LYNCHBURG ACADEMY OF MEDICINE

The Lynchburg Academy of Medicine was organized on February 14, 1893, by a group of seventeen physicians in Lynchburg, and was associated with the Medical Society of Virginia. In the early 1900s, the Academy began to expand its membership. In 1914, it was expanded to become the Lynchburg and Campbell County Medical Society. The Academy was incorporated in 1932. Locally, the Academy was instrumental in creating a joint hospital board to coordinate the resources of the three hospitals in the city. The group also supported the establishment of medical library services.
