Filename: 197829930

**Synopsis:** Brief comments Post, stamps, met station, postal notes

**Summary:** A humorous way of communicating scraps of information

Crumbs.

Miss Gwendoline Todd's design

Now for a light railway line to Teetulpa

From freezing Ben Nevis to torrid Papua.

New Meteorological Station at Mount Lofty

Of all diggings Teetulpa requires that priceless boon, water.

Melbourne Mint has received 9,545 oz. of gold from S.A. this year.

On and after Monday a cheque without the penny stamp is valueless

An Adelaide young lady has drawn a design for our postal note

Don't forget the penny stamp on your cheques on and after Monday next.

It is suggested that a water and sanitary rate should be declared at Teetulpa.

That indefatigable Gilberton observer will yet have an observatory on New Guinea.

Why should not the colony derive a profit through providing Teetulpa diggers with water ?

Mr. Clement L. Wragge, &c., has laid the foundations of our Meteorological Society " wide and deep."

The Commissioner of Crown Lands says n} stone will be left unturned to provide our " only" goldfield with water.

In Sidney, an island in the South Pacific. they keep girls shut up until they are married. After marriage it is impossible to keep them shut up. So the husband has to shut up.

*(ed. A few Crumbs of info. Gwendoline mentioned. Wragge apparently building an observatory in New Guinea. Teetulpa gold field going well, so worth cost of Post Office and telegraph mentioned earlier. But now needs water. Stamps being sold through Post Offices. Finally a good joke.)*
