Synopsis: Opening of telegraph service to Teetulpa and the goldfields

Summary:

Telegraph Station Opened at Mannahill.

A telegraph station has been opened at Mannahill, and we shall now consequently receive news some hours earlier than we should have done had the telegrams to be carried to Petersburg or Terowie. Mr. Todd has selected Mannahill as the site of the telegraph-station in preference to Yunta, on account of the coaches running daily to the former place from Teetulpa.

Arrangements for Telegraphic Communication with Teetulpa.

Mr. Knuckey has been dispatched to Teetulpa in order that he may by personal inspection and enquiry decide whether it will be advisable to connect the diggings with our telegraphic system, and if so to make the necessary arrangements for carrying out the work.

THE TEETULPA GOLDFIELDS.

An Important Discovery.

AN EIGHT-OUNCE NUGGET FOUND.

[From our Special Reporter,]

Teetulpa, October 19.

A nugget has been found four feet from the surface by McDougall weighing 8 ounces 14 dwt. It has been forwarded by the warden to the Commissioner of Crown Lands.

Nothing further of special interest has occurred.

Diggers are arriving from Silverton and elsewhere.

Great difficulty is experienced in getting from Mannahill to the field, a distance of 23 miles, but more conveyances are promised shortly. Water is now procurable within two miles.

(400 men on field.)
