NINETEEN HUNDRED
AND
SEVENTY-ONE

The years spent in college hold many special meanings and memories for each individual student. Although these years may at times seem very long, hard, and often meaningless, they are a very important part of the development of everyone who has accepted the challenge that college offers anyone willing to confront its challenges head on.

The challenge of college is much more than the confrontation of the never ending text book. Even though a college's primary purpose is to develop the intellect of its students, it does not end there, but merely begins. College is also a time when a person must formulate and develop his personality.

If college merely develops the intellect of a student it has only fulfilled half of its potential, because the intellect is only a small part of the human being. A person with a well developed mind and an undeveloped personality is only half prepared to face the world. The classroom and its text books can only teach an individual part of what is to be learned by attending college. The rest of the knowledge and development is attained outside of the classroom.

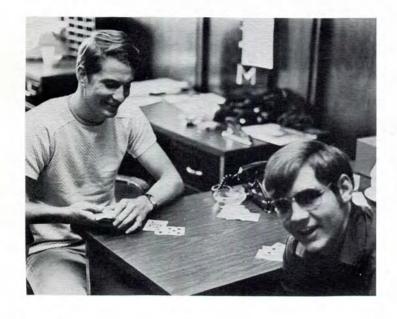

The physical and social aspects and the "crazy" occurances that go along with them must never be ignored. The non-academic part of college life is as essential for one's growth and development as is the academic side. The students' non-academic interests may vary widely, but whatever the interests may be they are a relevant part of the "knowledge" to be attained in college. If college fails to provide the student with the opportunity to develop the non-academic side of his personality it has in essence failed to totally educate its students.

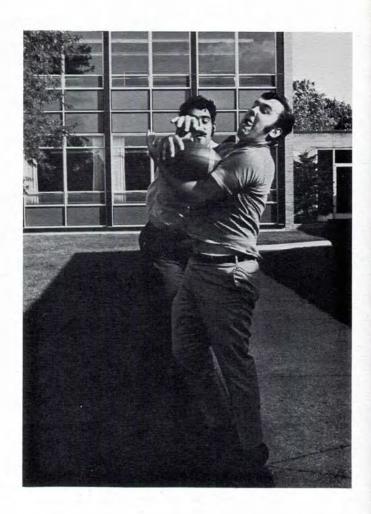

College must never simply educate a person to the world around him; it must also educate him to the world inside of himself.

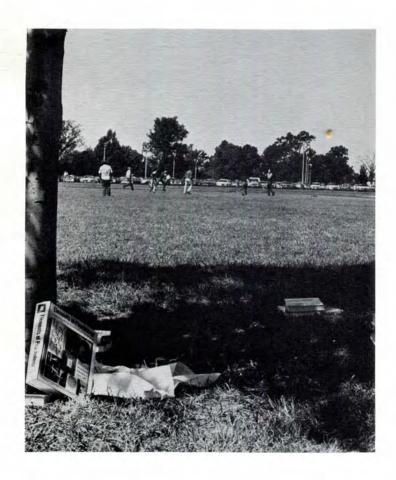

College is a priceless experience, which actually costs very little. The price of college is vision, ambition, and gratitude. To be able to recognize the value of college is essential. To strive to use every phase of college to its fullest extent is important. To be grateful for one's "education" is a blessing.

To everything there is a season, and a time to every purpose under the heaven:

A time to be born, and a time to die; a time to plant, and a time to reap;

A time to kill, and a time to heal; a time to burn down, and a time to build up;

A time to weep, and a time to laugh; a time to mourn, and a time to dance;

A time to cast away stones, and a time to gather stones together; A time to get, and a time to lose; a time to keep, and a time to cast away;

A time to rend, and a time to sew; a time to keep silence, and a time to speak;

A time to love, and a time to hate; a time of war, and a time of peace.

Ecclesiastes 3, 1-8

POTPOURRI

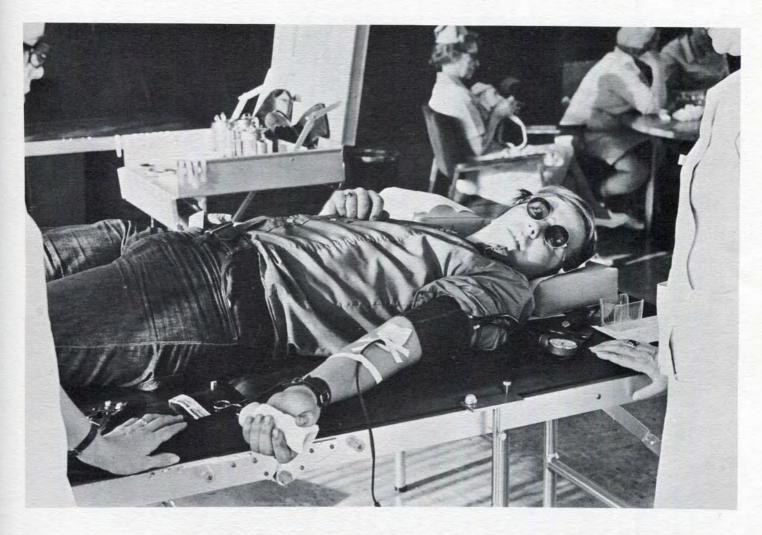

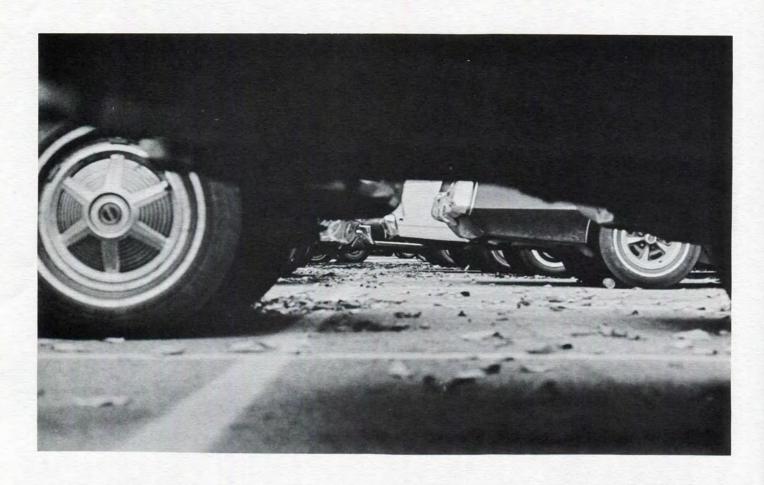

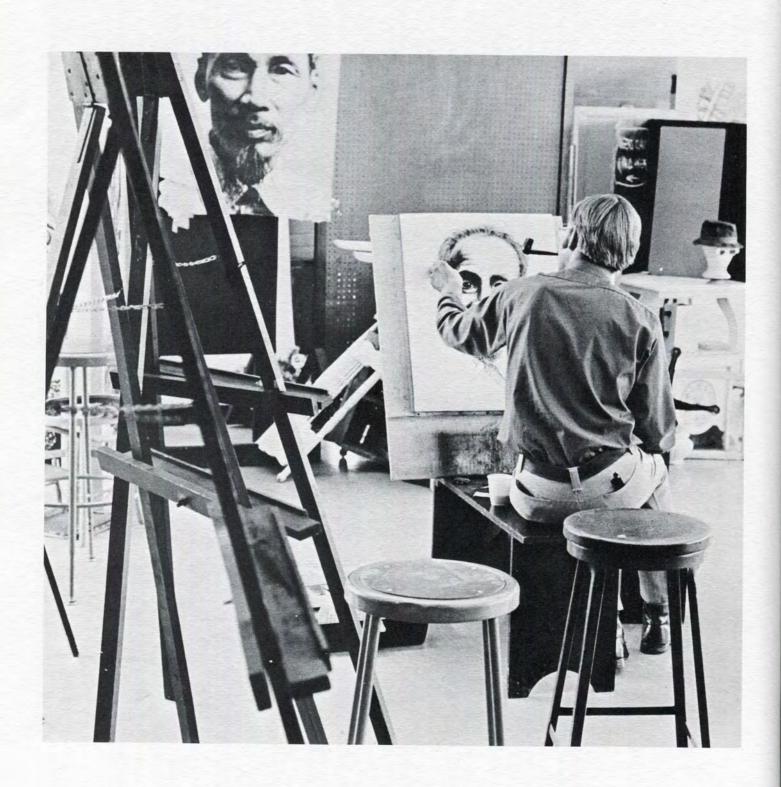

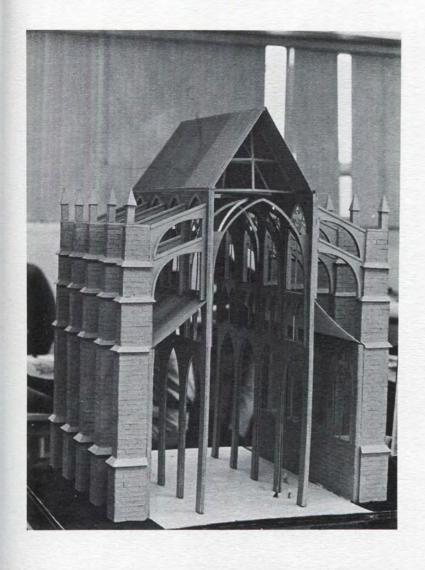

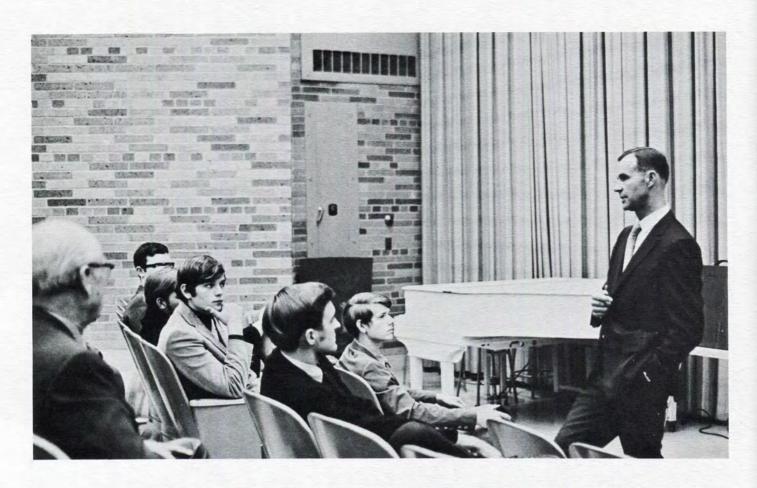

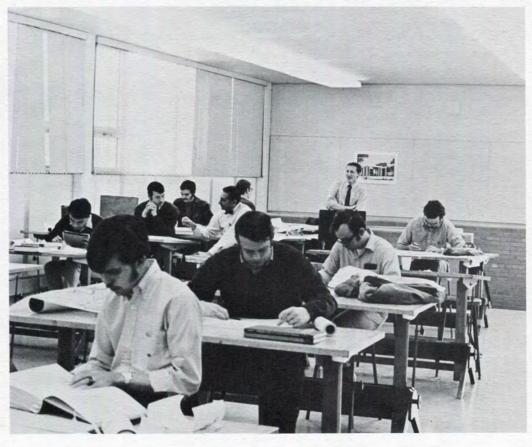

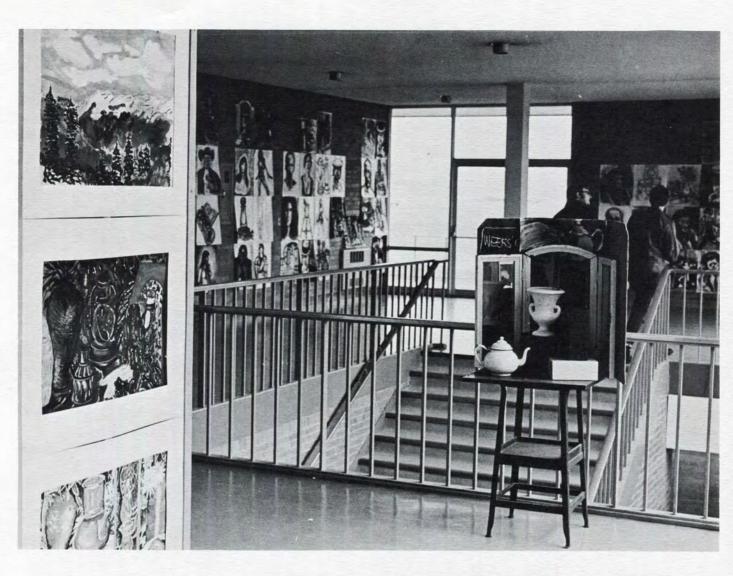

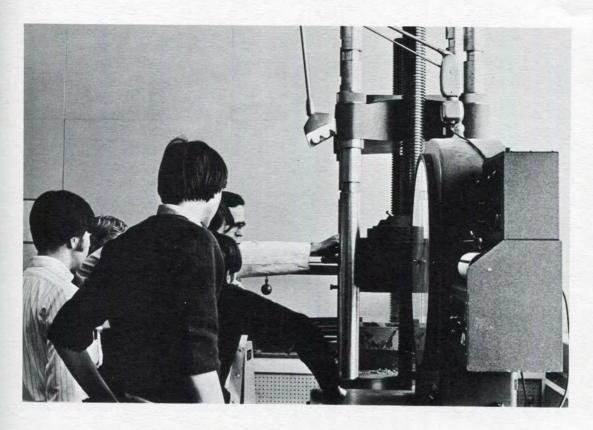

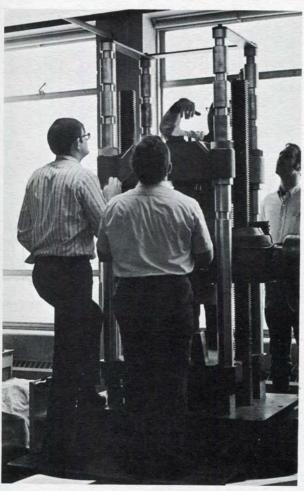

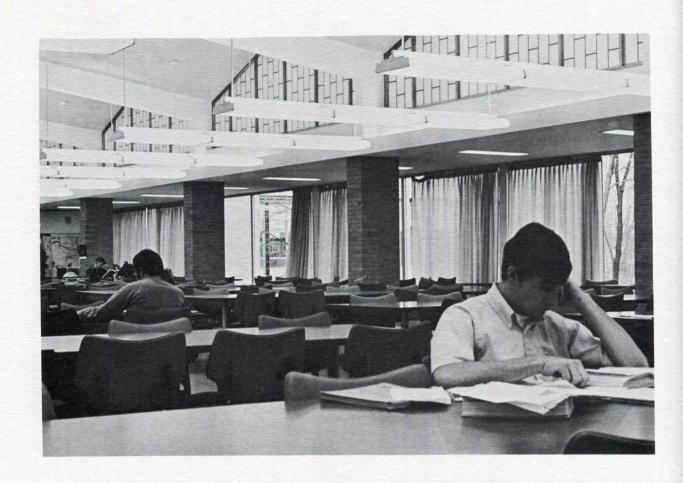

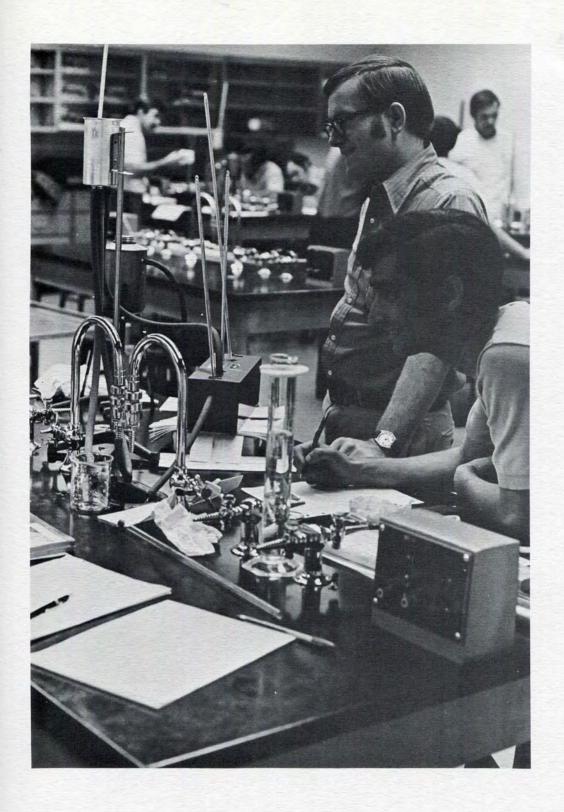

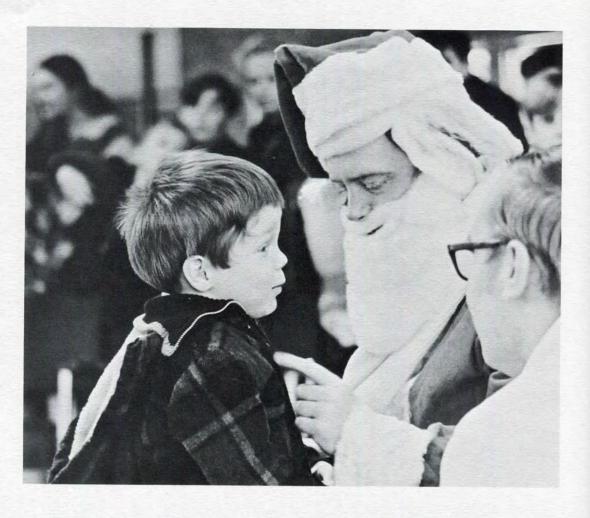

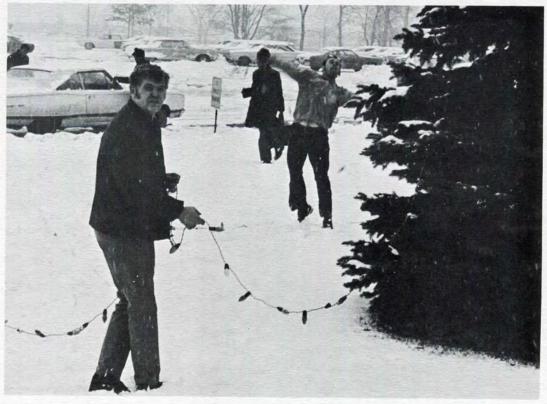

There's a river of my people And its flow is swift and strong Flowing to some mighty ocean Though its course is deep and long. Many rocks and reefs and mountains Seek to bar it from its way, But relentlessly this river Seeks its brothers at the sea. You will find me in the mainstream Steering surely through the foam, Far beyond its raging waters I can see our certain home. For I have met this river And I know its mighty force, And the courage that this gives me Will hold me on my course. O river of my people Together we must go, Hasten onward to that meeting Where my brothers wait I know.

From Allen Park graduating in Industrial Management,

One's-self I sing, a simple separate person

Yet utter the word Democratic, the word En-Masse.

Of physiology from top to toe I sing,

Not physiognomy alone nor brain alone is worthy for the Muse

I say the Form complete is worthier far,
 The Female equally with Male I sing.
 Of Life immense in passion, pulse, and power,
 Cheerful, for freest action formed under the laws divine,
 The Modern Man I sing.

The objectives of L.I.T. as stated in the catalog and other College publications are complete with respect to the prupose, kind, quality and content of our courses of study. Concomitant with these are other specific objectives which relate to the welfare of all segments of the campus community and the image of the College. Perhaps these are a measure of our progress toward fulfilling basic objectives. They include: studies on and efforts to improve student retention, employee compensation and quality of personnel, student-teacher ratio, teacher evaluation and teaching methods, student services, alumni relations, industry relations, student-faculty relations, better understanding and communication through the organization from students to trustees, completion of our campus master plan, and meticulous study and ordering of priorities to better serve our three student bodies. Our total effort will be satisfactory if employees, students, alumni and our publics can point with pride to accomplishments of L.I.T. and their association with the College.

1971

YEAR

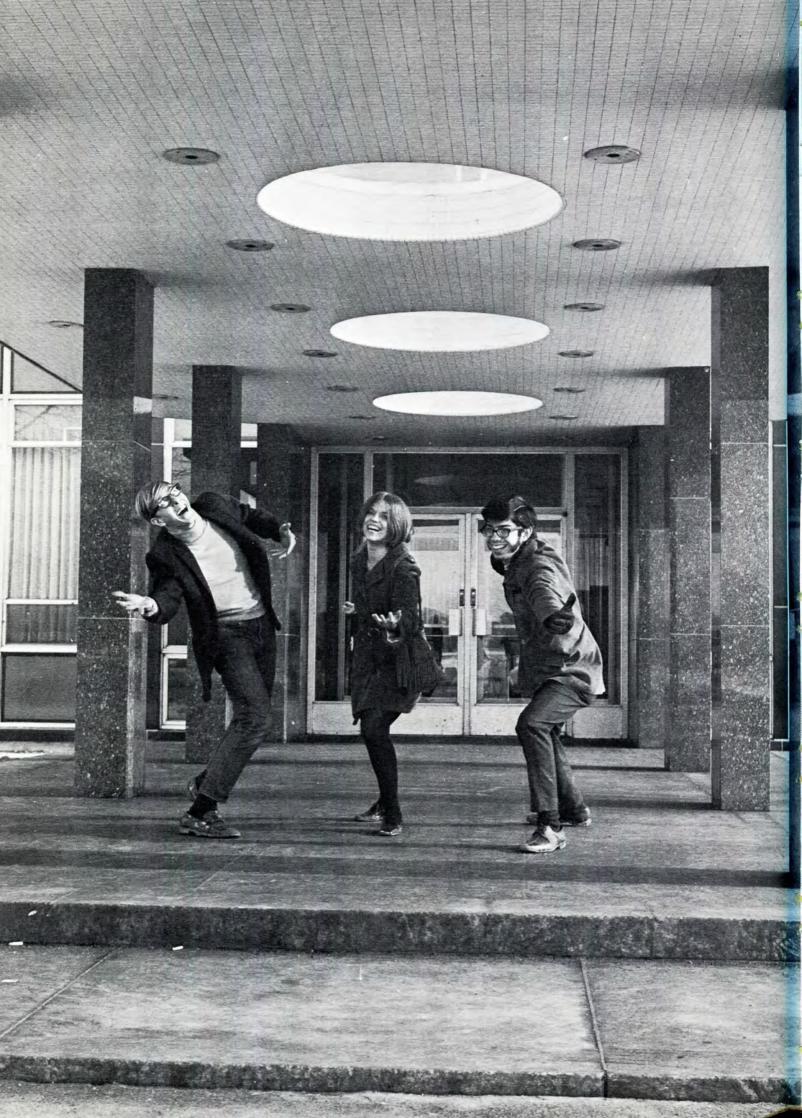

THE STUDENT

BOOK STAFF

GOVERNMENT

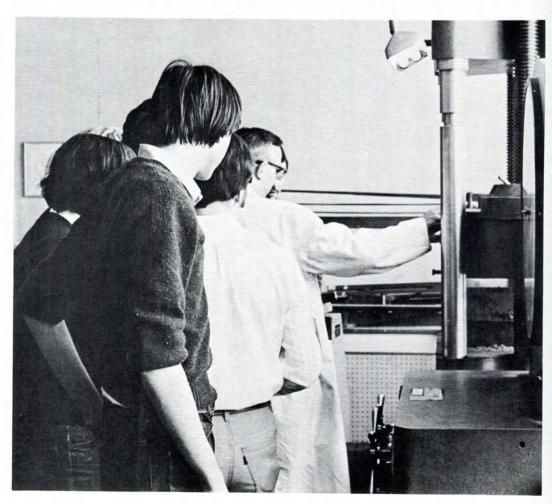

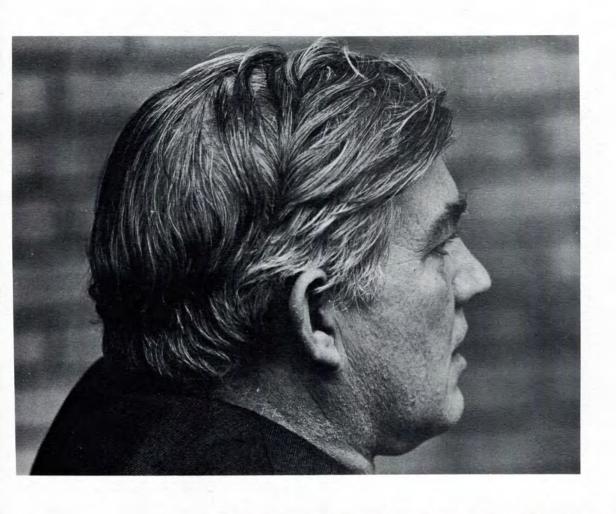

AND SO IT ENDS

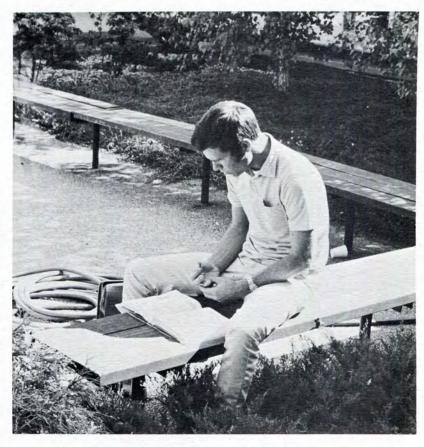

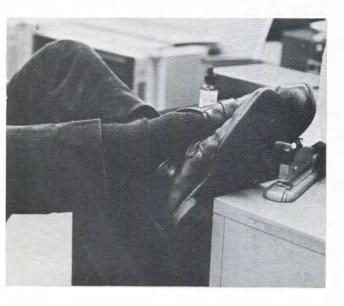

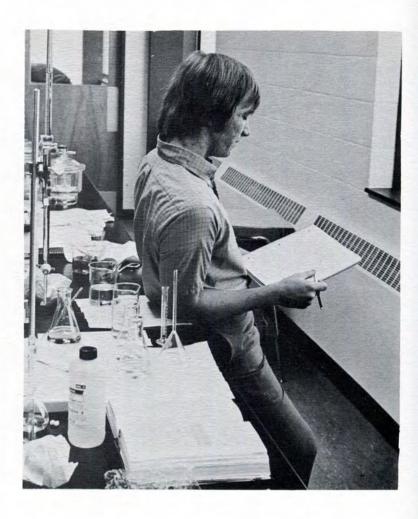

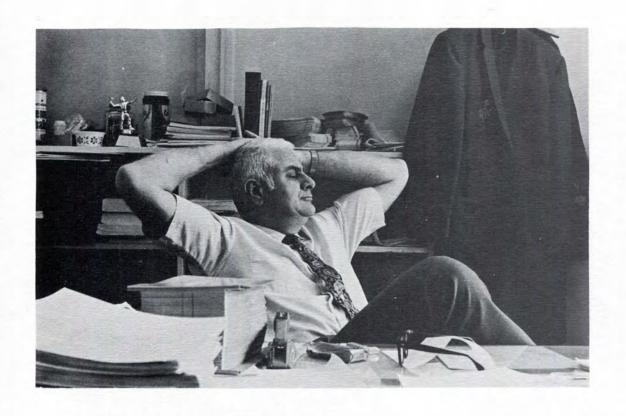

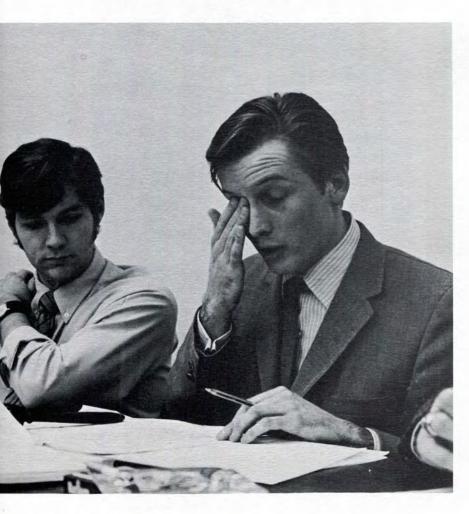

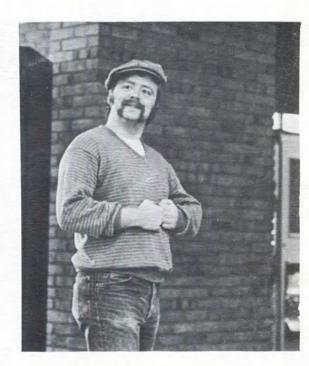

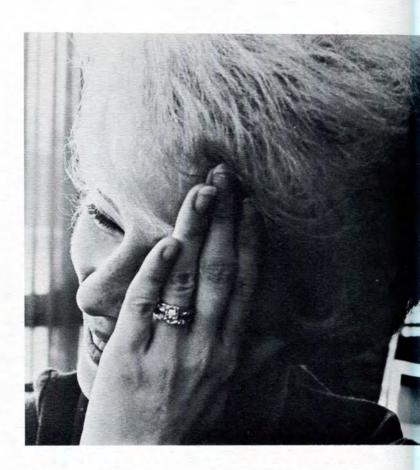

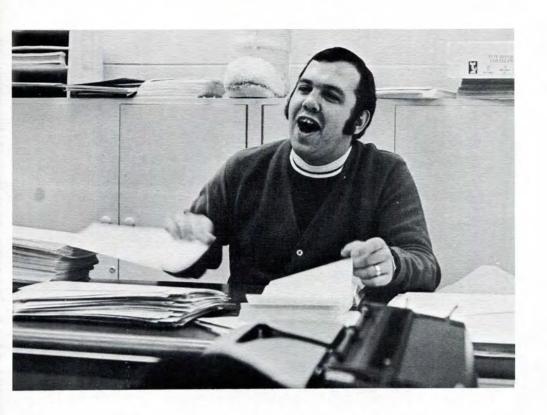

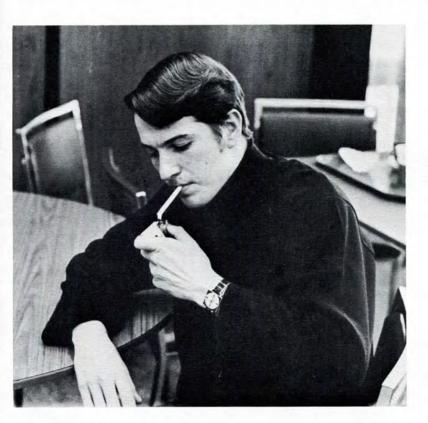

ACKNOWLEDGMENTS

As the 1970-1971 school year comes to an end and the Year Book Staff looks back over the past year and all its work, they hope that their efforts have been successful. We hope that in years to come you can look at the 1971 Year Book and recall fond memories of a year that was a part of your college days. It is our hope that every student at Lawrence will be as proud of this publication and the school it depicts as we are to have been a part of it.

At this time I would like to take the opportunity to extend appreciation and recognition to those people who played an important part in making this book a reality.

To John, president of the Student Government, thank you for the confidence and constant encouragement that you gave to us. Your countless hours of work to help us overcome those obstacles that confronted us throughout the year are beyond thanks.

To all administrators, faculty and students who are always a very important part of any Year Book, thank you for being a part of the '71 Year Book for without you and this school there would be no need for its creation.

My staff, Gerhard, Patty, and Brian, many thanks for the hours of work that you so willingly offered. They were appreciated very much.

Of all those people at Lawrence Tech who played a role in making this book a reality, there is one whom I find very hard to thank. His many long hours spent and skills contributed could not have been done without in creating this publication. Because of the scope of his worth, it is practically impossible to thank, my assistant editor, Bill Schmidt. To him goes a VERY SPECIAL thanks.

James R. Kolanek, Editor
