Southfield, Michigan 48075
Vol. 41 1974 Yearbook

DR. EARL W.

PELLERIN, FAIA

When one thinks of Lawrence Tech's School of Architecture, one automatically thinks of Dr. Earl W. Pellerin. They are synonymous.

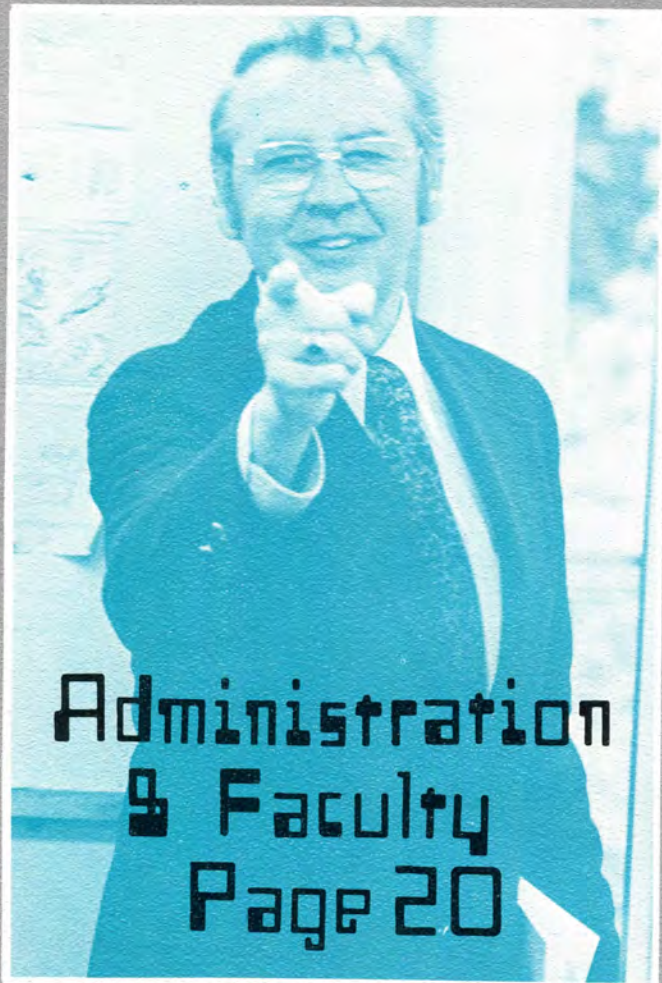

"Doc", as he is known by his students, has developed the Lawrence Tech School of Architecture from its beginnings in 1932 into one of the top architectural schools in the nation.

According to Dr. Wayne H. Buell, President of Lawrence Tech, Dr. Pellerin is a man of "untiring efforts and dedication . . . whose students have become many of the leaders in their profession in the Detroit area and throughout the country."

"Doc" has many achievements including his election in 1964 to the College of Fellows by the national body of the American Institute of Architects. In 1970 the Detroit chapter of the AIA presented him its Gold Medal and in 1973 the Michigan Society of Architects awarded him its highest honor, its Gold Medal, because he "Has demonstrated leadership in the profession and has contributed to the advancement of his local, state, and national professional organization and his community."

Dr. Pellerin has always been there when any other student or I have needed him. Otherwise these words would not have been written, for this student and many others would not be here to write about him. For myself and for all those other students who "owe it to Doc", we dedicate this Yearbook.

What is a Lawrence Tech ?? . . .

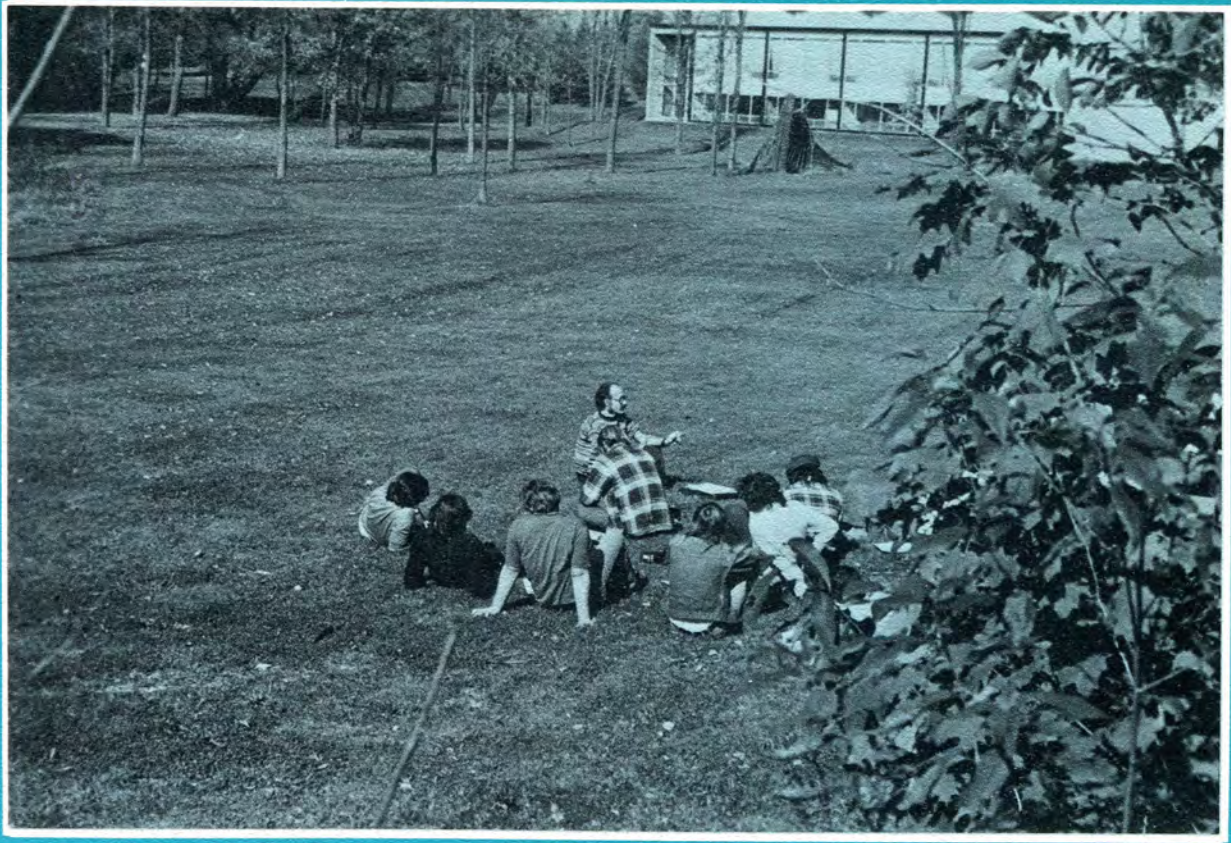

It is many things to
many people . . .

To some it is a place to learn in the classroom. . .

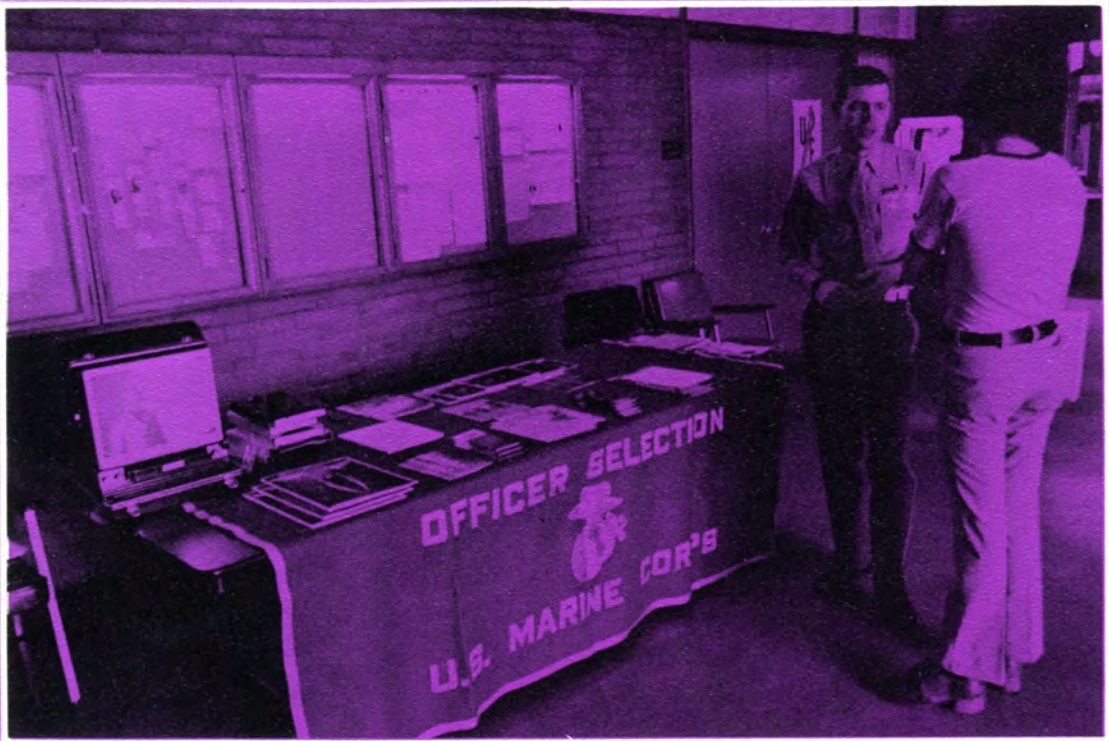

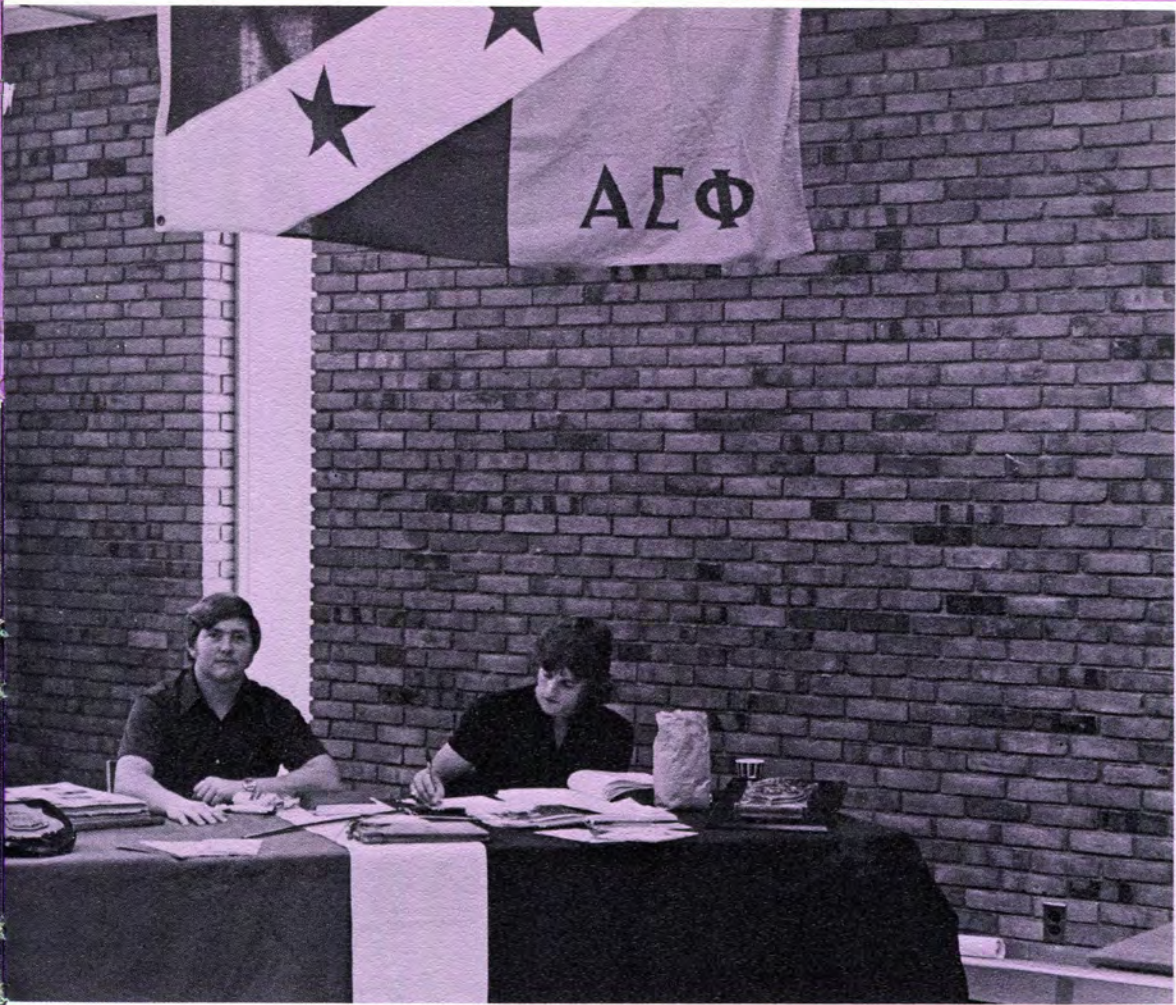

To others it is a place to learn outside the classroom. .

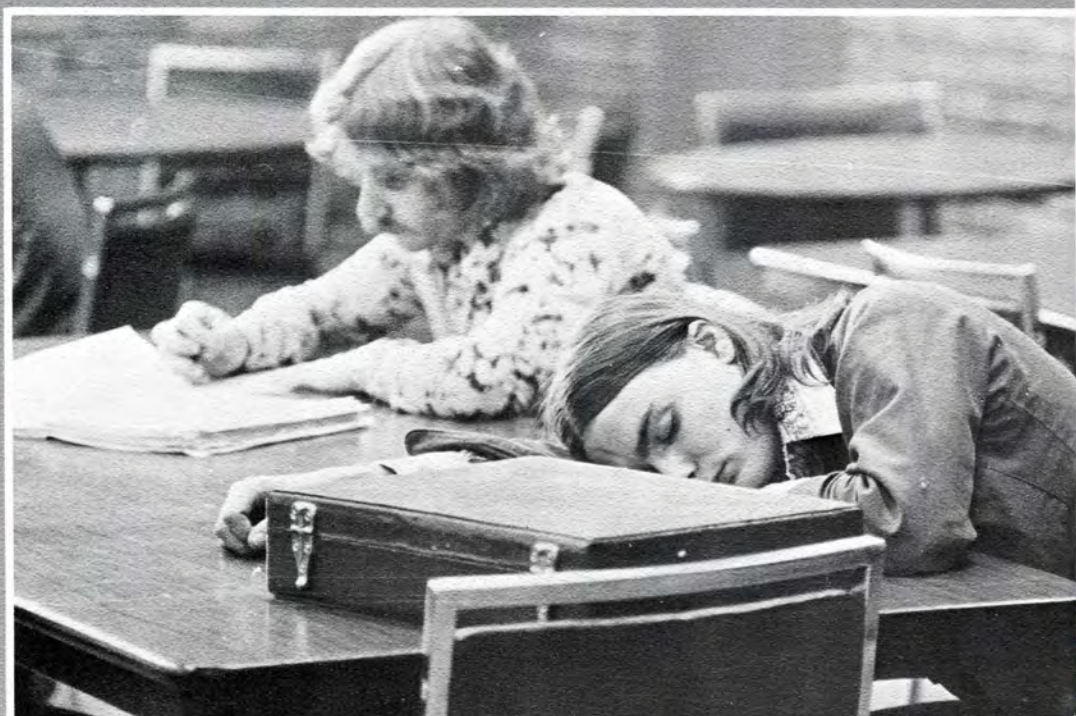

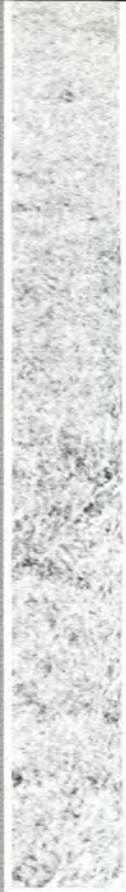

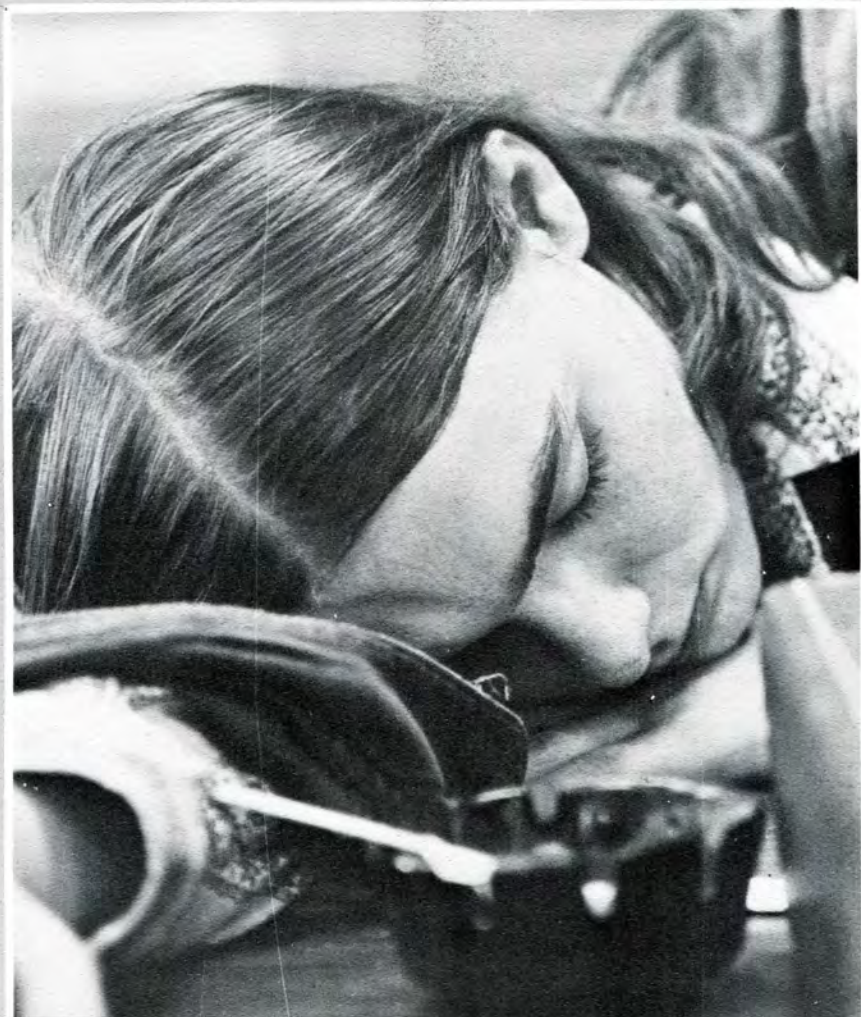

Yet to others its a chance to grow. . .

To some it is a place to pass four or five years in time.

And to others a way of life.

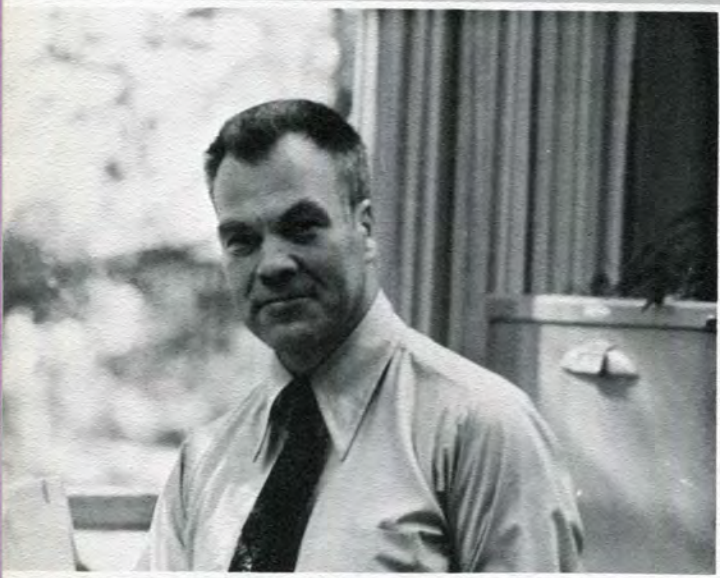

Lawrence Tech is UNlty, with diVERSITY

VET'S CLUB ROAD RALLY

Phi Kappa Upsilon fraternity pulled a clean sweep last year at the IFC's annual Greek Week. The first ceremony was the 'Ugly Greek' contest, and for the second year in a row PKU's Tito Zalba won the event.

On Wednesday of Greek Week, the Beauty Pageant was held, and again PKU's entry was the winner. The winner of "Queen" of Greek Week was Miss Jackie Hamm who also won the title of Quenn of Greek Week '73.

PKU Cleans Up

Greek Week

On Sunday, May 13th, on Mother's Day, the Greeks should have taken this as an omen. They found out again that it is not nice to fool Mother Nature, as she turned the weather into not a cool atmosphere, but one which was rather COLD!!

At the race course, converted B-lot, Alpha Sig, and PKU were all set, but the race was held up until 2 p.m. waiting for the other fraternities. Sig Eps finally showed up and there was a three fraternity rival.

PKU spent a great deal of time modifying their equipment this year. The biggest improvement was the new nylon bearing bicycle wheels deployed in the races.

The closest rivals were Alpha Sig, who ran into a bit of bad luck in the bath tub race. Their front end suspension broke as they lined up at the starting line.

Sig Eps also ran into an equipment problem, as on the last race, the toilet bowl race, the racer was completely demolished due to the combination of un-balanced wheels, high speed and lack of excess horsepower.

In the final event, the Tug-of-War over the LIT Creek, Alpha Sig eliminated Sig Eps in the run off. PKU defeated Alpha Sig in the finals. Because of the cold weather the tug of war was not carried out all the way, as the losers in both heats gave out before being pulled into the creek.

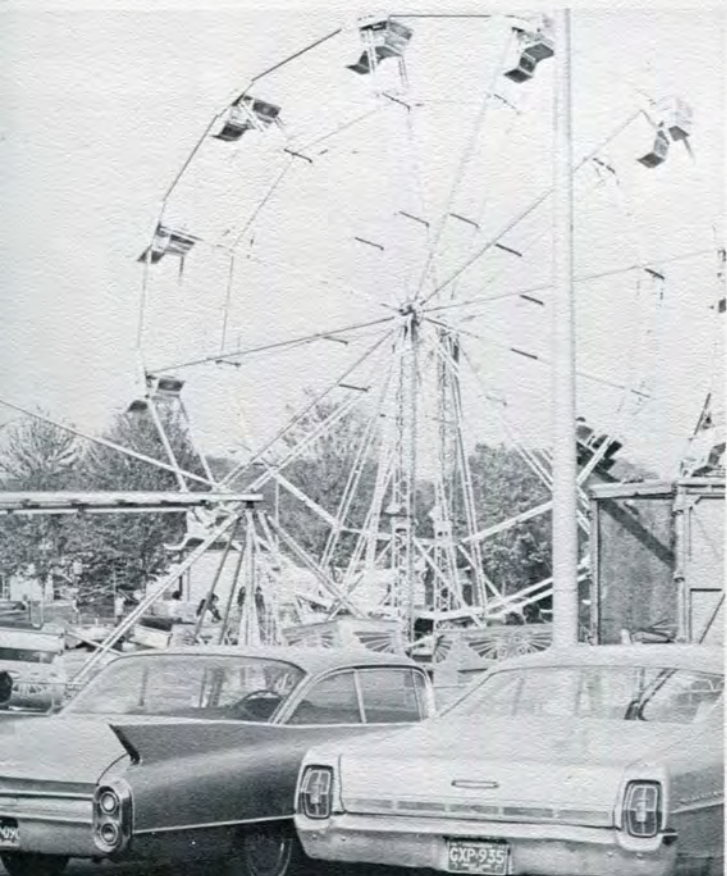

Despite dropping temperatures, May 4, 5 and 6 brought over 14,000 people to the 1973 Spring Fair. This Student Government sponsored event was an outstanding success.

Parking lots A and B were filled with games, rides and exhibits. There was something there for everyone. The clubs and organizations manned the game booths for those who liked to test their skill. Sigma Phi Epsilon fraternity ran a "dunk-booth."

Spring Fair

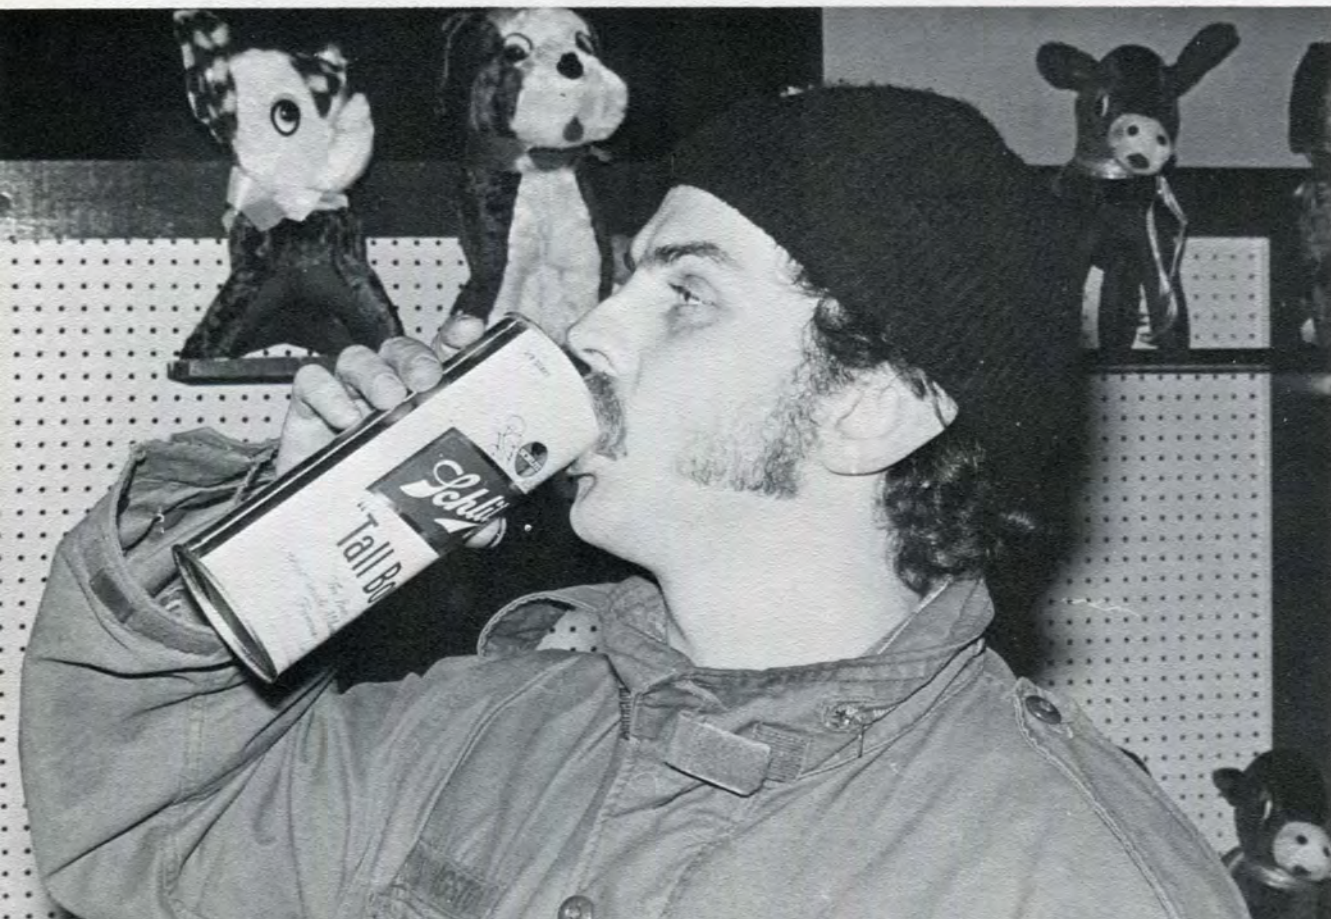

More than a Midway

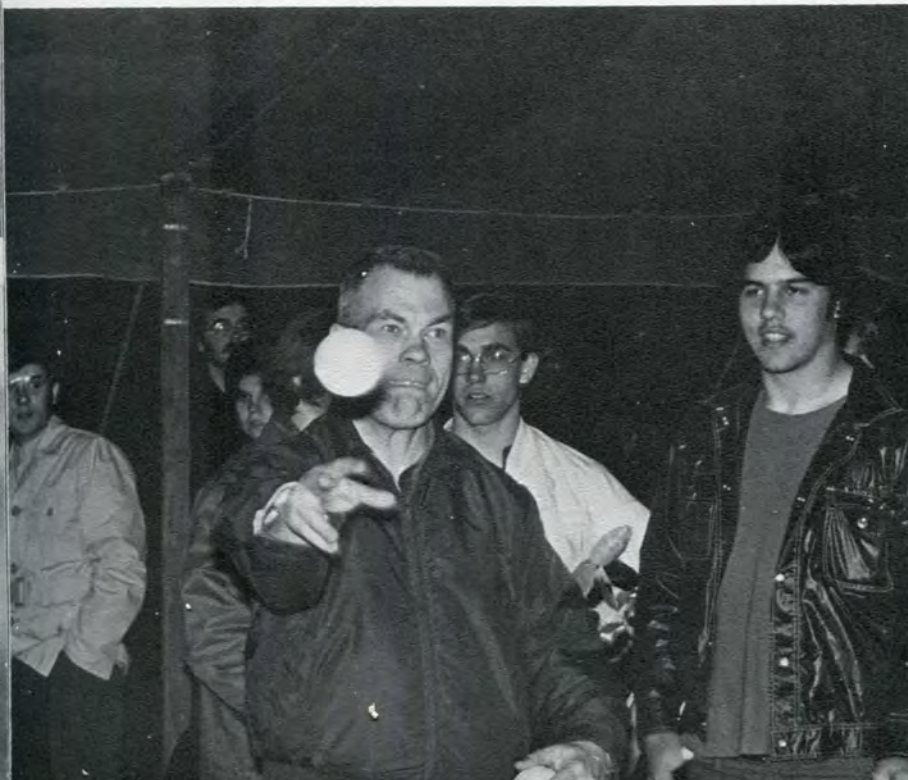

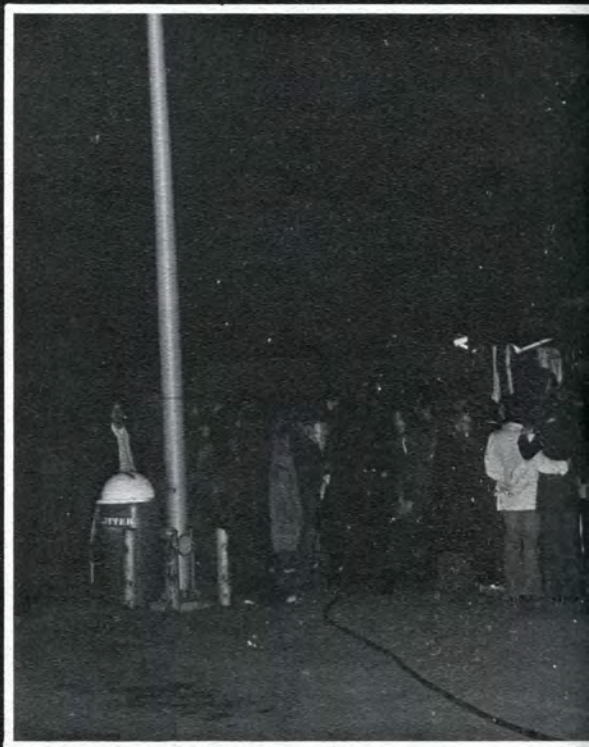

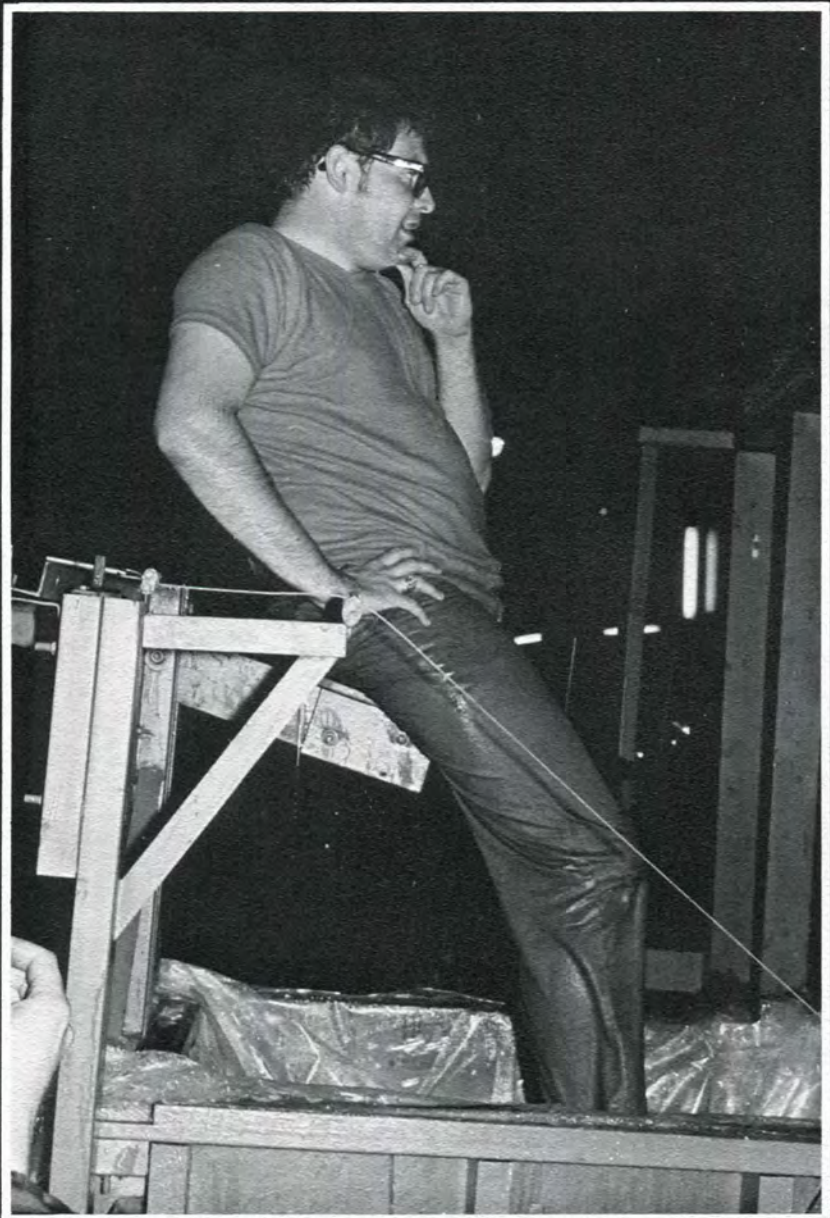

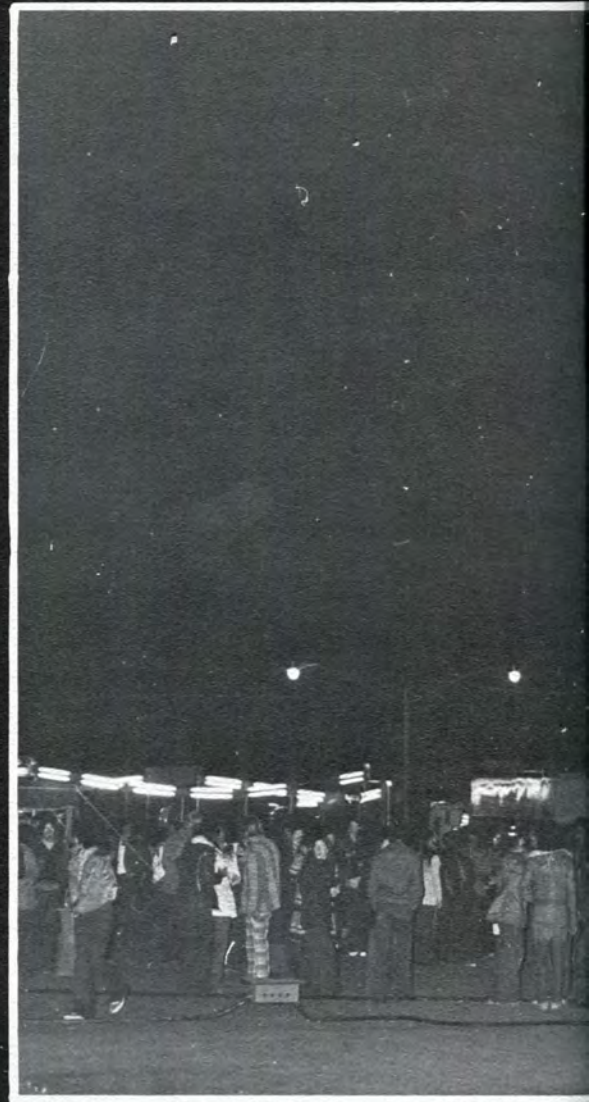

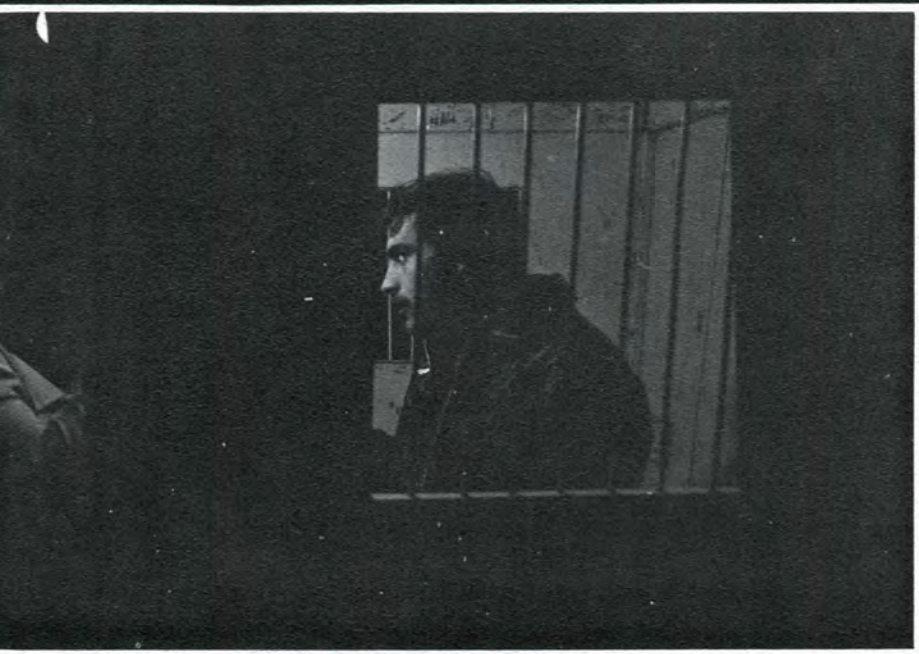

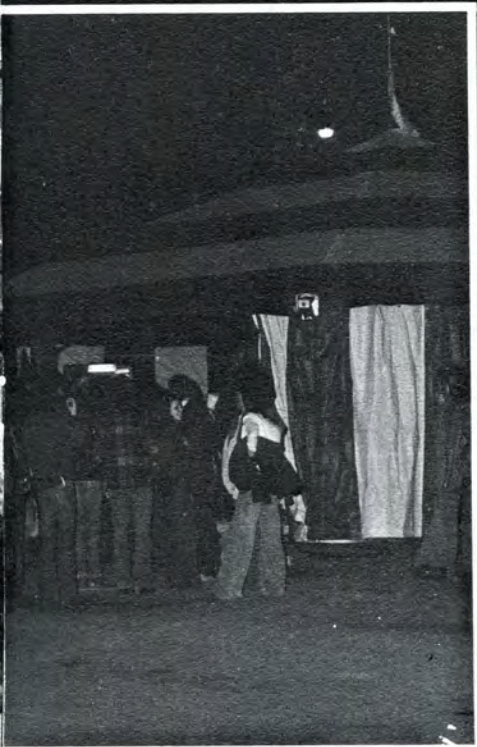

In the exhibit tent, visitors viewed antique cars (courtesy of the Detroit Historical Museum), motorcycles, a diamond display and the Chevy Show. Rides throughout the fair grounds ranged from a merry-go-round and kiddie cars to the Tilt-A-Whirl and the Moon-walk. There was also a popcorn wagon and a food stand for those who wished to indulge.

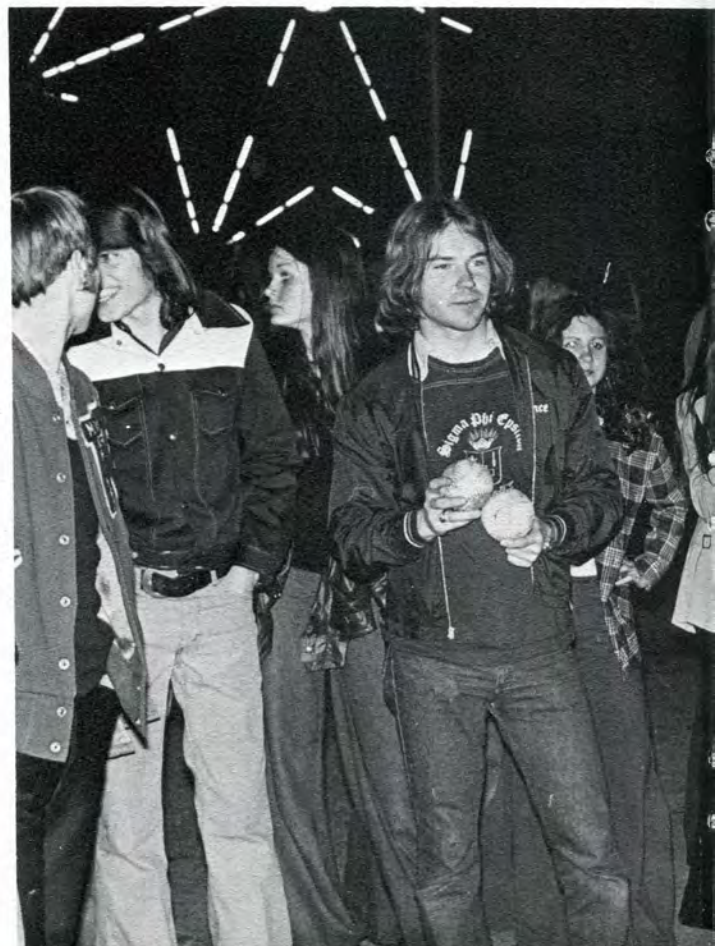

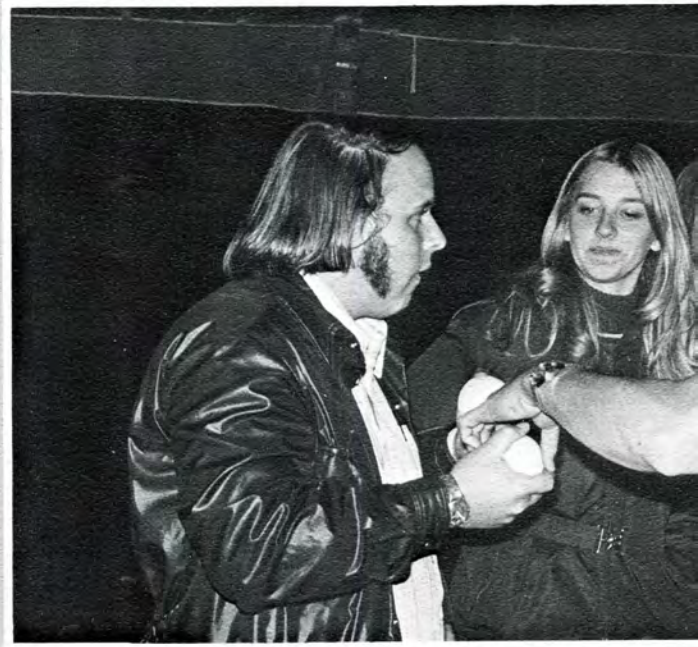

The net profit for the Fair was approximately \$3,000 most of which will be returned to the clubs and organizations who maintained game booths on the midway for the three days. The remainder of the profits will be retained by the Student Government to help finance activities during the 73-74 school year. The only unsuccessful part of the Fair was the annual raffle. Sales ended at an absolute minimum resulting in approximately a \$500 loss.

But all is well that ends well. Even with the unexpected always happening, all ran smoothly at the 1973 Lawrence Tech Spring Fair.

Blood Bank

Gift

Life

Twice a year, the American Red Cross comes to our school to accept blood donated by students and faculty for a very important cause, the Lawrence Tech Blood Bank.

In the fall blood bank 74 persons gave the gift that only they can give, BLOOD. As blood cannot be made in the test tube. Of the 74 persons, only 17 were rejected, the 57 that did give is an increase over last year's amount.

The Blood Bank, spearheaded by organizations who run a derby. The organization that has the most amount of members that give receives a trophy.

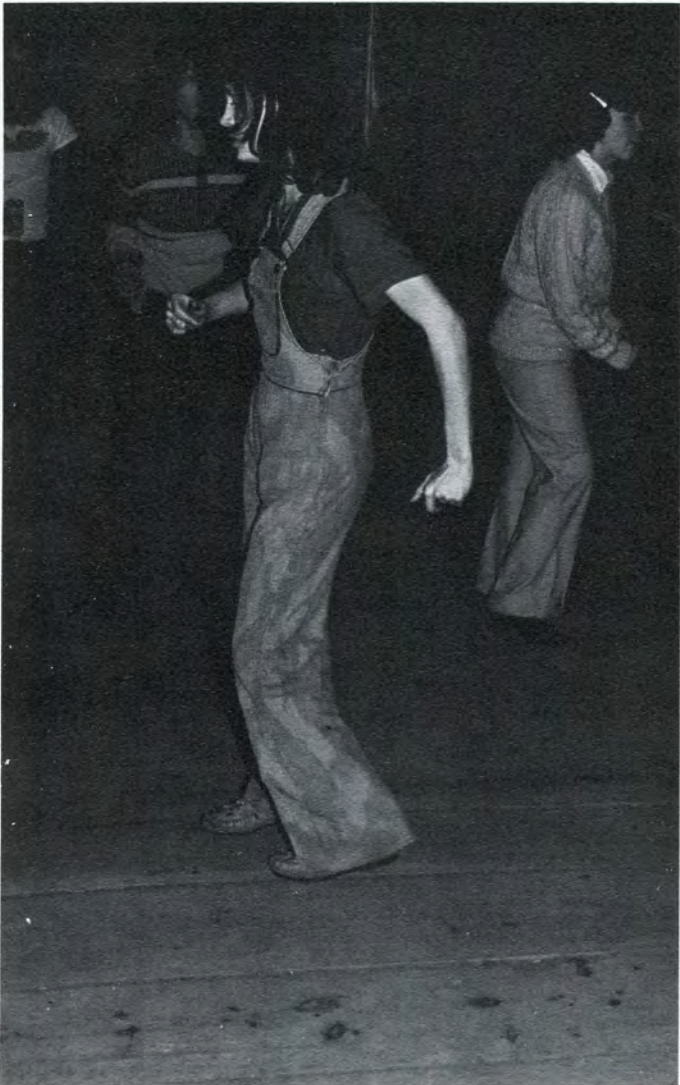

The falls Derby saw a three way tie between Sigma Phi Epsilon, Alpha Sigma Phi, and the Student Chapter of the AIA.

L.I.T. Students in AMC Economy Run

DETROIT, January 23 — Mark D. Bill of Lawrence Institute of Technology averaged 25.58 miles a gallon in a 1974 Gremlin to win a collegiate economy run sponsored by American Motors Corporation.

The event featured engineering students from five major Michigan universities and colleges as drivers, and covered about 220 miles from Cobo Hall in downtown Detroit, to the Michigan State Capitol in Lansing, and back to Lawrence Tech in Southfield.

Second place went to Matthew Kiriazis and Tom Howells of Wayne State University with 25.29 m.p.g., with Nancy Sutake of Michigan State third at 24.95 m.p.g., twins David and Thomas Chicovsky of University of Michigan fourth at 23.05 m.p.g., and Dennis J. Schauer of University of Detroit fifth at 21.58 m.p.g.

CALIFORNIA JOINS IN CHALLENGE

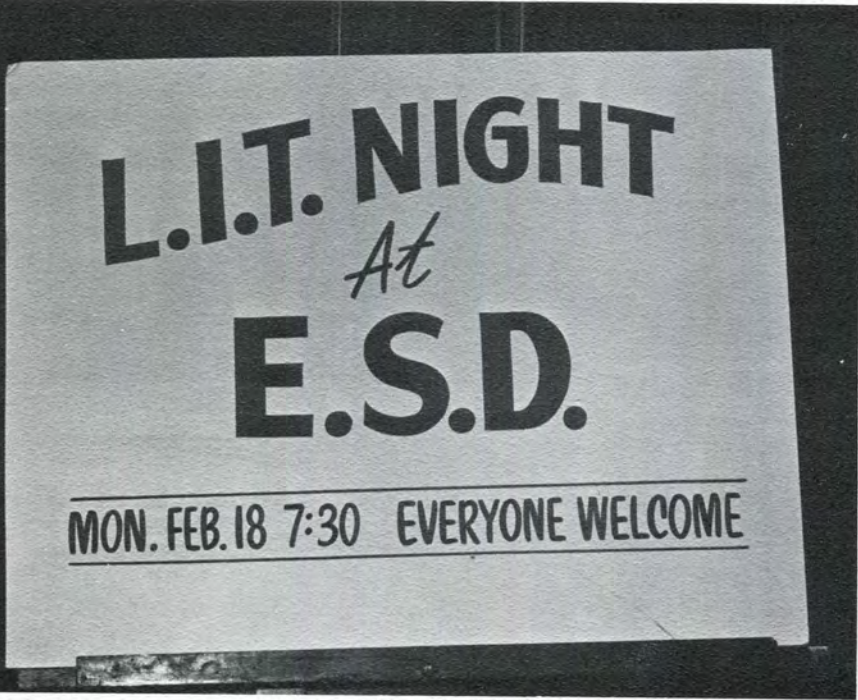

Economy driving competition appears to be spreading across the United States as the new intercollegiate sport.

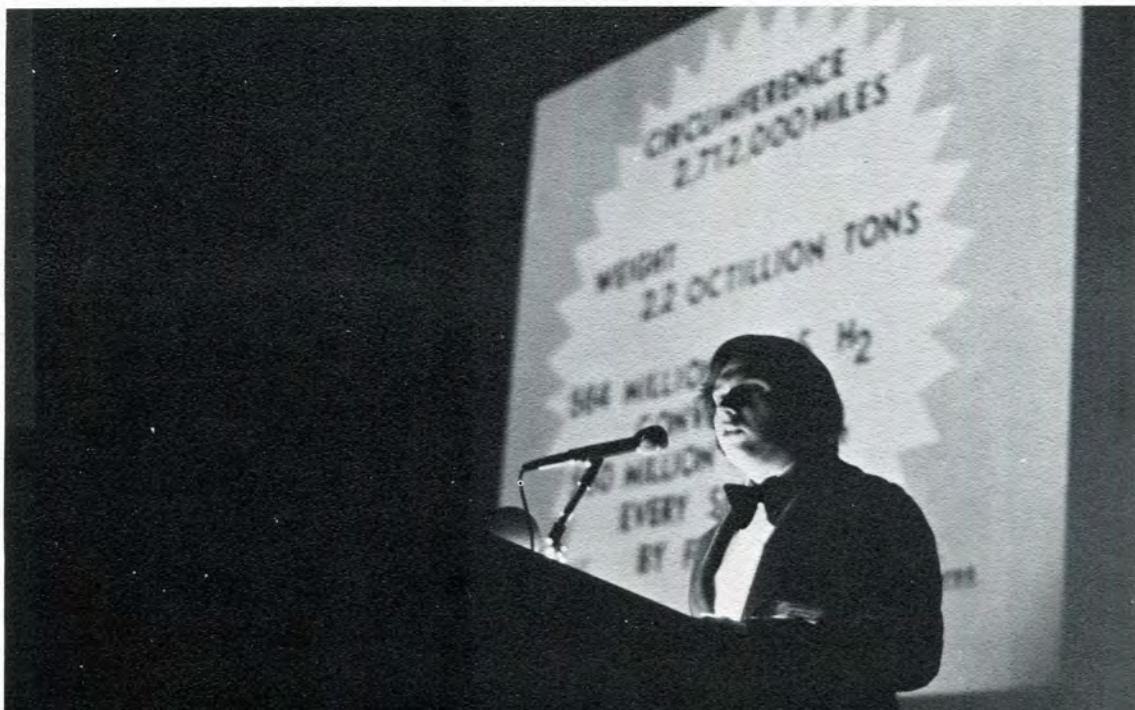

Lawrence Institute of Technology, Southfield, Michigan, victorious over four other Michigan universities in the country's first Gremlin Collegiate Economy Run on January 23, has received a second challenge to defend its title — this one from Northrop Institute of Technology in Los Angeles.

Dr. Buell accepted the invitation to compete with the western schools on a date mutually satisfactory to all contestants after Lawrence Tech has met six of Wisconsin's top schools

The letter "L" symbolizes two meaningful words in the life of a Christian which are love and life. The love that is evident in the Christian's life is the never failing love of God. Irrevocably the love of God encompasses comforting, protection, peace happiness, caring wisdom and understanding. The Christian also has a life that will never end. This eternal life shall be spent with God throughout the ages of eternity.

God cares about every human being as a person. Believe in Christ today and discover the love and the life of a Christian.

INTERFRATERNITY COUNCIL

WELCOME TO AN INSIDE VIEW OF FRATERNITY LIFE

"Now the genius of the fraternity, as I see it, is to take this casual association of the campus and organize it consciously and intentionally as a venture in friendship so that what otherwise might be only incidental may become highly productive in the education of the student. This the fraternity does in a number of ways, of which I shall indicate only a few.

"The fraternity provides an intimate, face-to-face association in a small sustained and sustaining social group. In a large group the individual tends to get lost in the multitude of general and somewhat vague relationships. Some of the large universities have recognized this need of close association and, like Harvard and Yale, have organized the university into relatively small residential units which are communities within the larger university community in which personal relationships are made obvious and meaningful. The fraternity further reduces this community to a small, homogeneous group where the relationships are still more intimate and personal. Like the home, the emphasis is upon persons as persons and where the relations of community are brought to the vivid consciousness of its participants. In such an intimate association one has in the highest degree the sense of belonging to a significant social group. Success or failure in the discernment and fulfillment of these personal relationships are more open

to observation and cultivation or correction than they could possibly be in a large, heterogeneous and impersonal group.

The fraternity provides a disciplined association. Membership involves the acceptance of obligations and the commitment to ideals. Long experience has demonstrated that there are fruitful ways of living together in such a group and out of this experience the fraternity has evolved a structure of organization, rules of procedure, and measures of discipline. Through friendly and constructive criticism by his intimate associates, the fraternity man is made conscious of his shortcomings and is stimulated to overcome them. Group approval and disapproval are among the most effective incentives in the modeling of attitudes and behavior.

"Finally, the fraternity gives one a sense of belonging, not only to a widely - extended contemporary movement, but to a long and honorable tradition with a rich and growing history.

If you have ever been even remotely interested in fraternities, or have ever thought about what it would be like to be a member of a college fraternity, you have already taken the first step toward a lasting brotherhood. We here at Lawrence Tech are interested in you as a student and as a possible fraternity man. So forget your ideas of fraternity life and let us show you exactly what fraternalism means here on our campus.

A History of Sigma Pi Engineering Society

The Engineering Society at Lawrence Institute of Technology was first conceived in December of 1970, when Professor R. Maslowski and sixteen of the top engineering students at LIT held a meeting to discuss the idea. The decision was made to form the society and temporary officers were elected. After laying the guidelines for a constitution and the qualifications for one to become a member of the society, four more members were elected making a total of twenty charter members. On March 25, 1971, the constitution was ratified and the society adopted the name Sigma Pi.

Membership in Sigma Pi is based on scholastic achievement as well as a display of exemplary character. Seniors must have a grade point average of 2.8 on the 4.0 scale, and be in the top one fifth of their class. They must also have completed a total of 45 hours at LIT, 25 of which must be in their major. Juniors are required to have a least a 3.0 grade point average and be in the top one eighth of their class. They also must have completed 45 hours at LIT, 3 hours being in their major. The charter members must have a grade point average of at least 2.7. There are two elections held each year, one in September and one in February after the change in semesters for the evening students. For a candidate to be elected there must be a two-thirds majority vote, in favor, by the total membership. It was originally decided to elect only two juniors in the fall elections, however, in September of 1973, this was changed to allow an unlimited number to be elected provided they met the requirements.

Sigma Pi has elected only 82 members, including the present membership in its three year history. The members have also been participants and in most cases officers in other school organizations such as the student chapters of the SAE and IEEE. Although always having been a small organization it has been an active one, participating in many of the school functions. Currently being studied is a program to provide an engineering orientation for high school students who might be interested in a career in the engineering profession.

Volleyball Comes To L.I.T.

With the erection of two volleyball courts across Ten Mile, so too rose the Lawrence Tech's Volleyball League.

The new sport on campus was at first well received with six teams signing up for competition. Competition was held on Tuesdays at noon. Even the faculty got enough bodies together to put a team.

In its first year in existence two powerhouses were developed, the Spikers and Alpha Sig. The Spikers, a group of recruited players, while Alpha Sig, a fraternity met in a showdown in a championship match as they both breezed through weekly competition.

After it was all over the Spikers were champions of this first venture in to intermural volleyball.

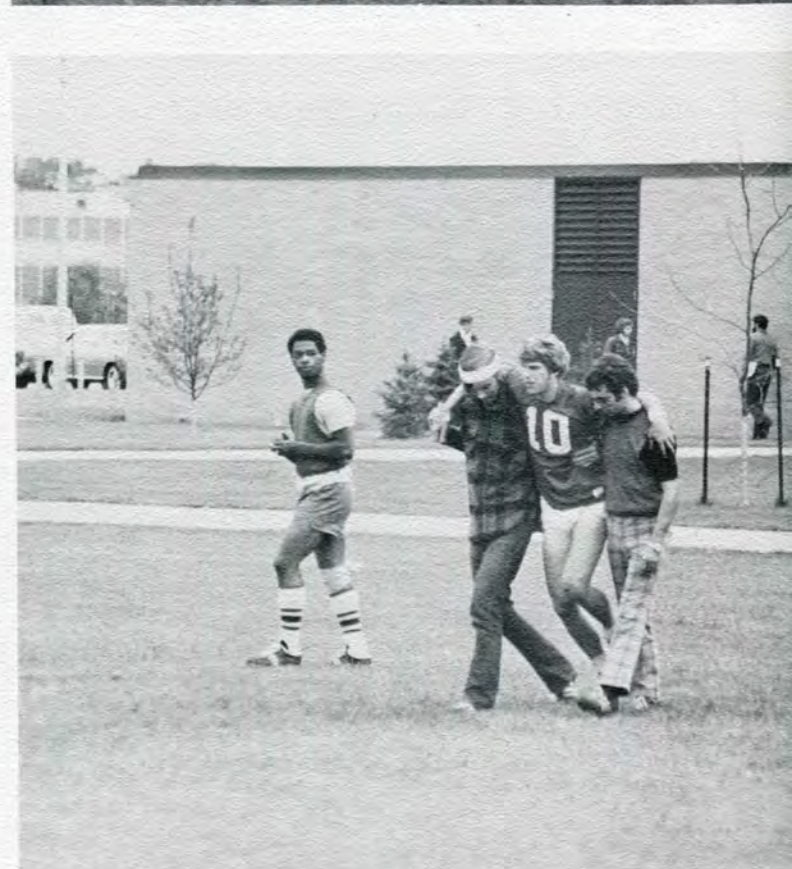

This year's intermural football league saw the return of the faculty, the combining of the previous season's champions and other surprises. Although the amount of teams wasn't as plentiful as years past, the enthusiasm was certainly there in this year's season.

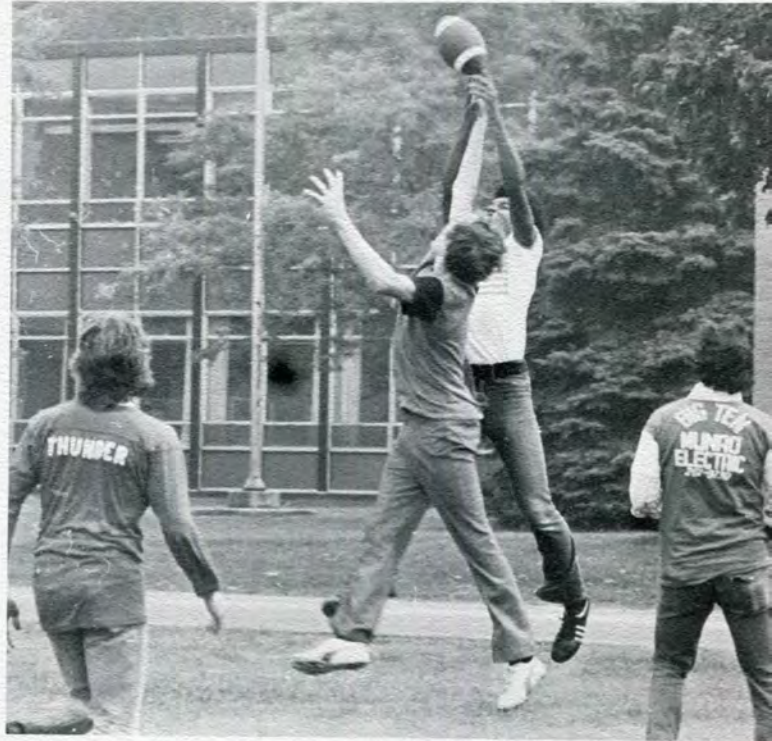

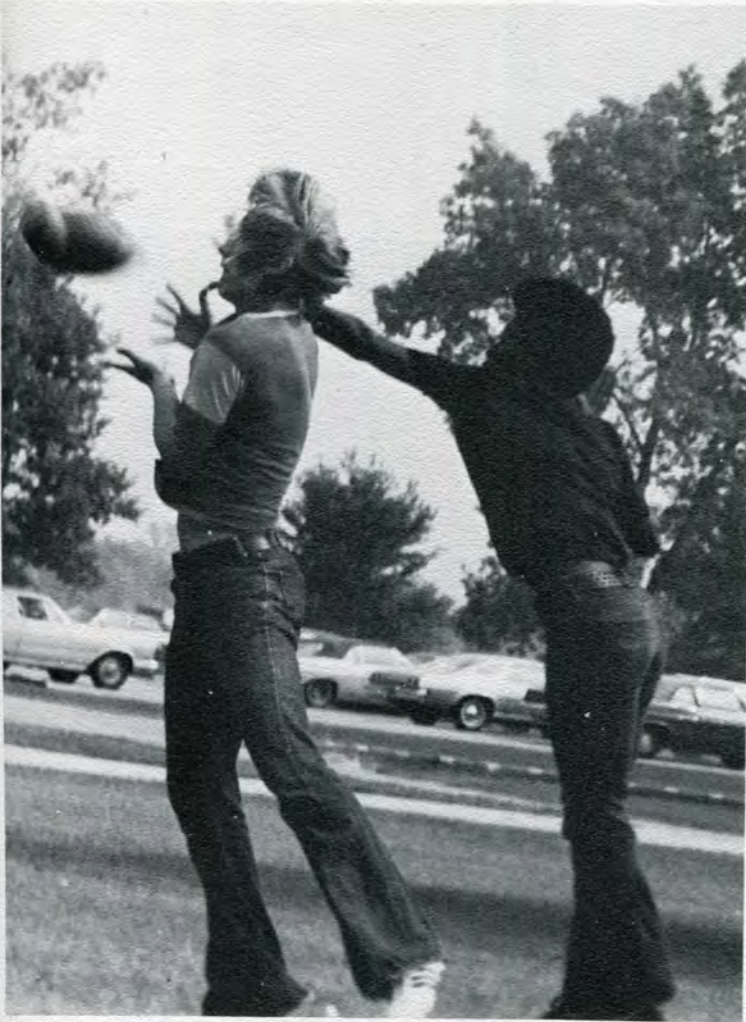

'But place third in newly created "Commuter Bowl"'

Hovna Wins Title

The faculty, with the return of Joe Shields, put together another great offensive machine in the Thursday league. The Superstars, champs of the Tuesday league the year previous, and the Purple Gang, school champs, both hit heavily with graduation, combined hoping to form a powerful team.

The "new" Purple Gang did have a strong team, but there was Hovna, a team that had a powerful passing attack. That attack, which made their running that much better, led them to the edging out of the Purple Gang in the final standings.

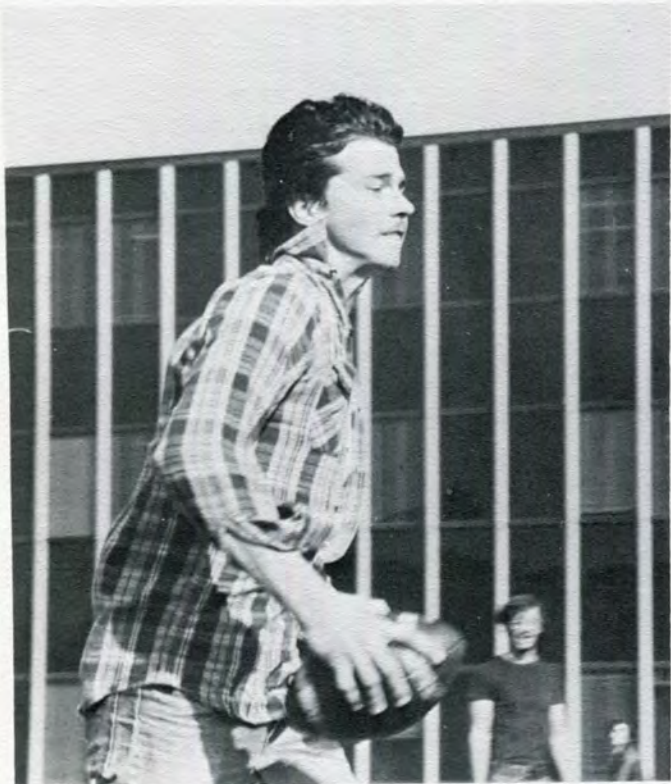

In the school championship, Hovna defeated ACS Allstars, champs of the Tuesday league, a league considered to be the weaker of the two.

A new dimension was added to this year's LIT intermural league. Through the efforts of Mr. Lew Moon and neighboring college athletic directors intercollegiate post-season play between Oakland University, Wayne State University, and U of D was realized in the first annual "Commuter Bowl".

Each of the four schools sent their respective school intermural champions to meet in a playoff. Hovna, by winning our school championship, was pitted against Oakland University, while U of D played Wayne State in the elimination round. In that round saw Oakland defeat LIT, and Wayne State defeated U of D.

In the finals Oakland defeated Wayne State

Hockey Club Comes of Age

By Dave Campbell

Relatively new to the Detroit area college student's life is hockey on campus. Not on a level or teams like Michigan Tech but more in a class with Junior and Senior hockey programs.

In the past three years, five new college teams have been formed, a by-product of the tremendous growth of recreational hockey. One such college is Lawrence Tech. Starting with a dream of playing college hockey, two students, Bill Livingston and Rick Pruzytulski, formed the hockey club in the fall of 1971.

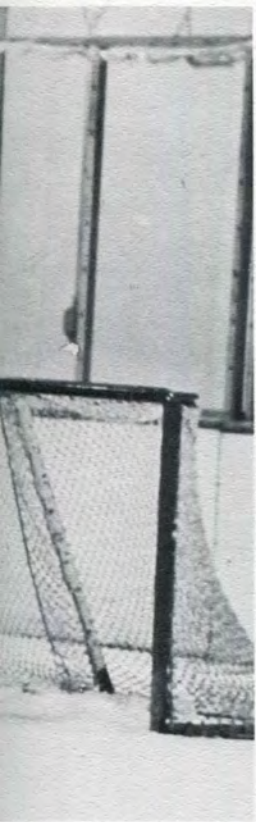

In its first season they compiled a record of 1-5, playing all their games against Henry Ford and Macomb. The '72-'73 season saw great enthusiasm at the school. Uniforms were purchased by the school and the schedule was expanded to 18 games. That season, playing without a coach and with club members paying all their own expenses, Tech finished with a record of 3-15-1. Forwards Tom Bommarito, Tom Dombrowski and Ron Predmesky tied for scoring honors, with goalie Dave Campbell being voted Most Valuable Player.

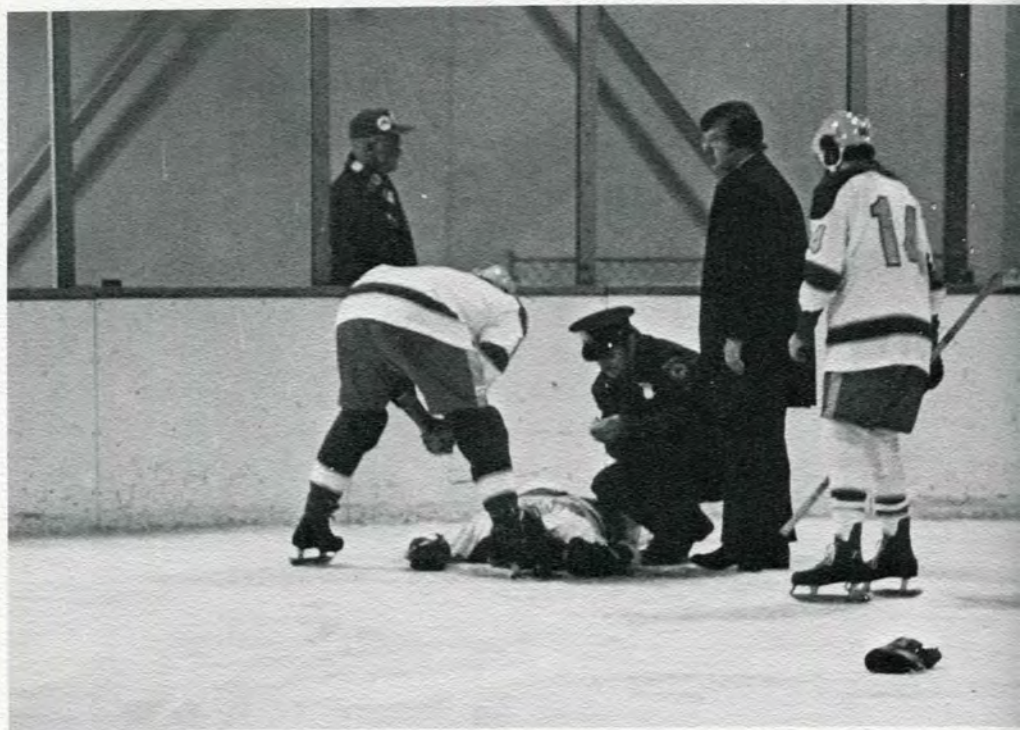

This season the club took a team approach. A team was selected from club members with the rest acting as a "farm system", a means of filling openings on the team should they occur. The school increased its financial support and a coach, Ernest Maier, a professor in Marketing, was added. The schedule was expanded to 24 games and the Novi Ice Arena became the team's new home rink. Five new players were added to the roster with 3 of them being able to break into the starting line up. The best of these has been Tam Vance, a freshman, who leads the team in scoring.

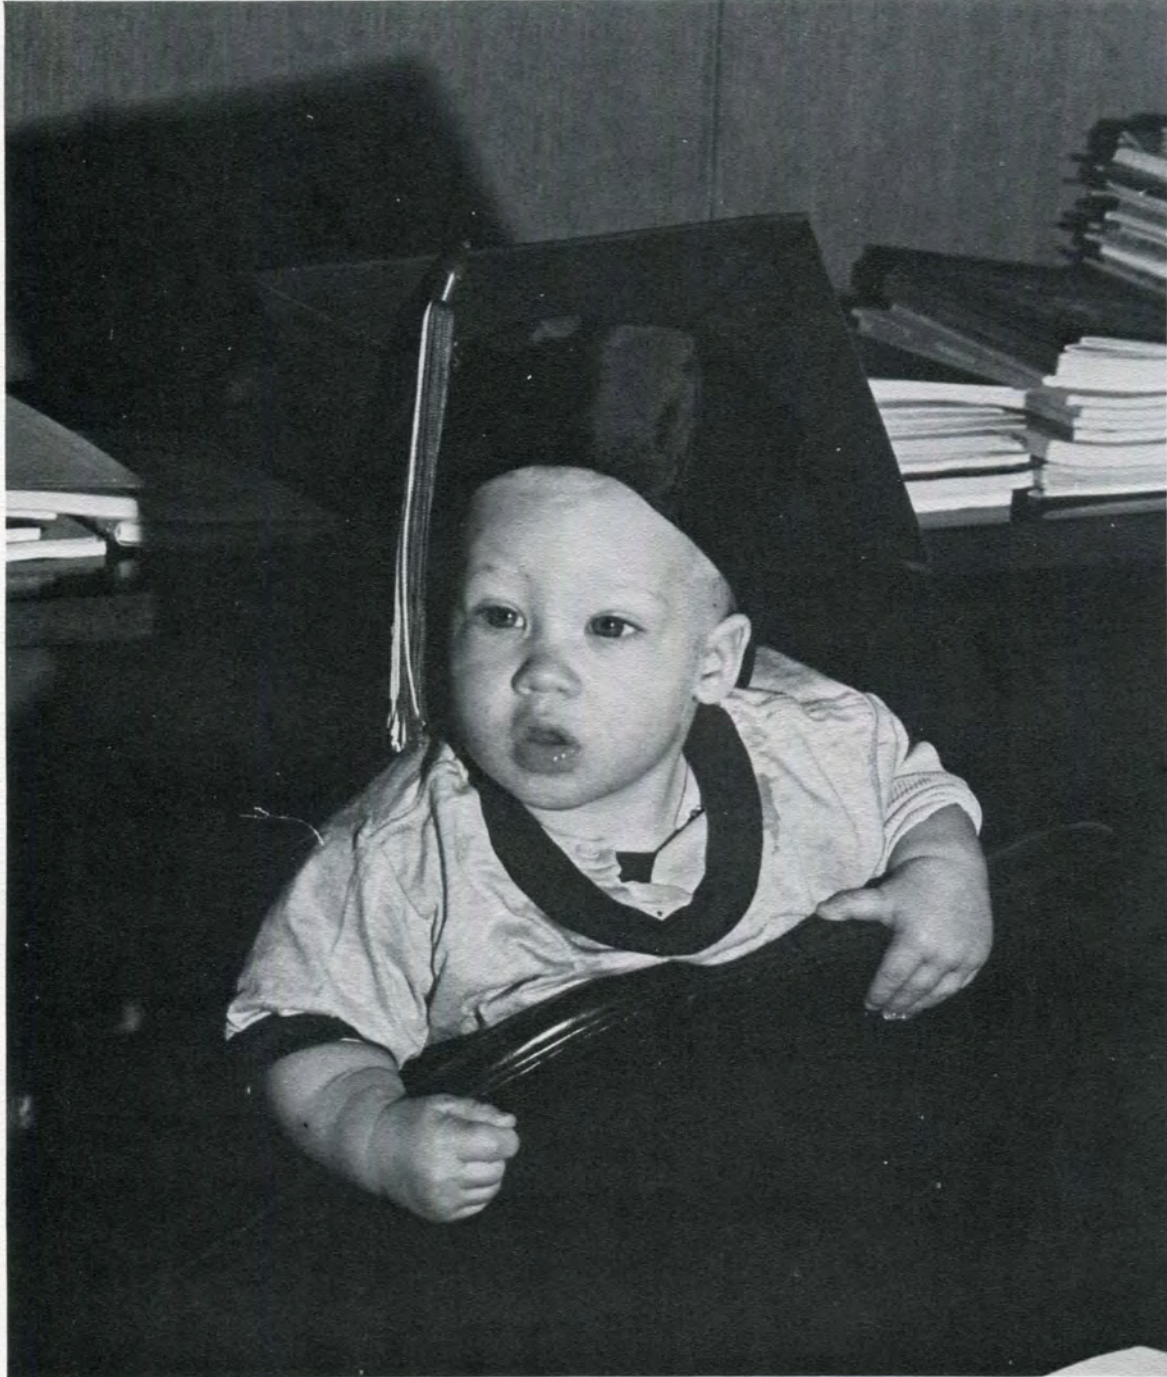

The future for the Lawrence Tech team is bright. Arrangements are now being made with Nordic Ice Arena in Hartland to become the new home rink of the Bluedevils. Again, plans are being made to increase the number of games on the schedule and there is a possibility of 40 games for next season. The team is gaining greater recognition at the school and increased financial aid looks likely. Lastly, chances of joining a league for the '75-'76 season appear very strong.

The team is open to any member of the student body and chances for any new students making the team are very good, as the current squad has six graduating members.

SENIORS

SHAWN MICHAEL FLACK

Graduating in Sibling Development
Stair Climbing Major

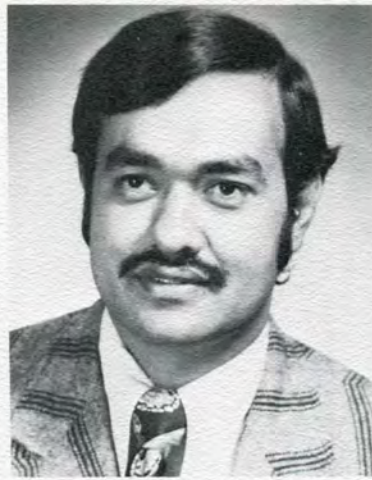

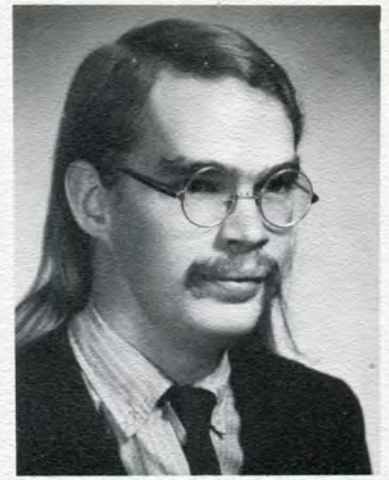

LEON ACCAVITTI

Graduating in Industrial Management
Manufacturing Major; Vet's Club
Baseball 1, 3; Football 2, 3

TIRATH S. AHLUWALIA

Graduating in Mechanical Engineering

CARL AHOLA

Graduating in Electrical Engineering
"All-Star" Bowler 1, 2, 3, 4, 5, 6th years

MICHAEL J. ANDERSON

Graduating in Electrical Engineering

DENNIS ASHLEY

Graduating in Architecture
Football 1, 2; Baseball 1, 2

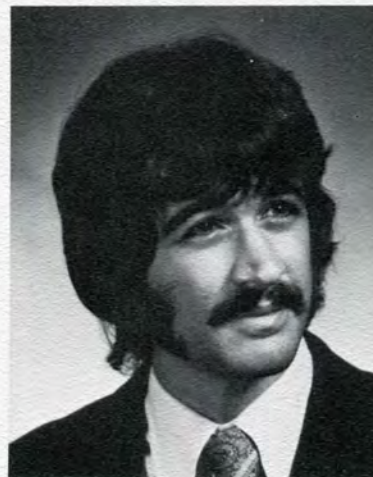

DENNIS BALL

Graduating in Construction Engineering

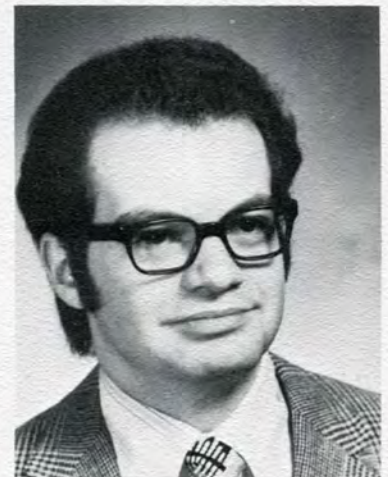

WILLIAM L. BALOG, JR.

Graduating in Architecture

JOHN BUFFONE

Graduating in Architecture

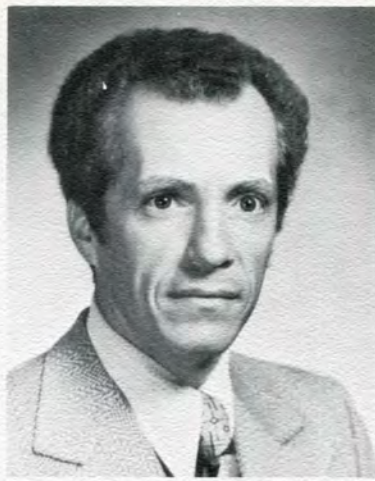

DENNIS BAMMEL

Graduating in Mechanical Engineering
Sigma Pi Engineering Honor Society;
Society of Automotive Engineers
Written for 'Tech News'

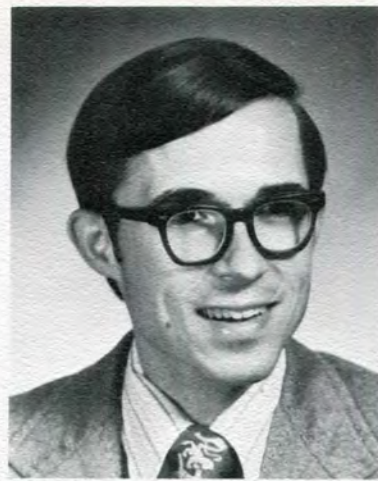

ROBERT BISHOP

Graduating in Mechanical Engineering

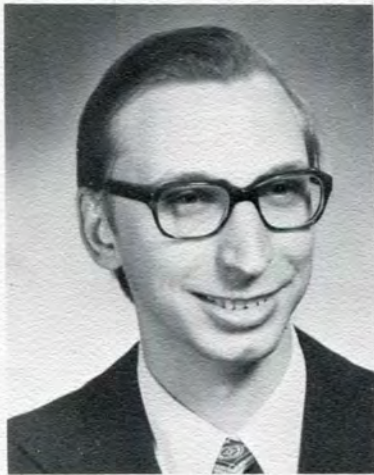

EDWARD BISSON

Graduating in Mechanical Engineering

MICHAEL BLASKO

Graduating in Industrial Management
Accounting Major; Vet's Club

LEONARD BOGER

Graduating in Electrical Engineering
Sigma Pi Engineering Honor Society

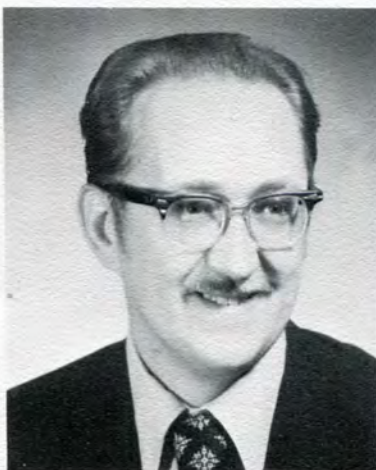

RONALD BORGI

Graduating in Industrial Management
Human Resource Administration
Alpha Epsilon Pi; Chairman of Teacher
Evaluation Committee; ASTD; SC/AIA;
Baseball 1, 2, 3, 4; Football 1, 2, 3, 4

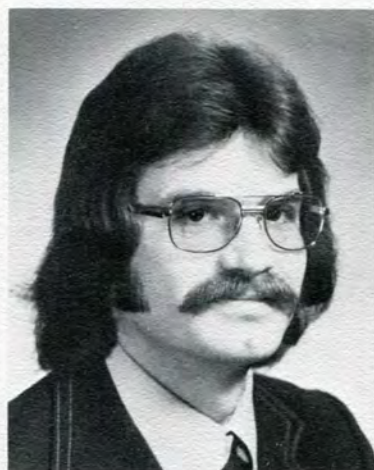

DONALD E. BOYD, JR.

Graduating in Architecture
Cross Country 2

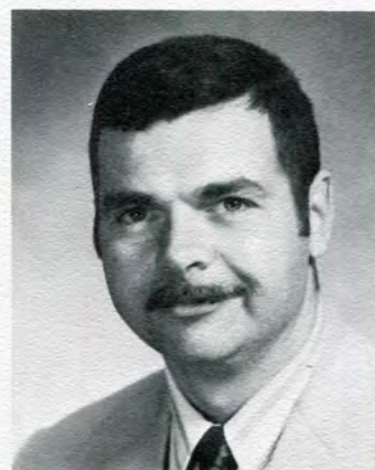

HENRY BRONCZYK

Graduating in Electrical Engineering

DONALD BROWN

Graduating in Architecture
Football 2; Baseball 3, 4

STEVEN C. BROWN

Graduating in Architecture

MAX CAMBURN
Graduating in Electrical Engineering

RICHARD W. CARBARY
Graduating in Industrial Management
Human Resources Major

JAMES CARPENTER
Graduating in Industrial Management
Christian Science Organization

VINCENT CHAN
Graduating in Industrial Management
Manufacturing Major

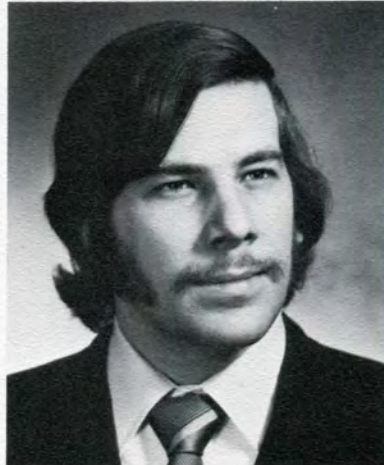

JOSEPH CHEMELLO
Graduating in Architecture
SC/AIA; Baseball & Football 1, 2, 3, 4

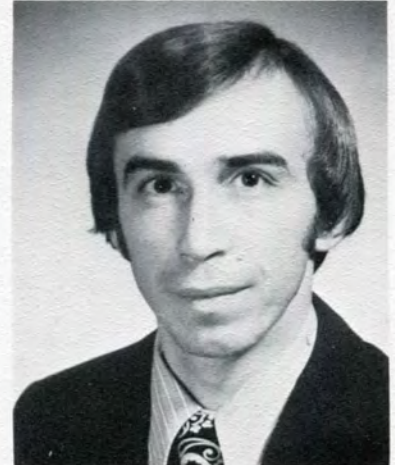

NORBERT CHMIELEWSKI
Graduating in Architecture
SC/AIA

LEONARD CONSTANCE, JR.
Graduating in Architecture

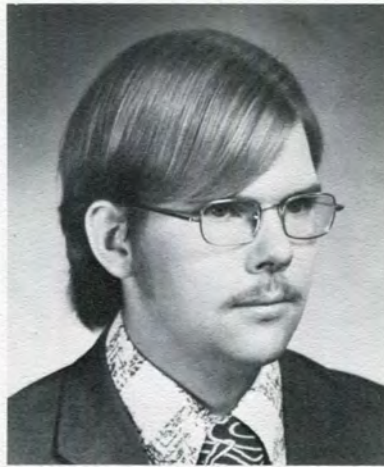

GERALD A. CRAWFORD
Graduating in Industrial Management
Accounting Major

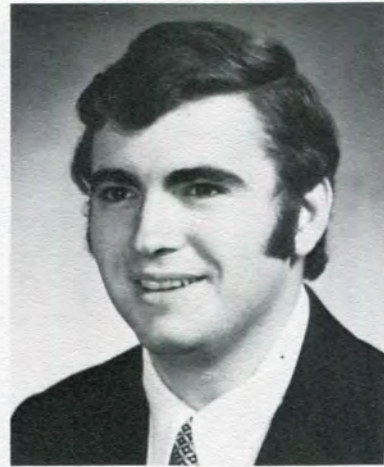

GERALD CUPER
Graduating in Industrial Management
Manufacturing Major

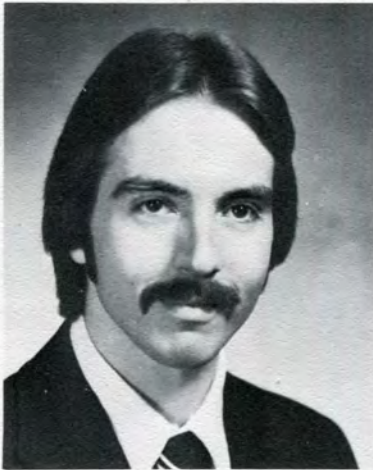

DENNIS DARLING
Graduating in Electrical Engineering
Sigma Pi Honor Society; IEEE

GEORGE A. DEFRAIN III
Graduating in Architecture
SC/AIA Board Member 4; Bowling 2, 3, 4
Open House Committee 4

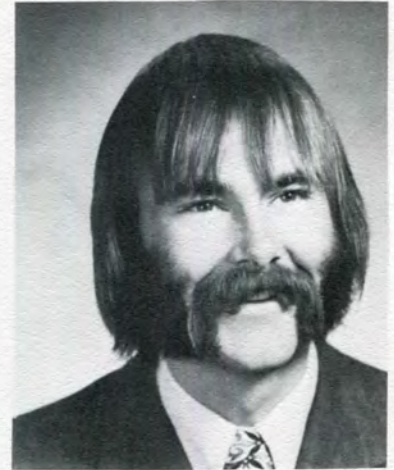

DEAN DeGALAN
Graduating in Electrical Engineering
Sigma Pi Honor Society; Member and
former Vice President of IEEE
Outstanding Student Award from IEEE

MARK DIETRICH
Graduating in Industrial Management
Human Resources Major

THOMAS DOMBROWSKI
Graduating in Construction Engineering
Hockey Team 2, 3, 4 Captain 4
Golf Team 1; Baseball 2, 3, 4

JAMES DONOVAN
Graduating in Arts and Science
Mathematics Major

GEORGE B. EAST
Graduating in Industrial Management
Manufacturing Major; Rho Delta Phi

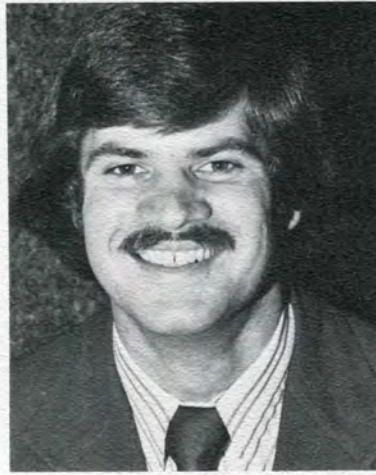

DARIUS ELLISON
Graduating in Mechanical Engineering

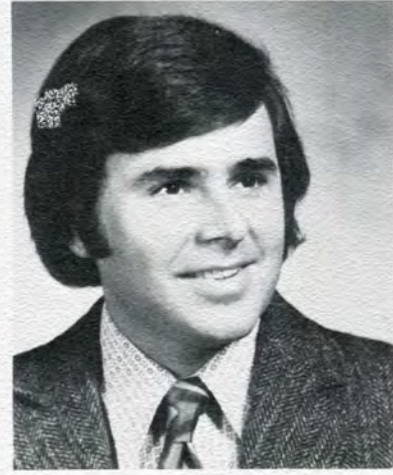

JOHN ESSER
Graduating in Industrial Management

DALE EWALD
 Graduating in Architecture
 SC/AIA; Ski Club

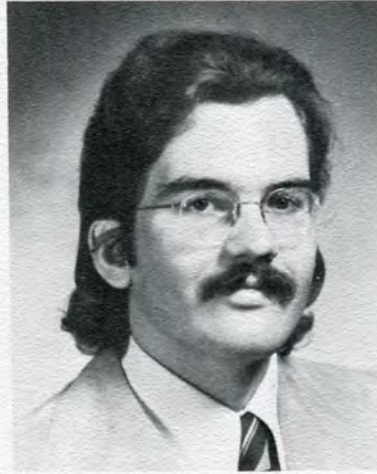

THOMAS FARRIS
 Graduating in Industrial Management

MICHAEL ZULINSKI

Graduating in Industrial Management
Human Resources Major; Ski Club 3; A.S.T.D.

THE EVENING GRADUATE

For years they nurtured the idea that the attainment of a degree would secure them a firmer foothold in the corporate structure. They knew that to achieve this it meant giving up four to six years of evenings at home. This was to be their exchange for an environment of accelerated learning and innumerable midnight hours.

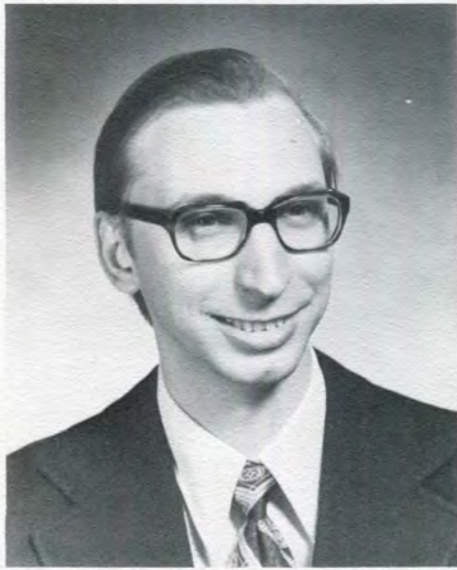

To a few, the path traveled was a little more rutted than for others. They too put in the concentrated twelve hour day, but also contended (along with their wives) with the raising of a family in a cost spiraling decade and knew all too well the pressures of financial burdens.

Now, with the last few courses approaching completion, they can justifiably look back with a sense of pride, think of those past sacrifices and then readjust their sights for other desired achievements.

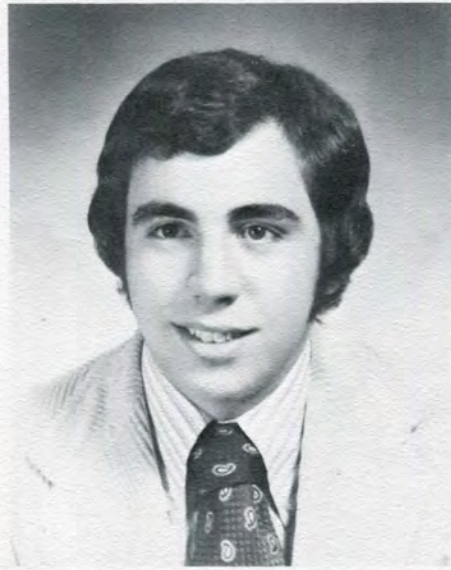

In ending here, one can only wish the best to these students in their fields of endeavor. One will also realize that they have gained what no man can take away,---a degree of higher thought.

Gregory J. Snyder

JEFFREY ZOKAS

Because not every senior has had his or her senior picture taken for the Yearbook, we will publish a list of all persons who had attained the standing of senior on September of 1973, not all those listed will graduate this June but will in the near future, thus we are publishing all those seniors names now. The following is that list:

DAY SCHOOL

Ahee, JJ	Crawford, GA	Hill, TP	Mandziuk, SF
Ahluwalia, TS	Crowley, DF	Hoffman, MB	Marinetti, GA

1974 Mustang II Ghia

We're still making collector's items.

We listen better. And because we do, we've come up with one classic car after another.

And now Mustang II.

We think it will be a classic, too. Because the same combination of styling, value and overall

performance that made classics of so many earlier Ford Motor Company automobiles is now a part of the all-new Mustang II.

Mustang II. After you've seen it, we think you will agree that we are still making collector's items.

1909 Model T

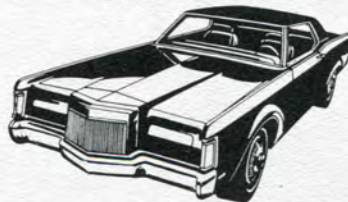

1965 Mustang

1939 Lincoln Continental

1955 Thunderbird

1969 Continental Mark III

1971 Pinto

A car that won't bump into other cars
when I'm grown up.

Darcie Conlon Age 10

We take Darcie seriously. A very safe car is something to be happy about. Even if hers is a little over-engineered.

She's thinking ahead. And so is Eaton. We're in the business of change. We anticipate it, and we help it happen. In cars, we've helped with things like speed controls, power steering, emission control systems, precision parts, air conditioning, viscous fan drives and the new air bags.

Today, Eaton is excited about tomorrow's innovations. When Darcie is old enough to drive, it will be a safer and easier thing to do.

At Eaton, *anticipating change—and helping it happen through innovation* is the big idea. We're diversified. Global. And growing. With futures in automotive, materials handling, trucking, industrial automation, controls technology, leisure, security and construction.

Get to know us better. Write for our book, "Change through Innovation".

Phillip D. Head, Vice President

One of the big challenges facing today's graduate is helping to conserve the limited supply of precious natural resources. As an individual, you can help by improving the quality of life in your home and community. Practice wise use of energy, learn to preserve and protect natural resources and you can *help keep the world in balance.*

YEARBOOK

MIKE UGORCAK Editor

RANDY ROBERTS Asst. Editor

CHUCK DESOFF Asst. Editor

Now this is said to be the hardest section of a Yearbook to complete, the section where the editor thanks all those that did so much to make this book a reality.

As you can see from the staff pictures we number only four full time members. But missing are those who spend their careers doing so much on the special "Invisible" Staff. The staff one never sees but are always there.

This is where they now come out of the woodwork. I wish to thank the following people and all those who I accidently overlooked.

THANK YOU FOR MAKING THIS YEARBOOK POSSIBLE
