

Inventory of the Old Jonesborough Cemetery, 1995

To remedy the absence of any detailed inventory of the Old Jonesborough Cemetery, a cataloguing of grave markers was performed in July, 1995. The inventory was initiated and designed by Dr. Gary Burkett and conducted by high school students who were participating in the Governor's School for Tennessee Heritage at ETSU's Center for Appalachian Studies and Services. The group of students who did this work were those participating in the "Historic Preservation" module of this program and were under the direction of Mr. Joe Spence, a high school teacher in Lenoir City. Mr. Spence and the students worked at the cemetery on July 10, 11 and 12. The Governor's School students, who worked diligently under the hot sun, were:

Rebecca Holbrook
Tonia Moore
Beth Dahl
Meighan Lenihan
Catie Martin

Brian McLean
Amanda Luke
Constanza Saravia
Michael Hogan

Lori Owen, a counselor with the program, and Mr. Spence also enthusiastically helped to catalogue the cemetery. Mr. Joe Spence is owed special gratitude for lending his expertise, as well as his hard work, to this effort.

Mr. Spence is contemplating having next year's Governor's School students produce a descriptive booklet about the Old Jonesborough Cemetery.

METHOD

Location Indicator

A technique was devised to describe the location of each grave marker.

1. The cemetery was divided into 13 "sections" (labeled A through M) as indicated on the attached map. The measurements provided on the map would enable future reconstruction of these sections. Sections were marked using stakes, string, and signs.
2. Within each section students were instructed to assign "rows," beginning with the grave markers closest to the front (west side) of the cemetery. Since the markers are not actually always in neat rows, a row sometimes consists of a single stone.
3. Within each row students were instructed to assign individual "numbers" for markers beginning with the marker closest to the south side of the cemetery.

Each grave marker, therefore, has a unique location indicator consisting of a combination of section, row, and number.

Information Collected

Each student was provided with a packet of forms to be used to record the information from each grave marker. The form, a copy of which is attached, had been designed based on suggestions from the book, A Gravestone Preservation Primer, by Lynette Strangstad.

Students were assigned to work by pairs in sections. In order to facilitate deciphering grave markers which were difficult or impossible to read, they used flour and/or chalk to highlight the inscriptions. Students often spent long periods of time attempting to read a single stone.

I have entered the information from the forms into a computer data base, which facilitates sorting and examining this information, and which I plan to update as more is discovered. I plan to check the accuracy of this information as time permits.

If anyone reviewing this information should discover mistakes that need correction or knows of additional information that should be added to these records, I would much appreciate hearing about it.

Working on this project is an ongoing process. There are scattered grave stones yet to be read and, perhaps, others to be discovered in the woods. Most importantly, the entire section of the cemetery commonly called by some "the colored cemetery" still needs to be inventoried. If others would like to help it would be welcomed.
