# Reflections

"Who gives a darn what I look like?"

I want . . . the BEST.

What Appears  
To Be An Ending

Laughter . . .

is a smile making noise.

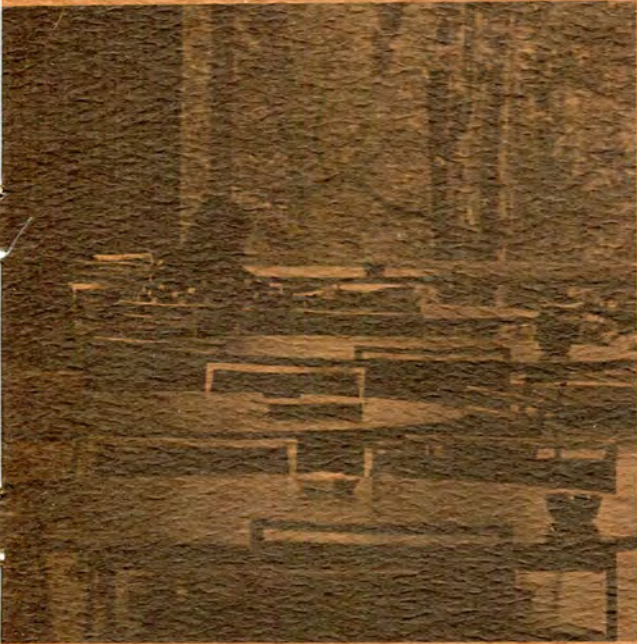

"Education is free, it's college that costs money."  
—Anonymous

ALONE .

I WILL DO BETTER —  
I MUST DO BETTER.

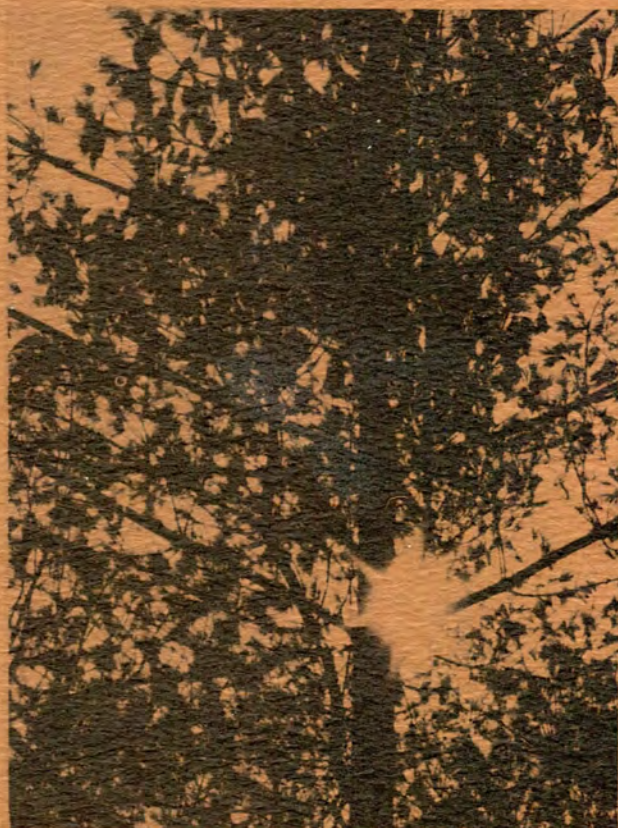

"You couldn't afford it so don't ask."

"I think this generation really cares about what they can do for humanity and the future."

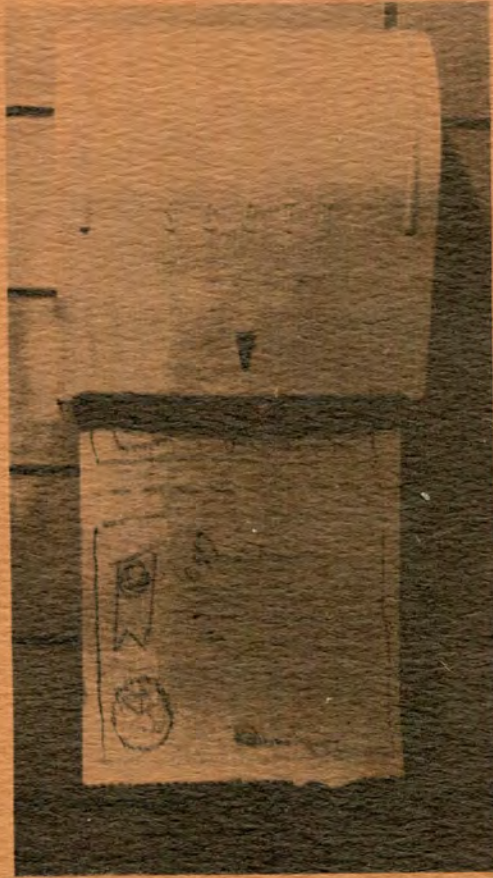

A New Beginning

ALWAYS ROAMING

Diploma Dispenser

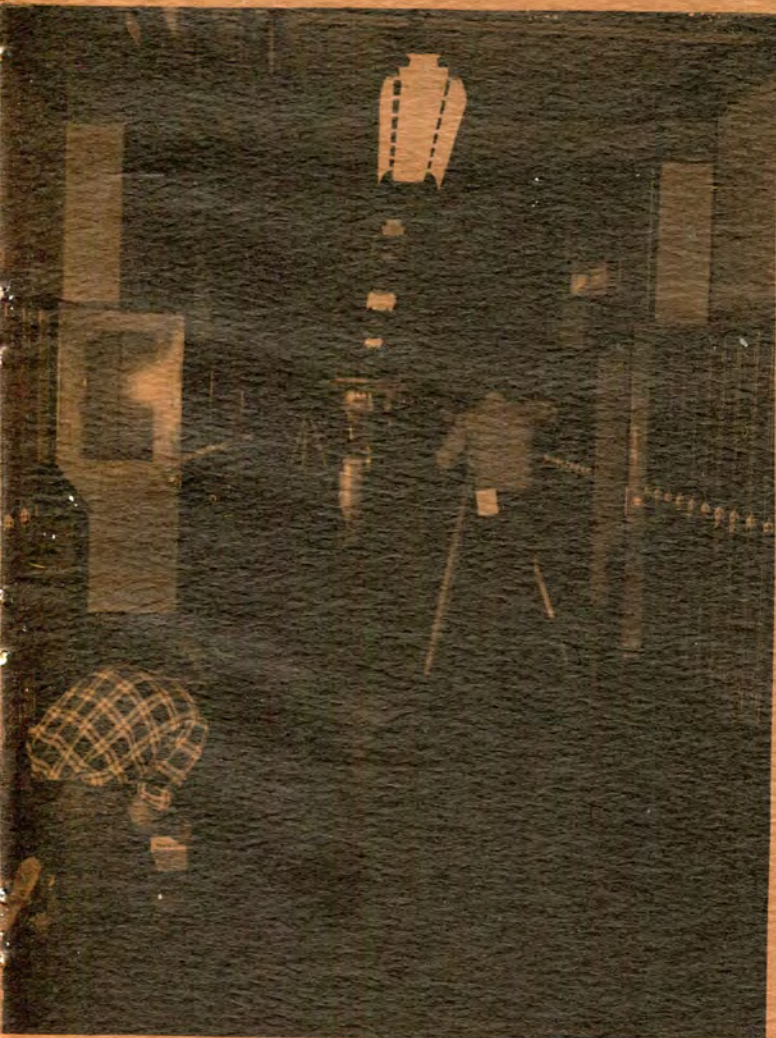

THE UTMOST BOUND  
OF HUMAN THOUGHT.

HE WORKS HIS WORK  
WITH A  
HUNGRY  
HEART

I got to look in it once or twice during the whole year.

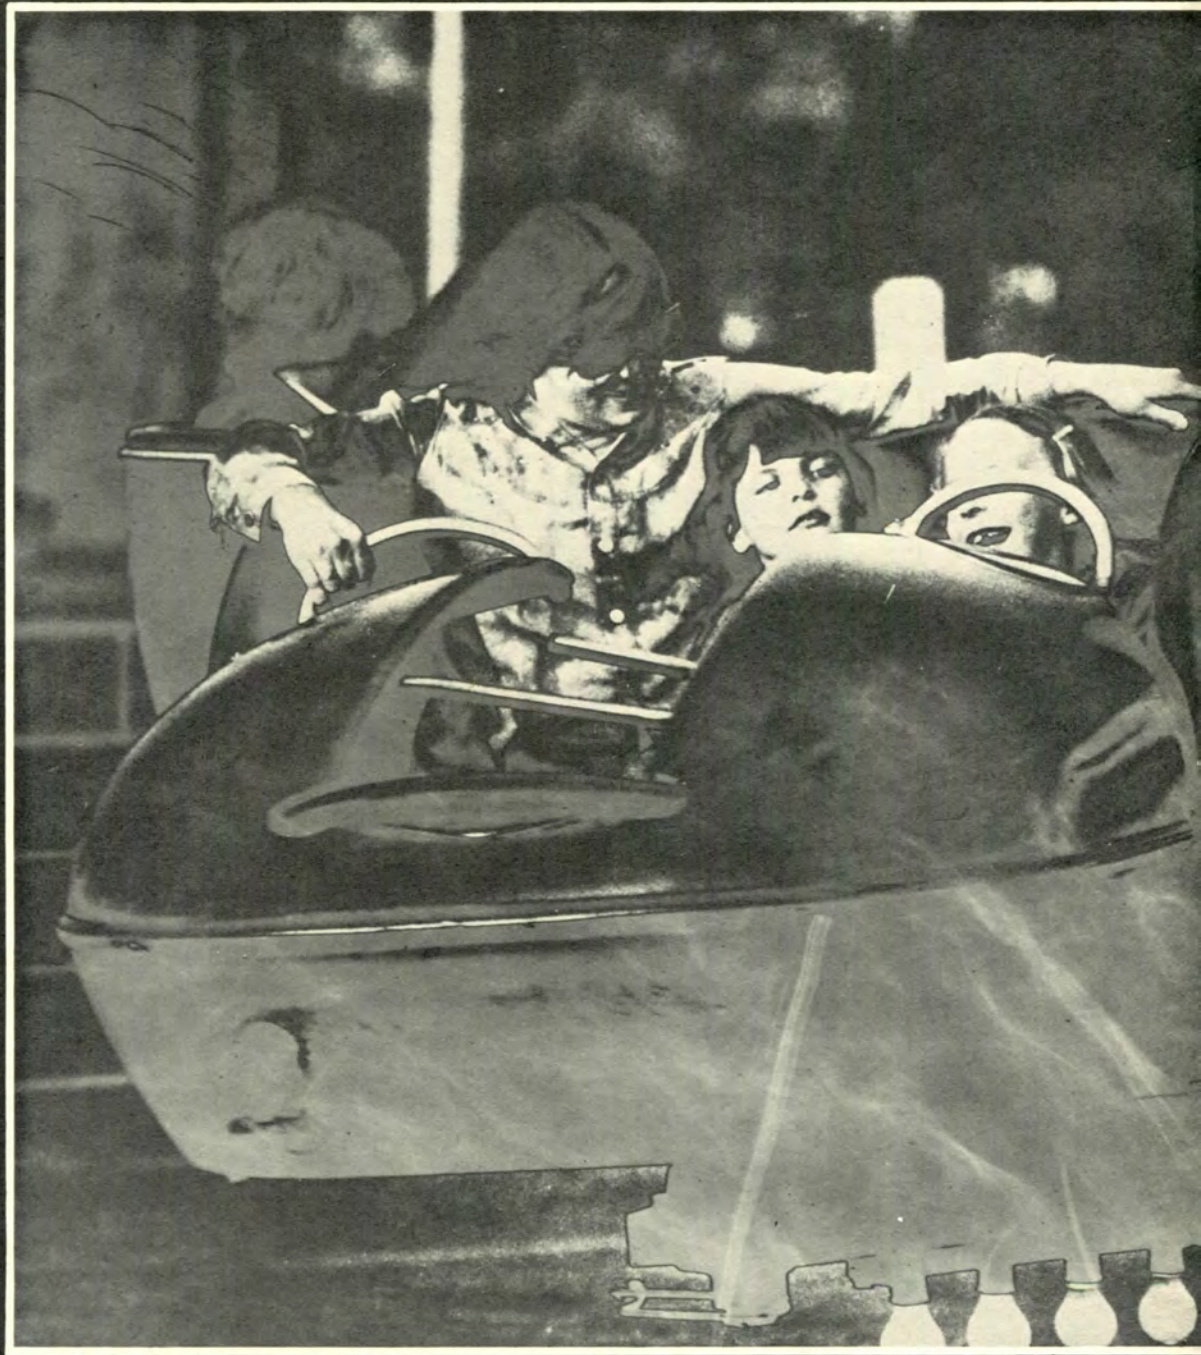

Technology developed by engineers, organized by businessmen and regulated by lawyers, form the Future. Education is the tool by which we, as students, may apply technology to man's environmental needs. Humans, as an integral part of nature, must be responsible for the use of their learning. Interaction within society stimulates man's awareness of his habitat. Only through this awareness can man assimilate the vast

knowledge within his grasp.

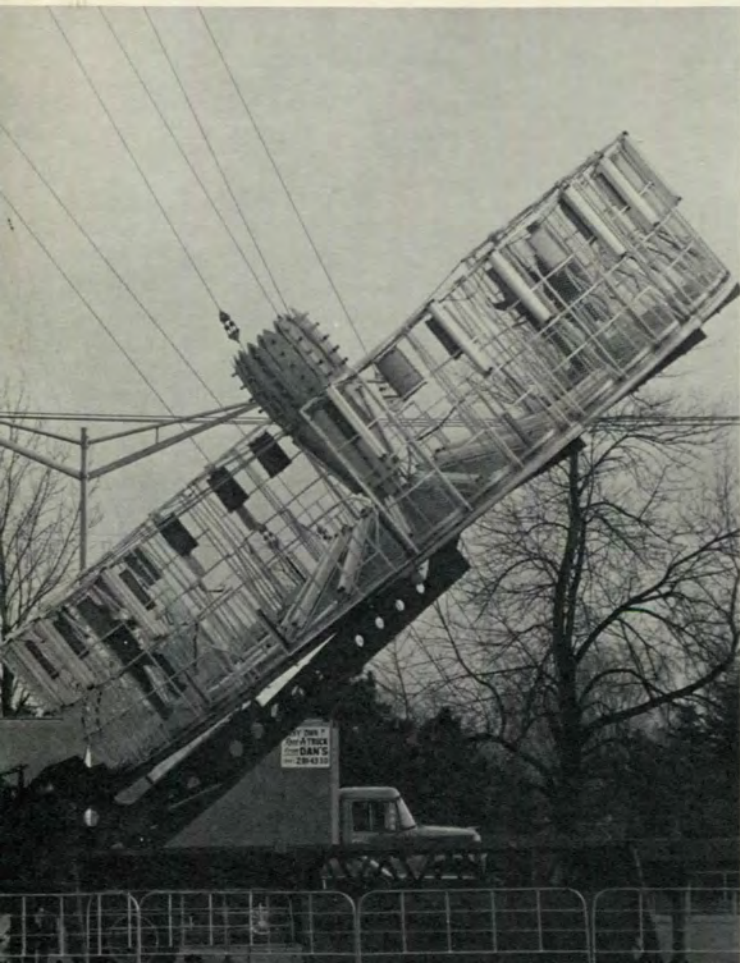

# Special Events

# Spring Fair

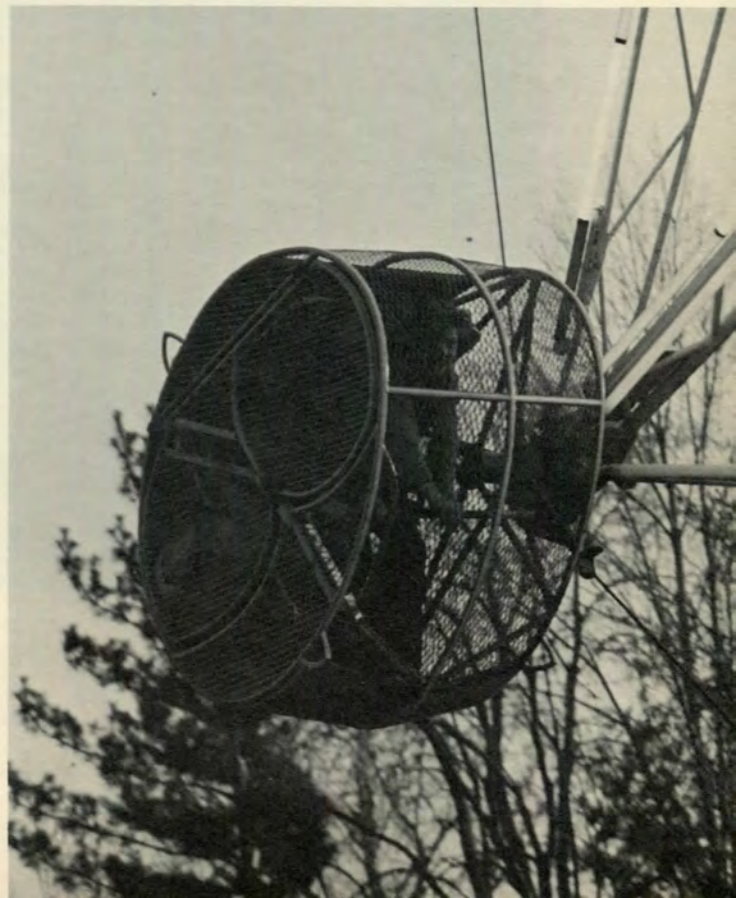

*The Tenth Annual Spring Fair was what many students felt was the strongest social activity on the campus and normally involved the most number of students. But the Spring Fair is now a thing of the past. The attraction of bright lights, a place where students brought their families to enjoy the campus, and a chance where student organization could make a little money, this was the purpose of the fair.*

*The Spring Fair for 1974 opened with the giving away of over \$400,000, this could be the largest Lottery held on campus. But this was just the opening hosted by the Michigan Lottery Commission. The 15 rides started the fair to a good weekend, the organizations ran the booths and the supervision by the Student Government made the weekend go very smoothly.*

*On Saturday night the sounds of music were everywhere, the Battle of the Band was on. Six bands from a 50's to the sounds of Soul, entertained the over 15,000 that attended the fair.*

**But now the lights are out and sounds are no longer, the Spring Fair ended an era.**

# Open House

# Greek Week

*When a man selects a fraternity, he is choosing a group of men with whom he will be proud to associate. A man comes to college looking for friendship and the sense of belonging. In all fraternities on campus, brotherhood is the ultimate friendship.*

*Brotherhood is developed by a close relationship of working and sharing. A man is fully educated only when he has learned to live and work with others. Social, athletic, and campus activities are stressed by all the fraternities here at L.I.T.*

A good example of these are the annual Greek Week festivities held October 14-20, 1974. Greek Week was designed to promote and enjoy some of our Greek traditions. Representative of the Greeks on Campus, Sigma Phi Epsilon, Alpha Sigma Phi, and Phi Kappa Upsilon, participation and acute competition were prominent as the Greek "games" and events ensued that week.

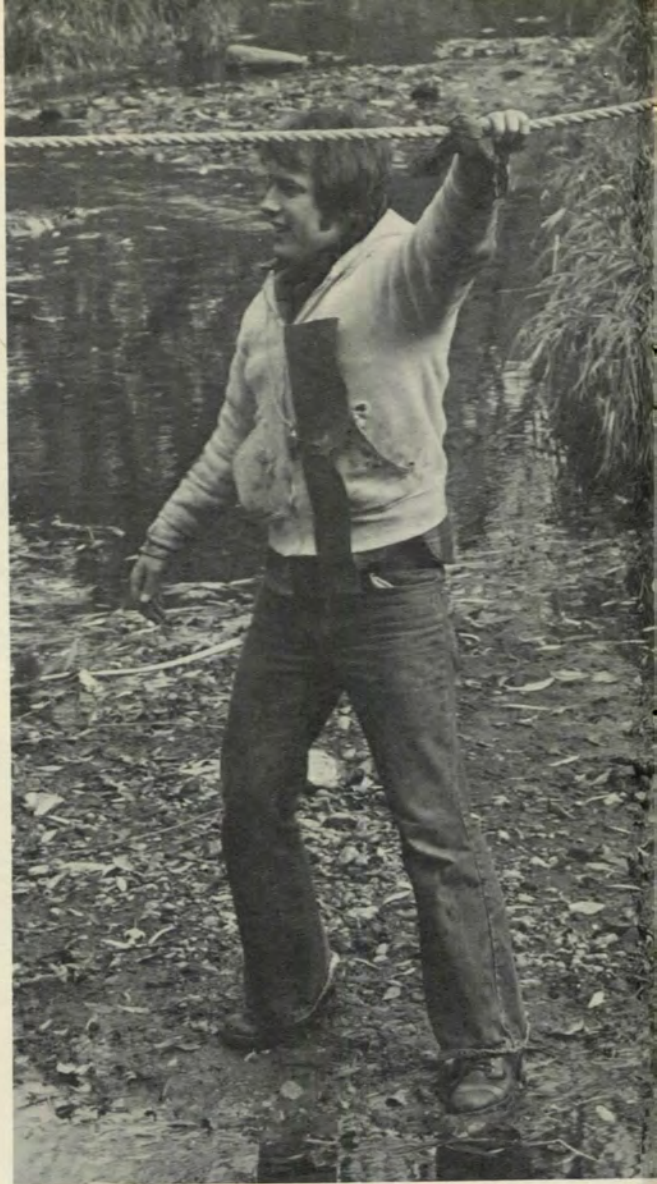

Greek Week began with an I.F.C. car wash dominated by the Sig Eps, followed by a Beauty Contest and Ugly Greek Contest on Oct. 16 & 18, respectively.

Susan Hodges, a Sigma Phi Epsilon Golden Heart, was named Miss Greek Week Beauty Queen, while Tito Zabala of Phi Kappa Upsilon won the Ugly Greek Contest . . .

*By Sunday, October 20, with competitive awareness and spirit growing, our campus Greeks met head-on to engage the traditional races and events.*

*The remaining events included Chariot and Trike races, a Car push, Discus Throw, Beer Chug Run, and the most coveted, a Tug of War across the L.I.T. Rouge River.*

Down to the final event, the competition had built momentum. Interfraternal rivalry was evident, but Brotherhood overshadowed all. Each fraternity had worked toward winning, but never the less, all the Greeks worked together to make the 1974 Greek Week a success.

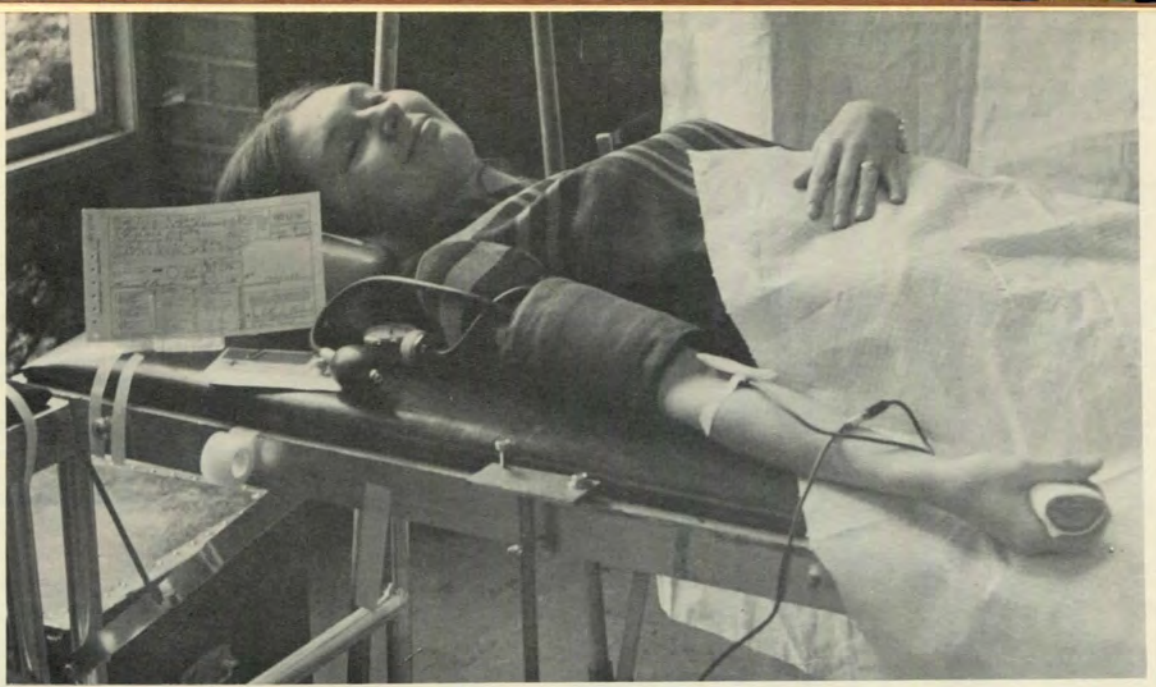

Again the Greeks have brought color, imagination, and excitement to the L.I.T. Campus.

## L.I.T. Movie Series

*Ten movies were shown at school this year including "Jesus Christ Superstar", "American Graffiti" and "Easy Rider". At a cost of only \$5 for a season or a dollar at the door.*

# Childrens Christmas Party

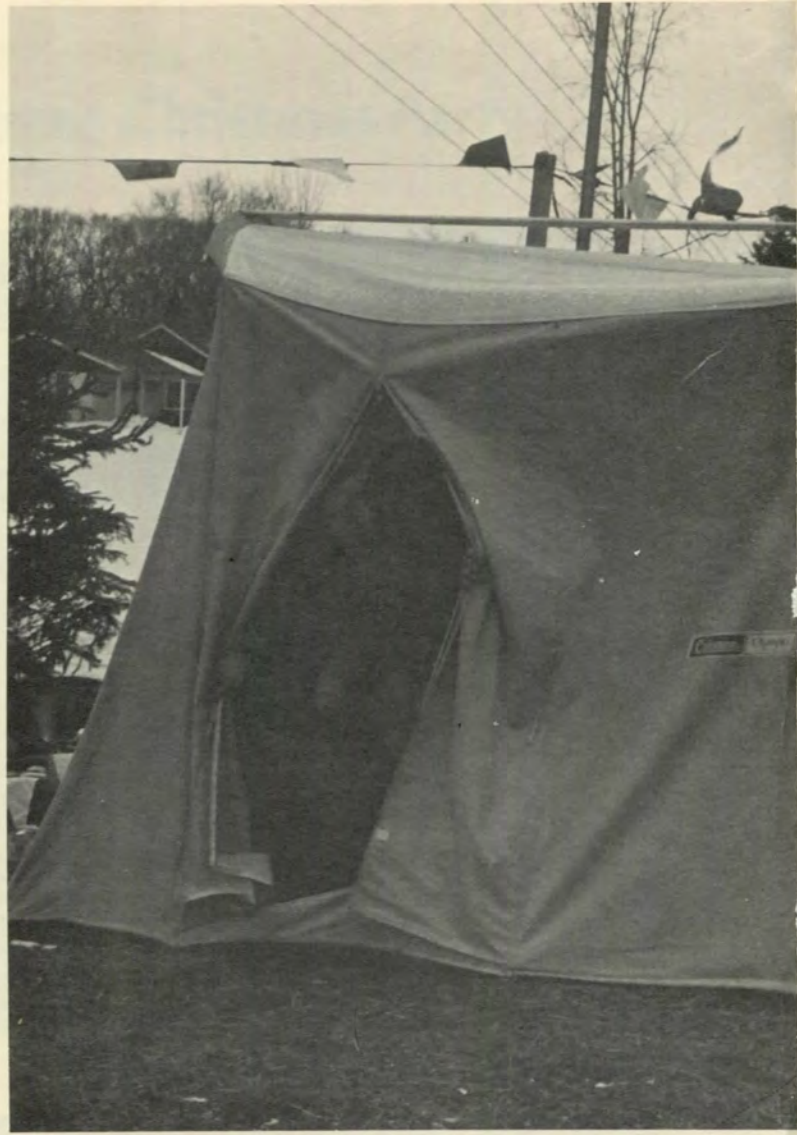

*The party attracted a lot of children of faculty and students giving the parents a chance to do some last minute shopping. With several cartoons and the movie "Scrooge" and, of course, Santa Claus, the party was a success.*

## Fraternity Activities

# Yearbook Photo Contest

*This year's contest subject was on Man and his environment. Environment was expressed very well during Michigan week by the Michigan Society of Architects 1969:*

*Environment; "The common ground of participating professionals. Wood and streams, streets and buildings, old and new. Environment is a gift to man originating in nature, modified and passed down from his ancestors. It must be refined to provide warmth and protection to a growing population; it must be protected to maintain light, cleanliness and vitality. It must be selectively pruned to remove the obsolete, the parasites; it must be carefully guarded to maintain the truth of the past which today remains relevant."*

1st Place Scott Bonney "Pea Soup"

who needs cement ?

bonney

*2nd Place Scott Bonney "Who needs cement?"*

*Out of approximately 65 entries these top five prints have been selected; First place won 50 dollars, second won 25, and third place 10. Thanks goes to our judges, Ronald Johnston, Richard Knight, and Robert Champlin.*

*3rd Place Don Phillips "Gateway to Paradise"*

MARK BEDELL	CONTROLLER
ROD LAWRENCE	RECORDER

Sigma Phi Epsilon has grown rapidly since its founding in 1901. From the first chapter of twelve men we have grown to over 200 Chapters and Colonies, and over 100,000 members. The scope of services provided by the National fraternity has also increased and includes the largest headquarters staff in the fraternity world. Sigma Phi Epsilon chapters receive assistance from this professional staff through personal chapter visits. Among other services, there are educational grants and loans for members, and housing financial assistance for chapters. Regional and national leadership academies are held annually to bring the latest information on chapters operations to undergraduate leaders

Our chapter at Lawrence Tech is now 24 strong, with an active alumni of over 150 members. We recently initiated 14 members, the largest pledge class in the history of L.I.T.

The objective of the chapter is to create a spirit of mutual respect in which individuals can best develop their respective potentials as students, leaders, and gentlemen. Sigma Phi Epsilon seeks men with the capacity for deep friendship and responsibility toward others.

In addition, we have an active Golden Hearts Chapter consisting of young ladies. Affiliated with our chapter as "Little Sisters", they are women chosen to represent us and our ideals.

# WELCOME TO AN INSIDE VIEW OF FRATERNITY LIFE

"Now the genius of the fraternity, as I see it, is to take this casual association of the campus and organize it consciously and intentionally as a venture in friendship so that what otherwise might be only incidental may become highly productive in the education of the student. This the fraternity does in a number of ways, of which I shall indicate only a few.

"The fraternity provides an intimate, face-to-face association in a small sustained and sustaining social group. In a large group the individual tends to get lost in the multitude of general and somewhat vague relationships. Some of the large universities have recognized this need of close association and, like Harvard and Yale, have organized the university into relatively small residential units which are communities within the larger university community in which personal relationships are made obvious and meaningful. The fraternity further reduces this community to a small, homogeneous group where the relationships are still more intimate and personal. Like the home, the emphasis is upon persons as persons and where the relations of community are brought to the vivid consciousness of its participants. In such an intimate association one has in the highest degree the sense of belonging to a significant social group. Success or failure in the discernment and fulfillment of these personal relationships are more open

to observation and cultivation or correction than they could possibly be in a large, heterogeneous and impersonal group.

The fraternity provides a disciplined association. Membership involves the acceptance of obligations and the commitment to ideals. Long experience has demonstrated that there are fruitful ways of living together in such a group and out of this experience the fraternity has evolved a structure of organization, rules of procedure, and measures of discipline. Through friendly and constructive criticism by his intimate associates, the fraternity man is made conscious of his shortcomings and is stimulated to overcome them. Group approval and disapproval are among the most effective incentives in the modeling of attitudes and behavior.

"Finally, the fraternity gives one a sense of belonging, not only to a widely-extended contemporary movement, but to a long and honorable tradition with a rich and growing history.

If you have ever been even remotely interested in fraternities, or have ever thought about what it would be like to be a member of a college fraternity, you have already taken the first step toward a lasting brotherhood. We here at Lawrence Tech are interested in you as a student and as a possible fraternity man. So forget your ideas of fraternity life and let us show you exactly what fraternalism means here on our campus.

Sigma Pi Engineering Honor Society was officially established at Lawrence Institute of Technology on December 18, 1970 under the instigation and advisorship of Professor Richard S. Maslowski, chairman of the electrical engineering department at Lawrence. It was founded to recognize those undergraduates in engineering who have honored themselves through scholastic excellence and laudable character. It was also originated to serve as the basis for a later formation of a Tau Beta Pi National Engineering Honor Society Chapter at Lawrence.

Active members are selected to Sigma Pi from full time students in the College of Engineering and are chosen with respect to specific requirements. Any junior whose cumulative grade point average is at least 3.0 and it places him/her in the top 1/8 of the junior engineering class is eligible. Any senior whose cumulative grade point average is at least 2.8 and it places him/her in the top 1/5 of the senior engineering class is eligible. All eligible members must also be recommended by the department chairman of their respective major, and a 2/3 majority vote of the active members is required to elect a candidate to membership. Voting is done by ballot and absentee ballots are allowed.

Two membership elections are held annually; one during the fall term and the other during the winter term. New members are honored at a formal initiation banquet after each election and also receive a certificate of membership.

# Better Than Money In The Bank.

That's education.

Worth every penny you can spend on it — and more.

Because the investment you make in your education pays dividends every year of your life.

At the SOC School Employees Credit Union we believe in education and we believe it's only smart to put your money where it will earn the highest dividends.

For employees of Lawrence Institute of Technology, that's the SOC Credit Union.

Full-time, part-time, day or evening staff know they just can't do any better than the high dividends earned on savings at the SOC Credit Union or the low finance charges on our convenient loans.

If you're a full or part-time employee of Lawrence Institute, we invite you to join with 5,700 educators in Oakland County who enjoy the benefits and privileges of membership in the SOC School Employees Credit Union.

**I believe this year's "Syntopian" has shown the activities, and expressed the feelings of the students at L.I.T. 1975. Working with a creative staff has made my job easier. Many thanks to those who have helped: My assistant editor Gary Tamanini who contributed much in the creation of this book; also Chuck Desoff, Gary Kecskes, Tony Bosman, Dean Lomas, and Bill Stimac who put in a lot of time and effort. Thanks also goes to the people who have contributed articles, photographs, or just time; President Wayne Buell, Dr. Richard Marburger, Mike Ugorcak, Blanche Wilson, Dennis Dimoff, Bruce Zarzewski, John Hopkins, Sandy Conoff, Richard Roberts, Ronald Johnston, Richard Knight, Robert Champlin, Janet Brzack, and Ronald Borrow, business manager. Yearbook produced by Student Government, printed by Jostens/American Yearbook Company, Topeka, Kansas. Official Senior photographer — Delma Studios, New York. Thanks to all who have had a part in making this year-book possible.**

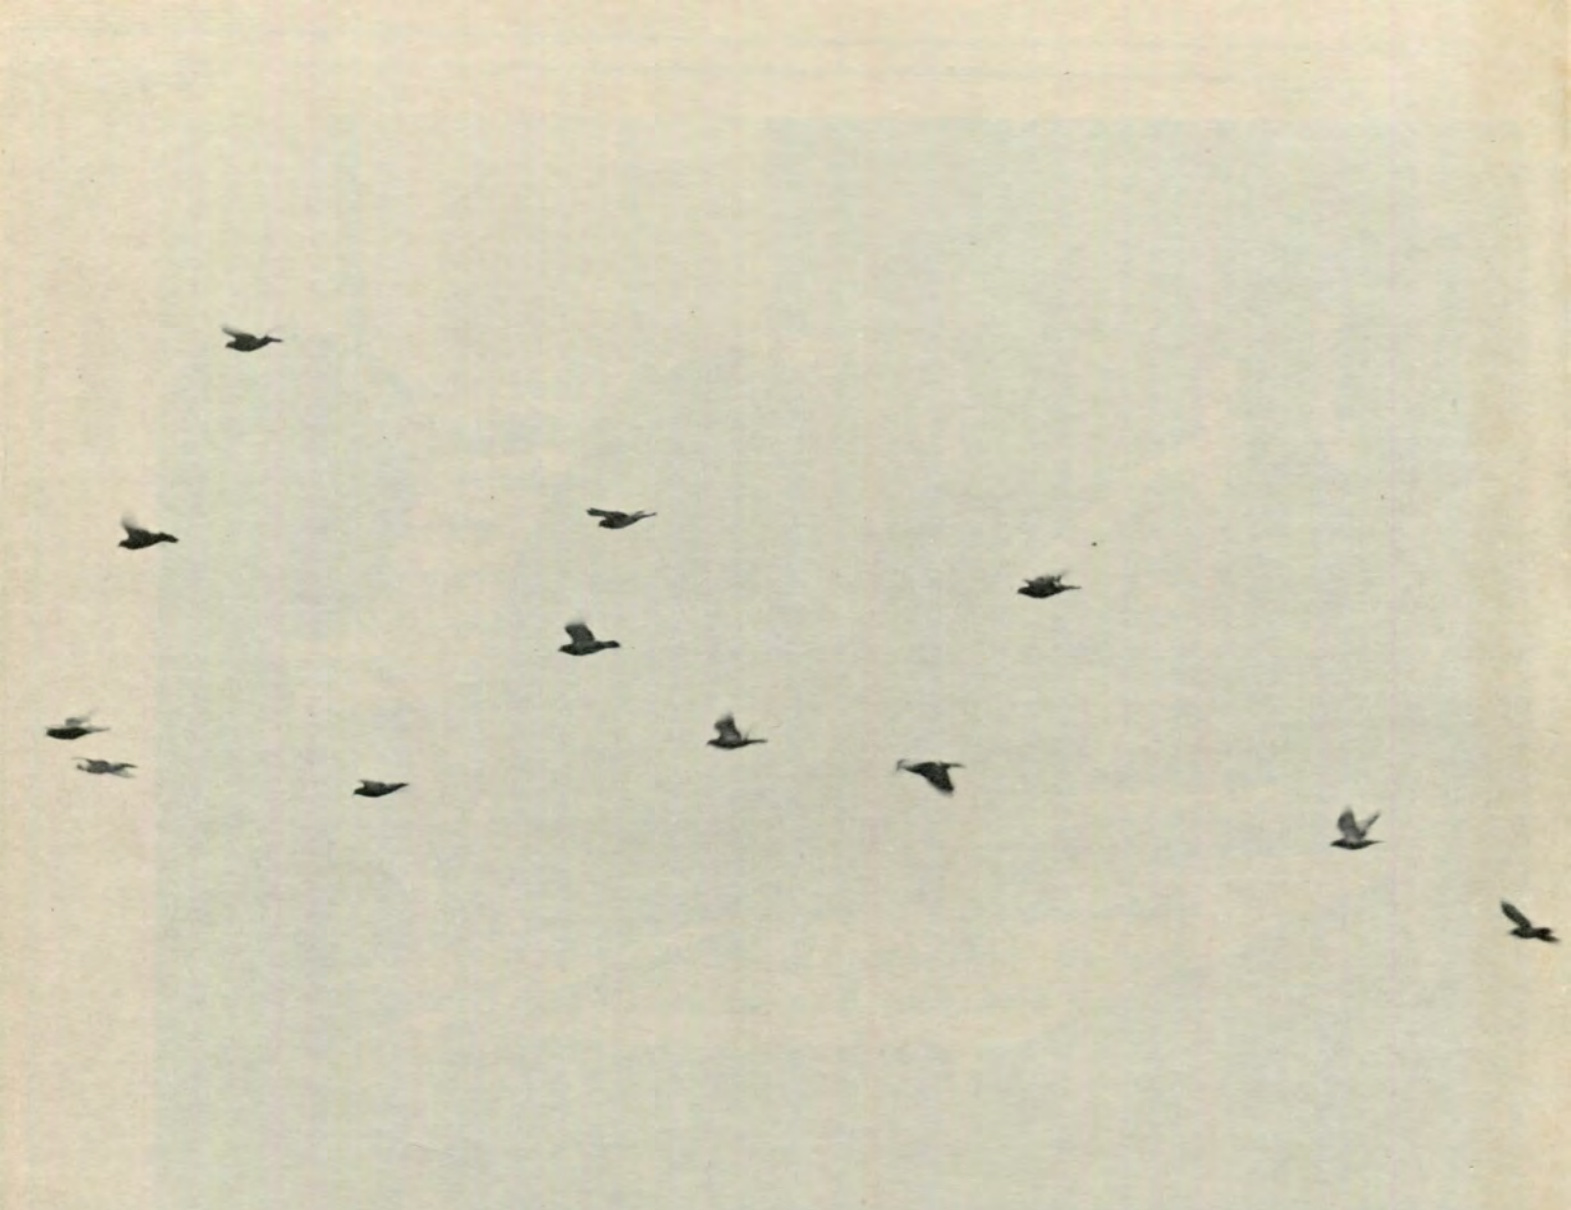

**A special thanks goes to a very talented man, Mr. Howard Etter, the artist who painted the watercolor for the cover of this year's "Syntopian". He attended the Academy of Art in San Francisco, California. As a self employed artist he moved to Detroit in 1960 and has been teaching since 1967. His work has been displayed in the Blue Cross/Blue Shield headquarters in downtown Detroit, Continental Bank in Chicago, and Farmers and Merchants Bank. Howard Etter is affiliated with several galleries: Gallery 22, Bloomfield Hills; Xochipilli Gallery, Rochester; Gallery One, Petosky; and Rubiners Gallery, Royal Oak. He is also a gold medal exhibitor at the Scarab Club in Detroit. Thank you Mr. Etter.**

**The 1975 yearbook has been dedicated to our environment, in hopes that we can learn to cooperate with our existing environment better. In a way that will not inhibit us, a way that doesn't pollute our air or water, a way that will make the best use of our land, so that we can live free of anything that would degrade our way of life. "Now the lord of Peace himself give you Peace always by all means".**
