoor thermostat which will not allow the auxiliary to heat the house unless the outdoor temperature is less than, say, 20 degrees."

"This means the heat pump will do all the work and not the auxiliary. It will be a little slower warming the house but you'll save money and energy."

Cooper also advises installing a light indicating-thermostat which will warn the homeowner if there is a malfunction in the heat pump.

"If the heat pump fails, you cannot tell it inside the house. The auxiliary would come on automatically and some customers find that out 30 days later when they get their electric bill. A light-indicating thermostat inside the home will tell you if the heat pump is not working."

Sharpe says the Fayetteville area is conducive to using a heat pump.

"The winters are mild enough where you do well on just a heat pump. You don't need an additional means of heat any more than someone who had an all-electric heat source, or gas or oil."

2-20-81  
A NUTRITION workshop will be sponsored Wednesday by the Fayetteville Area Health Education Center and the Cumberland County Nutrition Council.

It will be held from 2:30 to 5 p.m. in the auditorium at Fayetteville Technical Institute.

The workshop will be conducted by Dr. Marie Fanelli, assistant professor in the School of Public Health at the University of North Carolina at Chapel Hill.

The workshop is being provided at no charge, but interested persons should call 483-7130 to pre-register.

2-20-81  
FTI will conduct a drug awareness education class March 10, 12, 17 and 19 from 7 to 9:30 p.m. in room 379 in Cumberland Hall.

A fee will be charged. More information can be obtained by calling 323-1961, extension 210.

GREAT DECISIONS: The Great Decisions lecture series continues with "South Africa: Can Race War Be Avoided?" Speaker will be Donald Norland, U.S. ambassador to Chad. The lecture will be 7:30-9:30 p.m. today in the FTI Auditorium. 7-3-81

GREAT DECISIONS: Findley Burns, former U.S. ambassador to Ecuador, will speak on "Central America & the Caribbean: New Earthquake Zone," at 7:30 p.m. Thursday in the FTI auditorium as part of the Great Decisions lecture series. Admission is free. T-3-2-81

ANTIQUES SHORT COURSE: An antiques short course will be held this month at the Fayetteville Museum of Art. A class in oriental rugs will be held from 7-10 p.m. March 10 and 11. To register, contact FTI or the museum for a form. Fee is \$5. T-3-3-81

DRUG EDUCATION: FTI will conduct a drug awareness education class from 7-9:30 p.m. March 10, 12, 17 and 19 in Room 379, Cumberland Hall. Registration is \$5, class approved for teacher renewal credit. Information: 323-1961, ext. 210.

PUPPET MAKING: The Recreation and Parks Department will offer a puppet making class for ages 6-8 beginning March 9 at Honeycutt Recreation Center. Information: 483-1762. T-3-3-81

## FTI Gets Optimistic Reports On State, Federal Funding

By JOYCE EVANS  
Staff Writer

WAYNE WILLIAMS  
Installed On Board

Fayetteville Technical Institute has received optimistic messages from state and federal governments amid the threat of cuts in higher education at state and federal levels.

Cumberland County legislative delegate, Lura Tally who is also a FTI board member, told the board of trustees Monday that the education committee "has been making a pitch" for the community college system's equipment budget.

A \$34 million equipment budget request is among the countless items for the General Assembly's appropriation of funds.

FTI would get \$1.3 million of the

budget for the 58 schools in the system, if appropriated.

Equipment is the number one priority at FTI despite the "critical" shortage of space.

"We think we can hold on to some equipment money because of the move to attract industry to the state," Tally said.

"You cannot train students with obsolete and worn out equipment," she said.

Although the General Assembly is looking for ways to cut the base budget which is "very thin and doesn't have very much to cut," Tally said she is optimistic the equipment funds will be approved.

"Most of the equipment at FTI is 20 years old and if you train for modern industry, you must have

adequate equipment," Howard Boudreau, FTI president, said.

Secretary of the Department of Education Therrell Bell said he will try to give the community colleges more voice in education, according to Harry Shaw, board chairman.

"Right now, we have very little influence in the department of education," he said. Shaw said Bell noted that the community colleges represent 30 percent of the students in higher education, but federal funding reflects does not.

There's still talk about dismantling or scaling down the education department, but Bell will probably head an education agency if that happens, according to reports.

The proposed cuts in federal grants and student loans won't af-

fect FTI as much as some other state institutions, but the Human Resources Development project cut would, Shaw said.

Currently, FTI has about 15 students and three faculty coordinators of the federal program who would be affected if the program is discontinued, Boudreau said.

This program provides funds for people on welfare to attend school for job training, with the hope they'll become employed and taken off welfare roles.

Critics of the program say that it has not been successful because people who get the training don't hold down a job and generally go back on welfare.

Shaw and board members Steve Satsky and Bruce Pulliam recently

attended a legislative seminar in Washington, D.C. where they met with Congress members and Bell.

In an unrelated matter, City Councilman Wayne Williams was sworn in by District Court Judge Sol G. Cherry to fill the unexpired term of Roscoe L. Blue, who died Jan. 28.

Formerly a real estate appraiser and consultant, Williams is a business development officer for Peoples Bank and has served in that capacity since 1979.

The board also approved a resolution recognizing Blue's contributions to the FTI board and the school.

"As a valued member of this board, a buildings and grounds and

finance committee member, we express our loss and sympathy to his family," he said.

William Stanley, dean of fiscal affairs serving his last day at the school, was awarded a plaque for his dedicated services to the institution.

Stanley has been managing FTI's fiscal affairs since March 1964 until Monday when he retired.

Robert Carter, former assistant dean of instruction for scheduling classes at FTI, was appointed in January to replace Stanley as dean of fiscal affairs.

Carter, a Cumberland County native, began his career at FTI as a business administration instructor in 1967.

## FTI Trustee Member Sworn In

Fayetteville City Council member Wayne Williams was sworn in as a new member of the Fayetteville Technical Institute Board of Trustees Monday by Cumberland County District Court Judge Sol C. Cherry.

Williams, manager of the McPherson Church Road branch of Peoples Bank and Trust Co., was appointed by the Cumberland County Commissioners in February to fill the unexpired term of the late Roscoe L. Blue.

Blue's term on the 12-member board was to expire June 30.

Trustees chairman Harry F. Shaw lauded Blue as Williams was installed.

"If he were an alumni of any school, he was an alumni of Fayetteville Tech," Shaw said about the longtime board member, who died Jan. 28.

Shaw also praised retiring dean of fiscal affairs William P. Standley, who attended the trustees meeting on his last working day of 17 years' employment.

"Since I have been on this board I have grown to admire him and have never worried about our fiscal affairs," said Shaw. "I think we can sum it up in two words: well done, Bill Standley."

Attending the meeting with Standley was his replacement, Robert L. Carter, who before his appointment to dean of fiscal affairs served as assistant dean of instruction at FTI. Carter, who has worked at FTI for 13 years, is a certified public accountant.

The board, upon motion by finance committee chairman Thornton W. Rose, approved a motion giving Carter the authority to sign vouchers with either President Howard E. Boudreau or Vice-President William E. Sease and one giving him authority to countersign all warrants disbursing local funds, subject to approval by the county commissioners.

If approved by the commissioners, Carter's signature must appear on all warrants issued by the college, effective April 1.

FAYETTEVILLE TECHNICAL INSTITUTE NEWS:  
A drug awareness class will be held March 10, 12, 17 and 19 from 7 to 9:30 p.m. in Cumberland Hall. Teacher renewal credit has been given for the \$5 class. For registration information, call 323-1961, ext. 210.

THE FTI HORTICULTURE Club has been invited to present an exhibition in the Southern Living Show now underway in Charlotte.

Club member Bert Ayers designed the layout, which the members constructed themselves. Titled "Naturally Contemporary," it is built out of water, wood, stone and plants.

## Get Involved!

If you want an independent assessment of U.S. policy and prospects in the volatile Latin American region, free from the claims of the politicians or the pundits (like us), you can get it right here in Fayetteville on Thursday. Findley Burns, former U.S. ambassador to Ecuador, will be the speaker at the public forum program of "Great Decisions" at 7:30 p.m. in the auditorium at Fayetteville Technical Institute. Appropriately, his topic is: "Central America and the Caribbean: New Earthquake Zone." Take part, and be a better-informed citizen about a subject that may impinge on every American hearthside.

VOLUNTEERS ARE NEEDED for the Fayetteville Urban Ministry's Adult Reading Program. A 12-hour tutor training class will be held March 10, 12, 17 and 19 from 6:45 to 10 p.m. at Fayetteville Technical Institute. Pre-register by calling 483-5944.

FAYETTEVILLE TECHNICAL INSTITUTE

THERE'S STILL TIME  
LATE REGISTRATION

For SPRING TERM  
ON CAMPUS — FT. BRAGG  
DAY AND EVENING CURRICULUM COURSES

REGISTRATION: 11:00 A.M.-7:30 P.M. Monday, March 9, 1981

Students may register for On-Campus or Ft. Bragg, day or evening courses by coming to the F.T.I. campus (Horace Sisk Gym) on March 9, 1981.

COST: In-state resident: \$3.25 per quarter hour (\$39.00 maximum)  
Out-of-state resident: \$16.50 per quarter hour (maximum \$198.50)  
Activity fee: \$1.25

ALL TUITION AND FEES MUST BE PAID AT TIME OF REGISTRATION

Spring Quarter Classes Begin Tuesday, March 10, 1981

For further information, contact Admissions Office

FAYETTEVILLE TECHNICAL INSTITUTE  
1100 Dewey Street  
Fayetteville, N.C. Tel. 323-1961, or after 5 P.M. 323-0447.  
Accredited by the Southern Association of Colleges & Schools.  
"An Equal Opportunity Institution"

# FAYETTEVILLE TECHNICAL INSTITUTE

## EVENING CURRICULUM COURSES

REGISTRATION: 10:00 A.M. TO 7:30 P.M., WED., FEB. 18  
 HORACE SISK GYM, FTI CAMPUS  
 SPRING TERM: MARCH 10 — MAY 27

Who may attend: Persons who have completed high school or have attained the N.C. High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

Cost: In-state resident \$3.25 per quarter hour (maximum \$39); out-of-state student, \$16.50 per quarter hour (maximum \$198.50).

Payment: Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or Master Charge. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

Accreditation: FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits and is

recognized as a Servicemen's Opportunity College (SOC). Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution.

Servicemen and Veterans: Army/Air Force tuition assistance is available to qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans' Service or Student Development for information on V.A. requirements.

Availability of classes: All classes are filled on a first come, first served basis. FTI reserves the right to cancel courses due to insufficient enrollment or lack of qualified instructors.

COURSE NOTES: Course titles followed by II or III are sequence courses and are normally required to be taken in order.

Course numbers ending in A, B, or C are continuation courses, and must be taken in order.

AHR-1139, HVAC Proportional Controls: Must have two years work experience in field or previous training in related areas.

BMS-1135, Electrical Code Review: Review of applicable North Carolina electrical code/law.

RLS-202, Real Estate Mathematics: Recommended for students who require math refresher. (May be taken in conjunction with other Real Estate courses.)

RLS-293 or 294, Prerequisites Required.

RLS-286, Real Estate Fundamentals and Principles (Broker): Meets minimum requirements to take North Carolina Brokers Examination. (99 classroom hours.)

# County Transit Project Shelved

By JOHN MINTER

Cumberland County transportation planners on Tuesday abruptly announced termination of a five-month-old county bus service demonstration project.

The two rural routes, the first in North Carolina, will be cancelled March 29, seven months early, County Transportation Planner Rick Heicksen said Tuesday.

Heicksen said the planners recommended the bus service's termination to County Manager Harry Perkins, who agreed the service should be terminated.

Heicksen blamed the bus service's termination on cancellation by Wheatley Motors of a management contract, low ridership and the impending end of CETA funding for bus drivers.

Cumberland Transportation Service buses began covering the two routes on Oct. 13. One route ran through Hope Mills to the Cross Creek Mall and one from the Market Square to Godwin.

The CTS buses ran three times per day and tied into

See BUSES, Page 7-B

## Buses

the Fayetteville Area System of Transit system, permitting CTS passengers to transfer onto the FAST system.

The demonstration routes are part of a larger countywide transportation plan calling for five additional rural routes, shared-ride taxi service and door-to-door service for elderly and some human service agencies.

Heicksen said transportation planners will evaluate data collected during the demonstration project and re-

vised projections for the countywide plan.

He said he hoped to set up another demonstration by next year using the new projections.

Heicksen said planners learned that the CTS fare schedule is adequate. Regular fares are 75 cents. Fares for the elderly (over age 59) and handicapped are 50 cents.

For \$2 (\$1.50 for elderly and handicapped) a CTS rider can ride downtown, ride the FAST system all day any number of

times, then catch the CTS service back home.

Heicksen said there were no problems with the transfers to the FAST system. He said a higher level of service (more daily runs) were required.

The CTS service also provided transportation for the county's Mental Health Center clients between regular runs.

Increasing the level of service, Heicksen said, would interfere with service to the Mental Health Center and

other human service agencies.

Sources contacted Tuesday said Al Wheatley cancelled his management contract because of problems with CTS's CETA employees.

Sources said one of four drivers was fired recently and another quit.

The sources said the service's small staff made it difficult to provide service when one or more employees were not at work.

And, if someone must start

work downtown at 9 a.m., they have to catch a 7 a.m. bus.

Benny Porter Jr. rode the Cumberland CTS bus for the first time Tuesday evening, catching the 6:50 p.m. run from the Cross Creek Mall.

Porter said he is a student at Fayetteville Technical Institute.

He said he never rode the bus in the past because of CTS's schedule.

Porter said he normally walks or "thumbs" the nearly

four miles from his home in Hollywood Heights subdivision to the Mall, where he catches a FAST bus to FTI in time for 12 noon or 1 p.m. classes.

He said he normally gets out of class about 7:30 p.m., too late to catch the CTS bus which leaves the Mall at 6:50 p.m.

Tuesday, because of his final examination schedule, Porter was able to take advantage of the CTS service.

During his interview with The Fayetteville Times, he

learned that the bus service would be terminated.

Porter said he would "most definitely" use the CTS service if he could catch a bus getting him to class on time.

Joseph Banks, a Fayetteville State University student, is a regular CTS rider.

Banks said he catches a CTS bus which passes near his house in the Strickland Bridge Road area about 6:53 a.m. and by transferring to the FAST system, gets to FSU by 8:05 a.m.

## Sorting Out Food Facts And Myths

By MARSHA LAMM  
Staff Writer

Does gelatin really make your nails stronger? Are natural vitamins better than synthetic vitamins? Can artificial coloring agents cause hyperactivity in children?

If you answered no to those three questions, you would rate an A from nutritionist Dr. Marie Fanelli of the Department of Public Health at the University of North Carolina at Chapel Hill.

In leading a nutrition workshop at Fayetteville Technical Institute last Wednesday, Fanelli attacked many of the common beliefs held by laymen and professionals concerning nutrition. All too often members of her audience were confused by questions like those listed above.

And there were questions from the audience, such as "Is there a vitamin to prevent baldness?" or "Does Vitamin E prevent aging?"

One woman questioned Fanelli's disclaimer concerning gelatin by saying, "Well, gelatin certainly made my nails stronger."

Sponsored by the Fayetteville Area Health Education Center and Cumberland County Nutrition Council, the workshop on "Food Facts, Facts and Myths" was open to the public and drew more than a hundred professionals and laymen interested in nutrition.

Fanelli presented a true or false test in opening the workshop. In response to a question about gelatin, she told her audience that what can help strengthen your nails is more protein. By showing a breakdown of the chemical composition of gelatin, she demonstrated to the audience what a poor source of protein it is.

"Many factors affect nail growth," she said, listing wear and tear or use of nail polish remover as examples.

On the subject of synthetic vitamins versus natural vitamins, Fanelli told her audience that a vitamin is defined as a specific chemical substance with a purpose to fulfill in the body. Because synthetic and natural vitamins do not differ chemically, they will fulfill the same purpose in the body.

"Commercials and advertisements often tell you that natural vitamins are much more potent than synthetic vitamins," she said. "The body is not going to care where that Vitamin C came from — whether it is from a pill or an orange. It's all the same to the body."

The presence of coloring agents in food has been the source of much controversy, but Fanelli quickly laid rumors to rest which connect it with hyperactivity in children.

"It doesn't cause hyperactivity in all children," she said. "Some children are more susceptible to coloring agents in food but most are not."

Research has shown that changes in diet have a greater effect on hyperactivity than the presence of artificial coloring agents, Fanelli added.

Can honey, a natural form of sugar, be safely consumed by diabetics?

No, said Fanelli, who showed her audience that honey is by far more harmful to a diabetic than table sugar which is 100 percent sucrose. It enters the blood system much faster than ordinary table sugar.

Fanelli also told her audience that actophilus milk can be served in place of whole milk to children with lactose intolerance. Other foods lactose-intolerant children may consume include cheese, yogurt, cottage cheese and cultured buttermilk.

If small amounts of a vitamin are necessary to maintain the body, is it true that larger amounts are better for your health?

That's a common misunderstanding, said Fanelli. But there is a possibility of toxicity over a period of time if fat-soluble vitamins are taken in excessively large doses. Water-soluble vitamins have a slightly less possibility of toxicity because they are not absorbed by the fat cells of the body, said Fanelli. Excessive amounts of water-soluble vitamins are excreted but Fanelli warned her audience that practice puts unnecessary stress on the kidneys.

Are conventionally grown and marketed foods as safe and nutritious as health, organic and natural foods?

Of course, said Fanelli, who said it is hard to define exactly what "natural" means.

On the topic of natural foods, Fanelli said it is hard to define exactly what "natural" means.

"We have naturally occurring toxicants in our food supply that can be very harmful," she said, "but they are present in only trace amounts — like arsenic in shrimp, cyanide in lima beans and solanine in potatoes."

The nutritionist also warned her audience to be aware of sources of nutrition information which appeal to emotions through fear. The USDA and Federal Trade Commission help protect consumers to an extent, she said, but often literature will allude, make indirect claims and never give references as a source of information. Read but read critically, she cautioned.

"Question anything that recommends self diagnosis," she said. "Such a practice may be more harmful than beneficial, and it may delay treatment of a critical illness."

"Also avoid hear-say evidence and ads where someone says 'Take this — it cured my arthritis.' That's just one woman and it doesn't mean that it's going to cure your arthritis too."

**FAYETTEVILLE TECHNICAL INSTITUTE**

## THERE'S STILL TIME LATE REGISTRATION

**For SPRING TERM  
ON CAMPUS — FT. BRAGG  
DAY AND EVENING CURRICULUM COURSES**

**REGISTRATION: 11:00 A.M.-7:30 P.M. Monday, March 9, 1981**

Students may register for On-Campus or Ft. Bragg, day or evening courses by coming to the F.T.I. campus (Horace Sisk Gym) on March 9, 1981.

**COST:** In-state resident: \$3.25 per quarter hour (\$39.00 maximum)  
Out-of-state resident: \$16.50 per quarter hour (maximum \$198.50)  
Activity fee: \$1.25

**ALL TUITION AND FEES MUST BE PAID AT TIME OF REGISTRATION**

**Spring Quarter Classes Begin Tuesday, March 10, 1981**

For further information, contact:  
Admissions Office  
**FAYETTEVILLE TECHNICAL INSTITUTE**  
Hull and Devers Streets  
Fayetteville, N.C. Tel. 323-1961, or after 5 P.M., 323-0647.  
Accredited by the Southern Association of Colleges & Schools.  
"An Equal Opportunity Institution"

**Free Film Today At FTI**

TODAY — The spring schedule of the free Friday Film series, sponsored by Fayetteville Technical Institute and the Public Library, begins today at 8 p.m. in the Cumberland Hall auditorium at Fayetteville Technical Institute. The first film of the series is "One Sings, The Other Doesn't," directed by Agnes Varda. O 3-13-81

**FTI Nursing Students Tops**

Fayetteville Technical Institute nursing students scored higher in the recent five-part licensing examination than both the state and national averages, says Steve Plummer, public information officer for the school. O 3-13-81

**DRUG EDUCATION: FTI will conduct a drug awareness education class from 7-9:30 p.m. Tuesday and Thursday in Room 379, Cumberland Hall. Registration is \$5, class approved for teacher renewal credit. Information: 323-1961, ext. 210. T 3-16-81**

**Roses Garden Club Topic**

Selection and culture of roses was Mrs. Sanford Rackley's topic for the recent meeting of the Greenwood Garden Club at Green Valley Country Club. Mrs. Rackley, who has been growing roses for 16 years, is a member of the Fayetteville Rose Society and has worked with the rose garden at Fayetteville Technical Institute. Mrs. Carey Pate won a blue ribbon for her table arrangement. O 3-19-81

**FAYETTEVILLE TECHNICAL INSTITUTE**  
Fayetteville, North Carolina

## POSITION VACANCY

**POSITION:** Dean for Student Development

**QUALIFICATIONS:** An earned doctorate in the Student Development field is preferred. A minimum of a Master's Degree with a major concentration in counseling/student services is required. A minimum of 10 years experience in a postsecondary educational setting with supervisory responsibilities in Student Services or a closely related field is desired.

**JOB DESCRIPTION AND RESPONSIBILITIES:** The Dean for Student Development reports to the Vice President and is responsible for the total operations and functions of Student Development at FTI. Functions include recruiting, admissions, testing, registration, student records, orientation, guidance, counseling services, student housing, student activities, graduate job placement, and alumni follow-up.

**LENGTH OF EMPLOYMENT:** 12 Months - Reappointment Annually

**DATE OF EMPLOYMENT:** July 1, 1981

**SALARY:** Commensurate with Education and Experience

**CLOSING DATE FOR RECEIVING APPLICATIONS:** April 15, 1981

Contact: Mr. John E. McDaniels  
Personnel Officer  
Fayetteville Technical Institute  
P. O. Box 35236  
Fayetteville, N. C. 28303  
919-323-1961 Extension 246 or 373

AN EQUAL OPPORTUNITY EMPLOYER

FAYETTEVILLE Technical Institute is offering a number of off-campus courses during the coming months.

Three courses will be held at Irwin Junior High on Knox Street at Fort Bragg.

A course in Korean culture will be held at Irwin on Wednesdays from April 1 to June 17. A second series of classes on the same subject will be held at Spring Lake Junior High School March 30 through June 15.

Drug awareness classes will be held March 3 and April 2, 7 and 9 at 6:30 p.m. at Irwin.

And a course in effective communication will be held every Monday and Wednesday from 6:30 to 9:30 p.m. March 30 through May 13 at Irwin.

FTI, the State Personnel Development Division and Fayetteville State University will sponsor courses to help state and county workers.

Courses in human relations and basic accounting will be held on the FSU campus.

The human relations course will meet Mondays from March 23 to May 25, and the accounting course will meet on Tuesdays from March 24 to May 6. Fees will be charged.

More information on all courses can be obtained by calling FTI. O 3-20-81

**FRIDAY FILM CONNECTION:**  
"Greaser's Palace" shows at 8 p.m. March 27 in the FTI Auditorium. Admission is free. T 3-21-81

## FAHEC Will Lease Dental Equipment

By JOYCE EVANS  
Staff Writer

The Fayetteville Area Health Center's Board of Directors Tuesday voted unanimously to lease \$35,000 worth of dental lab equipment between Fayetteville Technical Institute and the Cumberland County Health Department.

For a nominal fee of \$1 each per year, the health department and FTI will lease the equipment for educational purposes with the provision that FAHEC maintains control.

Both institutions had proposed to lease the equipment, but a committee appointed in January to study the matter recommended distributing it between both groups.

Dr. David Swanson, director of family medicine, told that they desperately need the space where the dental equipment is housed for the family practice medicine area.

Since FAHEC only uses the equipment about twice per month, it was agreed that the possibility of leasing the equipment would be an answer to the space problem.

The Cumberland health department had proposed to set up a teaching climate for University of North Carolina School of Dentistry students rotating from Chapel Hill.

The health department has a full-time dentist staff and is willing to accept the equipment for the purposes of education and providing a service for indigent patients, Dr. Harold Godwin, FAHEC's director, told the board.

The committee studied the alternatives, and met with both FTI administrators and the health department's to establish priorities for each group and to propose to the board which program could best use the equipment.

After considering the alternatives and both proposals, the committee recommended leasing the Panorex X-ray machine, two operative dental chairs and associated equipment, one non-operative chair and hand drills to the health department.

FTI would get the standard X-ray unit with chair, dark room equipment and one operative chair and associated equipment.

They also would be required to repair any damages to the facility after moving the equipment.

In other business, the board voted to pass a resolution in appreciation to board member, Col. Ellis Hall Jr., executive officer of Womack who is resigning from the board.

Hall has accepted a position as departmental administrator at the East Carolina University School of Medicine's Family Practice division effective May 1.

He will receive a plaque in appreciation for the services rendered to FAHEC.

## Bergland To Speak At FTI

Former U. S. secretary of agriculture Robert Bergland will be the guest speaker tonight for Great Decisions, the weekly lecture series in progress at Fayetteville Technical Institute.

Bergland, who appointed to the cabinet position by former president Jimmy Carter in 1977, will speak on "Food: Humanity's Need, America's Interest."

Great Decisions is sponsored by the Foreign Policy Association and is an annual series of lectures featuring nationally-known speakers on current foreign policy issues.

The series is held at FTI each Thursday from 7:30 to 9:30 p.m. in the Cumberland Hall Auditorium.

Bergland, 52, a native of Rosseau, Minn., served former secretary of agriculture Orville Freeman from 1961 to 1968. He ran successfully for Congress in 1970 and was re-elected three times, serving on the House Committee on Agriculture and Small Business.

He resigned from Congress in January, 1977 when he was confirmed as Carter's secretary of agriculture. He served in that post until his term expired in January, 1981.

CHUB SEAWELL

**Attorney To Speak At FTI**

H. P. "Chub" Seawell Jr., a Carthage attorney, author and humorist, will be the guest speaker Thursday 7:30 p.m. in Cumberland Hall auditorium for the final segment of the Great Decisions lecture series at Fayetteville Technical Institute.

Seawell will present a satirical look at the future. "The World in 1981: American Power in a Troubled Age." A member of the North Carolina Bar Association for over 50 years, Seawell was the Republican gubernatorial candidate in 1952. A humorist with a conservative angle, he is the author of two books of satire, "Sir Walter, The Earl of Chatham, or Call Your Next Case," and "Satire in Solid Sketches."

**Art Film At FTI 3-27-81**

TODAY -- "Greaser's Palace" is the free art film tonight at 8 p.m. in Fayetteville Technical Institute's Cumberland Hall auditorium. It's part of the spring schedule of the Free Friday Film series sponsored by FTI and the Public Library.

**FRIDAY FILM CONNECTION:** "Valerie and Her Week of Wonders" shows at 8 p.m. April 10 in the FTI Auditorium. Admission is free. T 3-31-81

**SCHOOL LAW:** The Cumberland County Association of Classroom Teachers and Fayetteville Technical Institute are co-sponsoring several courses on school law and the teacher. "The Elementary Teacher and Liabilities in Physical Education" will be held from 5-9 p.m. April 10, and from 9 a.m. to noon, 1-4 p.m. April 11 in the Paul H. Thompson library at FTI. 3-31-81

**ARTS AND CRAFTS:** The Fayetteville Recreation and Parks Department and FTI will co-sponsor arts and crafts classes, including cake decoration, silk flowers, tote painting, quilting and sewing, beginning the week of April 6. Information: 483-1762. T 3-31-81

**SCHOOL LAW:** The Cumberland County Association of Classroom Teachers and Fayetteville Technical Institute are co-sponsoring several courses on school law and the teacher. "The Elementary Teacher and Liabilities in Physical Education" will be held from 5-9 p.m. April 10, and from 9 a.m. to noon, 1-4 p.m. April 11 in the Paul H. Thompson library at FTI. 7-4-81

**ARTS AND CRAFTS:** The Fayetteville Recreation and Parks Department and FTI will co-sponsor arts and crafts classes, including cake decoration, silk flowers, tote painting, quilting and sewing, beginning next week. Information: 483-1762.

**FRIDAY FILM CONNECTION:** "Valerie and Her Week of Wonders" shows at 8 p.m. April 10 in the FTI Auditorium. Admission is free. T 4-4-81

**ARTS AND CRAFTS:** The Fayetteville Recreation and Parks Department and FTI will co-sponsor arts and crafts classes, including cake decoration, silk flowers, tote painting, quilting and sewing, beginning next week. Information: 483-1762. T 4-4-81

**SCHOOL LAW:** The Cumberland County Association of Classroom Teachers and Fayetteville Technical Institute are co-sponsoring several courses on school law and the teacher. **SCHOOL LAW:** The Cumberland County Association of Classroom Teachers and Fayetteville Technical Institute are co-sponsoring several courses on school law and the teacher. "The Elementary Teacher and Liabilities in Physical Education" will be held from 5-9 p.m. Friday and from 9 a.m. to noon, 9-14 p.m. Saturday in the Paul H. Thompson library at FTI.

**TO REGISTER:** Come to the location of your choice on the day the class is scheduled to begin. A limited number of students will be registered on a first come, first served basis for each class. Registration fee is \$5.00 per student. Persons 65 years of age or older are fee exempt.

**ARTS AND CRAFTS:** The Fayetteville Recreation and Parks Department and FTI co-sponsor arts and crafts classes, including cake decoration, silk flowers, tole painting, quilting and sewing, beginning this week. Information: 483-1762.

**'Lucky' FTI Awaits Fund Hike**

By JENNIFER CALDWELL  
Of The Times Staff

Fayetteville Technical Institute President Howard E. Boudreau told members of the board of trustees Monday that he expects to receive a 5 percent increase from state funds for the coming year.

Earlier, community college administrators and other school officials had been told to expect a 6 percent cut from the General Assembly.

"Because our enrollment is increasing, we're one of the lucky ones," Boudreau told the board. He expects full-time curriculum enrollment to top 6,000 in the fall.

The budget increase would give FTI a tentative state budget of \$9,209,501 for the fiscal year, which begins July 1.

This estimated allotment does not include any salary increases and would actually provide less administrative money, said Boudreau.

"We stand to lose two to three positions," he said. "But we can absorb it. Smaller institutions can't."

The board also discussed the local budget in general terms, noting County Manager Harry Perkins has told all department heads he expects to turn in a "zero growth" budget.

"If they say zero growth there's no way we can make it," Boudreau said in a finance committee meeting preceding the meeting of the full board.

Finance director Bob Carter said the trustees could expect to face a 20 percent, or \$100,000 increase in utilities. Supplies and materials will also increase by about 10 percent, he said.

The ratio of state to county allocations is about 85:15, Carter said. The budget will be discussed in detail at the next meeting, May 4.

In other business, the trustees voted to approve several budget revisions including a revision resulting from a larger state appropriation received midway through the year for Adult Basic Education programs.

FTI was awarded an additional \$20,000 on top of the school's original \$23,986 "by asking for it," Carter said.

He explained that other community colleges in the state didn't spend their own appropriations, which reverted back to the general fund for other use.

Funds in a local construction bond fund for the renovation of the Horace Sisk building were moved to allow partial payment for the trustee's building project.

This \$53,272 building project, through inflation, will now cost approximately \$60,000, Carter said.

**Education Fees May Rise**

RALEIGH — Course fees for extension offerings at Fayetteville Technical Institute and the state's other 58 community colleges may be raised from \$5 to \$8 this morning.

The base budget appropriations subcommittee on education is scheduled to meet at 11:30 a.m. where recommendations made in March about continuing education course prices will be reconsidered.

The \$3 raise, if approved, is much smaller than earlier recommendations which would have doubled or tripled prices, confirmed Rep. Lura Tally, D-Cumberland.

In March, committee members tentatively voted to charge \$10 for vocational and \$15 for avocational courses offered throughout the state's continuing education departments. All of these courses are now \$5.

"The two different systems would be a bookkeeping nightmare," said FTI president Howard Boudreau, who was also concerned that the larger price recommendations of \$10 and \$15 might keep students from taking extension courses.

**A SEMINAR** on "How To Confront a Rapist" seminar will be held May 7-8 at the Fayetteville Technical Institute.

The North Carolina State University Department of Continuing Education is sponsoring four seminars in four cities across the state for. The seminars are designed for law enforcement officers, medical personnel, prosecutors and counselors.

Registration forms may be obtained from the Division of Continuing Education at NCSU or by calling Frank Emory at 737-2261.

**THE AMERICAN CANCER SOCIETY** has scheduled three fundraising events in May. On May 2, an auction will be held from 10 a.m.-noon at the Fayetteville Technical Institute gymnasium. Viewing of the items to be auctioned will begin at 8 a.m.

Also from 8 a.m.-8 p.m. May 2, a round-a-bout skating marathon will be held at the skating rink at Eutaw Shopping Center. Sponsor sheets can be picked up at the skating rink or at the American Cancer Society office at Eutaw.

The American Cancer Society Highland Run is set for May 9 from 9 a.m.-noon at Methodist College. Sponsor sheets can be picked up at the American Cancer Society office at Eutaw Shopping Center or the YMCA.

Call the American Cancer Society at 484-0456 for more information.

**Course On Business Writing Set**

Fayetteville Technical Institute will begin a course on professionalism in business writing on May 4 in Room 625 in the Horace Sisk Building.

Classes will meet from 7 to 9:30 p.m. on Mondays, Wednesdays and Thursdays for 11 weeks. The registration fee is \$5, but class size will be limited to those registering early. The final date for mail-in registration is May 1.

The course will be presented by C.L. Bennett, founder, publisher and editor of the Network Newspaper and NNCW Writing Service.

The course will cover a variety of writing projects and needs, including announcements and news releases, resumes and vitae, bylaws, resolutions and proposals, speech writing and more.

For more information, call Eli Anderson Jr. at 323-1961, extension 351 or 366.

**FTI Budget Not Bleak Boudreau Tells Trustees**

By JOYCE EVANS  
Staff Writer

Fayetteville Technical Institute does not face a serious dilemma because of cutbacks in federal and state spending proposed, but the county's recommendation of a "no growth" budget is another story.

Howard Boudreau, president of FTI, told the board of trustees Monday that the state's budget reduction picture is "looking better all the time." The state legislature has called for a 6 percent decrease in all schools' budgets, but Boudreau said he doesn't see much of a cut in the community colleges budgets.

But the state legislature is talking about picking up 5 percent of the state employees' retirement contributions which would result in a 7-8 percent increase for employees.

Currently, state employees pay 6 percent of their retirement contributions. Even though this 5 percent would not be money in employees' pockets, it would translate into extra funds available because they would not have to pay state and federal income taxes on this amount. Also, employees would pay only one percent of their retirement benefits, Boudreau outlined to the board. The school has 230 people in the state pension plan.

County Manager Harry Perkins has requested that all state agencies including schools present a budget without salary or cost-of-living increases.

Perkins is taking a hard line about funding appropriations because the county's has its own money problems facing what may be the toughest budget year yet.

But Boudreau sees a "no growth" budget as an impossible task because of increased costs for utilities, overall operating costs and a 12 percent inflation rate. It would definitely be a problem, he said.

FTI and other area schools will adopt their budgets prior to May 15 when the county will discuss and appropriate funds for schools.

Following the meeting, Boudreau said salary increases (payment into retirement funds) for locally paid personnel would not create any problems for the institution despite the "no growth" county budget in sight.

But the institution faces a problem with continued enrollment increase, and a 5 to 6 percent increase has been projected for next fall although the school already has a space problem.

And the community colleges had hoped for \$24 million equipment budget for the 58 schools, but Boudreau does not believe the legislature would appropriate more than last year's \$3 million.

Replacement of the school's 20-year-old "obsolete and worn-out equipment" is the number one funding priority. "We just will not be able to replace it," he said. The president said a \$3 million appropriation for equipment in the 58 schools "is worth nothing by the time you spread this amount out."

Although the legislature has proposed cutting about three positions which would decrease FTI's budget by about \$26,000 each, Boudreau said the institution could absorb such loss without too much of a problem. "FTI isn't too much concerned about this as some of the smaller schools would be."

"There will be cuts to the 58 schools, but we will be able to absorb these cuts without affecting the educational programs."

The board discussed possibilities of searching for ways to help reduce energy costs and proposed to study these alternatives when found.

**A NUMBER** of upcoming programs and events have been announced by the Fayetteville Recreation and Parks Department.

The department will sponsor, along with Fayetteville Technical Institute and several area merchants, a wheelchair basketball tournament April 25-26.

**WHEELCHAIR BASKETBALL:** The Fayetteville Wheeltroublers will host a 2-day tournament with FTI and the merchants of Cumberland County Saturday and Sunday at Horace Sisk gym at FTI. Saturday games are at noon, 2 p.m., 5 p.m. and 7 p.m. Sunday games are at noon and 2 p.m. Admission is free. T 4-24-81

**FTI OKs 10 Percent Budget Hike**

The board of trustees of Fayetteville Technical Institute unanimously approved a budget with a 10 percent local increase Monday, despite warnings from County Manager Harry Perkins that all departments should stick to a no-growth budget.

"There's no way we can have a zero-increase budget when we've got gains in enrollment," said FTI President Howard Boudreau. "I don't think 10 percent is a real increase."

The board, under the chairmanship of Harry Shaw, who was re-elected to another term, voted to submit a \$1,642,063 local budget to Cumberland County Commissioners, up from \$1,398,963 appropriated last year.

FTI is expected to receive \$9,650,610 from the state Department of Community Colleges, bringing the total budget, with federal, Ft. Bragg and other funds, to \$14,574,842.

However, if state pay raises come through for teachers and other employees, Boudreau expects to see the total top \$15 million.

The biggest increase in the local budget is in utilities and in the unencumbered fund balance, Boudreau said. FTI officials expect sharply higher utility and telephone rates, he said.

No local salary increases except for janitors and maids are included in the low budget.

However, the state budget will probably fund 10 additional instructional positions, Boudreau said, due to a rising enrollment estimated to come between 5,600 and 5,700 at the main and Ft. Bragg campuses in the fall. The enrollment is now 5,200.

In other business, trustees approved the promotions of two FTI employees to new posts.

Beginning in July, Dr. Jack Fernald, now head of the college admissions office, will take the place of Dean of Student Development Niles Compton.

Fernald, who joined FTI as a counselor in 1970, has been head of the admissions office since 1972. He graduated from the University of North Carolina, N.C. State University and Nova University.

Dr. Larry B. Norris, head of the English Department, will become the associate dean of instruction for general education, replacing Dr. Arthur Cavano.

Norris has headed FTI self-study committees and is a graduate of Pembroke State University, the University of Arkansas, and N.C. State University.

The Fayetteville Wheeltroublers will be busy Saturday and Sunday as hosts of a two-day wheelchair basketball tournament at FTI's Horace Sisk Gymnasium. Saturday games are at noon, 2 p.m., 5 p.m., and 7 p.m. Sunday games are at noon and 2 p.m. and admission is free for this event co-sponsored by Cumberland County merchants and FTI.

**Movie, Symphony, Festival**

Movie addicts can see Hal Ashby's "Harold and Maude" tonight at 8, free to all, at the Fayetteville Technical Institute's Cumberland Hall Auditorium. Intended for mature audiences, the film is part of a spring movie series sponsored by the Cumberland County Public Library and FTI.

# FAYETTEVILLE TECHNICAL INSTITUTE

## EVENING CURRICULUM COURSES

REGISTRATION: 10:00 A.M. TO 7:30 P.M., WED., MAY 13  
HORACE SISK GYM, FTI CAMPUS

SUMMER TERM: JUNE 1 - AUG. 14

**Who may attend:** Persons who have completed high school or have attained the N.C. High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

**Cost:** In-state resident \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$198.50).

**Payment:** Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or MasterCard. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

**Accreditation:** FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits and is recognized as a Servicemen's Opportunity College (SOC). Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution.

**Service and Veterans:** Army/Air Force tuition assistance may be available to qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans' Service or Student Development for information on V.A. requirements.

**Availability of classes:** All classes are filled on a first come, first served basis. FTI reserves the right to cancel courses due to insufficient enrollment or lack of qualified instructors.

**Class Information:** Evening classes are scheduled between 5:00 P.M. and 10:00 P.M., Monday through Friday. (Refer to brochure for specific classes, days, and times.)

**COURSE NOTES:**

Course titles followed by II or III are sequence courses and are normally required to be taken in order. Course numbers ending in A, B, or C are continuation courses, and must be taken in order. BMS-1135, Electrical Code Review: Review of applicable North Carolina electrical code/law. FSO-205, Nutrition II: Begins Tuesday, June 2 and ends Tuesday, July 7, 1981.

HOR-254, Plant Propagation: Begins Thursday, July 9 and ends Thursday, August 13, 1981.

RLS-202, Real Estate Mathematics: Recommended for students who require math refresher. (May be taken in conjunction with other Real Estate courses.)

RLS-286, Real Estate Fundamentals and Principles (Broker): Meets minimum requirements to take North Carolina Broker's examination. (99 classroom hours.)

## EVENING CURRICULUM COURSES

REGISTRATION: 10:00 A.M. TO 7:30 P.M., WED., MAY 13

HORACE SISK GYM, FTI CAMPUS

SUMMER TERM: JUNE 1 - AUG. 14

**Who may attend:** Persons who have completed high school or have attained the N.C. High School Equivalency (GED scores). A student may take up to the equivalent of one quarter of work in the Evening College before being required to meet all general requirements for admission.

**Cost:** In-state resident \$3.25 per quarter hour (maximum \$39); out-of-state resident, \$16.50 per quarter hour (maximum \$198.50).

**Payment:** Payment of tuition and fees may be made by cash, personal check (in-state bank only), BankAmericard, Visa, or MasterCard. Personal checks drawn on out-of-state banks, second party checks, and checks in excess of actual costs will not be accepted for payment of fees. All fees must be paid at time of registration.

**Accreditation:** FTI is fully accredited by the Southern Association of Colleges and Schools, is approved for V.A. benefits and is recog-

nized as a Servicemen's Opportunity College (SOC). Transferability of credits earned at FTI to other schools or institutions rests solely with the gaining school or institution.

**Servicemen and Veterans:** Army/Air Force tuition assistance may be available to qualified service personnel. Inquiries should be referred to appropriate military education center. Veterans should contact the Office of Veterans' Service or Student Development for information on V.A. requirements.

**Availability of classes:** All classes are filled on a first come, first served basis. FTI reserves the right to cancel courses due to insufficient enrollment or lack of qualified instructors.

**COURSE NOTES:** Class information: Evening classes are scheduled between 5:00 P.M. and 10:00 P.M., Monday through Friday. (Refer to brochure for specific classes, days, and times.)

**COURSE NOTES:** Course titles followed by II or III are sequence courses and are normally required to be taken in order.

Course numbers ending in A, B, or C are continuation courses, and must be taken in order.

BMS-1135, Electrical Code Review: Review of applicable North Carolina electrical code/law.

FSO-205, Nutrition II: Begins Tuesday, June 2 and ends Tuesday, July 7, 1981.

# FTI Plans Community Police Day

Fayetteville Technical Institute's law enforcement criminal justice program is sponsoring a police community relations day May 17 from 1-6 p.m.

"This will provide an opportunity for the community and various police agencies in the area to meet informally and become better acquainted," said instructor Dave Brumble.

The graduating class in the law enforcement program is sponsoring the day's events, which include local high school drill team presentations, square dancing, karate exhibitions, and police dog team appearances. The Reid Ross High School stage band will also perform.

Games and contests will also be conducted throughout the afternoon and drug displays and military department equipment will also be shown.

The Community Law Day events will take place at the FTI campus, and the public is invited to attend.

# FTI Presents Revised Budget

Representatives from Fayetteville Technical Institute presented a budget revision to the Cumberland County Board of Commissioners Monday which met with County Manager Harry Perkins' approval.

The county commissioners seemed pleased with the adjustments made by FTI executive council and finance committee. The submitted changes call for a \$70,745 increase and a total request of \$1,331,305 in local monies.

FTI's original budget request had been for a total of \$1,501,786.

"I find the budget adjustment satisfactory, most satisfactory," Perkins said.

FTI's total budget, including federal and state sources, amounts to \$15 million, said FTI President Howard Boudreau. The budget includes a \$97,293 utilities increase and approximately \$90,000 in rent to local public schools for evening extension programs.

In a specially called meeting last week, the FTI executive council and finance committees met and voted to eliminate \$170,481 from their original budget, \$65,000 of that amount in teacher supplements. Insurance and disability packages for employees were also eliminated.

Boudreau receives a \$14,850 supplement while FTI Vice President William A. Sease receives \$6,026 in local money. Neither will have his supplement eliminated.

"It's going to put us in a tight situation next year," Bob Carter, dean of fiscal affairs, said. "But we're committed to live with it now."

"When the last dollar's gone, we'll just have to shut the register," Carter said.

Carter said FTI officials hoped that money from the state funding would "allow us to cover the lost supplements."

"We'll do everything we can for those supplements," Carter, whose own supplement was eliminated, said.

Harry Shaw, a FTI trustee, told the county commissioners that "we think we got the message of what you really wanted from us, which was a no-growth budget."

Boudreau, after meeting with the county commissioners, said FTI would be able to "live with" the budget adjustments.

# Cumberland Legislator Reappointed FTI Trustee

LURA TALLY Renominated To Board

Lura Self Tally, a Cumberland County legislator in her fifth term of the N.C. General Assembly, has been renominated to the Fayetteville Technical Institute board of trustees.

Mrs. Tally was renominated Monday by the Cumberland County Board of Education for an eight-year term.

On Tuesday, the Fayetteville City Board of Education also renominated Mrs. Tally, as part of a joint appointment by the two county school systems.

Mrs. Tally is also employed part of the year by the Fayetteville City schools. She is not on the payroll during months the legislature is in session, said Dr. Fletcher Womble Jr., the city superintendent.

# FTI Laments Budget Request

By JENNIFER CALDWELL

Fayetteville Technical Institute officials are concerned that County Manager Harry Perkins has recommended the college's operating expenses be decreased below the current level of spending, while recommending increases for the Cumberland County and Fayetteville city school systems.

According to Perkins' proposed budget, FTI now receives \$1,172,696 in local operating expenses.

The board of trustees recommended requesting \$1,498,756 this year, but Perkins is recommending commissioners fund only \$1,043,109.

"I don't see how we can make it," said Harry Shaw, chairman of FTI's board of trustees.

"We assumed we would get full funding, because that's what we needed. It's their (commissioners) responsibility to take care of the

physical plant, which means the maintenance, the guards, the utilities and other things. We're having a big increase in prices, especially utilities," he said.

Perkins, in making the budget recommendations, said "we're going after FTI," saying approximately \$200,000 would be cut from that budget.

College President Howard Boudreau was not available for comment, and fiscal affairs director Robert Carter declined comment.

However, Thornton W. Rose, chairman of the finance committee, echoed Shaw's comments that FTI would be hard pressed to make up for the loss.

"I didn't realize they would cut that much," he said. "That's very serious and I don't know how we can make it without deleting some of our services."

THE FAYETTEVILLE TIMES, Thursday, June 4, 1981

# FTI Slashes Budget Request To County

By JENNIFER CALDWELL

Fayetteville Technical Institute's executive council and finance committee voted Wednesday to eliminate all professional supplements other than those of President Howard Boudreau and vice president William Sease.

This budget cut, totalling about \$65,000, and decreases in employee benefits and travel money reduced the board's request to the Cumberland County Commissioners by \$170,481 but would still be an increase over the current year.

Wednesday's special session was called by finance committee chairman Thornton W. Rose after

Cumberland County Manager Harry Perkins recommended not only a no-growth budget but a budget cutback for FTI to county commissioners on Monday.

"It's a no-growth budget, minus," said Boudreau. "I strongly feel we're being more or less persecuted for no reason at all," Boudreau said. "I see no reason for them to lash out at FTI. We've been a tremendous asset to this community."

Board member Steve Satsky said Perkins was new to Cumberland County "and hasn't seen what we've done for the community."

Perkins originally recommended the county fund

\$1,301,786 in current expense and capital outlay to FTI in fiscal year 1981-82, which is \$200,000 less than FTI's original request, of \$1,501,786.

However, at Monday's meeting, Perkins adjusted his recommendation to cut further, to \$1,046,139.

The FTI executive council voted to return to Perkins' original recommendation of \$1,301,786; adding \$29,519 to pay for renting county and Ft. Bragg school buildings for extension classes, bringing the total new request to \$1,331,305.

Boudreau's supplement, which was left intact, was discussed at the committee meeting.

Boudreau makes a total of \$85,738 from three sources: \$39,108 from the state, \$14,850 in local

supplement and \$1,800 in entertainment expenses.

"We have not received the state salary raises that go to the faculty," said Boudreau of himself and Sease, who makes a \$6,026 local supplement.

However, Boudreau has received raises the past two years, said Larry Morgan of the state Department of Community College's accounting department, which he said was because of a state pay raise.

Teachers, counselors and other professional personnel whose supplements were cut Wednesday make between \$250 and \$400 in local supplements, Boudreau said, with the average \$278.

**FTI Chairman  
Honored By Group**

0-1-81

The chairman of the dental hygiene department at Fayetteville Technical Institute was honored for her 35 years in the profession by the Greater Fayetteville Area Dental Hygiene Society at its annual spring session last week.

Mrs. Eileen Hoehn was a charter member of the dental hygiene faculty at FTI and has been an advisor to the State Board of Dental Examiners.

The group also elected new officers. They are:

Gisela Woody, president; Susan Lamprecht, vice president; Maureen Driscoll, secretary; and Cindy Parker, treasurer.
